

The **field inspection software** that frees up time and saves you money

INSPECTIO

Main functions

One workflow

Observe, inspect, perform maintenance with the same streamlined tool.

Automatic documentation

Everything is logged and documented, easily comply with regulations.

Digital twin

Find and monitor every piece of equipment, stay updated on necessary tasks.

Performing scheduled inspections and repairs has never been easier. We use Inspectio on all our drilling rigs.

— COSL Drilling Europe

INSPECTIO

Main benefits

Cut operational costs

Faster inspections, no redundant maintenance tasks, no lost information.

Increase safety

Ensure no task is overlooked, know the status of every piece of equipment.

Free up time

Inspections carried out in half the time.

Inspectio has reduced our man-hours by 51 percent, while increasing inspection quality.

— Dolphin Drilling AS

INSPECTIO

Use cases

Inspections

Ex inspections, hose inspections, etc.

Maintenance tracking

Full and on-going control over equipment status.

Compliance database

Automatic documentation.

The transformation from manual to automated digital checklists has increased the inspection quality while significantly reducing time spent.

— IKM Elektro AS

Get started, and

finish faster

- 1 Register interest and share with us what you need.
- 2 We'll contact you to fully understand your needs and give you a quote.
- 3 You'll be saving time, costs and frustration in no time.
