Introducing Saftronics

Saftronics have been designing, manufacturing and installing low voltage assemblies since 1979. Our expertise is recognised throughout industry and our products are used by many leading companies.

To provide the solutions your business needs, we offer a complete service — from establishing your requirements through to installing the equipment and training your staff.

By choosing Saftronics, you can be confident that your supplier has:

- a market-leading product range
- an extensive testing programme for assemblies
- staff who are knowledgeable and experienced
- proven experience in partnering and long-term agreements with major UK companies

Saftronics have a 10,000 sq. metre manufacturing unit, employ around 150 staff, and continually invest in advanced technology to improve customer service.

Industry standards

Saftronics are accredited for:

- assemblies: BS EN 60439-1
- quality management: BS EN ISO 9001
- software development: BS EN ISO 9001 TickIT
- environmental management: BS EN ISO 14001

Products and services

Saftronics can meet all your requirements for:

- motor control centres:
 - fixed-pattern and withdrawable
 - conventional and intelligent
- low-voltage switchboards
- control panels
- project management
- control and automation: SCADA and PLC
- site services:
 - installation and commissioning
 - maintenance and modifications
- staff training

At Saftronics, we provide lifetime support for our products.

“Our expertise is recognised throughout industry and our products are used by many leading companies.”
