

Control Panels

Key features

Saftronics design and manufacture a wide range of standard and custom made control panels which can be tailored to meet any particular specification or requirements. Saftronics have extensive experience in the design and manufacture of:

- motor control panels
- PLC and automation control panels
- local control panels
- indication control panels
- control desks

By carefully considering available spacing, cable access and ease of installation, we can design, manufacture and install control panels in a wide range of shapes, sizes and arrangements.

Meeting your requirements

- metalwork and enclosures are available in a wide range of colours
- all components accessible from the front of the panel
- local or remote control
- wide range of instruments and metering
- full range of control panels:
 - single-starter units, such as Soft Start, DOL, ASD or VSD
 - multi-starter process control systems
- any combination of conventional control equipment, computers, and PLCs
- standard enclosures or precision-built, custom-made enclosures, fabricated using the latest CNC technology
- custom-built kiosk available to house the control panel

Reliability

- BS EN 60439-1 compliant
- fully welded construction
- all materials carefully selected and checked, ensuring a long working life and maximum reliability
- quality engineering for reliability in service
- high performance
- guaranteed personnel safety

“Saftronics design and manufacture a wide range of standard and custom made control panels.”

Support

- full installation, site testing and commissioning services
- detailed operation and maintenance manuals
- technical support and advice
- comprehensive 12-month warranty on all products

Industries

Saftronics supply control panels to a wide range of industries:

- chemicals
- food and beverages
- oil & gas
- mechanical handling
- power generation
- specialist machinery manufacturing
- steel
- water and waste treatment

Sewers For Adoption

Saftronics can supply various standard control panels for pumping stations. We can offer the shortest lead times and the lowest prices for these products, which are designed and constructed to comply fully with the latest Sewers For Adoption specifications.

Summary

Enclosure	Ingress protection	Construction	Mounting	Control desk
Standard	IP54	Form 1	wall or floor	available
Custom-built	IP54	Form 1, 2, 3, and 4	wall or floor	available
Proprietary	up to IP66	Form 1	wall or floor	available
Sewers For Adoption (2-pump control panel)	IP54	Form 4	Wall (usually supplied in a kiosk)	not available
