"Welcome to your new SOCOMEC catalogue. To make it even easier, we have grouped all of our products into **nine major families**. Our flagship products are listed below. To find out all about our comprehensive ranges, let our 'helping hands' be your guide. Happy reading."

A high-tech organization at your service

➲ The company on your doorstep

We are wholly committed to providing you with the best response to your needs. This is why our commercial network is fully integrated and has a perfect understanding of your industrial situation. And depending on the case, each of the departments involved in your project will work directly with you. With SOCOMEC, you will always find the specialist contact you need right on your doorstep.

➲ The right product for you

We offer you the widest and most varied range of switching and protection systems available: thanks to wide-ranging adaptation of standard references, our product families cover an extensive scope of applications.
And since we use modular design as our basis, and offer a complete set of easy-to-fit accessories, you can benefit from numerous additional functions, at the best possible price.

➲ Continuous innovation

Technological foresight is a sixth sense possessed by each of our departments. And thanks to our many technological partnerships, we are constantly enriching our expertise.
Therefore, it is no surprise that our extensive R&D resources allow us to bring your expectations to life every day.
Our innovations benefit your performance.

➲ "JANUS de l'industrie"

The range of Type-S handles was awarded the "JANUS de l'industrie" industrial design prize. Awarded by the French design institute, with the backing of the Ministry of Foreign Trade, this prestigious label recognised a range that has been very popular with our customers.

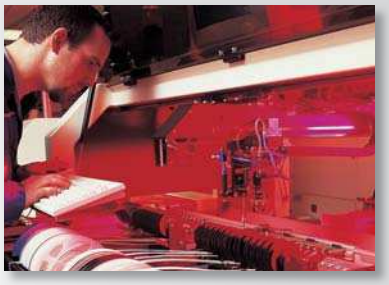
SITE 476 A



SITE 041 A

➲ Meeting deadlines

Thanks to the real-time management of orders and deliveries that we carry out in close collaboration with our transporters, you can count on us to honour our commitments to the full.

➲ Direct and friendly contact

Another area in which SOCOMEC lays claim to a personal "style":
Personal commitment to you, openness and friendliness, solidarity within a shared project, desire to give a response which meets your needs; these convictions guide every man and woman in our teams.

➲ Integrated production with shorter lead-times

As an independent manufacturer, SOCOMEC is in charge of all its strategic skills areas and offers the best progression in terms of flexibility.
Thanks to our integrated production and industrial organisation into autonomous cells, you can benefit from impeccable manufacturing quality and perfectly controlled deadlines.

➲ Your Guarantee of Satisfaction

An integrated ASEFA-LOVAG approved laboratory, numerous homologations and certifications testifying that our devices comply with international standards, quality recognised and proven on a daily basis, universality and adaptability to your specific configuration, this is what we offer to ensure your satisfaction.

➲ How to use a 2D code

1. Download 2D code reader from your smart phone, eg: QR code scanner pro, Mobiletag, ScanLife 2D code reader…
2. Launch the application from the Start menu of your mobile
3. Place the lens of your mobile's camera above or in front of the code and take a picture, or wait until the image is recognized (it depends on the reader
4. A web page opens and provides access to the destination's page on the www.socomec.com website.

➲ Access general information on the SOCOMEC group

➲ Pierre Siat test laboratory

Since 1965, SOCOMEC has had an integrated test laboratory at the heart of its production site. This laboratory is a member of ASEFA (Association de Stations d'Essais Française d'Appareils Électriques [French Association of Certified Testing Systems]) and is accredited by COFRAC (Comité Français d'Accréditation). Now, you can benefit from SOCOMEC's substantial expertise by having your own tests conducted within this specialist facility.
Our team of dedicated professionals will assist you in carrying out tests for compliance with French, European or world standards.

Types of test: dielectric tests, thermal tests, mechanical endurance tests, systems tests, climatic tests, short circuit tests.

➲ Metrology

Can you guarantee the quality of the measurements that you take during the development, manufacture or testing of your products?
SOCOMEC is pleased to offer you our wealth of metrological expertise to verify and certify your measuring equipment.

APPLI 079 A

➲ Homologation and certification

Our laboratory is able to provide homologation certificates and declarations of conformity and performance on request.

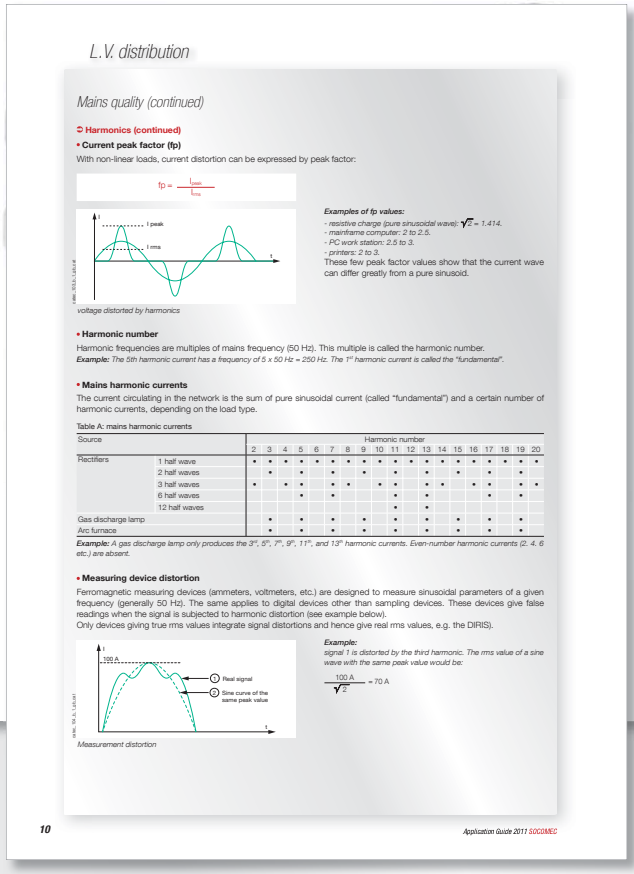
Application Guide

INDUSTRIAL SWITCHING & PROTECTION SYSTEMS **2011**



L.V. distribution

Mains quality (continued)

➲ **Harmonics (continued)**

• **Current peak factor (fp)**

With non-linear loads, current distortion can be expressed by peak factor:

$$fp = \frac{I_{peak}}{I_{rms}}$$

voltage distorted by harmonics

Examples of fp values:
- resistive charge (pure sinusoidal wave): $\sqrt{2}$ = 1.414.
- mainframe computer: 2 to 2.5.
- PC work station: 2.5 to 3.
- printers: 2 to 3.

These few peak factor values show that the current wave can differ greatly from a pure sinusoid.

• **Harmonic number**

Harmonic frequencies are multiples of mains frequency (50 Hz). This multiple is called the harmonic number.
Example: *The 5th harmonic current has a frequency of 5 x 50 Hz = 250 Hz. The 1st harmonic current is called the "fundamental".*

• **Mains harmonic currents**

The current circulating in the network is the sum of pure sinusoidal current (called "fundamental") and a certain number of harmonic currents, depending on the load type.

Table A: mains harmonic currents

Source		Harmonic number																	
		2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
Rectifiers	1 half wave	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•
	2 half waves		•		•		•		•		•		•		•		•		•	
	3 half waves	•		•		•		•		•		•		•		•		•		•
	6 half waves				•		•				•		•				•		•	
	12 half waves										•		•							
Gas discharge lamp			•		•		•		•		•		•		•		•		•	
Arc furnace			•		•		•		•		•		•		•		•		•	

Example: *A gas discharge lamp only produces the 3rd, 5th, 7th, 9th, 11th, and 13th harmonic currents. Even-number harmonic currents (2, 4, 6 etc.) are absent.*

• **Measuring device distortion**

Ferromagnetic measuring devices (ammeters, voltmeters, etc.) are designed to measure sinusoidal parameters of a given frequency (generally 50 Hz). The same applies to digital devices other than sampling devices. These devices give false readings when the signal is subjected to harmonic distortion (see example below).
Only devices giving true rms values integrate signal distortions and hence give real rms values, e.g. the DIRIS).

Measurement distortion

Example:
signal 1 is distorted by the third harmonic. The rms value of a sine wave with the same peak value would be:

$$\frac{100\ A}{\sqrt{2}} = 70\ A$$

Service & Technical Assistance: Your peace of mind assured

➲ Manufacturer's expertise

Over several decades, SOCOMEC's Switching and Protection. Systems have acquired a distinguished reputation in the domain of low voltage electrical distribution equipment testing and safety. Our manufacturer's expertise naturally extends to a complete offer of services designed to help you get the most out of our solutions.

➲ Optimum service guaranteed

Source inversion in complete safety
Changeover switches are strategic components that ensure continuity of service of supplies. In order to guarantee complete operational safety, we will implement our range of innovative source transfer solutions.

Your energy consumption comprehensively managed
Monitoring of energy consumption within a production unit is one of your primary operational considerations. For this our consultant engineers implement SOCOMEC's range of market-leading energy measurement and management systems.

Effective insulation monitoring for your electrical installation
To ensure that your fault monitoring and location system operates to its optimum capacity, our team of specialists perform all operations on site.
This means that you benefit from renowned expertise, as well as solutions tailored to the specific monitoring requirements of your electrical installation.

Cost-effective electrical usage
The presence of a specialist enables you to reduce your reactive energy costs, limit your energy losses by Joule effect, cut end of line voltage drops or increase your available active power… A real return on investment.

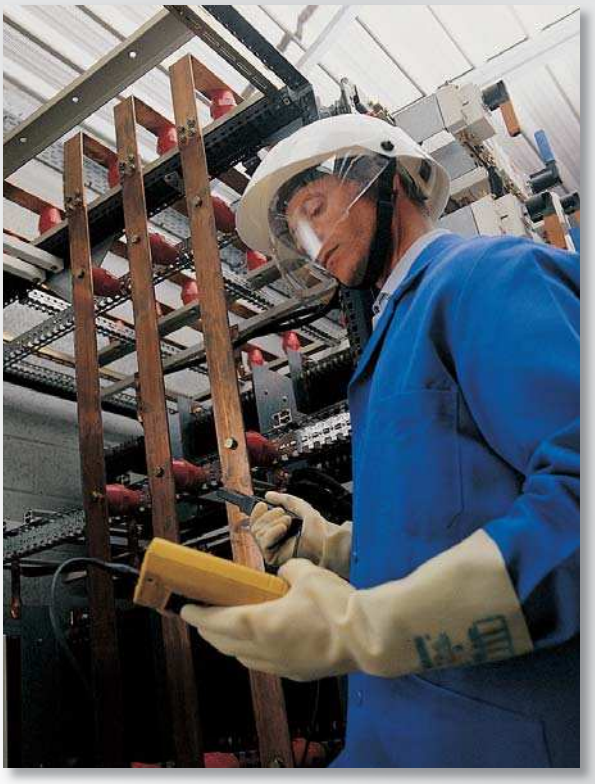
CORPO 154A

➲ The security of a fully committed partner

Specially adapted skills
Our service team is formed of specialists in our fields, with hands-on experience and well-acquainted with the maintenance of industrial electrical systems. You get the benefits from a dual skills base: technical expertise relating to the products that have been installed and practical knowledge of your usage needs.

Reassuringly close at hand
Our geographical coverage means that we are close to every user, ensuring we can respond to any request and guarantee comprehensive assistance, from technical diagnostics before repair to implementing solutions specifically adapted to your installations.

Constantly attentive to your needs
True to our principles, we favour direct and friendly contact. Our repairs are targeted responses to one, single problem: your own. Our engineers are attentive to your needs to bring you the most appropriate technical support and advice so you can plan your investments with confidence.



CORPO 164A

➲ Adapted services

Commissioning
Installation of your equipment is carried out by a specialist, and is totally compatible with and adapted to your use.

Engineering your installation
A broad range of features tailored to respond to the particular requirements and limitations of your electrical installation, and to help you deal with specific operational demands.

Training
You will receive training, specially adapted to your needs, in order to familiarise you with our equipment and enable you to use it to your best advantage.

Maintenance
A wide range of preventive or corrective maintenance options designed to suit your installation and its environment, and to ensure continuity of service of your electrical networks.

Engineering your project
From initial studies to operating your system, our team will guide you, ensuring full commitment.

Do not hesitate to contact our Socomec sales office to discuss a service package tailored to your requirements.

CORPO 155A

In compliance with the specifications from its customer EDF, SOCOMEC is designing switching and protection systems specifically for transformer substations and public utility networks.

Energy management and control: DIRIS system

Equipment for healthcare buildings

The provision of electricity in healthcare buildings presents particular challenges: the availability of reliable electrical power is an absolute imperative driven by the need to guarantee the quality of patient care and the obligation to ensure their safety.

This requirement is now coupled with the need to improve the energy efficiency of premises for sustainable management of installations.

SITE 336 A

SITE 310 A

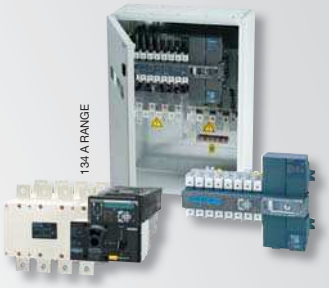
➲ Power supply redundancy with ATyS and ATyS M source changeover switches

Essential for guaranteeing the safety of electrical energy in critical sectors, source changeover enable automatic switching to a generator set or other network if the main supply circuit fails (normal/emergency switching).



134 A RANGE

APPLI 243 A

➲ 100% energy availability in operating areas with the IT medical power distribution unit

The IT medical cabinet ensures the high availability distribution of high quality power. It is a product of SOCOMEC's expertise in the fields of source switching, ISOM insulation monitoring and uninterruptible power supply.
The IT medical cabinet meets comprehensive specifications:

- Compliance with, amongst others, the NFC 15-211 and CEI 60364-7-710 standards.
- Double input via an ATyS M source changeover switch, ensuring automatic control of switching between the two sources.
- Distribution including:
  - an ISOM insulation monitoring system
  - automatic fault locator.
- uninterruptible power distribution based on NeTYS range of UPS.

APPLI 243 A

➲ Energy efficiency

The new DIRIS and COUNTIS ranges constitute a global response by SOCOMEC to the needs of installers, integrators and users in industry and the service sector. All these elements are easily interconnected, to enable exchange and processing of the available information, and to ensure efficient system monitoring.
They comply with the new IEC 61557-12 standard relating to PMDs (Performance measuring & monitoring devices).

117 B RANGE

SITE 466 A

SITE 374 A

➲ Power supply redundancy with ATyS and ATyS M source changeover switches

Essential for guaranteeing the safety of electrical energy in critical sectors, source changeover enable automatic switching to a generating set or other network if the main supply circuit fails (normal/ emergency switching).

134 A RANGE

➲ Energy efficiency

In service sector buildings, controlling the heating, ventilation, air conditioning and lighting, setting up a Building Management System (BMS) and, last but not least, correcting the power factor allow consumption to be reduced by up to 30%.

For the user, the most important thing is to know the consumption according to three criteria: the geographical location, the use (ventilation, lighting, etc.) and the type of energy.

For each stage: concrete, interconnectable solutions

The new DIRIS and COUNTIS ranges constitute a global response by SOCOMEC to the needs of installers, integrators and users in industry and the service sector. All these elements are easily interconnected, to enable exchange and processing of the available information, and to ensure efficient system monitoring.
They comply with the new IEC 61557-12 standard relating to PMDs (Performance measuring & monitoring devices).

Measurement
COUNTIS E products meter power consumed by loads, thereby enabling control and allocation of consumption. They are MID certified and communicate via RS485.

Management
Besides metering functions, the new multifunction DIRIS A power measurement units provide network monitoring and optimisation via alarm management and monitor electrical apparatus distribution and remote control parameters. They communicate via Ethernet and have temperature modules.

Analysis
Also covering the metering and monitoring functions, the DIRIS N guarantees an analysis of the quality of the energy provided, as per the criteria defined in the EN 50160 standard, and supplies a detailed analysis of the 'pollution' (harmonic, inter-harmonic, transients, flicker effects, etc.).

Communication
The CONTROL VISION software allows all the electrical readings taken to be displayed, and the power consumption of various workstations in a building or data centre to be read.

Equipment for Photovoltaic applications

Our expertise in the world of controlling and protecting electrical installations has quite naturally been expressed in both standard solutions and those adapted to photovoltaic applications. Whatever the type of architecture, we can offer breaking and protection systems adapted to each application from 2kWc to tens of MWc. Our modular designs ensure installation is exceptionally easy, providing a wide range of functionalities.

➲ Main applications

site_408_a

Residential

Electric installations up to approximately 5 kW are affected by this application. It is composed of panels installed on house roofs which are mainly used for electric equipment.

© SMA solar technologie 1135

Commercial

Electric installations up to approximately 250 kW are affected by this application. It is composed of panels installed on terrace roofs, skylights, glass sections or on building facades.

site_317_a

Solar parks

Electrical installations of several MW are affected by this application designed for the resale of the produced energy to distributors (EDF…). It is composed of solar panels installed in fields of several acres.

➲ Safe operations

To ensure electrical isolation during maintenance operations, or for emergency breaking to prevent a risk of fire or electrical shock, it is essential that dedicated switches are being used.
For load breaking on a photovoltaic chain, generator set or UPS, DC side, only SIRCO PV devices can:

- isolate raised DC voltages
- break on load and in complete safety.

➲ Protection of installation

Fuses need to be installed to ensure protection of the panels against reverse currents or protection of the photovoltaic generator pipes. These fuses, which are type gPV, are able to interrupt weak DC fault currents.
Depending on its location, the size of the photovoltaic generator may make it a considerable antenna in the event of a storm (destructive voltage surges).
Setting up dedicated SURGYS PV surge arrestors will significantly lower this risk.

➲ Fault prevention

In a non-polarised installation, the ISOM AM480 PIC will allow any insulation fault to be monitored as a preventative measure.
In a polarised installation, the RESYS class B earth leakage relay will detect the fault thanks to its ability to measure DC homopolar currents.

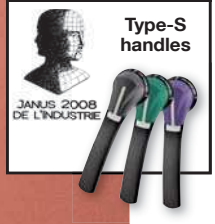
Load break switches

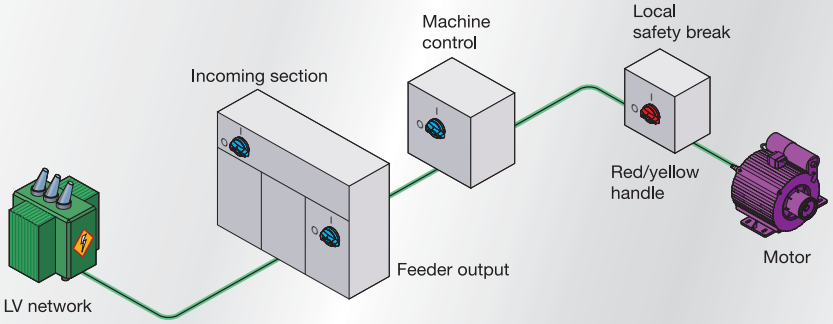
Load break switches for machine controller power distribution

INNOVATION



Evolved in the electrical breaking technology market since 1922, SOCOMEC is both a global leader and unrivalled benchmark.

Our range of load break switches is currently one of the largest on the market. Although the SIRCO M and SIRCO products alone meet the majority of requirements, SOCOMEC has set out to cover the entire range of applications. **Discover all of our products in our selection guide on the next page.**



We have developed numerous special products: switches with over rated neutral, high short circuit capability switches, multipolar switches, earthing switches, switches for 1000 V networks, special motorised switches, etc.

Whatever your requirements, you will find the perfect solution in the next few pages.

➲ **Discover our complete selection guide** *(see next page)*

➲ **Need a suggestion?** We will help you find the best solution for your application.

➲ **A special requirement?** SOCOMEC creates specific products. Please feel free to consult us.

Choosing the right load break switches

Depending on their rating, SOCOMEC load break switches can be used to control machines or power distribution. The selection guide gives an indication of general uses.

In addition to the rating, the other criteria in your selection include:
- fully visible breaking*,
- tripping function**,
- motorised operation .

Please do not hesitate to contact us for suggestions or any special requirement.

* Fully visible breaking is used for low voltage metering and in applications where, for safety reasons, the break must be made fully visible in a more explicit way.

** Tripping function is used to remotely control the break in the event of an emergency break or automatic break relating to protection relays. It can also be used, when power is restored, to avoid erratic start-ups of machine equipment.

➲ Need an enclosed switch?

SOCOMEC offers you a range of local safety enclosures made from sheet metal or polyester.

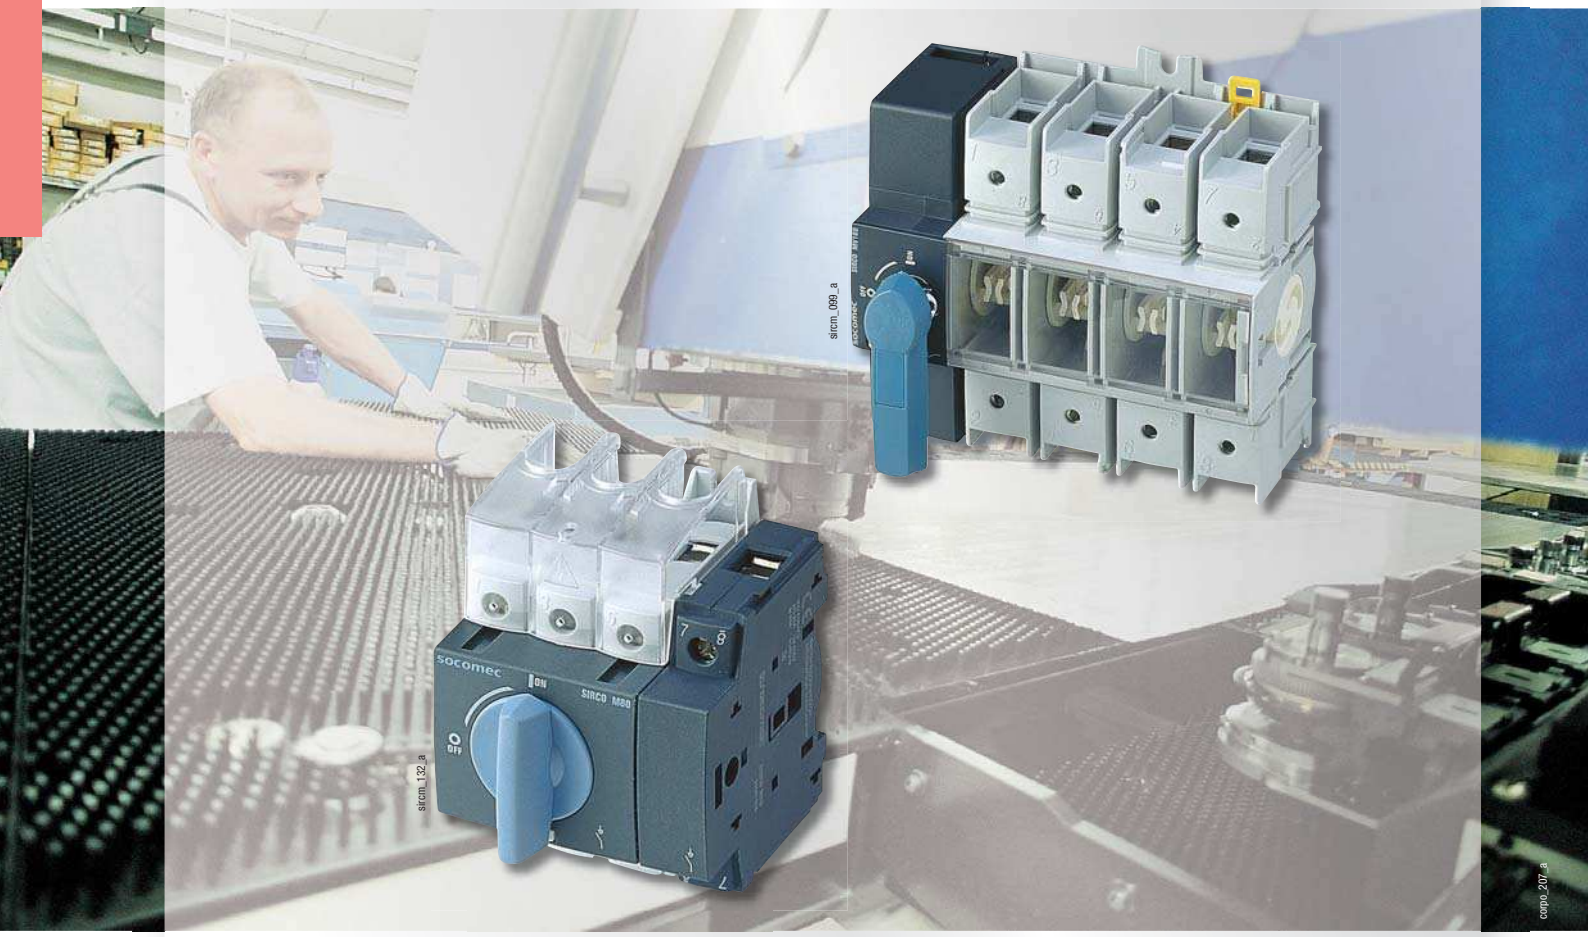
SIRCO M and MV



Load break switches from 16 to 160 A

➲ Function

SIRCO M and **MV** are manually operated modulable and modular multipolar load break switches.
They make and break under load conditions and provide safety isolation for any low voltage circuit, particularly for machine control circuits.

➲ Specific characteristics

SIRCO M
- Fully visualised breaking.
- Contact point technology.
- For panel mounting device, use the "Door mounting kit" (see accessories).

SIRCO MV
- Visible double breaking based on contact carriers equipped with sliding contacts (type SIRCO, see page 38).
- Fully visualised breaking.

➲ General characteristics

- Double break per phase.
- DIN rail mounting, panel or modular panel with 45 mm front cut out.
- IP20 devices and accessories.
- Severe load duty categories (AC-22 and AC-23).

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- IS13947-3
- Standard UL: see SIRCO M UL

➲ Approvals and certifications(1)

- KEMA
- RINA (Registre Naval Italien)

(1) Product reference on request.

➲ Other products

- The changeover switches are composed of two 3 poles SIRCO M switches and conversion kit.
- They ensure switching, transfer of sources or transfer of two low voltage circuits on load as well as their safety disconnection.

What you need to know

SIRCO M

- SIRCO M can be operated in different ways:

Complete switch body
toggle operation

Direct operation with
handle

External operation
front, left side or right side

- The SIRCO M is a 3 pole device available from 16 to 125 A, complete with an unswitched neutral or PE pole and type M auxiliary pre-break and signalling contacts.
  The basic 3 pole device is available enclosed in a polyester enclosure from 16 to 100 A (see page 492).

- From 16 to 80 A, it is possible to mount the device on a door and transform a 3 pole switch into a 6 or 8 pole switch or a 3 or 4 pole changeover switch, by adding a conversion kit and a switched 4th pole.

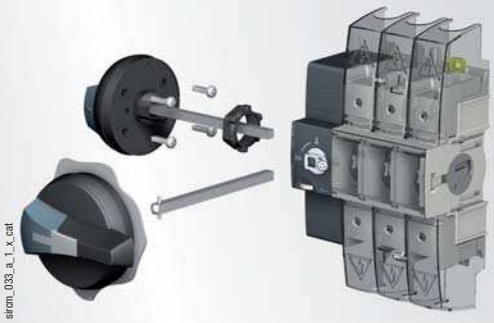
Compact enclosure: see page 492

SIRCO MV

- 3 operations are available:

Direct operation

External right side operation



External front and left side operation

- SIRCO MV can be ordered in 3 or 4 pole from 100 to 160 A.
  Two types of auxiliary contacts are available:
  - U type pre-break,
  - M type signalisation.

Shaft for external handle

sircm_045_a_2_x_cat

Use
Standard lengths:
- 150 mm,
- 200 mm,
- 320 mm.

Other lengths: consult us.

For 3/4 pole switches, shaft extensions for external front and side handle.
For 6/8 pole switches and SIRCOVER M changeover switches, shaft extensions for front operation only.

For SIRCO M

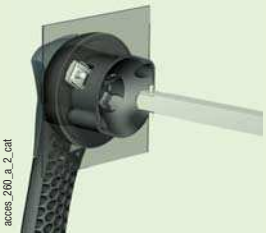
Shaft guide for external operation



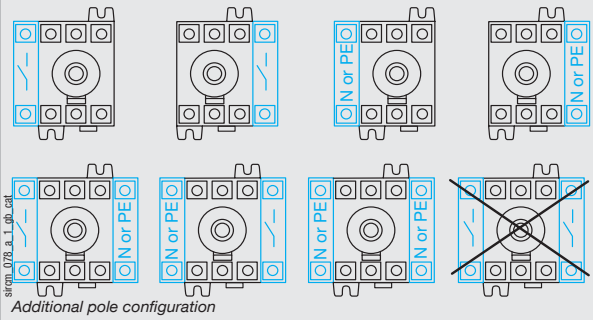
acces_260_a_2_cat

Use
To guide the extension shaft into the external handle.
This accessory enables handle to engage extension shaft with a misalignment of up to 15 mm.
Required for a shaft length over 320 mm.

Description	Handle type	Reference
Shaft guide	S00 and S0	1419 **0000**
Shaft guide	S1	1429 **0000**

Additional pole for SIRCO M

sircm_072_b_1_x_cat



sircm_078_a_1_gb_cat

Additional pole configuration

4e pole

Use
Adds one or two poles and transforms:
- 3 pole load break switches into a 4 pole,
- 6 pole load break switches into a 8 pole,
- 3 pole changeover switches into a 4 pole.

Rating (A)	No. of poles	Type	Reference
16	1 P	switched	2200 **1000**
20	1 P	switched	2200 **1001**
25	1 P	switched	2200 **1002**
32	1 P	switched	2200 **1003**
40	1 P	switched	2200 **1004**
63	1 P	switched	2200 **1006**
80	1 P	switched	2200 **1008**
100	1 P	switched	2200 **1010**
125	1 P	switched	2200 **1011**

Neutral pole

Use
Transforms the 3-pole switch into a 3-pole + solid neutral.

Rating (A)	No. of poles	Type	Reference
16 … 40	1 P	unswitched	2200 **5005**
63 … 80	1 P	unswitched	2200 **5009**
100 ... 125	1 P	unswitched	2200 **5011**

Protective earth module

Use
Adds 1 protective earth module pole to the switch-disconnector.

Rating (A)	No. of poles	Type	Reference
16 … 40	1 P	unswitched	2200 **9005**
63 … 80	1 P	unswitched	2200 **9009**
100 ... 125	1 P	unswitched	2200 **9011**

Terminal shrouds

sircm_049_a_1_cat

Use

Top and bottom protection against direct contact with the terminals or connection parts.
Available in 1 or 3 pole versions for SIRCO M and 3 or 4 pole for SIRCO MV.
An opening on each terminal cover makes it possible to insert a probe to measure temperature.

For SIRCO M

Rating (A)	No. of poles	Position	Reference
16 … 40	1 P	top / bottom	2294 **1005**
16 … 40	3 P	top / bottom	2294 **3005**

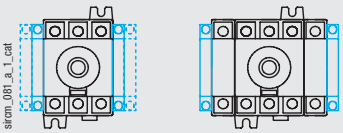
100 … 160	4 P	top / bottom	2294 **4016**

Auxiliary contacts

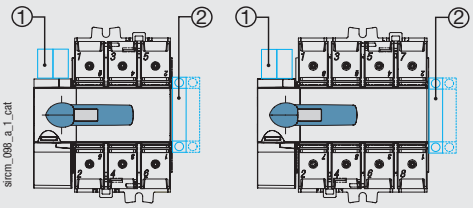
M type

sircm_075_b_2_cat



sircm_061_a_1_cat

Auxiliary contacts configurations for SIRCO M



sircm_068_a_1_cat

Auxiliary contacts configurations for SIRCO MV

1. Maximum 2 "U" type auxiliary contacts.
2. Maximum 4 "M" type auxiliary contacts

Use

Pre-break and signalisation of positions 0 and I by NO+NC or 2 NO auxiliary contacts.
They allow to anticipate the switching of the main poles. They can be mounted on the left or on the right side of the device.
Max 4 auxiliary contacts (2 modules).

Pre-break is not guaranteed on the **SIRCO MV**.

Characteristics

NO+NC auxiliary contacts: IP2 with front operation.

For SIRCO M

Rating (A)	Number of AC	Type of AC	Reference
16 … 125	1 AC	NO + NC	2299 **0001**
16 … 125	1 AC	2 NC	2299 **0011**

For SIRCO MV

Rating (A)	Number of AC	Type of AC	Reference
100 … 160	1 AC	NO + NC	2299 **0001**
100 … 160	1 AC	2 NC	2299 **0011**

Characteristics

Contact type	Nominal current (A)	Operating current I_e (A) 230 VAC AC-13	AC-15
NO + NC	10	10	6

U type

sircm_048_a_1_x_cat

Use

Pre-break and signalisation by NO or NC auxiliary contact.
Maximum 2 auxiliary contacts.
For use only with SIRCO MV switches.

For SIRCO MV

Rating (A)	Number of AC	Type of AC	Reference
100 … 160	1 AC	NC	3999 **0701**
100 … 160	1 AC	NO	3999 **0702**

Conversion kit

sircm_050_c_2_cat

Conversion kit for 6/8 pole load break switches

sircm_097_b_2_x_cat

Escutcheon for 3/4-pole changeover switches (I - 0 - II) or (I - I+II - II)

sircm_086_b_1_cat

Use

It must be ordered at the same time as the handle for external control.
This accessory enables the assembly of two 3 pole switches and additional poles in order to achieve:
- 6 or 8-pole SIRCO M load break switches,
- 3 or 4-pole SIRCOVER M changeover switches.

SIRCOVER M changeover switches ensure switching, transfer of sources (I - 0 - II) or transfer of two low voltage circuits on load (I - I+II - II), with the continuity of power supply.

Rating (A)	Type	Reference
16 … 80	Load break switches 6 / 8 P	2269 **6009**
16 … 80	Changeover switch 3/4 pole (I - 0 - II)	2209 **6009**
16 … 80	Changeover switch 3/4 pole (I - I+II - II)	2299 **6009**

Door mounting kit

sircm_051_b_2_cat

Use
This kit enables direct mounting of the switch on the door panel, on the right or left side of the panel.
Moreover, the connection clamps of the switch are always accessible.

The external handle is quick and easy to install due to an internal locking nut mounted on the inside of the enclosure.
2 kits are available:
- one for complete protection IP2X
- one with overall dimensions reduced.

For SIRCO M

Rating (A)	No. of poles	Description	Reference
16 … 80	3/4 P	Complete protection IP2X	2299 **3309**
16 … 80	3/4 P	Overall dimensions reduce	2299 **3409**

Cap for side operation mounting

sircm_126_a_2_cat

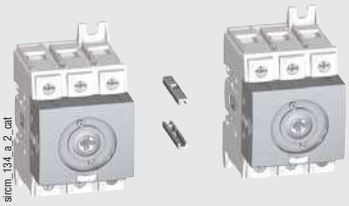
Use
Accessory for capping the front face of the **SIRCO M** when utilising in side operation, 20 units per pack.

This piece can be snapped on the switch body directly.

For SIRCO M

Rating (A)	Pack	Reference
16 ... 80	20 pieces	2299 **9409**

6/8 pole joining accessory



sircm_134_a_2_cat

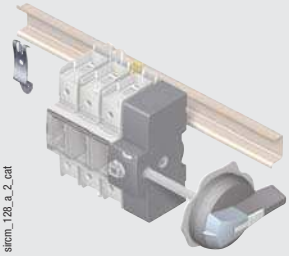
Use
40 units per pack, they allow the joining of two 3 pole switches (+ additional pole) in order to form a 6 or 8 pole switch for external side operation.

For multi-pole switches, please consult us.

For SIRCO M

Rating (A)	Pack	Reference
16 ... 80	40 pieces	2299 **9909**

DIN rail locking clip



sircm_128_a_2_cat

Use
This locking clip prevents the **SIRCO MV** from sliding when DIN rail mounted.

For SIRCO MV

Rating (A)	Type	Reference
100 ... 160	M4	5000 **0041**
100 ... 160	M5	5000 **0051**

Voltage sensing and power supply tap

altysm_026_a_1_cat

Use
It allows connection of 2 x ≤ 1.5 mm² voltage sensing or power cables.

For SIRCO MV

Rating (A)	Pack	Reference
100 ... 160	2 pieces	1399 **4006**

Remotely trippable switch from 32 to 160 A

➲ Function

IDE are manually operated multipolar load break switches which can be tripped remotely.
They make and break under load conditions and provide safety isolation for any low voltage electric circuit, particularly for compliance with the machine directive: **protection against automatic restart after isolation and re-establishment of the mains voltage (EN 60204.1 \'a7 7 7.5).**

➲ General characteristics

Customized design of IDE switches provides the following advantages:

- operating safety:
  - remote control by tripping coils,
  - fully visualised breaking,
  - IP20 protection with terminal shrouds (accessory).
- ease of positioning:
  - device originally equipped with an early break auxiliary contact to simplify the wiring,
  - front or rear mounting, in direct or external operation.

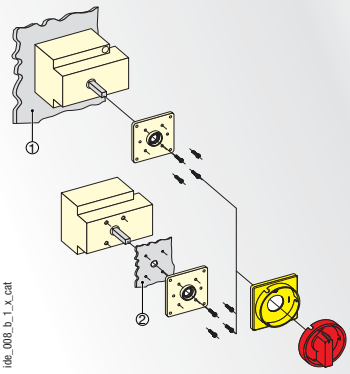
➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- EN 60204-1 § 7.5
- VDE 0660-107
- VDE 0113-1

➲ What you need to know

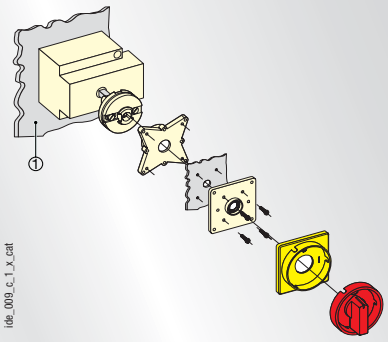
- The IDEs are available in direct and disconnectable external operation versions.
  Can be equipped with 3 or 4 pole and are available with two types of mounting:
  - rear mounting on plate or on DIN rail, direct operation or disconnectable external operation,
  - door or panel mounting.

Direct operation



1. Base mounted
2. Door mounted

Disconnectable external control



1. Base mounted

- Available in 230 or 400 VAC versions, the IDEs can be tripped remotely via a shunt trip or undervoltage coil.
  They are used to protect against automatic restarting and to prevent damage caused if the network malfunctions and is then re-established.

- Factory mounted, IDE includes an internal cabling.
  Coil is supplied between:
  - L1 and N for device 230 VAC,
  - L1 and L2 for device 400 VAC.

  For an IDE 32 A, an actuator relay can be incorporated between D2 and 14 (other wiring on request).

Load break switch with fully visualised breaking from 125 to 5 000 A

➲ Function

SIRCO switches are manually operated or motorised multipolar load break switches. They make and break under load conditions and provide safety isolation for any low voltage circuit.

➲ General characteristics

- Fully visualised breaking.
- High thermal and dynamic withstand.
- Severe utilisation categories (AC-22 and AC-23).
- Good electrical and mechanical endurance.
- High resistance to humidity (supplied "tropicalised").

➲ Available on request

- Early break auxiliaries.
- SIRCO 9 and 12 poles up to 1600 A.
- 3 pole + neutral.
- Early break advanced neutral for networks charged with harmonics.
- Conducting neutral.
- Neutral earthing stud.

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- VDE 0660-107 (1992)
- NBN EN 60947-3
- BS EN 60947-3

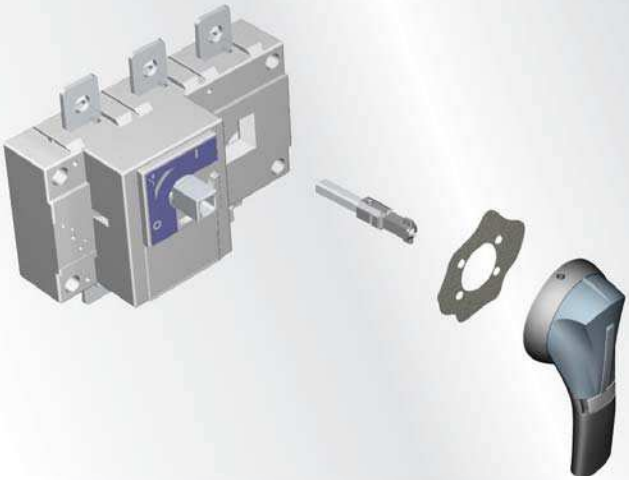
➲ What you need to know

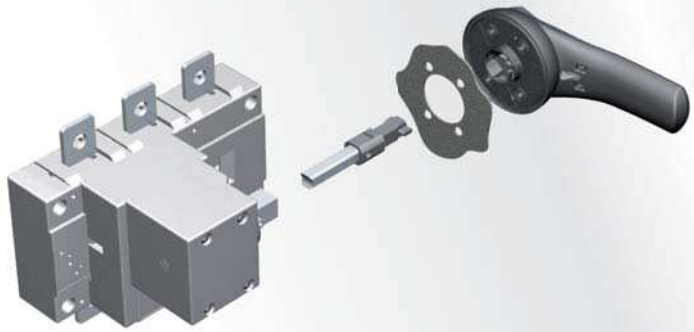
- In front direct or external operation,
  SIRCO is available in 3 and 4-pole versions from 125 to 5000 A.

Can be ordered in 6 or 8 pole from 125 to 1600 A.
The switch can be enclosed in a polyester or sheet metal enclosure from 125 to 1250 A.



sirco_372_a_1_cat

- External right side operation,
  SIRCO is available in 3 and 4-pole versions from 125 to 1800 A.



sirco_371_a_1_cat

- For rating 2000, 2500 and 3200A, a connection kit for copper bars allows the connection between the 2 connection terminals of one pole.

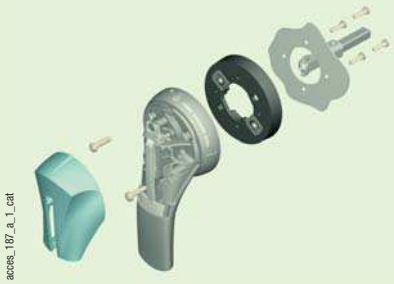
S type handle adapter



acces_167_a_1_cat

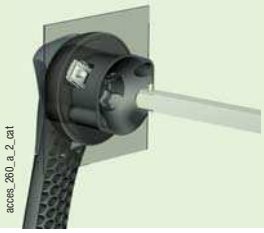
Use
Enables S type handles to be fitted in place of existing older style Socomec handles. Adapter can also be utilised as a spacer to increase the distance between the panel door and the handle lever.

Dimensions
Adds 12 mm to the depth.

Handle colour	To be ordered in multiples of	External IP (1)	Reference
Black	10	IP65	1493 **0000**

(1) IP: Degree of protection according to standard IEC 60529.

Shaft guide for external operation



acces_260_a_2_cat

Use
To guide the shaft extension into the external handle.
This accessory enables handle to engage extension shaft with a misalignment of up to 15 mm.
Required for a shaft length over 320 mm.

Description	Reference
Shaft guide	1429 **0000**

Auxiliary contacts

acces_076_a_1_cat

acces_065_a_1_cat

Use
Pre-break and signalling of positions 0 and I:
- 1 to 2 NO/NC auxiliary contacts,
- 1 to 4 NO + NC auxiliary contacts,
- 1 to 2 low level NO/NC auxiliary contacts..

Characteristics
NO/NC AC: IP2 with front and side operation.

Connection to the control circuit
By 6.35 mm fast-on terminal.

Electrical characteristics
30 000 operations.

Terminal shrouds

Use
Top or bottom protection against direct contact with terminals or connection parts.

Advantage
Perforations allowing remote thermographic inspection without removal.
The terminal shrouds also provide phase separation for SIRCOs from 125 to 630 A.

acces_077_a_1_cat

Copper bars connection kits

Fig. 1

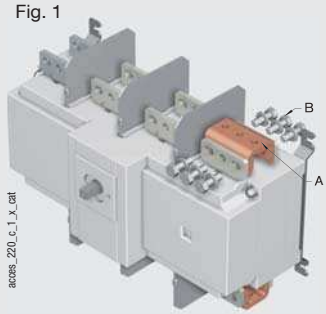

Fig.2

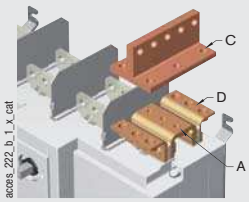
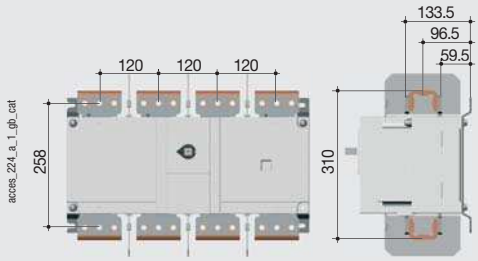


Use

To allow connection between the two power terminals from a same pole for 2000 to 3200 A ratings (Fig. 1 and Fig 2).
For 3200 A rating, the connection piece (part A) are delivered bridged from factory.
Bolt sets must be ordered separately.
Technical notice for these specific accessories is downloadable from www.socomec.com.

Fig. 1

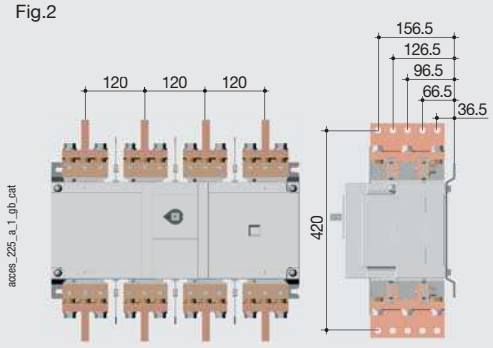


Top or bottom flat connection - Fig. 1

Rating (A)	Piece	Quantity to order per pole(1)	Reference
2 000 … 2 500	Connection - part A	1	2619 **1200**
2 000 … 2 500	Bolt set - part B	1	2699 **1200**
3 200	Connection - part A		included
3 200	Bolt set - part B	1	2699 **1200**

(1) Example for 3 pole device equipped upstream only: order 3 times the indicated quantities.

Fig.2



Top or bottom edgewise connection - Fig. 2

Rating (A)	Piece	Quantity to order per pole(1)	Reference
2 000 … 2 500	Connection - part A	1	2619 **1200**
2 000 … 2 500	T piece - part C	1	2629 **1200**(2)
2 000 … 2 500	Right angle - part D	1	2639 **1200**(2)
3 200	Connection - part A		included
3 200	T piece - part C	1	2629 **1200**
3 200	Right angle - part D	1	2639 **1200**

(1) Example for 3 pole device equipped upstream only: order 3 times the indicated quantities.
(2) Bolt set is provided with the accessories.

Inter phase barrier

acces_036_a_1_cat

Use

Safety isolation between the terminals, essential for use at 690 VAC or in a polluted or dusty atmosphere.
The terminal shrouds also provide phase separation for SIRCOs from 125 to 630 A.

Rating (A)	No. of poles	Reference
125 ... 160	3 P	2998 **0033**
125 ... 160	4 P	2998 **0034**

Use

Locking in position 0 of the front or side operation handle:
- using a lock (not supplied) and the factory integrated padlocking function of the handle. From 125 to 1800 A, the padlock on the external front operation handle also locks the door,
- using padlock (not supplied): see diagrams opposite,
- using undervoltage coil: the SIRCO can only be closed if the coil is live.

For 6/8 pole: consult us.

Locking using RONIS EL11AP lock (not supplied)

Rating (A)	No. of poles	Operation	Figure	Reference
125 ... 630	3/4 P	front direct	1	2699 **6008**(1)
125 … 1 800	3/4 P	external front	3	1499 **7701**
800 ... 3200	3/4 P	front direct	2	2699 **6027**
4 000 ... 5 000	3/4 P	external front	4	2799 **7002**

(1) Front operation handle included.

Locking using CASTELL lock (not supplied)

Rating (A)	No. of poles	Operation	Lock type	Figure	Reference
125 … 160	6/8 P	external front	K	2	4109 **8507**
125 … 1 800	3/4 P	external front	FS	3	1499 **7703**
125 … 1 800	3/4 P	external front	K	3	1499 **7702**
250 ... 630	6/8 P	external front	K	2	2999 **8707**
800 … 1600	6/8 P	external front	K	2	2799 **7003**
2000 … 4000	3/4 P	external front	K	2	2799 **7003**

Locking using 230 VAC undervoltage coil
(other voltages: please consult us)

Rating (A)	No. of poles	Operation	Reference
125 ... 630	3/4 P	external front	2699 **9063**(1)
800 … 3 200	3/4 P	front direct	2699 **9315**(1)

(1) The locking system is directly mounted on the device.

Other specific accessories

bd_02_04_01

- Mechanical coupling device for making switches with "n" poles of the same or different ratings.
- Mechanical interlocking device.

Load break switches with visible breaking from 125 to 1600 A

➲ Function

SIDER are manually operated 3 or 4 pole load break switches.
They make and break under load conditions and provide safety isolation for any low voltage electric circuit.

➲ General characteristics

- Fully visible breaking.
- Visible double breaking.

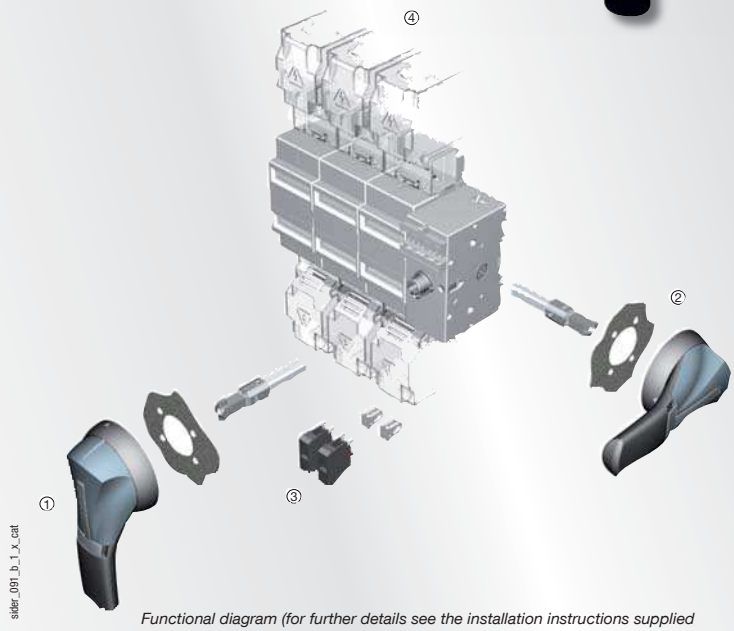
➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- VDE 0660-107 (1992)
- NBN EN 60947-3
- BS EN 60947-3

➲ Approvals and certifications(1)

- PSA E03.15.605.G
- RENAULT EB03.15.613
- UKR (Ukraine)
- GOST (Russia)

(1) Product reference on request.



Functional diagram (for further details see the installation instructions supplied with every device).

1. External front operation
2. External side operation
3. 2x2 configurable U type ACs, for pre-break and signalling or TEST.
4. Terminal shrouds

(1) IP: Degree of protection according to standard IEC 60529.

Shaft guide for external operation

acces_260_a_2_cat

Use
To guide the shaft extension into the external handle.
This accessory enables handle to engage extension shaft with a misalignment of up to 15 mm.
Required for a shaft length over 320 mm.

Description	Reference
Shaft guide	1429 **0000**

S type handle adapter

acces_187_a_1_cat

Use
Enables S type handles to be fitted in place of existing older style Socomec handles. Adapter can also be utilised as a spacer to increase the distance between the panel door and the handle lever.

Dimensions
Adds 12 mm to the depth.

Handle colour	To be ordered in multiples of	External IP (1)	Reference
Black	10	IP65	1493 **0000**

(1) IP: Degree of protection according to standard IEC 60529.

Alternative S type handle cover colors

Use

For single lever handles type S1, S2, S3 and double lever handle, type S4.
Other colours: consult us.

Auxiliary contacts for pre-break and signalling - Front operation

Use

Pre-break and signalling of positions 0 and I:
- 1 to 2 NO/NC auxiliary contacts,
- 1 to 4 NO or NC auxiliary contacts.
- 1 to 4 NO+NC auxiliary contacts.

Connection to the control circuit

By 6.35 mm fast-on terminal.

Characteristics

NO/NC AC: IP2.

Electrical characteristics

30 000 operations.

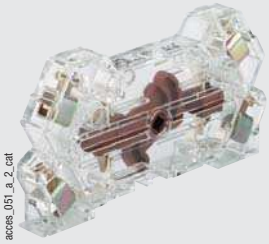
S type auxiliary contacts for signalisation - Front and right side operation



acces_051_a_2_cat

Use
Position 0 and I signalling 1 to 4 NO+NC auxiliary contacts.

Connection to the control circuit
By terminals with max. section 10 mm².

Electrical principle
The NO+NC S-type auxiliary contacts can be configured as 2 NO or 2 NC.

Electrical characteristics
30 000 operations.

Visible breaking and tripping load break switch from 250 to 1800 A

➲ Function

SIDERMAT are manually operated tri- or tetrapolar load break switches which can be tripped remotely.
They make and break under load conditions and provide safety isolation for any low voltage circuit.
The tripping function is used to provide the following functions:
- personal protection against insulation faults by combination with toroids and differential relays,
- protection against overloads by combination with CT and thermal relays,
- protection against short circuits with fuses (see page 196 "SIDERMAT combination").

➲ General characteristics

- Remote breaking by voltage release device.
- Visible double breaking.
- Can be triggered by complementary protection modules.

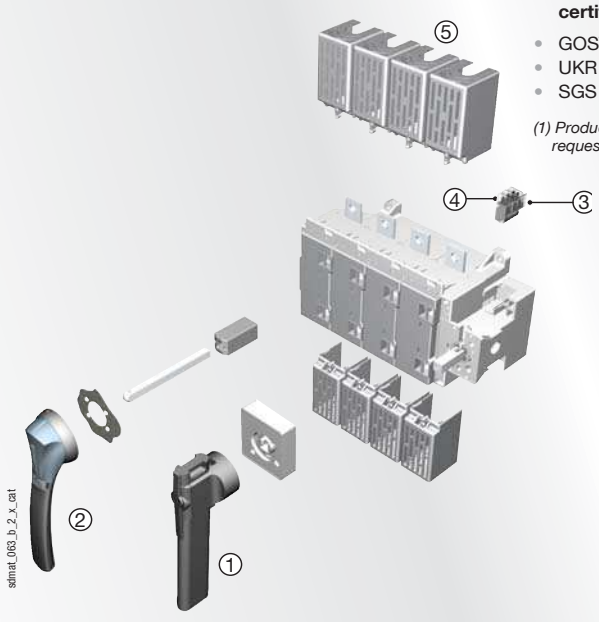
➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- VDE 0660-107 (1992)
- NBN EN 60947-3
- BS EN 60947-3

➲ Approvals and certifications(1)

- GOST (Russia)
- UKR (Ukraine)
- SGS (Saudi Arabia)

(1) Product reference on request.



Overview (for further details, please see the installation instructions supplied with each device).

1. Direct front operation
2. External front operation
3. NO/NC position AC.
4. NO/NC AC wired to ready mounted transmission coil.
5. Terminal shrouds

Alternative tripping coils

acces_049_a_1_cat

Shunt trip coil

acces_050_a_1_cat

Undervoltage trip coil

Use

Omnipolar breaking remotely controlled by shunt trip or undervoltage voltage release coil.
Note: the shunt trip coil must not be supplied for more than 5 s.
A 230 VAC shunt trip coil is fitted to the standard switch body.
To modify this coil, the reference opposite must be added to the switch reference (use "original coil" reference).

Examples for ordering:

- SIDERMAT with shunt trip coil 230 VAC - 1 reference:
  SIDERMAT 250 A, 3 pole, front operation: 3500 3026.
- SIDERMAT fitted with a non standard coil - 2 references:
  SIDERMAT 250 A, 3 pole, front operation, fitted with a 110 VAC undervoltage trip coil: 3500 3026 + 39913110.

Consumption on inrush (W)	13	13	13	13	13
Minimum maintaining voltage (V)	6	15	25	60	140

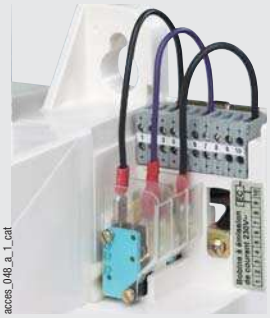
Current-reducing resistor for undervoltage trip coil

Use

Reduces, by limiting the current, the effects on the undervoltage coils used in continuous processes or processes exposed to high ambient temperatures.

Voltage	Reference
110 VAC	3999 **3112**
230 VAC	3999 **3230**
400 VAC	3999 **3400**
110 VDC	3999 **4110**

Auxiliary contacts



acces_048_a_1_cat

Use
Pre-break and signalling of positions 0 and I:
1 to 2 NO/NC auxiliary contacts

Coil tripping
1 to 2 NO/NC auxiliary contacts

Connection to the control circuit
By 6.35 mm fast-on terminal.

Characteristics
NO/NC auxiliary contact: IP2.

Electrical characteristics
30 000 operations.

Lock RONIS 1104A

Use

Locking in position 0 of front or side operation handle:
- using a padlock (not supplied) and factory integrated padlocking function of the handle. Padlocking, in external front operation, locks the door.
- using RONIS 1104 A lock (key BC 3318) to be mounted directly on the padlockable handle.
- locking using RONIS EL11AP lock (not supplied).

Locking using RONIS EL11AP lock 1104 (supplied)

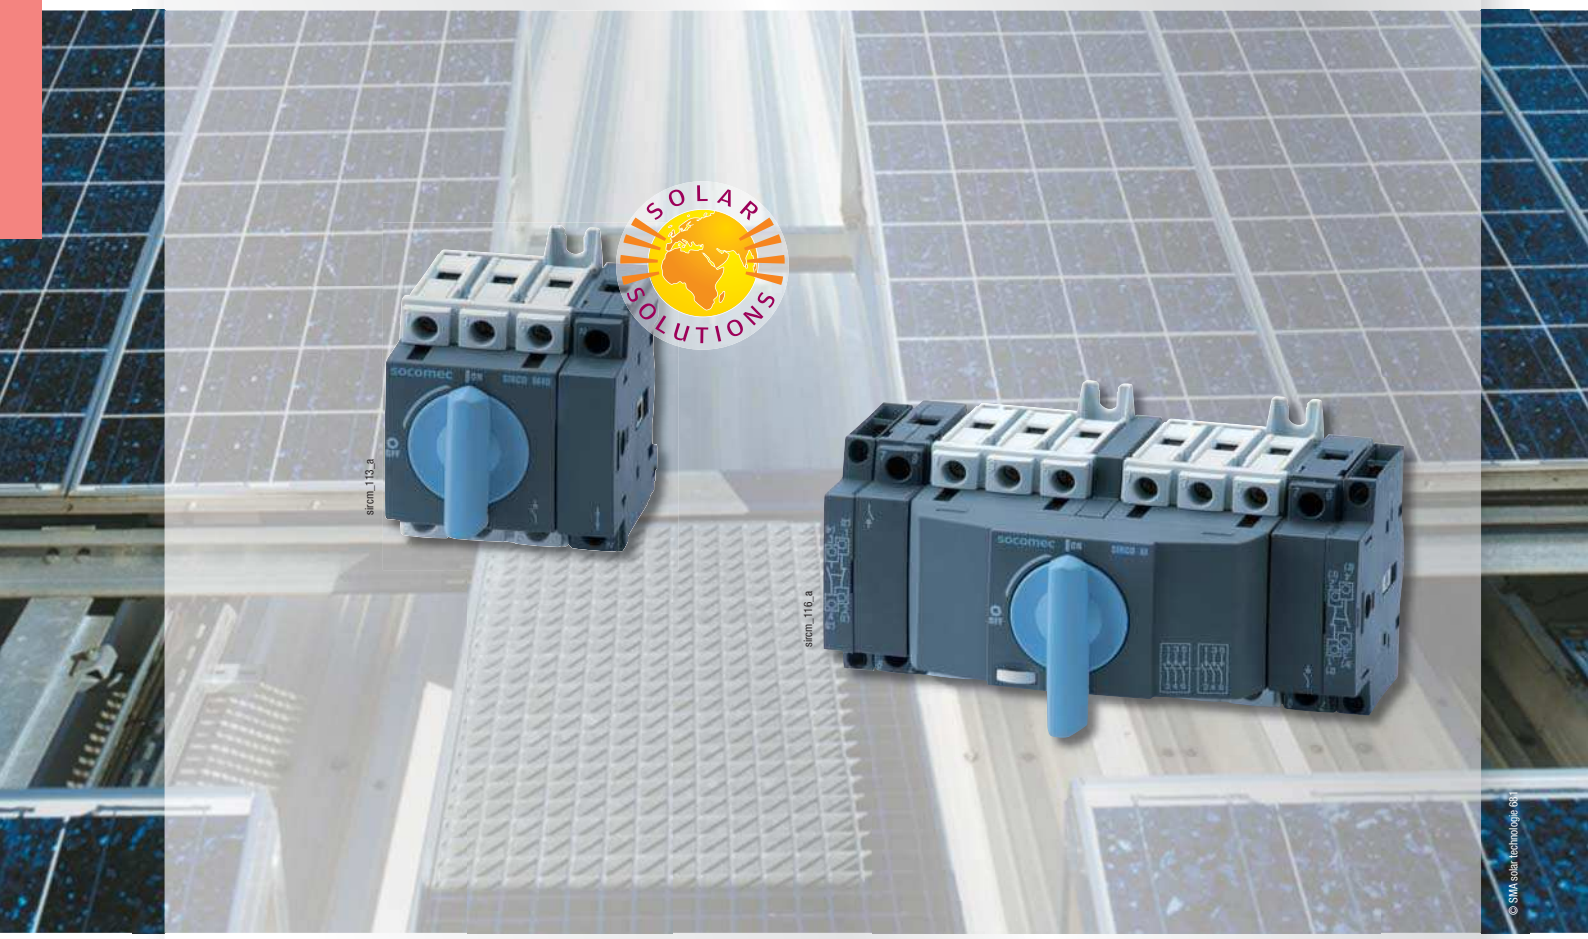
SIRCO M PV

Load break switches for solar applications



500 V d.c., 600 V d.c. and 800 V d.c. Photovoltaic Switch 25 to 40 A

➲ Function

SIRCO M PV are manually operated multipolar load break switches. They make and break under load conditions and provide safety isolation for any low voltage of photovoltaic applications.

➲ General characteristics

- Modular and flexible device.
- Fully visualised breaking.
- Double break per phase.
- Contact point technology.
- DIN rail mounting, panel or modular panel with 45 mm front cut out.

➲ Customised solutions

- SIRCO M PV 9 and 12 poles.
- SIRCO M PV and SIRCO M for simultaneous break of AC / DC circuits.
- SIRCO M PV mixed ratings.

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- IEC 60364-4-410 (They provide safety disconnection and protection against overcurrents)
- IEC 60364-7-712 (Buildings electrical installations - Part 7-712: rules for special locations - Solar photovoltaic power supplies (PV)

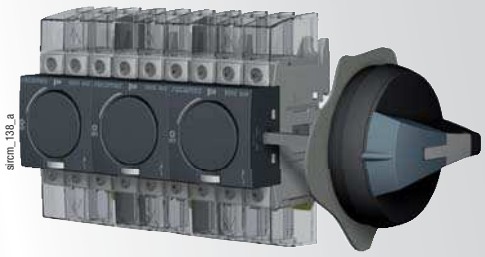
➲ Available on request

- Other rating: consult us
- Enclosed multipolar switches: consult us

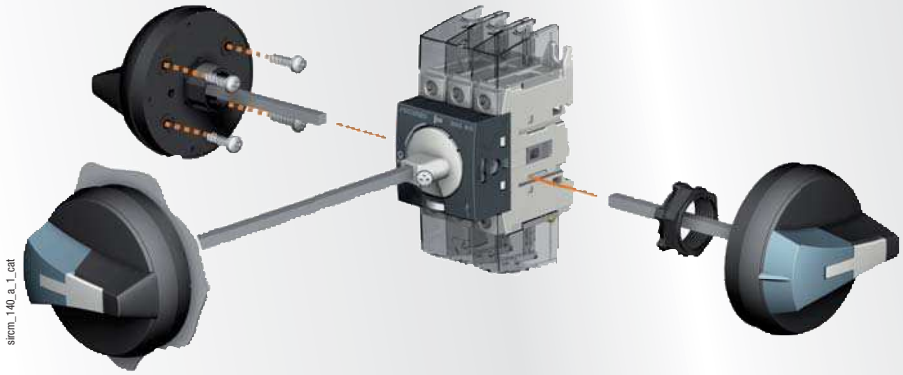
What you need to know

Direct operation

External side operation for multipolar configuration



External operation



- In a combiner box, located close to the solar cell strings, or located close to the inverter, we recommand the use of a door interlocked external handle for its safety features. The locking function of the enclosure in the "ON" position will force the operator to safely disconnect and isolate the solar cell strings prior to any intervention.

Think about it...

You can combine overcurrent protection (see page 402) with protection against transient overvoltages due to lightning (see page 414).

- **Need an enclosed switch ?**
  No problem with our specific product department. SOCOMEC also manufactures solutions for all your requirements.
  For further information, please contact us.

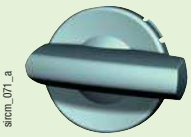
(1) For 4 pole switches
(2) Defeatable handle.
(3) Supplied with a shaft.
(4) Direct handle supplied as standard.

➲ Accessories

Direct operation handle



M00 handle

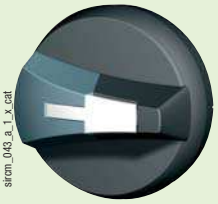
Use
Direct handle for SIRCO M PV 4 poles 500 V d.c.

For SIRCO M PV - 4 poles

Rating (A)	Handle colour	Handle	Reference
32 ... 40	Blue	M00 type	2299 **5012**(1)(2)
32 ... 40	Red	M00 type	2299 **5013**(2)

(1) Direct handle supplied as standard for 6 and 8 pole equipment.
(2) For 4 pole switches

External operation handle



S00 handle

Use
The door interlocked external operation handle includes a padlockable handle, a conversion kit and must be combined with a shaft extension.
In a combiner box, located close to the solar cell strings, or located close to the inverter, we recommand the use of a door interlocked external handle for its safety features.

Example
The locking function of the enclosure in the "ON" position will force the operator to safely disconnect and isolate the solar cell strings prior to any intervention. Opening the door when the switch is on "ON" position is possible by defeating the interlocking function with the use of a tool (authorized persons only).
The interlocking function is restored when the door is re-closed.

Front and right side operation I - 0

Rating (A)	Handle colour	Handle	External IP	Reference
25 ... 40	Black	S00 type	IP55	1471 **1111**(1)
25 ... 40	Black	S00 type	IP65	1473 **1111**(1)
25 ... 40	Red/Yellow	S00 type	IP65	1474 **1111**(1)

(1) Defeatable handle.

Left side operation I - 0

Rating (A)	Handle colour	Handle	External IP	Reference
25 ... 40	Black	S00 type	IP65	147A **5111**
25 ... 40	Red/Yellow	S00 type	IP65	147B **5111**

Shaft for external handle

Use
Standard lengths:
- 150 mm,
- 200 mm,
- 320 mm.

Other lengths: consult us.

For 3/4 pole switches: shaft extensions for external front and side handle.
For 6/8 pole front operated switches: shaft extensions for external front handle only.
For 6/8 pole side operated switches: shaft extensions for external side handle only.

For SIRCO M PV

Rating (A)	Shaft length (mm)	Reference
25 ... 40	150 mm	1407 **0515**
25 ... 40	200 mm	1407 **0520**
25 ... 40	320 mm	1407 **0532**

Terminal shrouds

sircm_049_a_1_cat

Use
Top and bottom protection against direct contact with the terminals or connection parts. 2 units per pack.
1 or 3 pole are available.

Advantage
Perforations enabling remote thermographic inspection without dismantling.

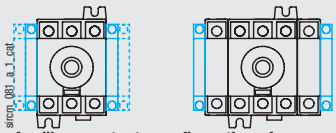
For fitting a complete device
4 poles: please order one reference of 3 pole and one reference of 1 pole terminal shrouds.
6 poles: please order 2 references of 3 pole terminal shrouds.
8 poles: please order 2 references of each terminal shrouds (1 pole and 3 poles).

For SIRCO M PV

Rating (A)	No. of poles	Position	Reference
25 ... 32	1 P	top and bottom	2294 **1005**
25 ... 32	3 P	top and bottom	2294 **3005**
40	1 P	top and bottom	2294 **1009**
40	3 P	top and bottom	2294 **3009**

M type auxiliary contacts

sircm_075_b_2_cat



sircm_081_a_1_cat

Auxiliary contacts configurations for SIRCO MPV

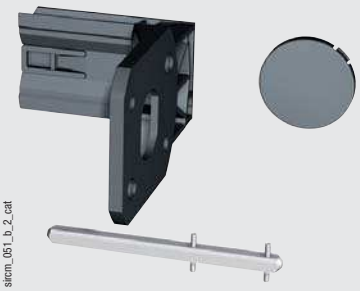
Use
Pre-break and signalisation of positions 0 and I by NO+NC or 2 NO auxiliary contacts.
They allow to anticipate the switching of the main poles. They can be mounted on the left or on the right side of the device.
Max 4 auxiliary contacts (2 blocks).

Characteristics
NO+NC auxiliary contacts: IP2 with front operation.

For SIRCO M PV

Rating (A)	Number of AC	Type of AC	Reference
25 ... 40	1 AC	NO + NC	2299 **0001**
25 ... 40	1 AC	2 NC	2299 **0011**

Door mounting kit



sircm_051_b_2_cat

Kit with reduced overall dimensions.

Use
This kit enables direct mounting of the SIRCO M PV 4 poles switch, on the door front panel, on the right or left side panels.
Moreover, the connection clamps of the switch are always accessible.
The external handle is quick and easy to install due to an internal locking nut mounted on the inside of the enclosure.

2 kits are available:
- one for complete protection IP2X,
- one with overall dimensions reduced.

For SIRCO M PV

Rating (A)	No. of poles	Description	Reference
25 ... 40	3/4 P	Overall dimensions reduce	2299 **3409**(1)(2)
25 ... 40	3/4 P	Complete protection IP2X	2299 **3309**(1)

(1) Delivered with a shaft.
(2) Standard.

Cap for side operation mounting

sircm_126_a_2_cat

Use
Accessory for capping the front face of the **SIRCO M PV** when utilising in door mounting or side operation, 20 units per pack.
This piece can be snapped on the switch body directly.

For SIRCO M PV

Rating (A)	Pack	Reference
25 ... 40	20 pieces	2299 **9409**

SIRCO M PV polycarbonate enclosure

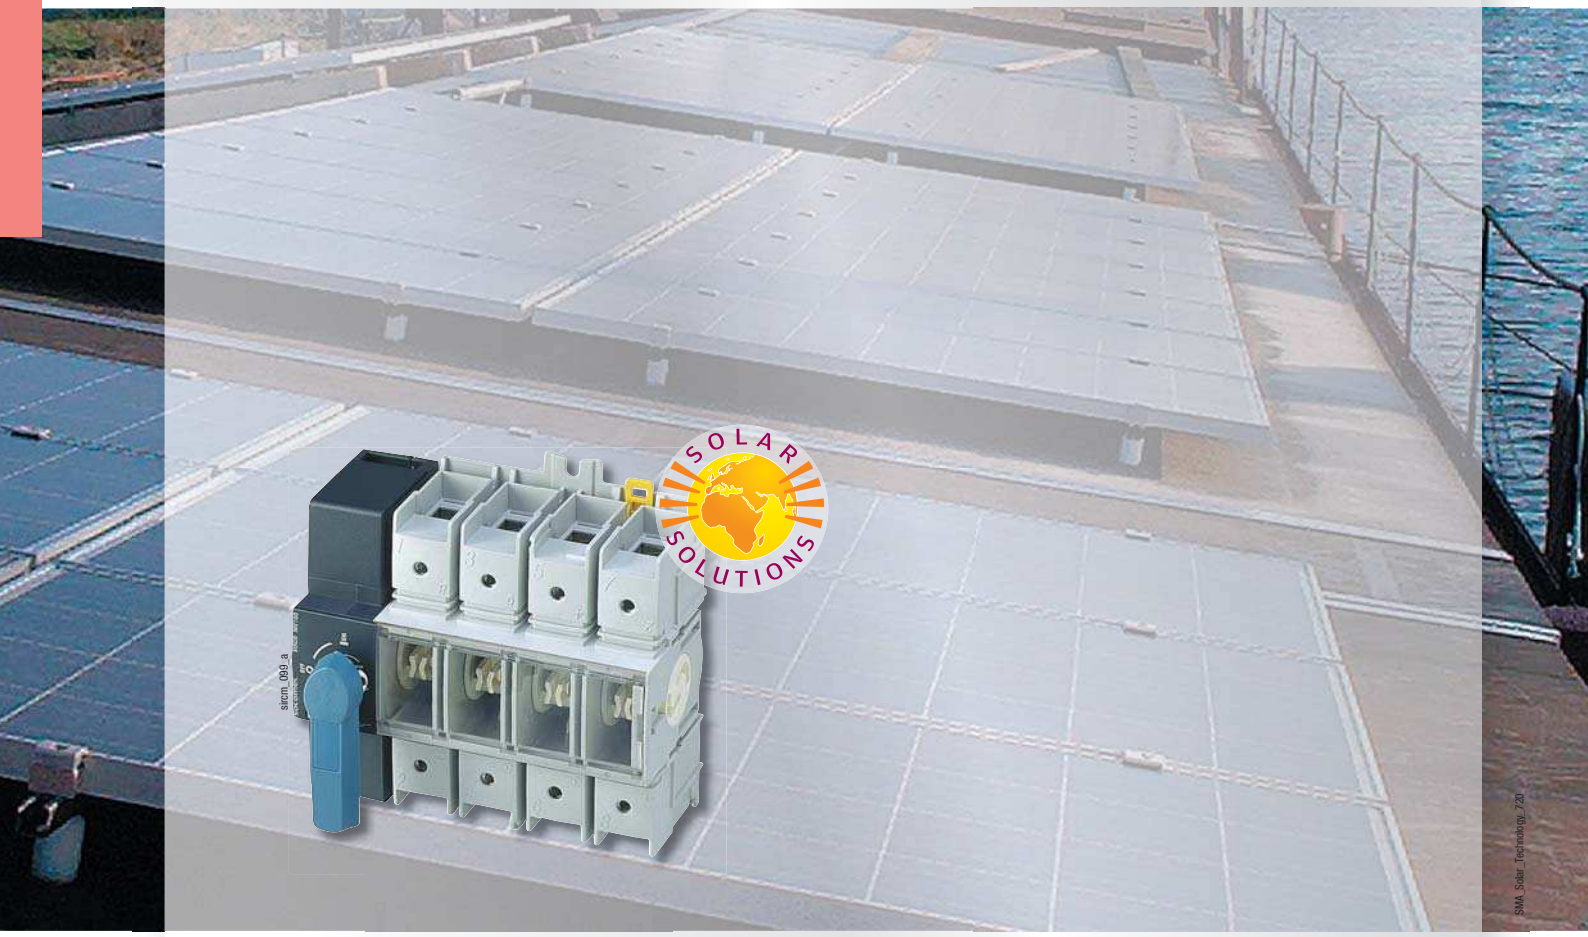
SIRCO MV PV

Load break switches for solar applications



600 V d.c. and 800 V d.c. Photovoltaic Switch 63 to 80 A

➲ Function

SIRCO MV PV are manually operated multipolar load break switches.
They make and break under load conditions and provide safety isolation for any low voltage of photovoltaic applications.

➲ General characteristics

- Modular device.
- Fully visualised breaking.
- Backplate or DIN rail mounting with 45 mm cut-out up to 80 A.
- Up to 800 V d.c.
- IP20 devices and accessories.

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- VDE 0660-107 (1992)
- IEC 60364-4-410 (They provide safety disconnection and protection against overcurrents)
- IEC 60364-7-712 (Buildings electrical installations - Part 7-712: rules for special locations - Solar photovoltaic power supplies (PV)

➲ Available on request

(1) IP: Degree of protection according to standard IEC 60529.
(2) Defeatable handle.

Use
The door interlocked external operation handle includes a padlockable handle, a conversion kit and must be combined with a shaft extension.
In a combiner box, located close to the solar cell strings, or located close to the inverter, we recommand the use of a door interlocked external handle for its safety features.

Example
The locking function of the enclosure in the "ON" position will force the operator to safely disconnect and isolate the solar cell strings prior to any intervention.
Opening the door when the switch is on "ON" position is possible by defeating the interlocking function with the use of a tool (authorized persons only).
The interlocking function is restored when the door is closed back.

63 ... 80	2 pieces	2209 **2016**

Enclosed switches

Our SIRCO MV PV can be delivered enclosed, please consult us. Close to the installation, they guarantee:
- Disconnection under DC load between the inverters and PV generators (necessary according to the IEC 60364-712 standard).

For local safety disconnection, SOCOMEC - a leader on the market - offers the widest range of enclosed switches. Whatever the level of safety is, we are able to meet all your requirements (disconnection, switching for mechanical maintenance, emergency breaking).
- Enclosed solar load break switches
- Enclosed fuse combination switches
- Enclosed changeover switches
- Complete integrated equipment.

Available on request:
- Enclosures made of steel or stainless steel sheet metal (painted for sea environments or brushed), insulating materiels
- Specific colors (enclosure paint, handle)
- Specific dimensions
- Specific connections: classe II quick connectors.

For any request of customised products, please consult us.

Handle key interlocking accessories

Fig. 1

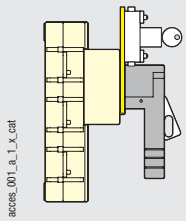

Fig. 3

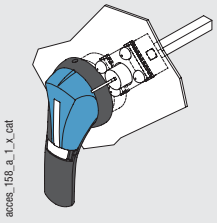

Use
Locking in position 0 of the front operation handle prior to any intervention on the photovoltaic installation:
- using a padlock (not supplied) and the factory integrated padlocking function of the handle. From 100 to 800 A, the padlock on the external front operation handle will also lock the door,
- using padlock (not supplied): see diagrams opposite,
- using undervoltage coil: the SIRCO PV can only be switched in position "OFF" when the coil is supplied.

Locking using RONIS EL11AP lock (not supplied)

Rating (A)	No. of poles	Operation	Figure	Reference
100 … 800	3/4 P	direct front	1	2699 **6008**(1)
100 … 800	3/4 P	external front	3	1499 **7701**

(1) Front operation handle included.

Locking using 230 V a.c. undervoltage coil (other voltages: please consult us)

Rating (A)	No. of poles	Operation	Reference
100 … 800	3/4 P	external front	2699 **9063**(1)

(1) The locking system is directly mounted on the device.

Customised solutions

coff_343_a

When they are not being mounted into larger panels, load break switches, changeover switches or fuse combination switches are generally delivered in their own enclosure. Close to the installation, they guarantee:

• Disconnection under PV load between inverters and PV generators (necessary according to IEC 60364-712 standard).

For local safety disconnection, SOCOMEC - a leader on the market - offers the widest range of enclosed switches. Whatever the level of safety is, we are able to meet all your requirements (disconnection, switching for mechanical maintenance, emergency breaking).

Enclosed PV load break switches
Enclosed PV fuse combination switches
Enclosed PV changeover switches
Complete integrated equipments.

Available on request:
- Enclosures made of steel or stainless steel sheet metal (painted for sea environments or brushed), insulating materials
- Specific colors (enclosure paint, handle)
- Specific dimensions
- Specific connections: speed class II connectors

For any request of customised products, please consult us.

Other specific accessories

bd_03_04_01

• Mechanical coupling system to get mutipolar switches of the same or different ratings.
• Mechanical interlocking device.

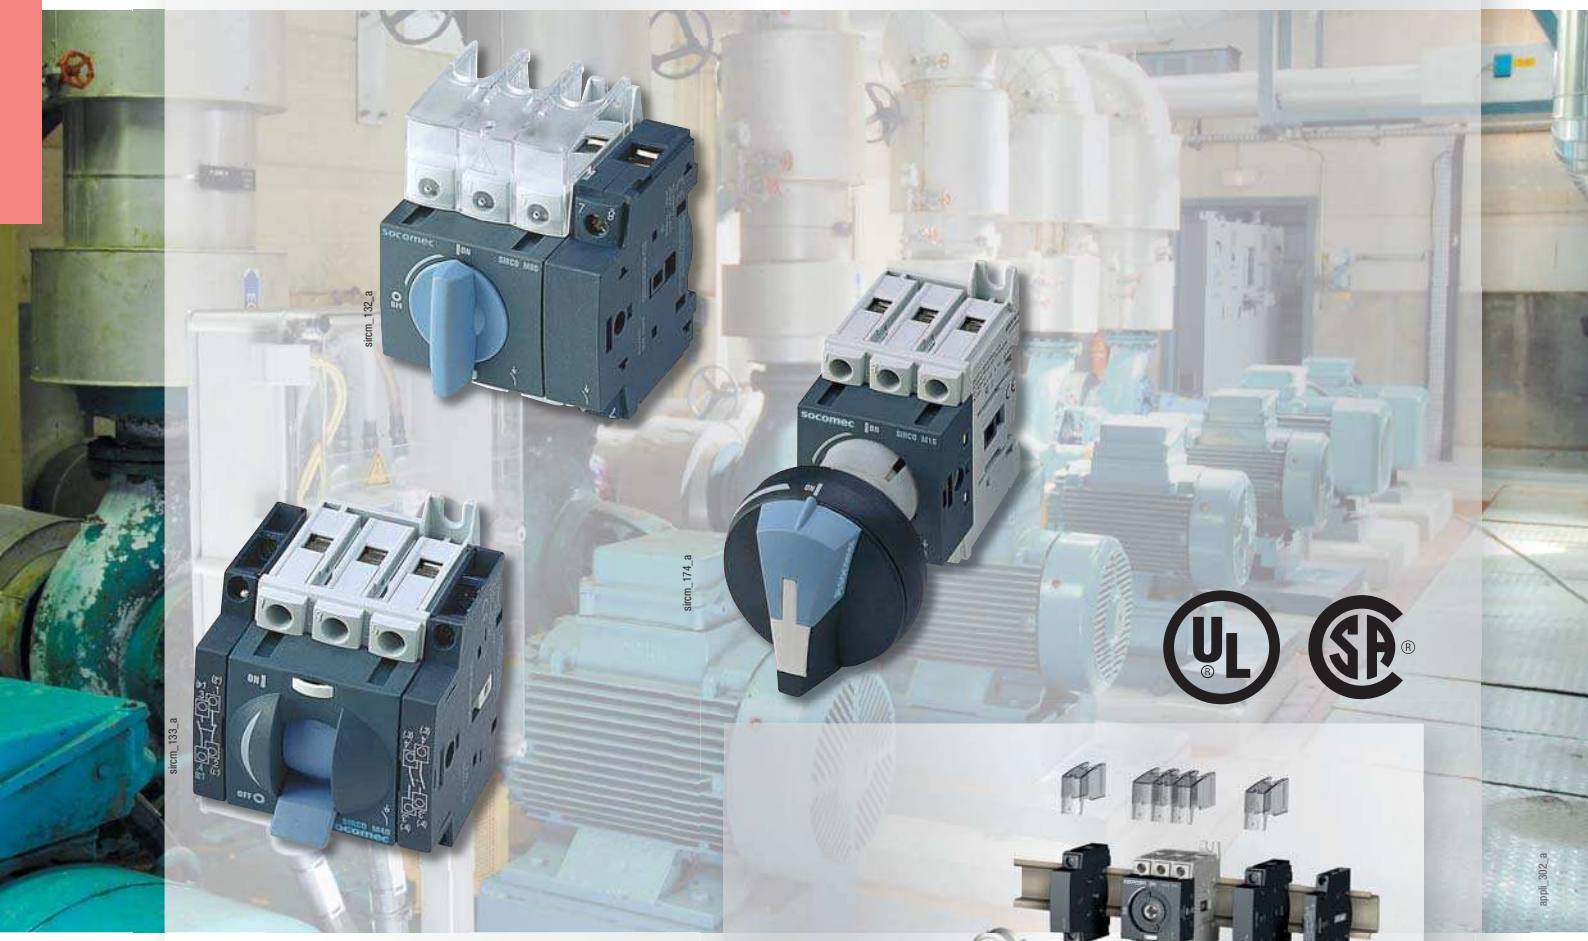
SIRCO M UL508

Load break switches standards UL and CSA



16 to 80 A

➲ Function

SIRCO M UL/CSA non fusible disconnect switches are compact modulable and modular switches. They make and break under load conditions and provide safety isolation for any low voltage circuit, particularly for machine and control circuits.

➲ General characteristics

- Direct or external operation
- Compact footprint
- DIN rail or base mount
- Wide range of accessories
- Up to 8 pole or 4 pole MTS

➲ Conformity to standards

- UL 508 listed, Guide NLRV, File E173959
- CSA C22.2§14, class 3211-05, File 112964
- IEC 60947-3

UL508 non-metallic polycarbonate 4, 4X enclosed SIRCO M

coff_368_a_1_cat

➲ Function

Enclosed **SIRCO M** switches allow safe control and safe disconnect on of any motor application.

➲ Conformity to standards

- UL508, Guide NLRV, file E173959
- CSA C22.2#14, Class 3211-05, file 702154
- IEC 60947-3

➲ General characteristics

- Grey enclosure with red handle.
- Equipped with a 3 pole SIRCO M.
- 1 removable earth terminal.
- Possibility of adding 1 power pole and 1 auxiliary contact.
- Nema type 1, 3R, 12, 4, 4X.

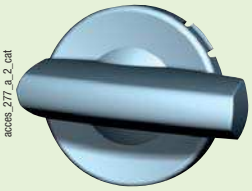
➲ Accessories

Direct handle



Rating (A)	Handle colour	Handle	Reference
16 … 80	Blue	M00 type	2299 **5012**

External handle

S00 handle

S0 handle

Use
The handle locking function prevents the user from opening the door of the enclosure when the switch is in the "ON" position (only if the handle is fitted on the door).

Opening the door when the switch is in the "ON" position is possible by defeating the interlocking function with the use of a tool (authorized persons only).
The interlocking function is restored when the door is closed back.
The handle is padlockable with 3 padlocks.

Front and right side handles I - 0

Conversion kit

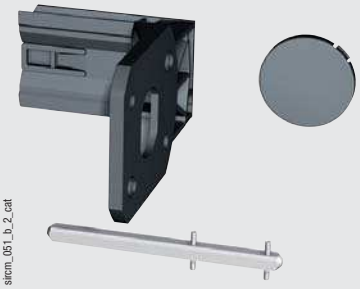
Conversion kit for 6 or 8 pole load break switches

Conversion kit for 3 and 4-pole changeover switches (I - 0 - II) or (I - I+II - II)

Use
These accessories enable the assembly of 2 switches in order to achieve:
- 6 or 8 pole switches
- 3 or 4 pole open or close transition changeover switches.

Rating (A)	Type	Reference
16 … 80	Load break switches 6/8 P	2269 **6009**
16 … 80	Changeover switch 3/4 pole (I - 0 - II)	2209 **6009**
16 … 80	Changeover switch 3/4 pole (I - I+II - II)	2299 **6009**

Door mounting kit



Use
This kit enables direct mounting of the switch on the panel door or on the right or left side of the panel.
The external handle is quick and easy to install due to an internal locking nut mounted on the inside of the enclosure.

Rating (A)	No. of poles	Reference
16 … 80	3/4 P	2299 **3409**

SIRCO M UL98

30 to 100 A

➲ Function

SIRCO M non fusible disconnect switches are compact switches that break and make power circuits on and off load and provide safety isolation.
These switches are extremely durable and are tested and approved for use in the most demanding applications.

➲ General characteristics

- Touch safe.
- DIN rail or back plate mounted.
- Direct or external handle.

➲ Specific characteristics

- Contact point technology.

➲ Conformity to standards

- UL98, Guide WHTY, file E201138
- CSA 22.2#4, Class 4651-02, file 112964
- IEC 60947-3

External handle

S00 handle

S0 handle

Use

The handle interlocking function prevents the user from opening the door of the enclosure when the switch is in the "ON" position (only if the handle is fitted on the door).
Opening the door when the switch is in the "ON" position is possible by defeating the interlocking function with the use of a tool (authorized persons only).
The interlocking function is restored when the door is re-closed. The handle is padlockable with 3 padlocks.

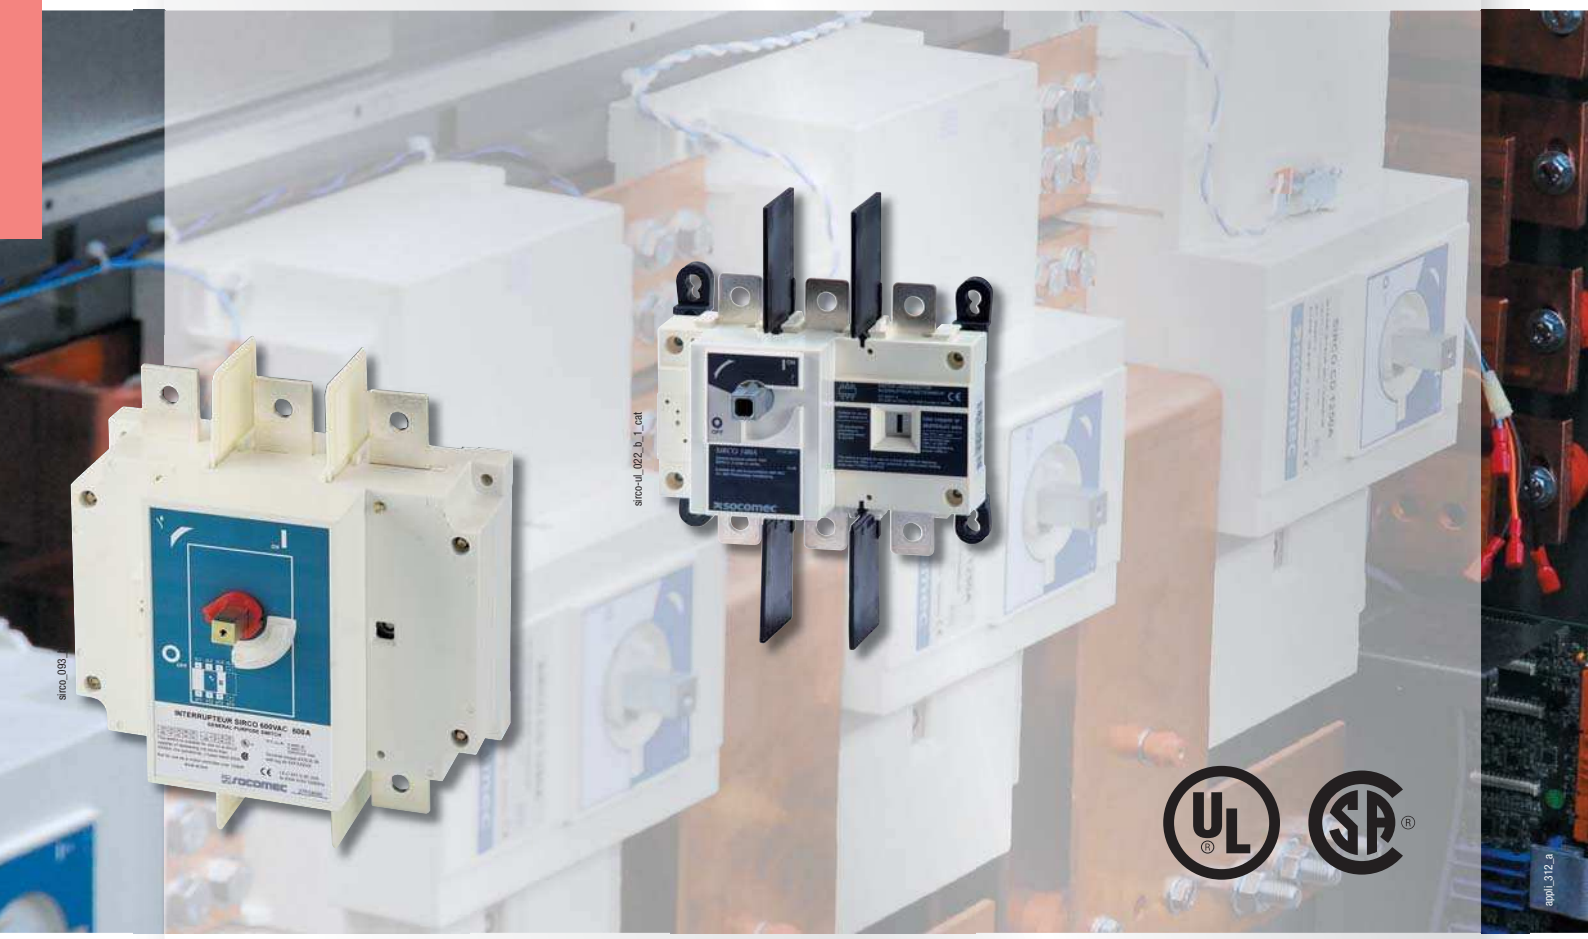
SIRCO UL 98

Load break switches standards UL and CSA



100 to 1200 A

➲ Function

SIRCO non fusible disconnect switches are heavy duty switches that break and make power circuits on and off load and provide safety isolation.
These switches are extremely durable and are tested and approved for use in the most demanding applications.

➲ General characteristics

- Fully visualised disconnection.
- High thermal and dynamic withstand.
- Severe utilisation categories.
- High electrical and mechanical endurance.

➲ Conformity to standards

- UL98, Guide WHTY, file E201138
- CSA Pending 22.2#4, Class 4652-04, file 703166
- IEC 60947-3

➲ Customized solutions (please consult us):

- Visible contacts from 30A to 400A.
- NFPA79 on non fusible disconnects.

SIRCO DC UL98

Load break switches standards UL and CSA

100 to 1200 A (600 A x 2) 600VDC UL98 General use

➲ Function

SIRCO DC non fusible disconnect switches are heavy duty switches that break and make 600VDC photovoltaic circuits on and off load, they are suitable for use in accordance with NEC Atr. 690 Photovoltaic Installations.
These switches are extremely durable and are tested and approved for use in the most demanding applications.
They are available in 3, 4, and 6, 8 poles for dual-input configurations, in order to suit all your requirements.

➲ General characteristics

- Patented switching technology.
- Up to 600 V d.c. according to UL98/CSA C22.2#4.
- Up to 1000 V d.c. according to IEC 60947-3.
- Suitable for use in accordance with NEC Art. 690.

➲ Conformity to standards

- UL98, Guide WHTY, file E201138
- CSA Pending C22.2#4, Class 4651-02, file 112964
- NEC Art. 690
- IEC 60947-3

Simplified large photovoltaic system layout

➲ Zoom

A 6 or 8 pole switch allows the connection of two independant solar string circuits to its inputs, the output can be paralleled in order to concentrate currents up to 1200A 600VDC general use.

On and Off on-load disconnection are operated with one handle.

S2-type heavy duty handle

Use
The interlocking function of the front external handle prevents the user from opening the door of the enclosure when the switch is in the "ON" position, and when the switch is padlocked in the "OFF" position (S2, S3 and S4 type handles only). Opening the door when the switch is in the "ON" position is possible by defeating the interlocking with the use of a tool (authorized persons only). The interlocking function is restored when the door is re-closed.

TVSS SURGE SWITCH UL

Load break switches standards UL and CSA

TVSS (Transient Voltage Surge Suppressor) Surge Switch

➲ Function

The **TVSS Surge Switch** is an extremely compact, high performance, manualy operated, non-fused switch. It is specifically designed to withstand the high surge current of 200kA with an 8 x 20 µs waveform seen in today's transient voltage Surge Protective Device (SPD) applications. Socomec Surge Switch uses a unique contact design that actually clamp contacts tighter during a surge.

➲ General characteristics

- 200kA 8/20µs shockwave withstand.
- Rated 100A 600VAC UL508 general use.
- High electrical and mechanical endurance.

➲ Conformity to standards

- UL508, Guide NRNT, File E224992
- IEC 60947-3

- VDE 0660-107 (1992)

SIRCO range with over rated neutral

The use of power electronics is becoming more frequent. Chopper rectifiers and current inverters distort the signal by reinjecting the 3rd order harmonics which are added to each other on the neutral.
Available from 125 to 1800 A.

SIRCO 3 x 250 A with neutral at 400 A.

SIRCO HW short-circuit performance

- 80 kA eff. 1 s.
- 110 kA eff. 0.1 s.
- 240 kA peak.

Multipolar SIRCO

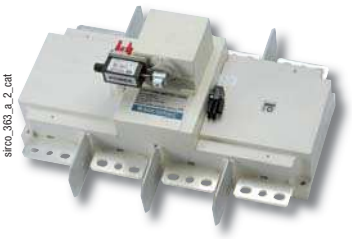
SOCOMEC can provide switches up to 16 poles.

12 pole SIRCO.

Specific range for 1000 V network

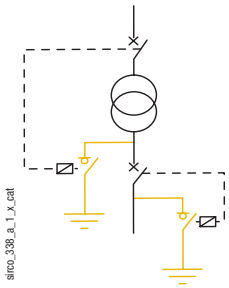
AC-22 / AC-23 characteristics.

SIRCO for earthing



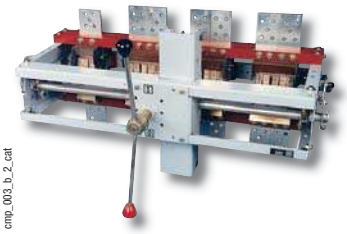
sirco_363_a_2_cat

- From 800 to 1800 A.
- 50 kA eff. 1 s.
- Special S4 type handle.
- Undervoltage coil interlocking.



sirco_338_a_1_x_cat

CMP



cmp_003_b_2_cat

Function

CMP are manually operated high power load-break switches from 2500 to 5000 A with optional remote tripping.

Available on request

- X poles.
- Tripping coil.

General characteristics

- Safety isolation by fully visible breaking.
- High thermal and dynamic withstand.
- Easy to use for large flat busbars.

Motorised SIRCO based on an ATyS motorised switch

sirco_343_a_1_cat

Function

Remote controlled, they ensure making and breaking on load and security breaking of any low voltage electrical circuit.

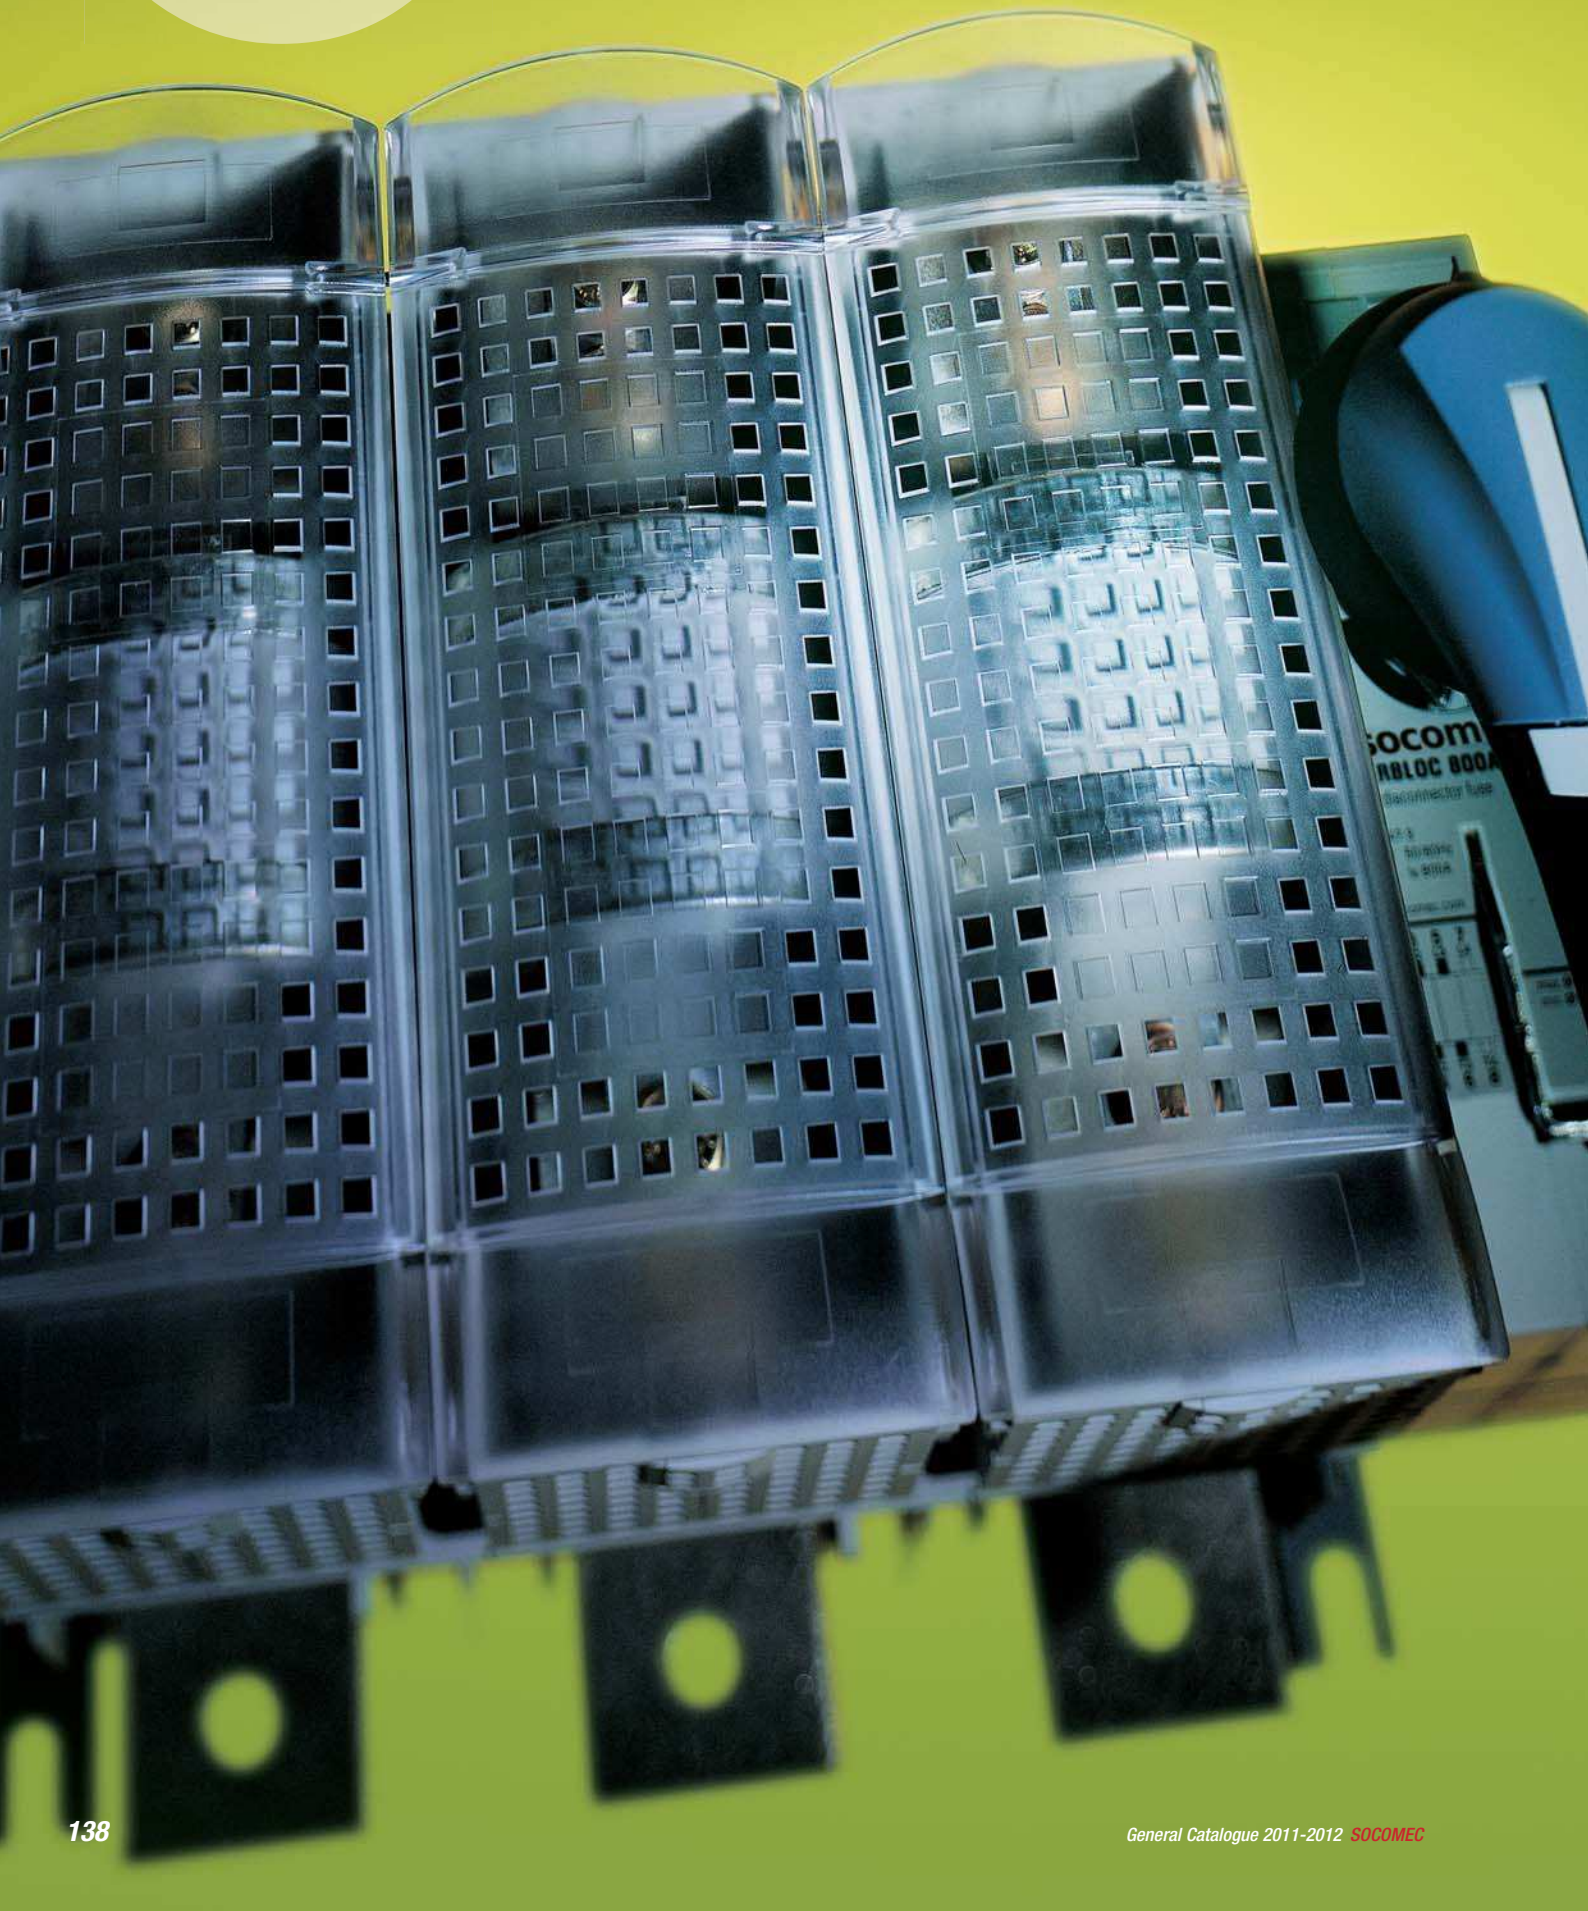
Fuse protection



Fuses, fuse holders and fuse combination switches

INNOVATION

Fuse protection offers lots of benefits compared to the circuit breaker in a large number of industrial applications. With over 80 years' experience, SOCOMEC offers a range of switches and components useful for building a complete fuse protection solution.

➲ **Do you want…**

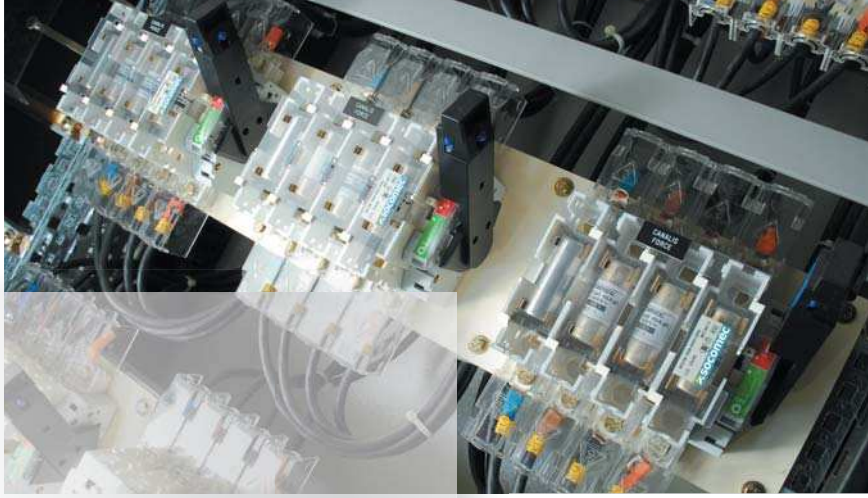
Better understanding of fuse protection



Fuse combination switches provide a guarantee of reliable breaking and protection from power distribution to motor protection. Summary of the main benefits:

- **Significant limitation of short circuits**

The thermal and mechanical effects generated during a short circuit can be considerable. Since a fuse can cut-out short circuit much faster than a circuit breaker, it offer a greater limitation of the mechanical effect on your switchboard and wires (see fig. 1).

- **High breaking capacity**

Starting 1A, gG and aM fuses have a breaking capacity of 100 kA (or more); it is therefore not necessary to worry too much about the short circuit current when choosing the product which has the right characteristics.

- **Simplified selectivity**

Fuses allow total selectivity, regardless of the short circuit level. This is ensured as soon as the ratio of ratings between the upstream and downstream fuse is at least 1:6. This characteristic guarantees perfect continuity of the energy supplied (see an example in fig. 2).

- **The visible breaking**

When eliminating a short circuit, the energy generated is absorbed by the silica and remains confined in the body of the fuse, stopping the propagation of the arc or even the projection of white-hot materials.

- **Visible double breaking**

Fuse combination switches ensure breaking upstream and downstream of the fuses which allows them to be replaced in complete safety.

➲ Useful information:

• Controlled by the HV/LV transformer sensor, the fuse combination switches with tripping function are the best way of ensuring its general breaking and protection functions.

• Protection with high speed (UR) fuses is the only way to efficiently protect the semiconductors used in electronic equipment (variable speed drives, etc.) against short circuits.

FUSERBLOC

20 to 1250 A
Manual operation

➲ Function

FUSERBLOC are manually operated multipolar fuse combination switches. They break or switch off on load and provide safety isolation and protection against overcurrent for any low voltage electrical circuit.

➲ General characteristics

- Fully visualised breaking.
- Double break by phase (top and bottom of fuse).
- Protection against overcurrent by fuse circuit-breakers (gG, aM, UR, BS88) with high breaking capacity (100 kA eff.).
- IP20 protection with terminal shrouds front panel.
- Compact.
- TEST position for testing control circuits without power using U type auxiliary contacts. In TEST position, the enclosure door can be opened.

➲ Available on request

- **FUSERBLOC** with **rear top or bottom connections:** consult us.
- **Multipolar FUSERBLOC** providing various coupling possibilities (for example: FUSERBLOC 3 x 400 A + 3 x 50 A with front or side operation).
- **FUSERBLOC UL and CSA** for the North American markets (see page 204).
- **FUSERBLOC with centred operation:** consult us.
- **FUSERBLOC for solar applications**: consult us.

Multipolar FUSERBLOC

Centred operation

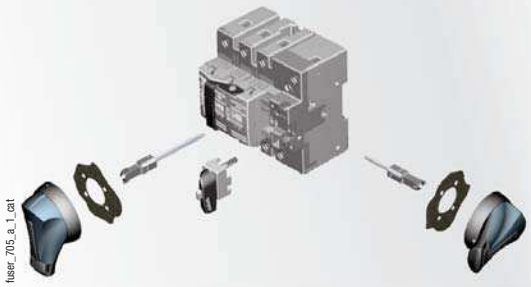
FUSERBLOC for solar applications

What you need to know

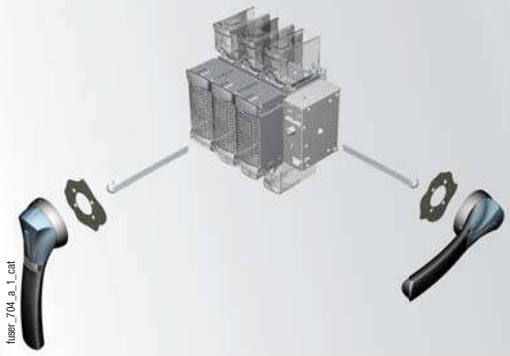
- Along with the rating, FUSERBLOC is selected according to the fuse type and functional specifications. SOCOMEC FUSERBLOC can be equipped with NFC, DIN or BS88 fuses.

- The INSTALFUSE® v2 software carries out sizing calculations for low-voltage electrical installations and their fuse protection.

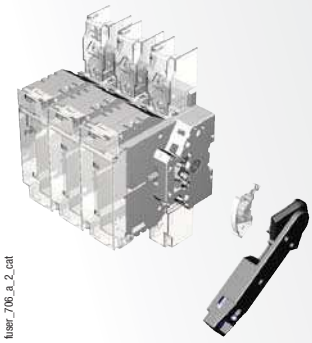
- Whether it is 3 pole + switched neutral or 3 pole + solid neutral, the FUSERBLOC 20 to 32 A with direct front operation and external operation is the best suited solution in compact design.



- From 630 to 1250 A, the FUSERBLOC unit allows direct and external front or right side operation in 2, 3 or 4 poles.

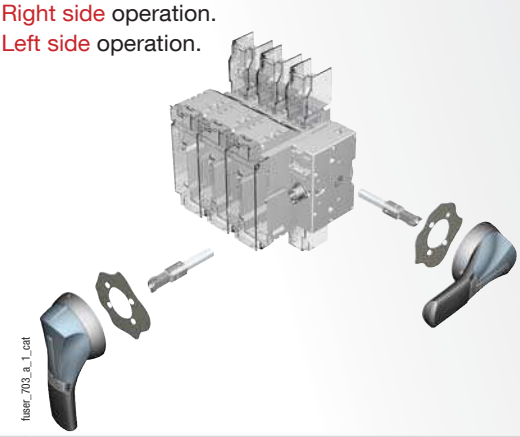


- From 32 to 400 A, the FUSERBLOC is available in 2, 3 or 4 poles with direct side operation.



- FUSERBLOC is available in 3 and 4-pole versions within 2 types of enclosures:
  - Steel enclosure for front operation from 25 to 800 A, (NFC and DIN)
  - Polyester enclosure with front and side operation from 50 to 400 A (NFC and DIN).
  - For BS88 steel enclosed FUSERBLOC please consult us.

- With external operation, it is possible to operate the device in 3 ways:
  - Front operation.
  - Right side operation.
  - Left side operation.



- For ratings 20 to 400 A, the flat mounting kit provides a compact solution ideally suited to withdrawable applications.

S type handle adapter

acces_187_a_1_cat

Use
Enables S type handles to be fitted in place of existing older style SOCOMEC handles. Adapter can also be utilised as a spacer to increase the distance between the panel door and the handle lever.

Dimensions
Adds 12 mm to the depth.

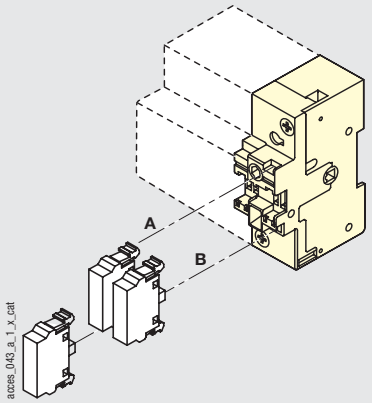
U type auxiliary contacts



Use
Compact universal type auxiliaries can be configured to be operated on both, standard and TEST position switches from CD 20 to 1250 A. Each slot can accommodate up to 2 interlocked ACs.

Connection to the control circuit
By terminals with max. section 2 x 2.5 mm². For FUSERBLOC CD 20 to 400 A. Pre-break and signalling of positions 0, I and Test. For FUSERBLOC ≥ 630 A: Pre-break and position 0 and I signalling.

A type auxiliary contacts

Use
Pre-break and position 0 and I signalling by 1 or 2 NO /NC auxiliary contacts. For low level use, specific auxiliary contacts: consult us.

Connection to the control circuit
By 6.35 mm fast-on terminal.

Electrical characteristics
30 000 operations.

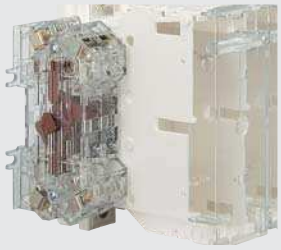
S and ST type auxiliary contacts

acces_051_a_2_cat



acces_083_a_1_cat

Use
For FUSERBLOCs 32 to 1250 A, position 0 and I signalling by 1 to 4 NO + NC auxiliary contacts.

Electrical principle
The NO + NC S type auxiliary contacts can be configured as 2 NC or 2 NO.

Connection
By terminals with max. section 10 mm².

Mechanical characteristics
30 000 operations.

NFC and DIN fuse blowm indication

Use

For fuse cartridge with striker (size 14 x 51 22 x 58; 0; 1; 2; 3 and 4).

Electrical principle

A NO/ NC auxiliary contact detects that the fuse has blown.

Connection to the control circuit

By 6.35 mm fast-on terminal.

Mechanical characteristics

30 000 operations.

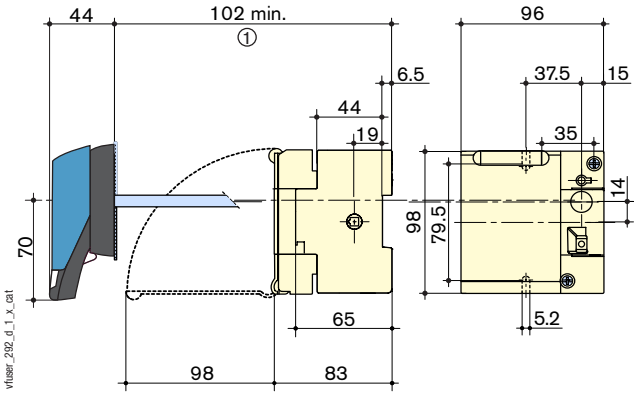
➲ FUSERBLOC - Dimensions

External operation

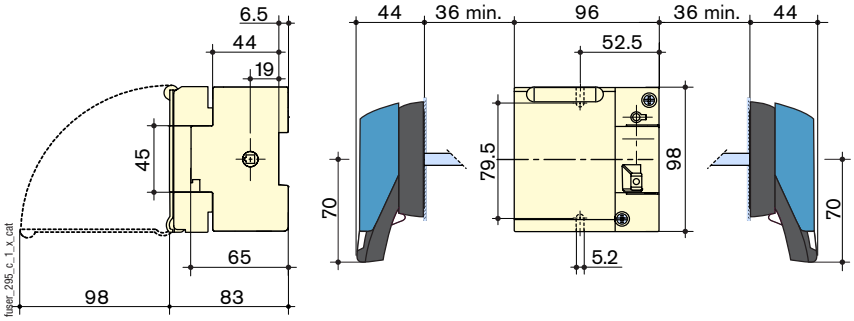
BS88 - FUSERBLOC CD 20 to CD 32 A in size A1

External front operation

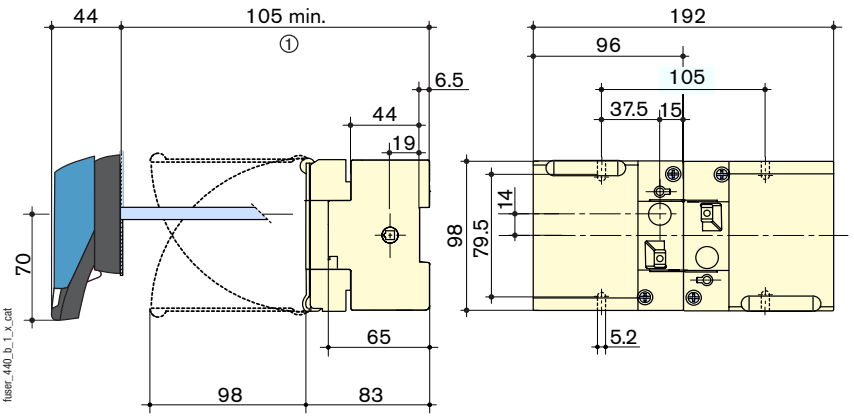


1. With 1 U type AC: 130 mm
With 2 U type AC: 155 mm.

External side operation



External front operation fuse combination changeover

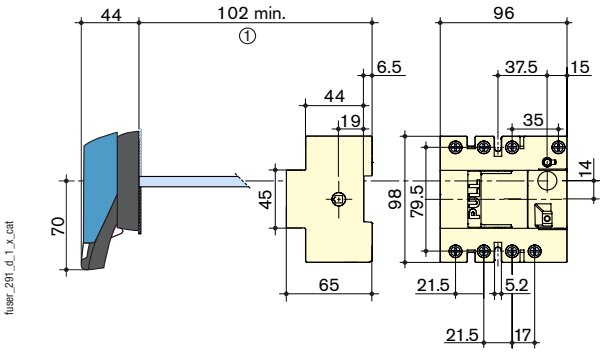


1. With 1 U type AC: 130 mm
With 2 U type AC: 155 mm.

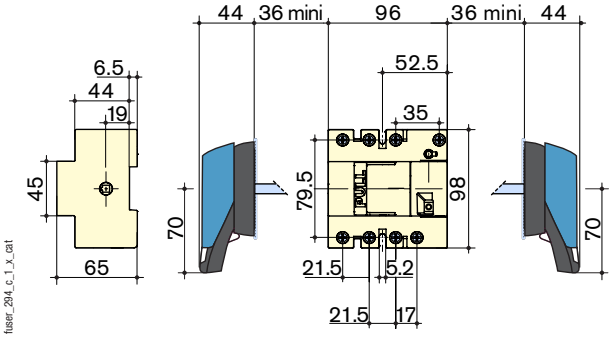
External operation

NFC and DIN - FUSERBLOC 25 to 32 A in size 10 x 38

External front operation



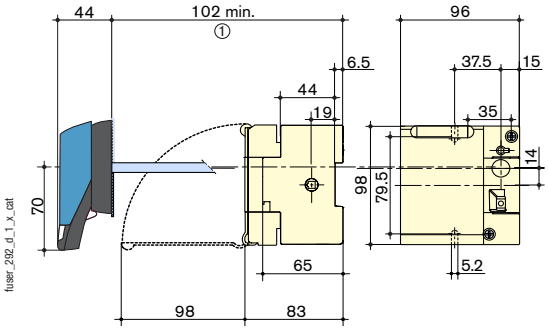
External side operation



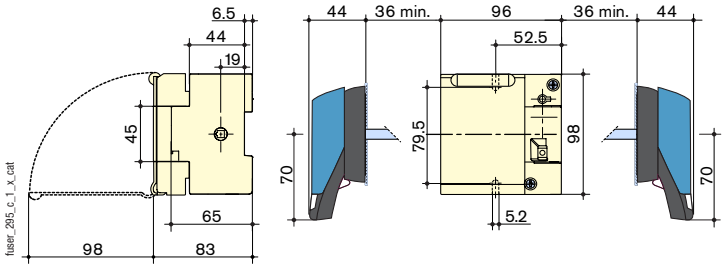
1. With 1 U type AC: 130 mm.
With 2 U type AC: 155 mm.

NFC and DIN - FUSERBLOC 32 A in size 14 x 51

External front operation



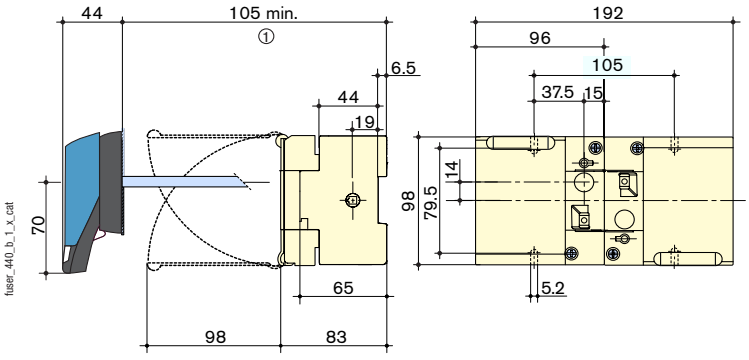
External side operation



1. With 1 U type AC: 130 mm.
With 2 U type AC: 155 mm.

NFC and DIN - FUSERBLOC 25 to 32 A in size 10 x 38 and 14 x 51

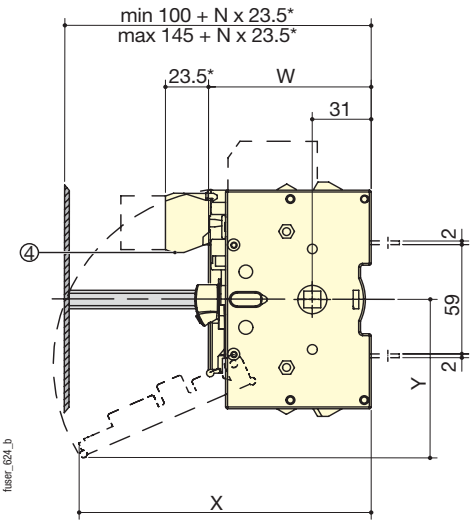
External front operation fuse combination changeover



1. With 1 U type AC: 130 mm.
With 2 U type AC: 155 mm.

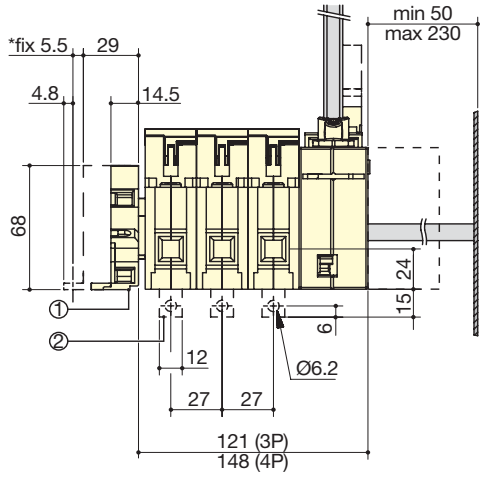
External front or right side operation

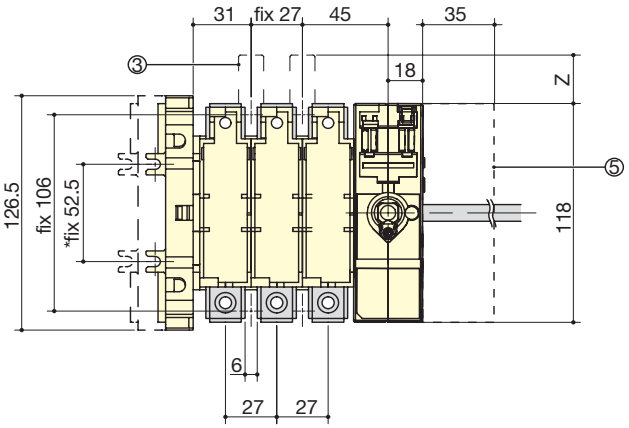
BS88 - FUSERBLOC 32 A in fuse size A1



** to use if pre-break auxiliary contact number > 4*
W : 84.5 for BS88 ; 87 for NFC and DIN
X : 153 only for DIN
Y : 85 only for DIN
Z : 26 only for DIN

NFC and DIN - FUSERBLOC 50 A in fuse size 14 x 51





1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)
3. 1 or 2 pre-break auxiliary contact (fuse blown indication)
4. 1 to 4 pre-break auxiliary contact for signalisation
5. Additional contact holder for U type AC

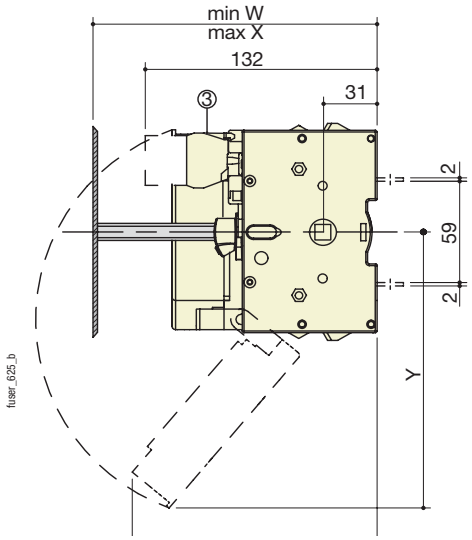
➲ Dimensions for external handles

BS88 - FUSERBLOC 32 to 63 A
NFC and DIN - FUSERBLOC 25 to 63 A

Handle type	Front operation		Side operation	
	Direction of operation	Door drilling	Direction of operation	Door drilling
S1 type Box size 0				

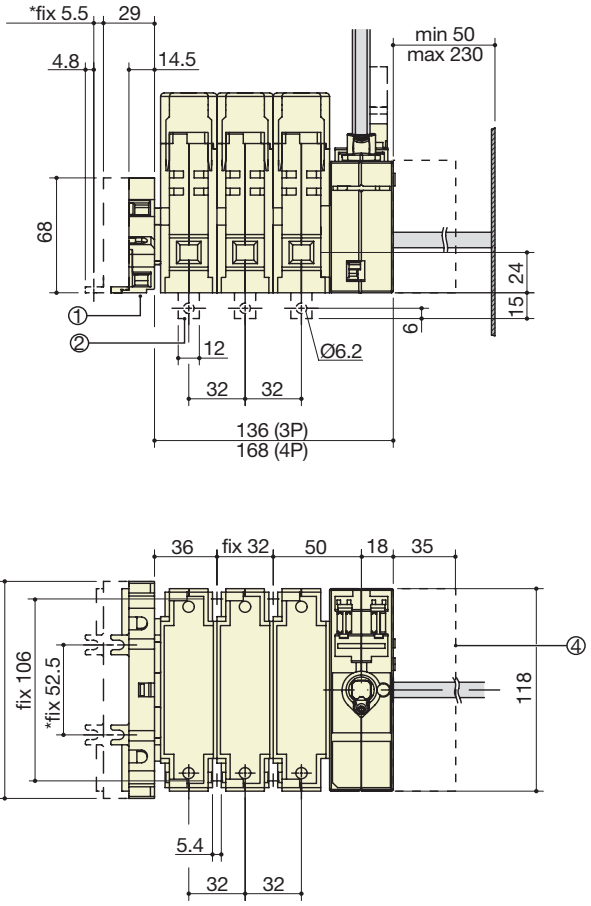
External front or right side operation

BS88 - FUSERBLOC 63 A in fuse size A2 - A3



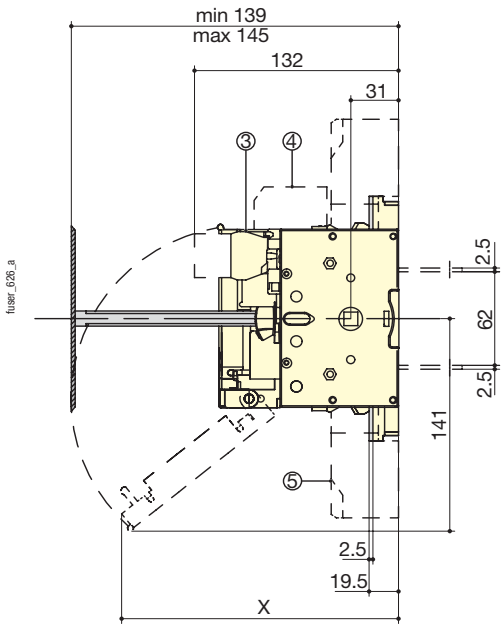
** to use if pre-break auxiliary contact number > 4*
W : 124 + N x 23.5 for BS88 ; 139 for NFC and DIN
X : 145 + N x 23.5 for BS88 ; 145 for NFC and DIN
Y : 159 only for DIN
Z : 145 only for DIN

NFC and DIN - FUSERBLOC 63 A in fuse size 00C



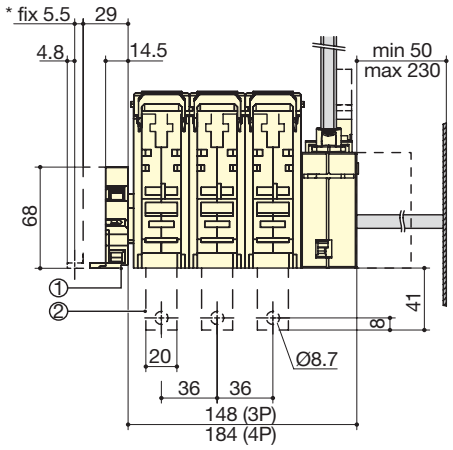
1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)
3. 1 to 4 pre-break auxiliary contact for signalisation
4. Additional contact holder for U type AC

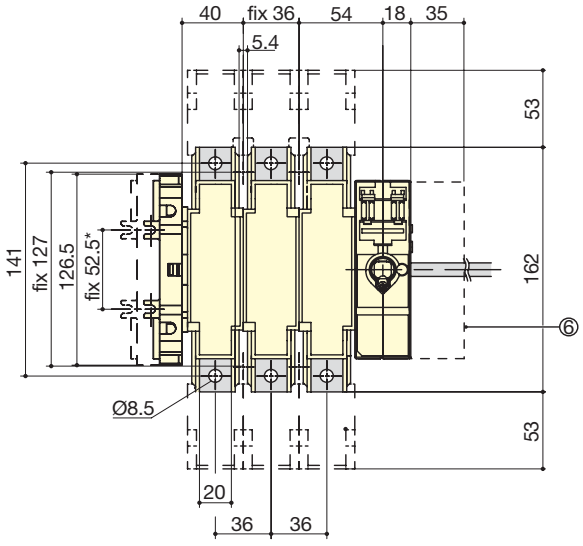
BS88 - FUSERBLOC 100 A in fuse size A4 - max Ø 31 mm



** to use if pre-break auxiliary contact number > 4*
X : 179 for BS88 / NFC and DIN 100 to 125 A
189 for NFC and DIN 125 to 160 A

NFC and DIN - FUSERBLOC 100 to 125 A in fuse size 22 x 58
FUSERBLOC 125 to 160 A in fuse size 00

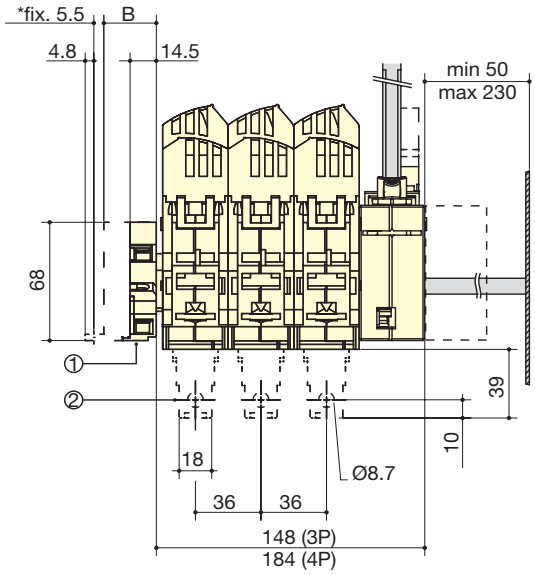


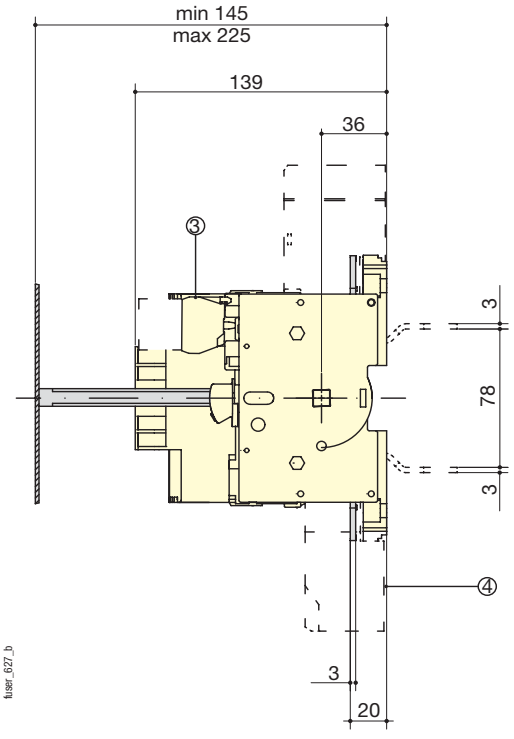


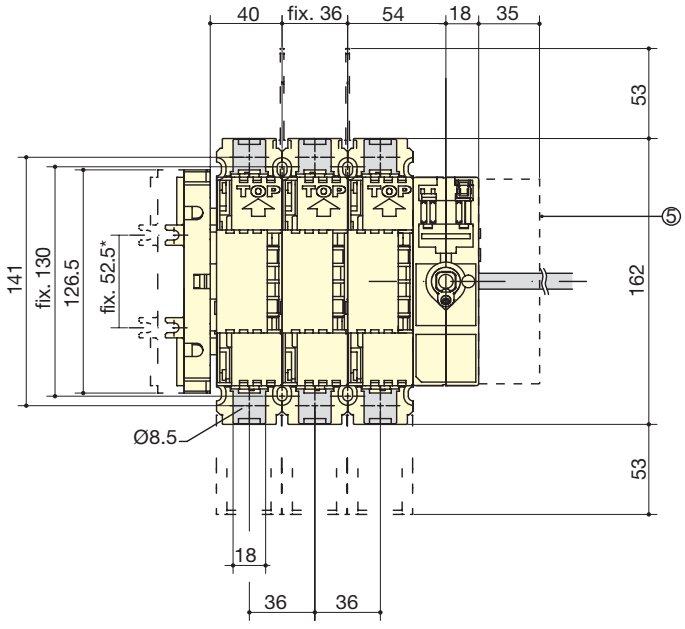
1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)
3. 1 to 4 pre-break auxiliary contact for signalisation
4. 1 or 2 pre-break auxiliary contact (fuse blown indication)
5. Terminal shrouds
6. Additional contact holder for U type AC

External front or right side operation

BS88 - FUSERBLOC CD 160 to CD 200 A in fuse size A3-A4 (A4 max Ø 31 mm)



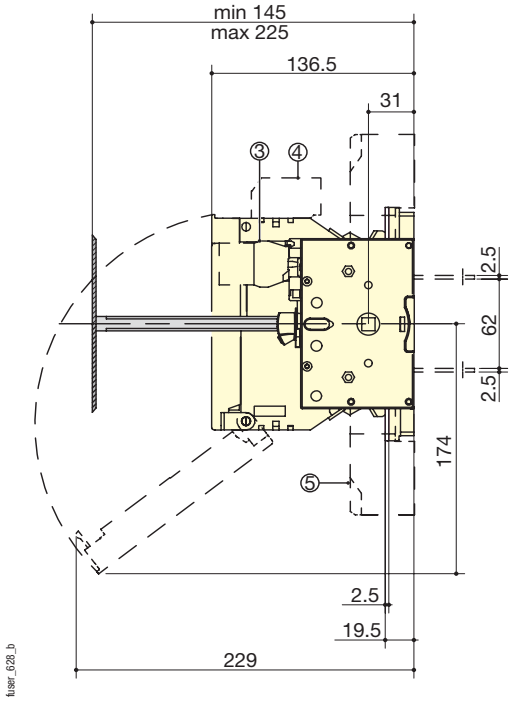




** to use if pre-break auxiliary contact number > 4*
1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)

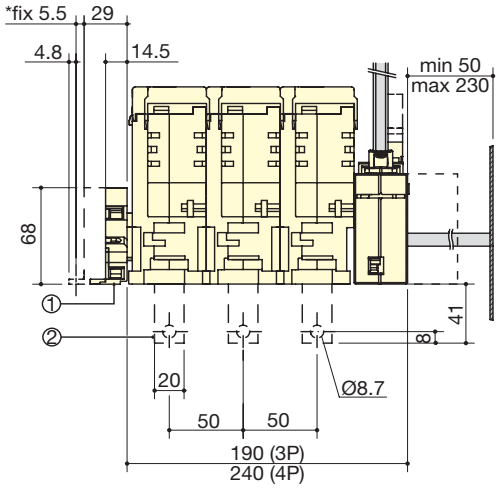
3. 1 to 4 pre-break auxiliary contact for signalisation
4. Terminal shrouds
5. Additional contact holder for U type AC

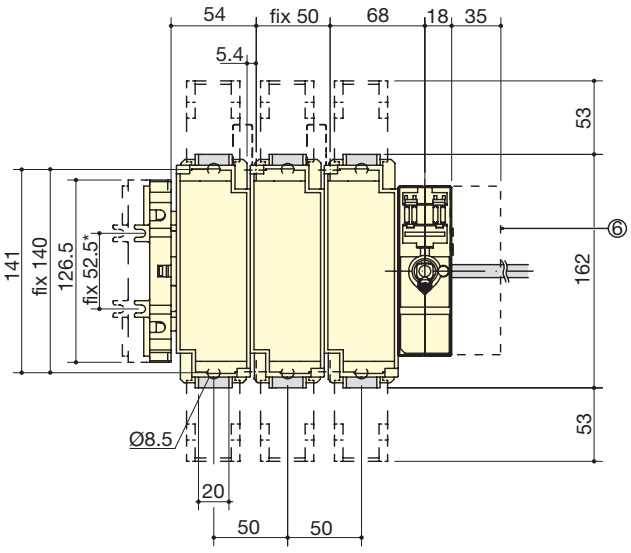
BS88 - FUSERBLOC 160 A in fuse size A4 & B1-B2



** to use if pre-break auxiliary contact number > 4*
1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)
3. 1 to 4 pre-break auxiliary contact for signalisation

NFC and DIN - FUSERBLOC 160 A in fuse size 0

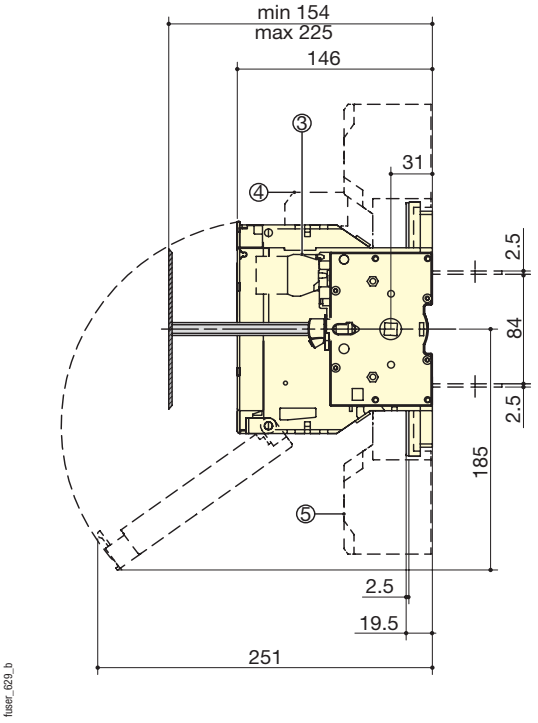




4. 1 or 2 pre-break auxiliary contact (fuse blown indication)
5. Terminal shrouds
6. Additional contact holder for U type AC

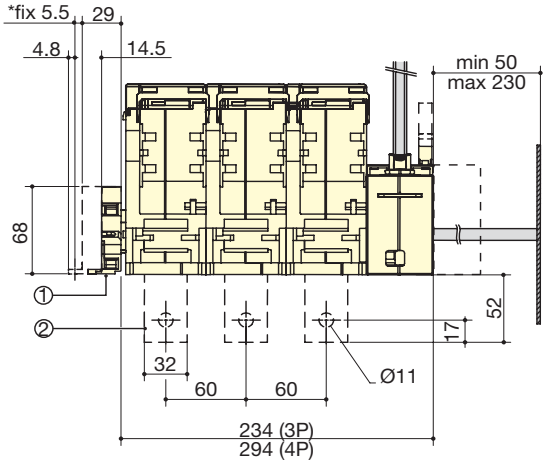
External front or right side operation

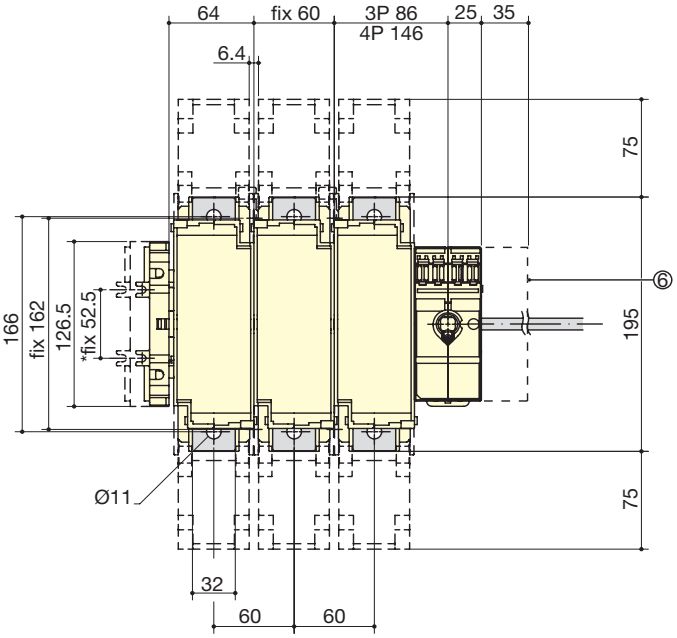
BS88 - FUSERBLOC 200 A in fuse size B1-B2
FUSERBLOC 250 A in fuse size B1-B2-B3



** to use if pre-break auxiliary contact number > 4*
1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)
3. 1 to 8 pre-break auxiliary contact for signalisation

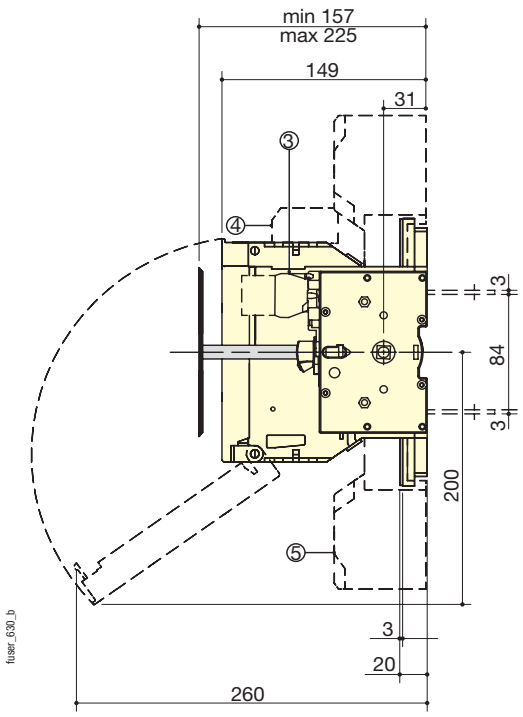
NFC and DIN - FUSERBLOC 250 A in fuse size 1





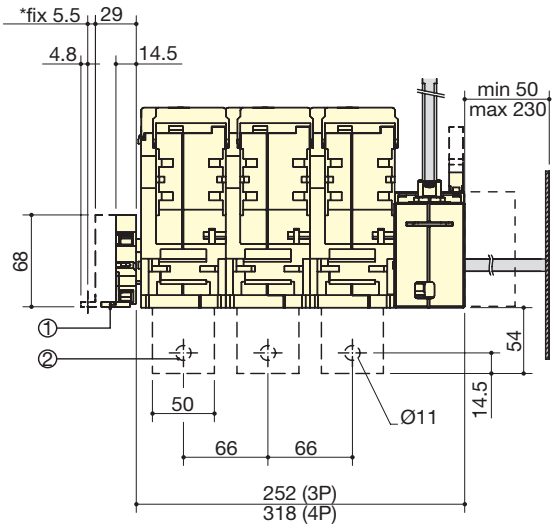
4. 1 or 2 pre-break auxiliary contact (fuse blown indication)
5. Terminal shrouds
6. Additional contact holder for U type AC

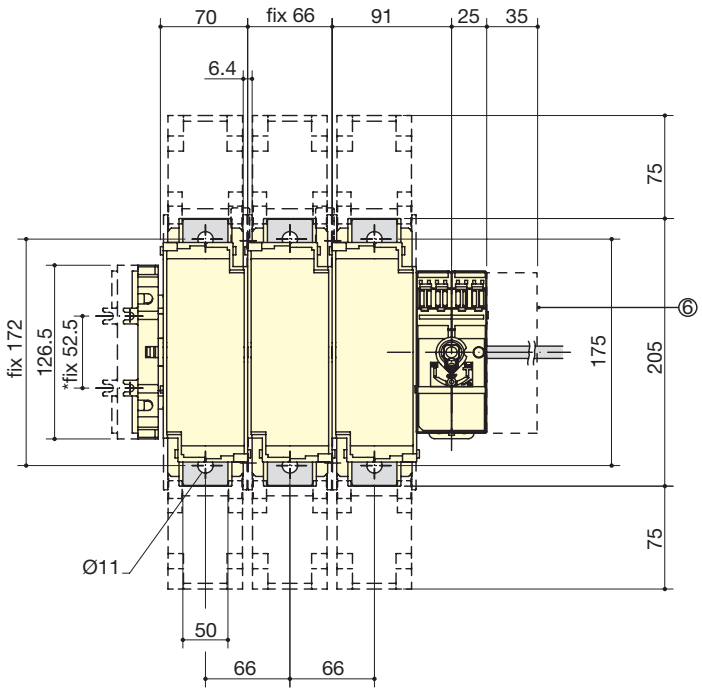
BS88 - FUSERBLOC 315 A in fuse size B1-B2-B3
FUSERBLOC 400 A in fuse size B1-B2-B3-B4



** to use if pre-break auxiliary contact number > 4*
1. S type auxiliary contact NO + NC to use if block number > 4
2. Rear connection (option)
3. 1 to 8 pre-break auxiliary contact for signalisation4. 1 or 2 pre-break auxiliary contact (fuse blown indication)
5. Terminal shrouds
6. Additional contact holder for U type AC

NFC and DIN - FUSERBLOC 400 A in fuse size 2





➲ Dimensions for external handles

BS88 / NFC and DIN - FUSERBLOC 100 to 400 A

Handle type	Front operation		Side operation	
	Direction of operation	Door drilling	Direction of operation	Door drilling

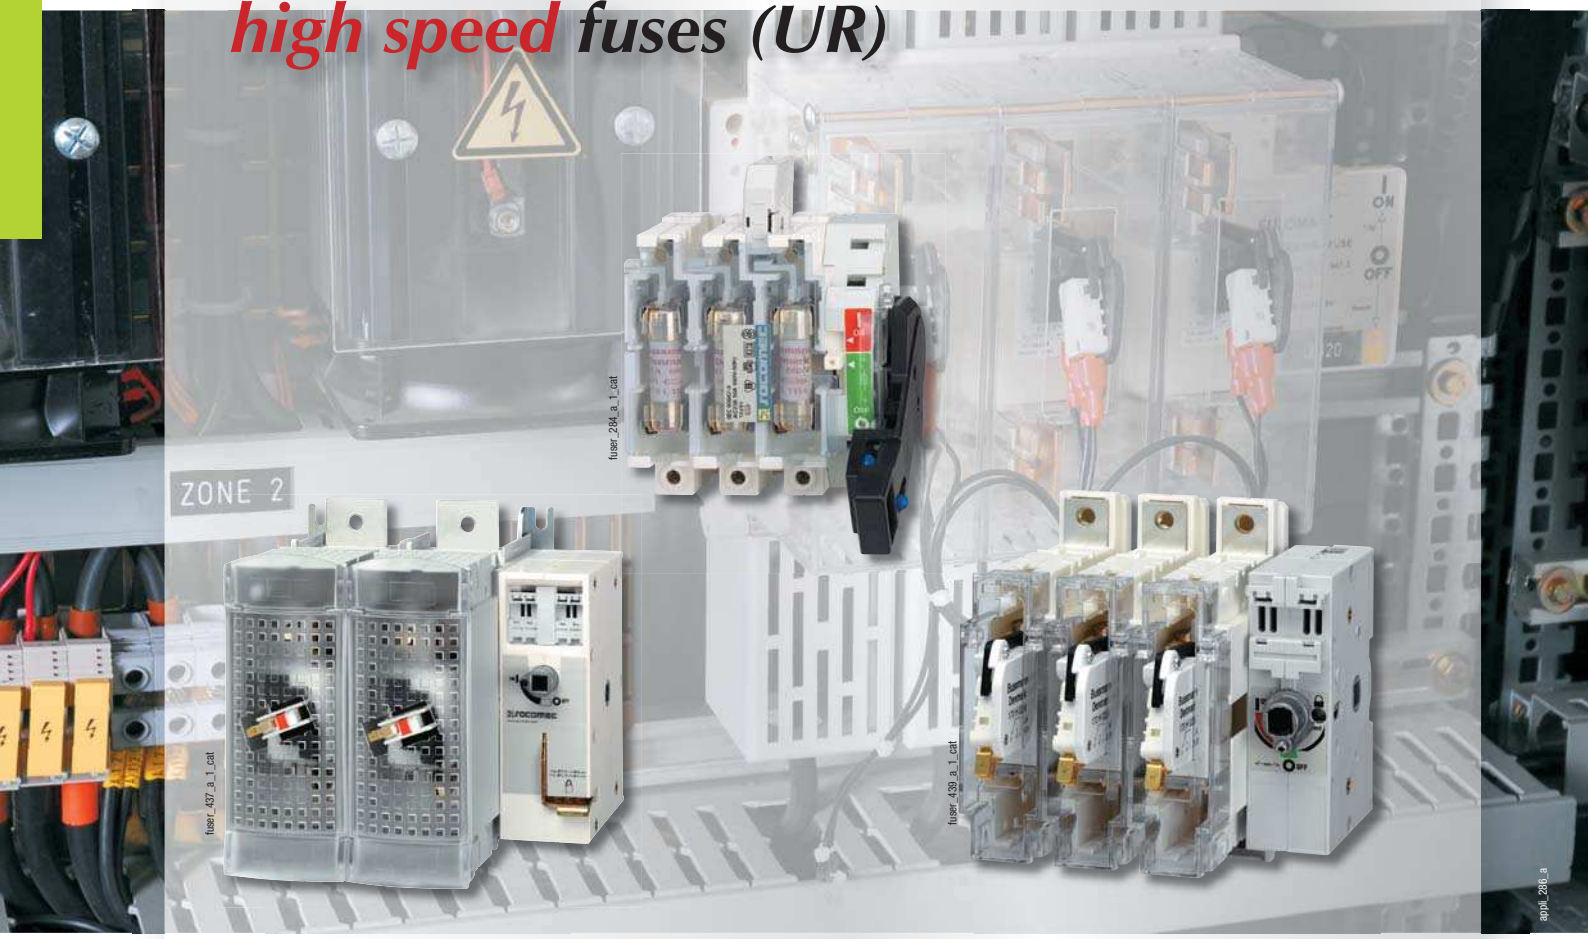
FUSERBLOC and high speed fuses (UR)



High speed fuses (UR) protect power semi-conductors and DC circuits

➲ Function

FUSERBLOC fuse combination switches combined with high speed fuses (UR) provide optimal breaking and making on load, safety isolation and protection of power semi-conductor circuits.

➲ Comments

- These associations were determined following tests performed in our laboratory. Correct functioning of the FUSERBLOC unit and UR fuses is only guaranteed when these combinations are respected.
- For FUSERBLOC V, we recommend using threaded bolted tag fuses (type BK/50) in preference to knife-edge fuses (DIN 43620), so as to improve the power dissipation of the fuses.
- Contact us for any other combinations (1250 V UR fuses, notched fuses with 80 mm distance between centres, other sizes, etc.)
- For remote tripping devices: consult us.
- To determine the UR fuses required, see page 247 "High speed fuses (UR)"

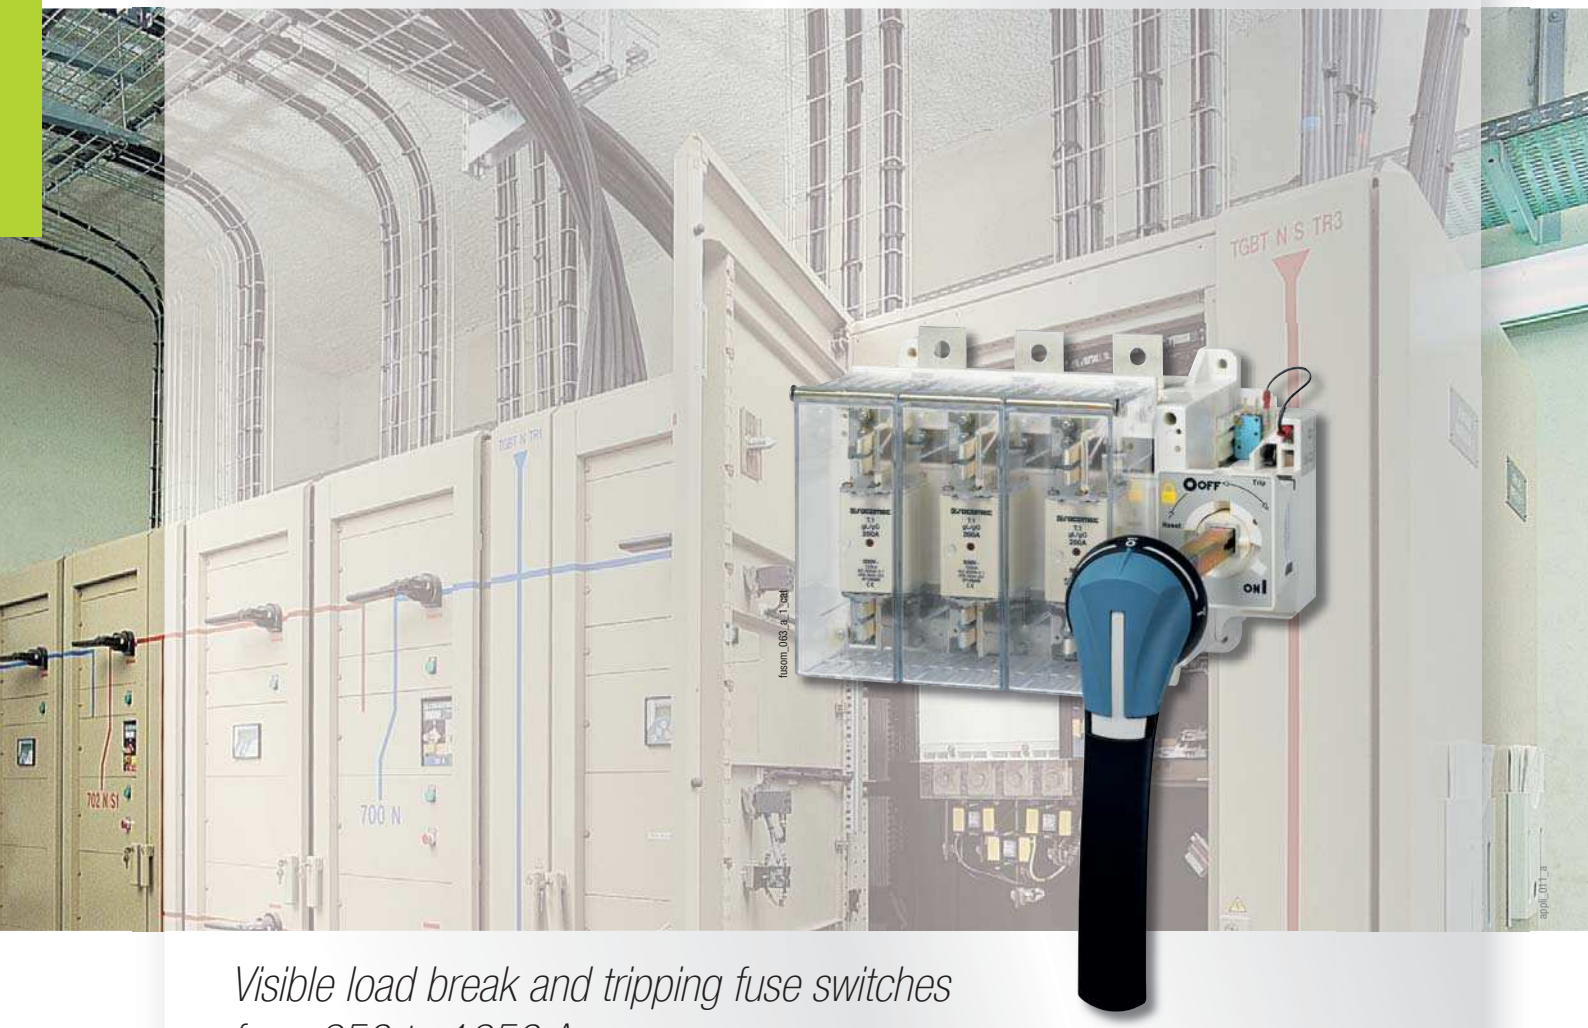
(1) If ordered at the same time as the standard device.
(2) If ordered later.
(3) For the fuses: see page 246 "Fuses UR 10 to 2000 A".

Other accessories: see page 142 "FUSERBLOC"



Visible load break and tripping fuse switches from 250 to 1250 A

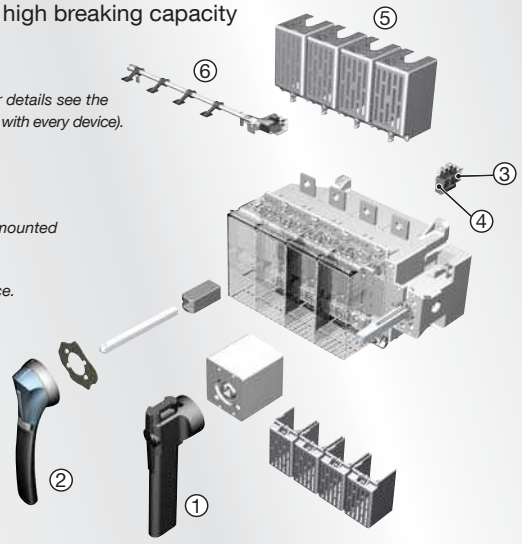
➲ Function

FUSOMAT are manually controlled tri- or tetrapolar fuse combination switches.
They can be tripped remotely.
They break or switch off on load and provide safety isolation and protection against overcurrent for any low voltage electrical circuit.
They can automatically disconnect a circuit in combination with:

- fuse blown indication,
- thermal relay,
- protective relays DIRIS,
- other protective devices.

➲ General characteristics

- Remote breaking by voltage release device.
- Fully visualised breaking.
- Double breaking by phase (top - bottom of the fuse) up to 630 A (NFC/DIN) and 800 A (BS88).
- Visible breaking up to 630 A (NFC/DIN) and 800 A (BS88).
- Protection against overcurrents by fuse links (gG, aM) with high breaking capacity (100 kA eff.).



Functional diagram (for further details see the installation instructions supplied with every device).

1. Direct front operation
2. External front operation
3. NO/NC position AC.
4. NO/NC AC wired to ready mounted transmission coil.
5. Terminal shrouds.
6. Fuse blown indication device.

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- VDE 0660-107
- NBN EN 60947-3
- BS 88

Auxiliary contacts

Use
Pre-break and signalling of positions 0 and I: 1 to 2 NO/NC auxiliary contacts
Coil tripping
1 to 2 NO/NC auxiliary contacts
Connection to the control circuit
By 6.35 mm fast-on terminal.
Characteristics
Auxiliary contact NO/NC IP2.
Electrical characteristics
30 000 operations.

Alternative tripping coils

acces_049_a_1_cat
Shunt trip coil

acces_050_a_1_cat
Undervoltage trip coil

Use
Omnipolar breaking remotely controlled by shunt trip or undervoltage voltage release coil.
Note: the shunt trip coil must not be supplied for more than 5 s.
A 230 VAC shunt trip coil is fitted to the standard switch body. To modify this coil, the reference opposite must be added to the switch reference (use "original coil" reference).

Examples for ordering:
- FUSOMAT with shunt trip coil 230 VAC - 1 reference: FUSOMAT 250 A, 3 pole, front operation, reference 3650 3026.
- FUSOMAT fitted with a non standard coil - 2 references: FUSOMAT 250 A, 3 pole, front operation, fitted with a 110 VAC undervoltage trip coil: 3650 3026 + 3991 3110.

Delayed undervoltage trip coil

Voltage	Reference
230 VAC	3992 **3230**
400 VAC	3992 **3400**

Current-reducing resistor for undervoltage trip coil

Use
Reduces, by limiting the current, the effects on the undervoltage coils used in continuous processes or processes exposed to high ambient temperatures.

Voltage	Reference
110 VAC	3999 **3112**
230 VAC	3999 **3230**
400 VAC	3999 **3400**
110 VDC	3999 **4110**

DIN Fuse blown indication

Use
For DIN fuse cartridges with striker.
Electrical principle
A NO/NC auxiliary contact detects that the fuse has blown.
Connection to the control circuit
By 6.35 mm fast-on terminal.
Electrical characteristics
30 000 operations.

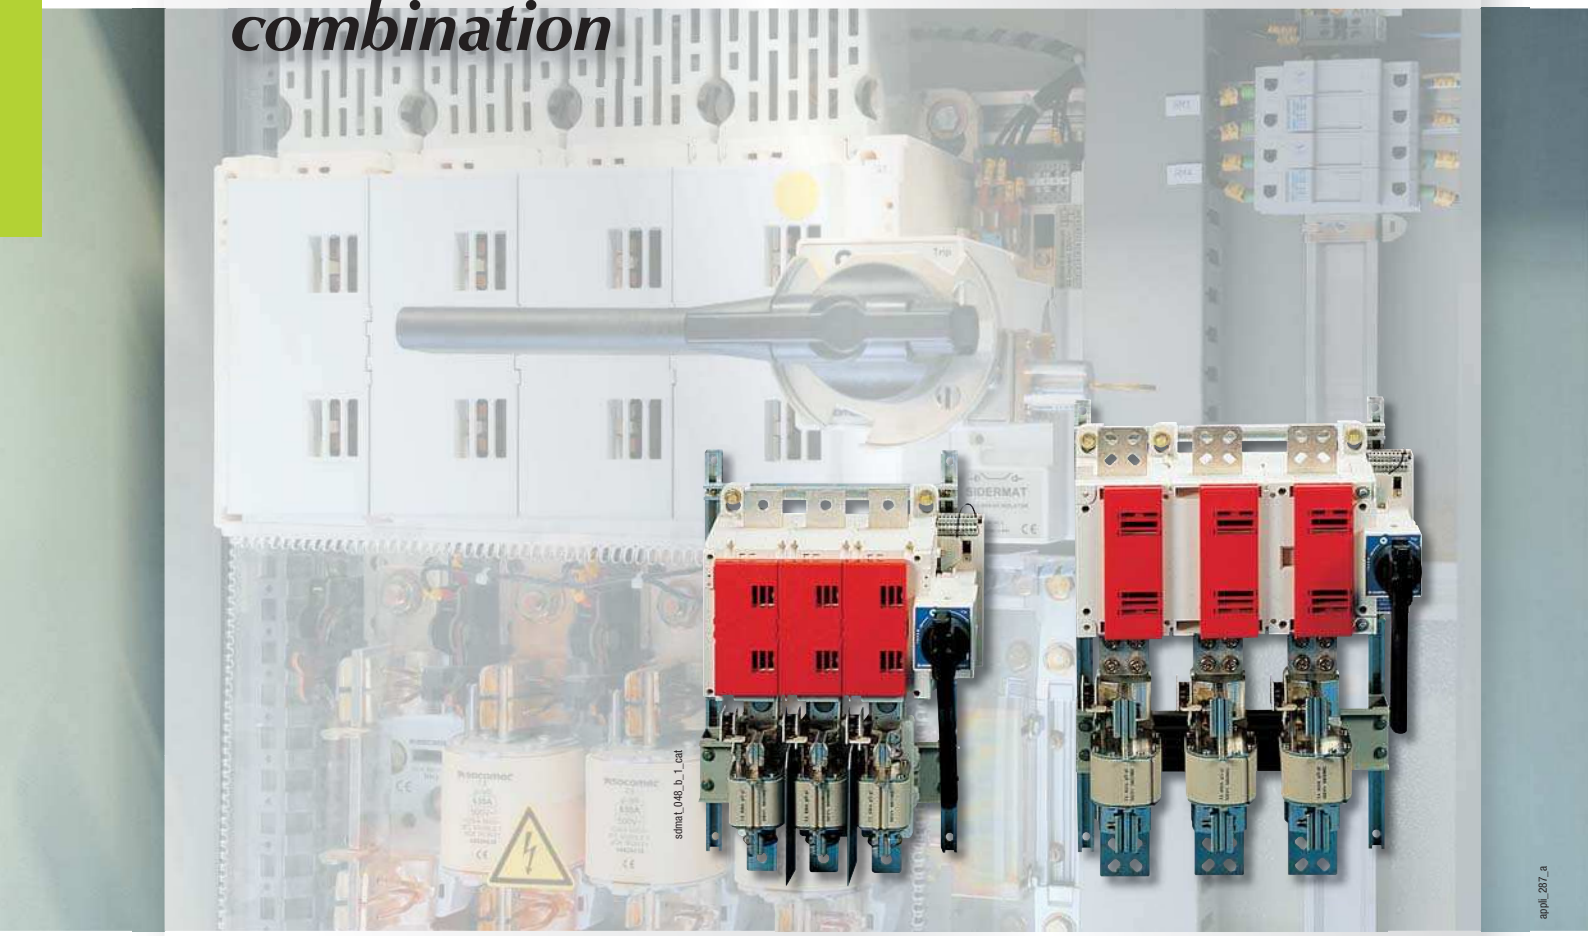
SIDERMAT combination



Visible breaking and tripping fuse switches from 630 to 1800 A

➲ Function

SIDERMAT combination are manually operated tri- or tetrapolar fuse disconnecting switches which can be triggered remotely.
They make and break under load conditions and provide safety isolation and protection against overcurrent for any low voltage electrical circuit.
They can automatically switch on a power circuit in combination with:
- fuse blown indication,
- thermal relay,
- differential relay,
- protective relays DIRIS,
- other protective devices.

➲ General characteristics

- Remote breaking by voltage release device.
- Fully visualised breaking.
- Visible double breaking.
- Protection against overcurrents by fuse links (gG, aM) with high breaking capacity (100 kA eff.).
- Device supplied without fuses.

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- BS EN 60947-3
- NBN EN 60947-3
- IEC 60269-1
- IS 14947-3
- DIN EN 60269-1
- NF EN 60269-1
- IEC 60269-2
- VDE 0636-1
- VDE 0660-107

Functional diagram (for further details see the installation instructions supplied with every device).

1. Direct front operation
2. External front operation
3. NO/NC position AC.
4. NO/NC AC wired to ready mounted transmission coil.

Current-reducing resistor for undervoltage trip coil

Use
Reduces, by limiting the current, the effects on the undervoltage coils used in continuous processes or processes exposed to high ambient temperatures.

Voltage	Reference
110 VAC	3999 **3112**
230 VAC	3999 **3230**
400 VAC	3999 **3400**
110 VDC	3999 **4110**

Alternative tripping coils

undervoltage trip coil

shunt trip coil.

Use

Omnipolar breaking remotely controlled by shunt trip or undervoltage voltage release coil.
Note: the shunt trip coil must not be supplied for more than 5 s.
A 230 VAC shunt trip coil is fitted to the standard switch body.
To modify this coil, the reference opposite must be added to the switch reference (use "original coil" reference).

Examples for ordering

- Combined SIDERMAT with shunt trip coil 230 VAC - 1 reference: Combined SIDERMAT 630 A, 3 pole, front operation: 3520 3063.
- Combined SIDERMAT fitted with a non standard coil - 2 references: Combined SIDERMAT 630 A, 3 pole, front operation fitted with a 110 VAC undervoltage trip coil: 3520 3063 + 3991 3110.

Coils Characteristics: see page 70 "SIDERMAT"

110 VDC	3990 **4110**	3991 **4110**
220 VDC	3990 **4220**	3991 **4220**

(1) To be ordered at same time as switch (factory fitted).

Delayed undervoltage trip coil

Voltage	Reference
230 VAC	3992 **3230**
400 VAC	3992 **3400**

Auxiliary contacts

Use

Pre-break and signalling of positions and I:
1 to 2 NO/NC auxiliary contacts

Coil tripping

1 to 2 NO/NC auxiliary contacts

Connection to the control circuit

By 6.35 mm fast-on terminal.

Characteristics

NO/NC auxiliary contact: IP2.

Electrical characteristics

30 000 operations.

FUSERBLOC UL

30 to 800 A

➲ Function

FUSERBLOC Fusible disconnect switches are heavy duty switches that break and make power circuits on and off load.
The switches employ double break contacts per pole that ensure complete isolation of the fuse when the switch is in the "OFF" position.
These switches are extremely durable and are tested and approved for use in the most demanding applications.
The TEST position function is enabled with handles with the TEST position. This function tests the control circuit auxiliaries without switching the main contacts. It is a simple alternative to a separately wired push button.

➲ General characteristics

- On load make and break power circuit applications.
- Double break by phase.
- Up to 200 kA Short Circuit rating.
- Touch safe covers.
- Compact Footprints.
- Front or side operation.
- Flange operation.
- NFPA 79 compliant kits.
- Voltage sensing terminals.

➲ Conformity to standards

- NFPA79 (2002 Edition)
- UL489, Guide WJAZ, file E255272 (Frame size 1 and 2)
- UL98, Guide WHTY, file E201138 (Frame sizes 3 to 8)
- CSA22.2 #5, Class 4652-06, file 112964 (Frame size 2)
- CSA22.2 #4, Class 4651-02 , file 112964 (Frame sizes 3 to 8)
- IEC 60947-3

➲ Customized solutions (1)

- Different gear box position
- Fuse blown detection

➲ FUSERBLOC UL - NFPA79 accessories

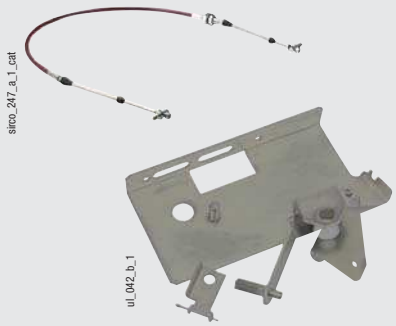
Flange handle for flange operation

Use
Meets both UL508A and NFPA79 requirements.
The handle will operate the switch by cable or rod.

Rating (A)	Type	Nema type	Reference
30 … 200	Standard handle	1, 3, 3R, 4, 12	3729 **9002**(1)
30 … 200	Chrome plated handle	1, 3, 3R, 4, 4X, 12	3729 **9003**(1)

(1) Defeatable handle.

Cable operator



Use
Link between the flange handle and the switch, please order the flange handle, the mechanism and a cable length of your choice.

Rating(A)	Description	Reference
30 ... 200 A	Cable flange mechanism	3729 **9903**

Cable lenght (inches)	Cable lenght (mm)	Reference
36	900	3729 **9992**
60	1500	3729 **9993**
120	3000	3729 **9994**

Rod operator

Use
Link between the flange handle and the switch. The rod flange is an economical solution, please order the flange handle and a rod kit.

External handle

S0 type handle

S1 type handle

S2 type handle

S3 type handle

Use

The locking function of the front external handle prevents the user from opening the door of the enclosure when the switch is in the "ON" position, and when the switch is padlocked in the “OFF” position (S1, S2, S3 and S4 type handles only).

Opening the door when the switch is in the "ON" position is possible by defeating the interlocking function with the use of a tool (authorized persons only).
The interlocking function is restored when the door is re-closed.

Shaft guide for external handle

acces_260_a_2_cat

Use

This accessory enables handle to engage shaft with a misalignment of up to 15 mm.
Required for a shaft length over 400 mm for S1 to S3 handles and for a shaft lenght from 320 mm for S0 handle.

Description	Reference
Shaft guide for S1 to S3 handles	1429 **0000**
Shaft guide for S0 handle	1419 **0000**

U type Auxiliary Contacts

acces_056_a_1_cat

Use

U type AC can be configured to be operated on both, standard and TEST position switches from CD 30 to 800 A. Each slot can accommodate up to 2 interlocked ACs.
- For CD 30A/CC, a maximum of 4 ACs (8 with an additional holder),
- For CD 30A/J, maximum 2 ACs (6 with an additional holder),
- For 30 to 200A/J, maximum 4 ACs,
- For 400 to 800A/L, maximum 8 ACs.

Electrical characteristics

A600.

For cylindrical fuses and high speed fuses (UR) 32 to 100 A

➲ Function

RM and **RMS** are modular fuse disconnect switches for cylindrical fuses. They provide safety disconnection and protection against overcurrents in any low voltage electrical circuit.
RM: fuse disconnect switches without signalisation (for fuses without striker).
RMS: fuse disconnect switches with pre-break position signalisation and fuse blown indication auxiliary contact.

➲ General characteristics

- Omnipolar and simultaneous breaking
- High dielectric strength.
- Modular DIN 45 mm cut-out.

➲ Photovoltaic applications

Consult us.

➲ Conformity to standards

- IEC 60269-2-1
- IEC 60269-1
- IEC 60269-2
- IS 14947-3
- NF EN 60269-1
- NF C 63-210
- NF C 63211
- VDE 0636-10
- DIN 43620

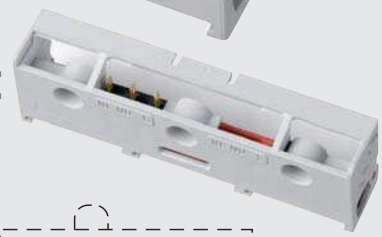
(1) The signalisation auxiliary contact provides the pre-break, fuse presence and also signals a blown fuse.

➲ Think about it

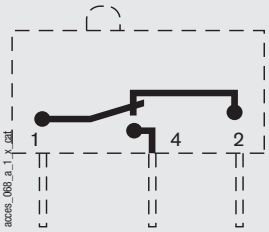
10x38 RMs equipped with 0.5A gG fuses provide effective protection for voltage inputs and auxiliary supplies for all our electronic devices (DIRIS, COUNTIS, ISOM, RESYS differential relays, etc.).

Auxiliary contacts

m_051_a



m_050_a



acces_068_a_1_x_cat

Use

- Pre-break, presence and fuse blown for RMS 50 and 100: 1 or 2 NO/NC auxiliary contacts
- Pre-break, presence and fuse blown for RMS 50 2 NO/NC auxiliary contacts.

Connection

By 6.35 mm fast-on terminal.

Modular fuse disconnect 10 x 38 for PV applications

➲ Functions

RM PV are unipolar or bipolar modular fuse disconnects without signalisation specially design for PV 10x38 cylindrical fuses.
They provide safety disconnection and protection against overcurrents in any low d.c. voltage photovoltaic applications.

➲ General characteristics

- Rated voltage of 1000 V d.c.
- Omnipolar and simultaneous breaking.
- High dielectric strength.
- Modular DIN 45 mm cut-out.
- Self-extinguishing thermoplastic material.
- High capacity connection.

➲ Conformity to standards

- IEC 60947-3
- IEC 60269-2-1
- IEC 60269-1
- IEC 60269-2
- IS 14947-3

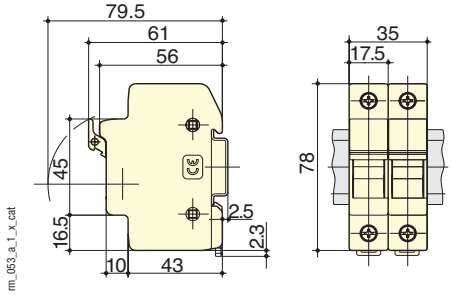
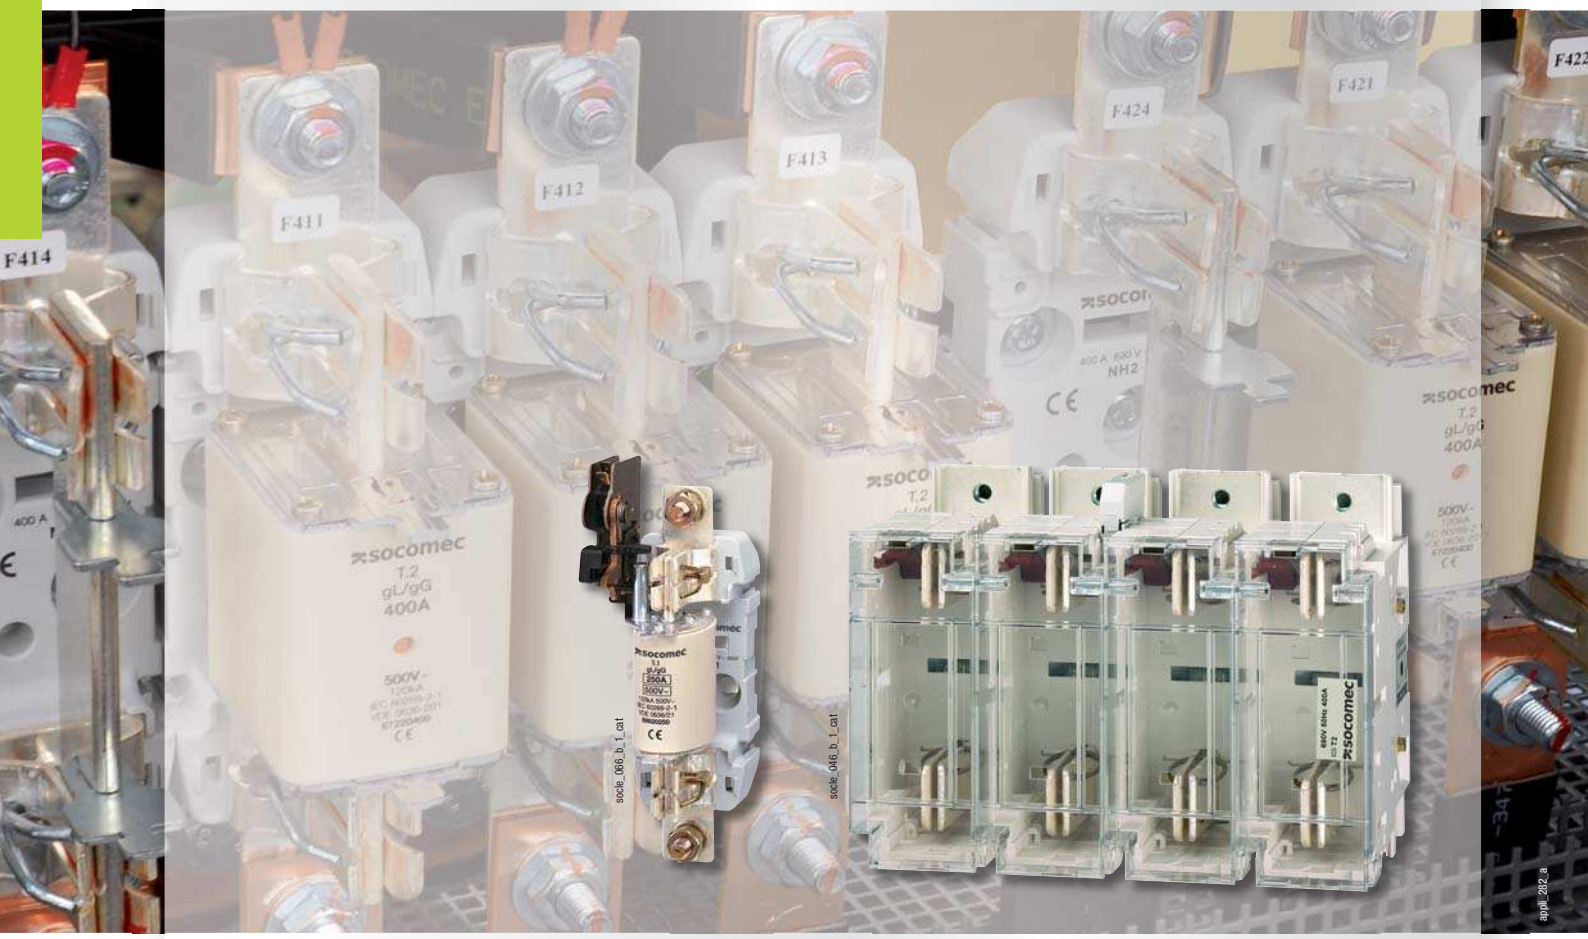
Dimensions



Fuse bases



For NH and high speed (UR) fuses 160 to 2500 A

➲ Function

SOCOMEC **fuse bases** provide fixed, unipolar or multipolar support for knife edge fuses.

➲ General characteristics

- High dielectric strength.

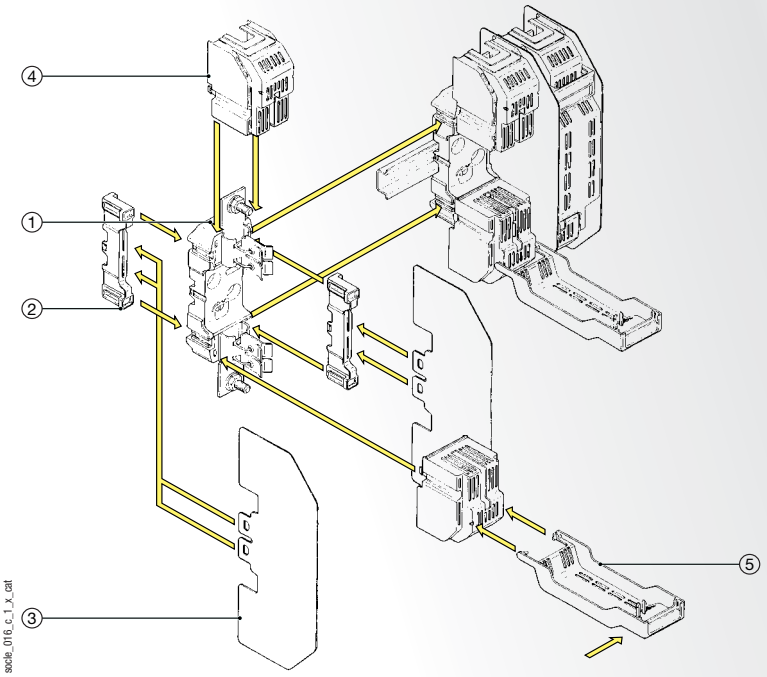
➲ Conformity to standards

- IEC 60269-1
- IEC 60269-2
- IEC 60269-2-1
- NF EN 60269-1
- NF C 63211
- VDE 0636-10
- DIN 43620

➲ Approvals and certifications(1)

- Bureau Véritas
- Lloyd's Register of Shipping

(1) Product reference on request.



1. Fuse bases
2. Connecting block:
- block for assembling unipolar bases T00, T0, T1, T2 and T3,
- screen support for phases T00, T0, T1, T2 and T3
3. Phase separation shield
4. Terminal shrouds (mandatory for mounting fuse covers)
5. Fuse cover (provides IP2 protection for any brand of fuse).

IP20 kit:
- unipolar = 2 connecting blocks + 2 phase separation shields + 2 terminal shrouds + 1 cover
- tripolar = 2 connecting blocks for the ends + 2 phase separation shields for the ends + 6 terminal shrouds + 3 covers.

Fuse bases for fuses with or without a striker from 160 to 630 A (U = 690 V)

BS88 industrial fuselinks

From 2 to 1250 A

➲ Function

SOCOMEC **industrial fuses** protect installations and people against overcurrents for any low voltage electrical circuit.

➲ General characteristics

Performance

- High breaking capacity 120 kA at 500 V, 80 kA at 690 V.
- High short-cicuit limitation capacity.
- Simple, reliable discrimination.

Reliability

Absolute protection over time guaranteed by the simplicity of manufacture and function (Joule effect).

Safety

The energy given off whilst eliminating the fault is contained within the cartridge.

➲ Conformity to standards

- IEC 60269-1
- IEC 60269-2
- IEC 60269-2-1
- NF EN 60269-1
- NF C 63-210
- NF C 63211
- VDE 0636-10
- DIN 43620

➲ Available on request

- EDF application: T2 fuses, in accordance with standard HN 63 - S20.
- 690 V knife-edge fuses.
- UL and CSA fuses for North American markets.

Distribution industrial fuselinks (type gG)

NFC and DIN industrial fuselinks

From 0.16 to 1250 A

➲ Function

SOCOMEC industrial fuses protect installations and people from overcurrents for any low voltage electrical circuit.

➲ Advantages

Performance

- High breaking capacity - 120 kA at 400/500 V, 80 kA at 690 V.
- High short-circuit limitation capacity.
- Simple, reliable discrimination.

Reliability

Absolute protection over time guaranteed by the simplicity of manufacture and function (Joule effect).

Safety

The energy given off whilst eliminating the fault is contained within the cartridge.

➲ Conformity to standards

- IEC 60269-1
- DIN EN 60269-1
- NF EN 60269-1
- IEC 60269-2
- NF EN 60269-2

➲ Approvals and certifications(1)

(1) Please consult us.

➲ Available on request

- EDF application: T2 fuses, in accordance with standard HN 63 - S20.
- British Standard (BS) fuses for UK markets.
- UL and CSA fuses for North-American markets.
- T00 and T4 fuses for 690 VAC.

Solid cylindrical link

fusib_123_a_1_cat

Use
Solid link to be used in conjunction with the neutral pole of cylindrical fused disconnecting switches.
3 sizes: 10 x 38, 14 x 51, 22 x 58.

Rating (A)	Size	To be ordered in multiples of	Reference

100	22 x 58	10	6039 **0000**

Solid links

fusib_124_a_1_cat

Use
Solid link to be used in conjunction with fuse bases or knife-edge fused disconnecting switches, generally fitted on the neutral pole. 6 sizes: 000/00C/00-0-1-2-3-4.

Rating (A)	Size	Tightening	Reference

Time/current operation characteristics

High speed fuses (UR)

From 10 to 2000 A

➲ Function

High speed fuses (UR)
protect power semi-conductors and DC circuits.

➲ General characteristics

- Very high breaking capacity: 300 kA
- Very high thermal and mechanical stress limitation.
- High resistance to cyclic loads.
- An auxiliary contact can be adapted for fuse blown indication.(DDMM).
- Following tests performed in its laboratory, SOCOMEC recommends FUSERBLOC or bases designed for UR fuses.

➲ Conformity to standards

- IEC 60269-1
- NF EN 60269-1
- IEC 60269-4
- NF EN 60269-4
- DIN EN 60269-4

➲ Approvals and certifications(1)

- UL "recognized"
- CSA

(1) Product reference on request.

➲ Available on request

- gR DIN 43620 fuses - Sizes 00 - 3.

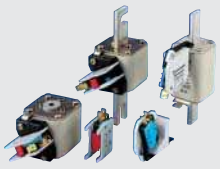
➲ High speed fuses (UR) - Accessories

Fuse blown auxiliary contact



fusib_051_a_1_cat

Connection
6.3 x 0.8 mm fast-on connection.

Electronics principle
A NO/NC auxiliary contacts detects that the fuse has blown.

References: see pages 248 to 253.

PV fuses 10 x 38 gR 1000 V d.c. for photovoltaic applications

➲ Function

SOCOMEC **PV fuses** protect the installation against the inverse over-currents which could occur in the photovoltaic installation.

➲ Advantages

Performance
- High breaking capacity at 1000 V d.c.
- The working range adjusted for small over-currents specific to PV installations.
- Simple, reliable discrimination.

Reliability
- Fuses are simple and totally sealed products which guarantee a long-term protection without any maintenance.

Safety
- The energy released during a short-circuit is contained within the sealed fuse cartridge.

➲ Conformity to standards

- IEC 60269-1
- IEC 60269-2
- IEC 60269-6
- NF EN 60269-1
- VDE 0636-10

➲ Approvals and certifications(1)

manne_490_a

➲ What you need to know

Used Characteristics

- I_{SC} : short circuit current of the PV string
- $I_{SC\ MAX}$: short circuit current of the PV string related to maximum sunlight density
- I_{RM} : maximum admitted reverse current
- I_n : fuse rating or fuse rated current (at 25°C in a RM disconnect switch)
- N_c : number of PV strings in parallel connection
- U_e : maximum fuse rated voltage
- $U_{OC\ MAX}$: maximum open circuit voltage in the lowest temperature conditions

When to protect

A PV string requires an over current protection when its own maximum admissible reverse current characteristic (Irm) is less than the current generated by the rest of the installation (current generated by the “Nc-1” other strings).
The protection is obligatory if $N_c \leq 1+ (I_{RM} / I_{SC})$

How to protect

The overload protection is to be applied at each of the two polarities, regardless of whether the d.c. installation is earthed or not.

➲ How to choose the fuse protection

Voltage

$U_e > U_{OC\ MAX}$

In the absence of complementary information use $U_{OC\ MAX} = 1.4\ U_{OC}$.

Fuse rating determination

Determination of the Fuse Rated Current consists of choosing a protection capable of:

- supporting without fusing the normal overload current during the periods of maximum sunlight density at the ambient temperature of the enclosure in which the fuse is installed

  $I_n > I_{SC\ MAX}$

  In the absence of complementary information use $I_{SC\ MAX} = 1.4\ I_{SC}$

- melting and reliably clearing the fault before the PV modules are damaged by the reverse current

  $I_n < I_{RM}$

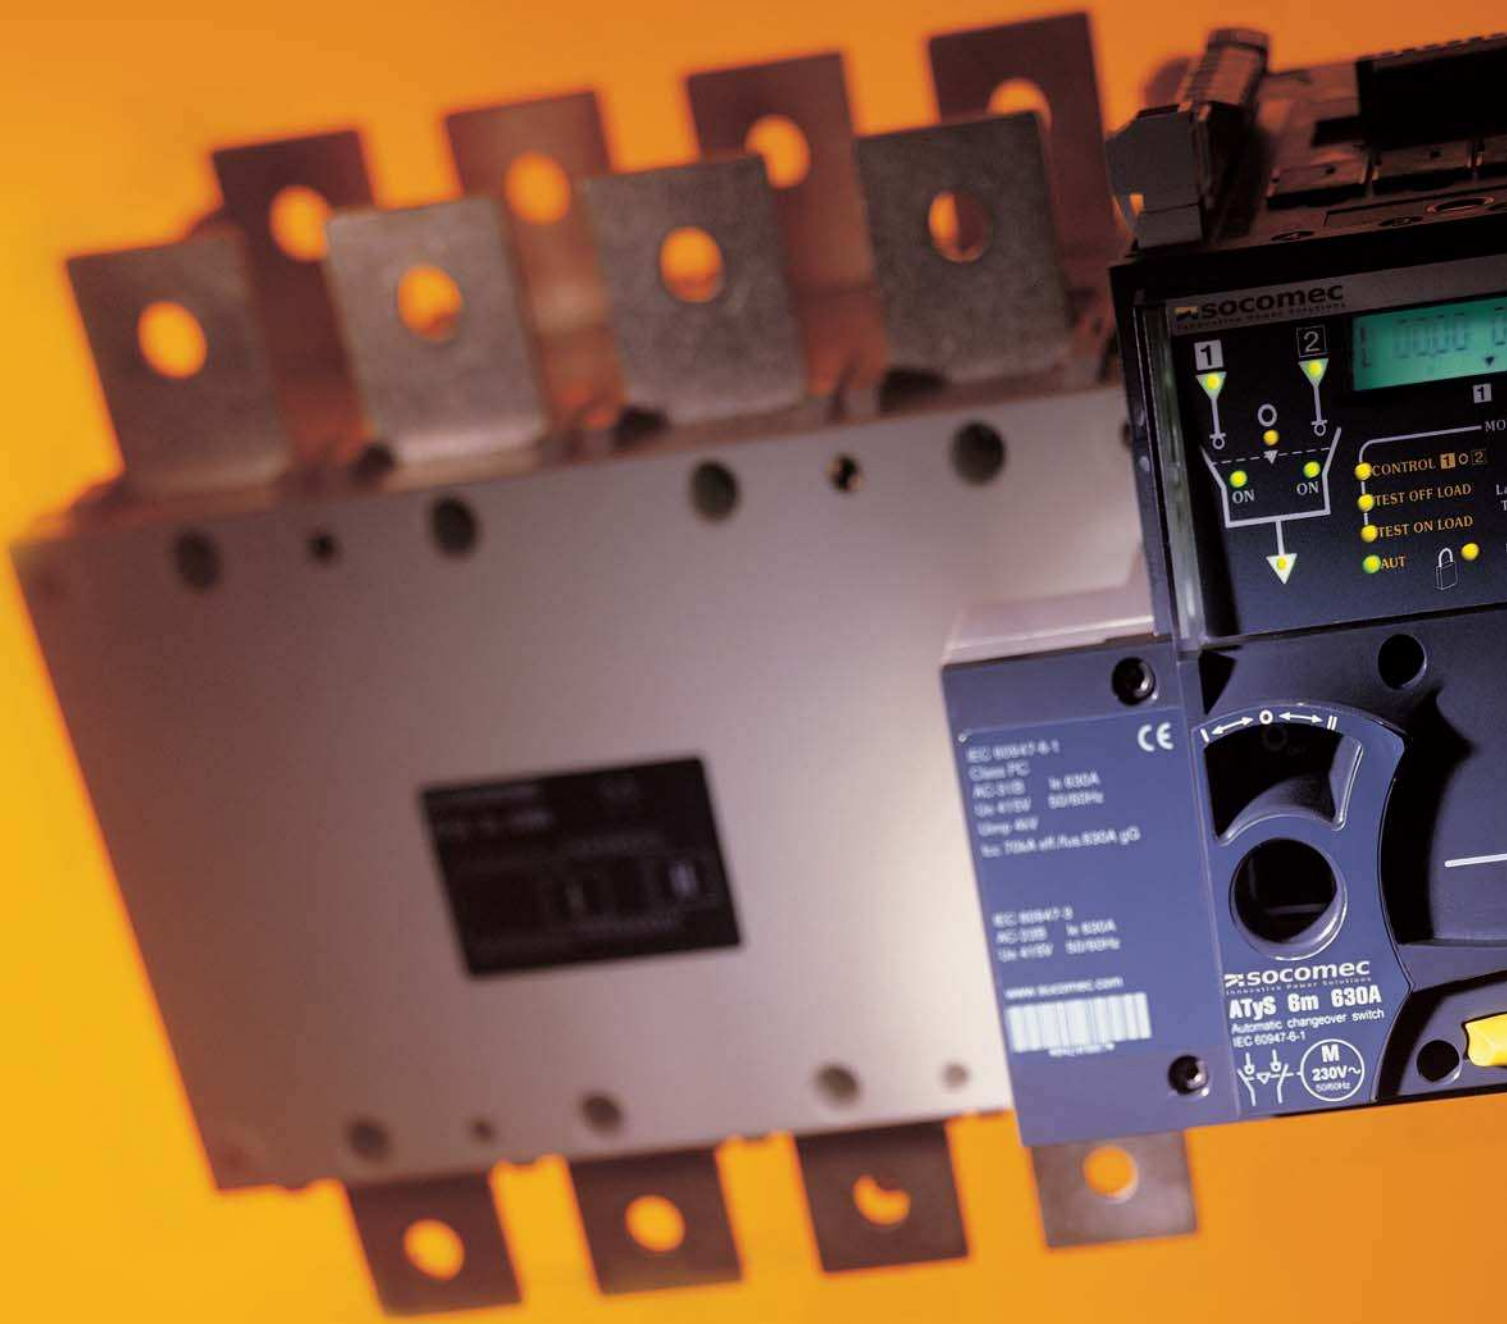
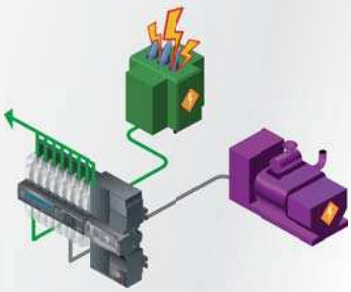
Changeover switches



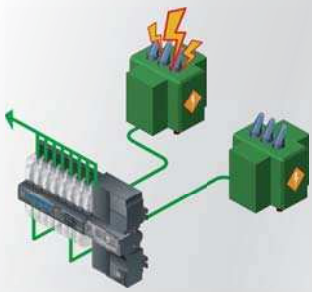
Switches, controller and monitoring software

Providing an unrivalled benchmark in source switching, SOCOMEC is continuously innovating to ensure ever more efficient ways to guarantee the continuity of distribution and, therefore, the rate of availability of your energy.

From the 'small' COMO C manual changeover switch to the ATyS 6 automatic changeover switch, the range of switches covers, as standard, a large proportion of needs.



ATyS M changeover switch for Normal/Backup use with a generating set



ATyS M changeover switch for Normal/Backup use with two networks

All these switches are also available enclosed.
Discover all of our products in our selection guide on the next pages.

The experience we have gained from different projects has led us to develop numerous special products (make before break contact or mixed pole motorised changeover switches, etc). Please do not hesitate to contact us for more details.
Trust the experts with all your applications - even the most critical!

➲ **A special requirement?**
SOCOMEC makes specific products. Please feel free to consult us.

Choosing the right changeover switch

SOCOMEC changeover switches can be used not just for Normal/Backup operation, but also for managing the switching of loads or the connection of equipment to earth.

In addition to the rating and the related electrical breaking specifications, the selection criteria are:

- type of control,
- visible breaking,
- installation constraints inside the enclosure.

Please do not hesitate to contact us for suggestions or any specific requirement: We adapt our products to your specific requirements.

➲ Products for all switching applications from 25 A to 3200 A

• Applications with 2 interlocked switches

Source transfer: manual or automatic switching (ATS) between two sources, either transformer or generating set *(fig. 1)*.

Earthing of equipment such as motors or electrical lines reserved for signalling, whilst isolating them from their power supply in a fail-safe way *(fig. 2)*.

Inversion of loads: switching of the power supply from one load to another load in order to ensure that they both age at an equal rate *(fig. 3)*.

Inversion of phases on motors: inversion of the succession of phases supplying a motor in order to modify the direction of rotation *(fig. 4)*.

• Application with 3 interlocked switches

UPS 'BY-PASS': isolation then bypassing of a secure UPS type power supply using 3 interlocked breaker switches assembled very close together *(fig. 5)*.

• Application with 4 interlocked switches

Solution 'ATS BY-PASS': upstream and downstream disconnection of an ATS function (automatic switching) while guaranteeing the continuity of the distribution via a 'BY-PASS' branch. Carried out using a single operating handle, this operation allows the ATS function to be separated for maintenance, in complete safety.

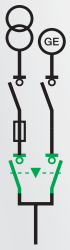

Fig.1

Fig. 2

Fig. 3

Fig. 4

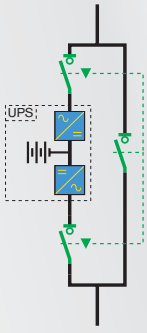

Fig. 5

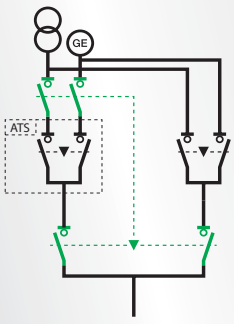

Fig. 6

Linked to a switching function, the bypass branch means it is still possible to select the sources in the event of a failure of one of them *(fig. 6)*.

Changeover Switches
SIRCO M

What you need to know

- The changeover switches SIRCO M can be equipped with 2 operating handles:
  - front direct handle
  - front external handle.

- Changeover SIRCO M is available in 3 and 4 poles, from 25 to 100 A, with pre-break or signalisation auxiliary contacts (accessories).

Changeover switches from 25 to 100 A

Function

SIRCO M Changeover Switches are 3 or 4 pole manually operated modular changeover switches.
They provide changeover, source inversion or switching under load between two low voltage power circuits, as well as their safety isolation.

General characteristics

- Fully visualised breaking.
- DIN rail mounting, panel or modular panel with 45 mm front cut out.
- IP20 accessories.
- Overlapping Changeover I-I+II-II available, see page 18.

Conformity to standards

- IEC 60947-3
- EN 60947-3

Changeover switches

SIRCO VM1

Visible breaking changeover switches from 63 to 125 A

➲ Function

SIRCO VM1 changeover switches are manually operated three or four pole changeover switches.
They provide changeover, source inversion or switching under load between two low voltage power circuits, as well as their safety isolation.

➲ General characteristics

- Safety isolation by fully visible double breaking.
- DIN rail mounting, panel or modular panel with 45 mm front cut out.
- IP20 devices and accessories.

➲ Conformity to standards

- IEC 60947-3
- IS 14947-3
- EN 60947-3
- VDE 0660-107 (1992)
- NBN EN 60947-3
- BS EN 60947-3

SIRCOVER and SIRCOVER BY-PASS

Changeover switches with fully visualised breaking from 125 to 3200 A

➲ Function

SIRCOVER products are manually operated multipolar changeover switches. They provide changeover, source inversion or switching under load between two low voltage power circuits, as well as their safety isolation.

SIRCOVER BY-PASS are manually operated changeover switches.
They are a combination of three interlocked switches enabling the use with 3 + 6 pole or 4 + 8 pole. They insulate by providing simultaneous safety isolation top and bottom and by passing loads of low voltage circuits mainly during maintenance operations.

➲ General characteristics

- 3 stable positions, (I, 0, II) or overlapping contacts (I, I+II, II), and on load changeover switching (AC-22 and AC-23).
- Fully visualized breaking.
- IP20 devices and accessories.

➲ Available on request

- Devices 6 or 8 pole
- Devices with over-sized neutral ex.: 3 x 250 A + N 400 A.
- Devices with advanced neutral.

➲ Conformity to standards

- IEC 60947-3
- IS 14947-3
- EN 60947-3
- VDE 0660-107 (1992)
- NBN EN 60947-3
- BS EN 60947-3

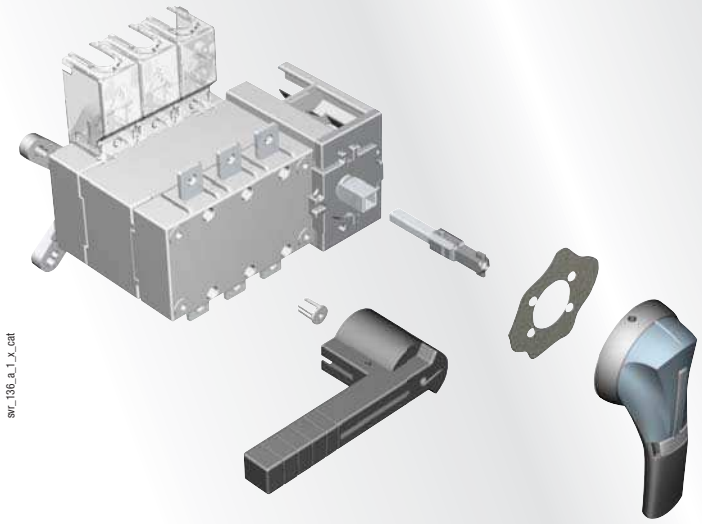
➲ Approvals and certifications(1)

- Bureau Véritas
- BBJ Poland (Attestaion of verification)

(1) Product reference on request.

What you need to know

- **SIRCOVER** with 3 stable positions (I, O, II) are 3 or 4 pole devices from 125 A to 3200 A. They are available enclosed in a steel or polyester enclosure from 125 to 1600 A.
- **SIRCOVER** with overlapping contacts (I-I+II-II) are 3 or 4 pole devices available from 125 to 1800A. They are available enclosed in a steel enclosure from 125 to 1600 A.
- **SIRCOVER BY-PASS** with 3 stable positions (I, O, II) are a combination of three interlocked switches enabling the use with 3+6 poles or 4+8 poles from 125 to 1600 A. They are available in steel enclosure from 125 to 1600 A and with overlapping contacts (I, I+II, II).
- **SIRCOVER** and **SIRCOVER BY-PASS** can be used with a direct or external handle.



- A connection kit for copper bars allows the link between the 2 connection terminals of one pole (fig 1 and 2) and the bridging of the upstream and downstream link for ratings 2000, 2500 and 3200A (fig 3).

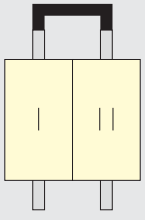
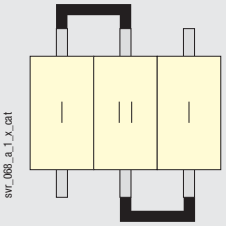
acces_041_a_1_cat



svr_124_a_1_cat

SIRCOVER BY-PASS

acces_208_a_2_cat



svr_068_a_1_x_cat

Use
Creation of a common link, on the top or bottom side of the switch, in order to feed load with either power supply I or/and II. For SIRCOVER BY-PASS, two sets of bridging bars are needed as the switch is composed of three basic switch frames.

Position I: 6 or 8 poles
Position II: 3 or 4 poles

Rating (A)	Section (mm)	Reference

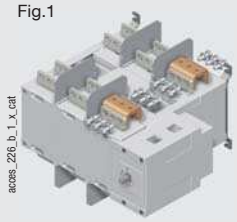
Copper bars connection kits for 2000 to 3200 A SIRCOVER

Fig.1



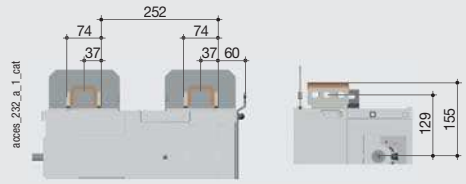


Fig. 2

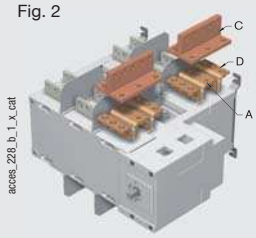

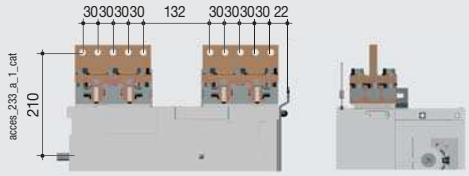

Fig. 3

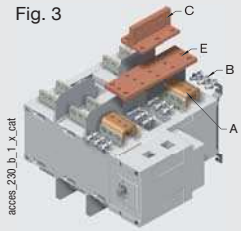

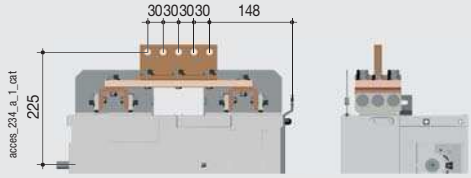

Use

Enables:
- To allow connection between the two power terminals from a same pole for 2000 to 3200A ratings (Fig. 1 and Fig 2).
- Top or bottom bridging connection (Fig. 3).

For 3200 A rating, the connection pieces (part A) are delivered bridged from factory. Bolt sets must be ordered separately.

Technical notice for these specific accessories is downloadable from www.socomec.com

Top or bottom flat connection - Fig. 1

2 000 ... 3 200	3 / 4 P	top / bottom	included

Inter phase barriers

acces_036_a_1_cat

Use
Safety isolating separation between the terminals, essential for use at 690 VAC or in a polluted or dusty atmosphere.
The terminal shrouds also provide phase separation from 125 to 630 A.

Rating (A)	No. of poles	Reference
125 … 200	3 P	2998 **0033**(1)
125 … 200	4 P	2998 **0034**(1)

Use

- using padlock (not supplied), this device is factory mounted in the direct or external operation handle and allows using up to 3 padlocks (Fig.1).
- Locking:
  - using lock (not supplied)
  - using undervoltage coil.

The interlocking positions are either determined as standard or configured by the user, removing pre-formed tabs.
Padlocking and locking can be combined.

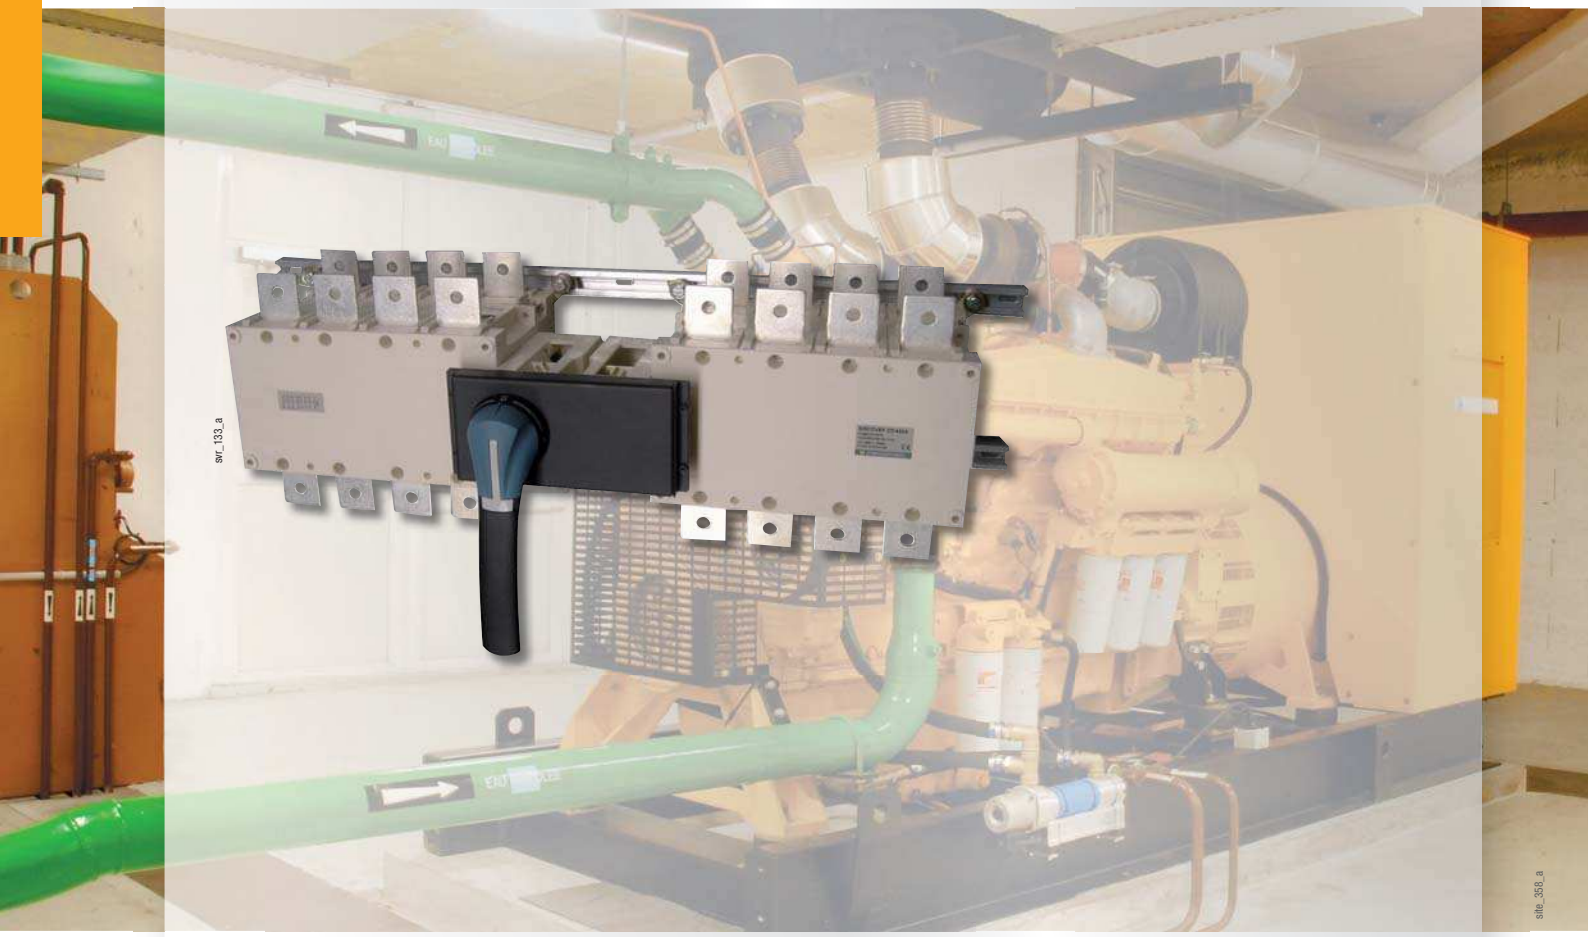
ATS BY-PASS



From 125 to 1600 A

➲ Function

ATS BY-PASS are designed to isolate ATS type electrical equipment (automatic transfer switch) without interrupting the load supply.
With the SOCOMEC **ATS BY-PASS** system, top and bottom isolation is achieved simultaneously.
Integrating a SOCOMEC changeover switch into the installation allows the source used for bypassing to be selected.

➲ General characteristics

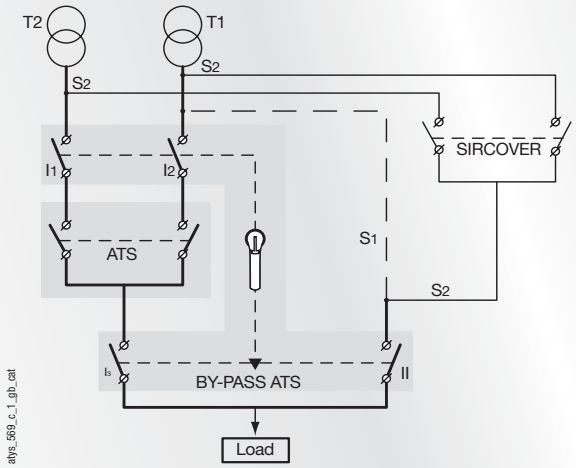
- From 125 to 1600 A.
- Available with 4 poles only.
- Manual operation.
- 3 stable positions (I, 0, II) and ease to switch from one to the other under load (AC-22).
- Fully visualized breaking.
- Mechanical interlocking.
- IP20 devices and accessories.
- Direct and external operation.

➲ Accessories

- Bridging bar.
- Auxiliary contact.
- Terminals protection screen.
- Terminal shrouds.
- Key handle interlocking system
- Different optional accessories are available.

➲ Conformity to standards

- IEC 60947-3
- S 14947-3
- EN 60947-3
- VDE 0660-107 (1992)
- NBN EN 60947-3
- BS EN 60947-3



Operating principle

- Without SIRCOVER: load is supplied by one of the two power sources (transformer T1 for example).
- With a SIRCOVER: the source to be used for the supply during BYPASS can be selected.

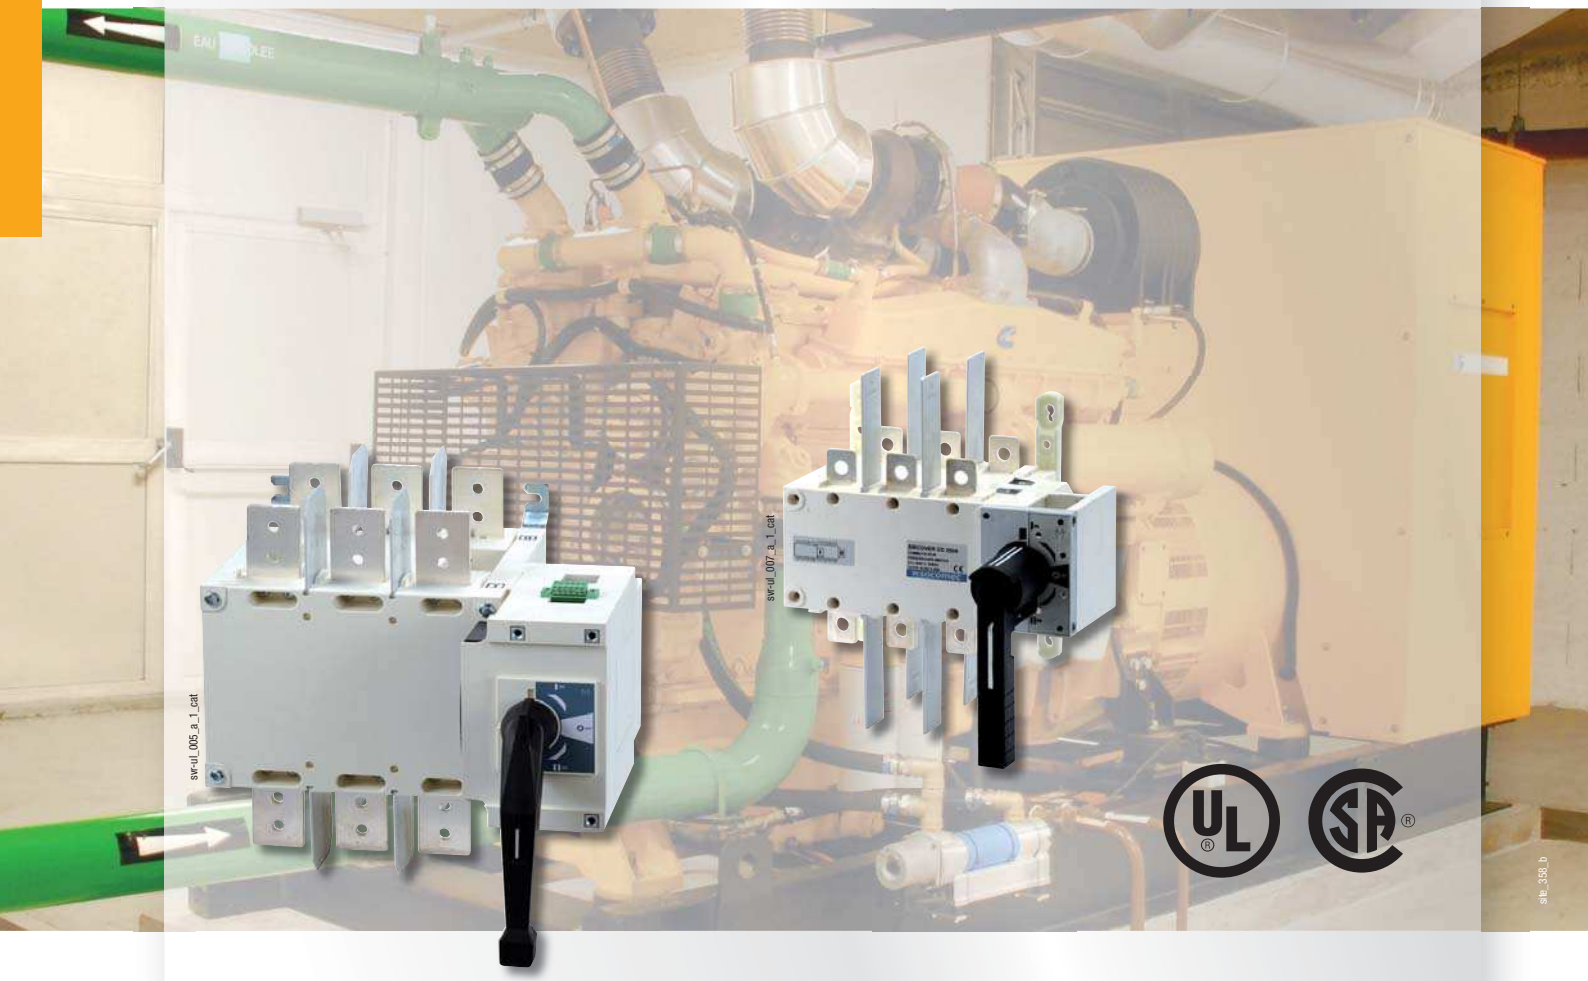
SIRCOVER UL



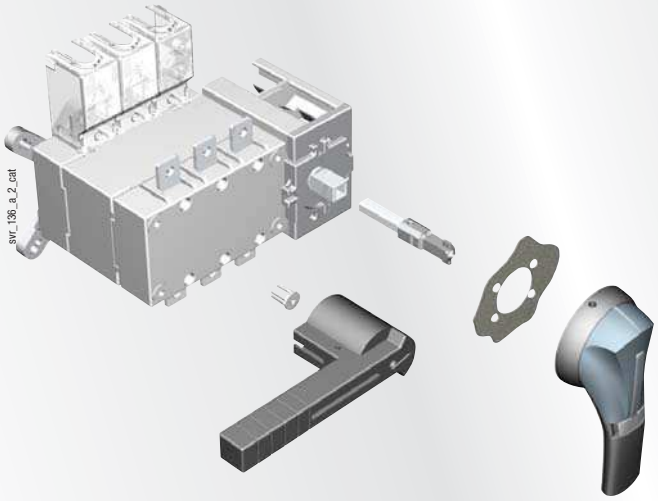
100 to 1200 A

➲ Function

SIRCOVER are heavy duty manual transfer switches. They ensure switching transfer of sources or transfer of two low voltage circuits on load as well as their safety disconnection.
These switches are extremely durable and are tested and approved for use in the most demanding applications as resitive load or total system applications.

➲ General characteristics

- 3 stable positions (I, 0, II).
- On load switching.
- Direct or external handle.
- 480VAC total system.
- 600VAC resistive load.
- Back to back construction compact foot print



➲ Conformity to standards

- UL98, Guide WHTY, file 201138
- UL1008, Guide WPYV, file 317092
- CSA 22.2#4, Class 4651-02
- IEC 60947-3

(1) New range, all ratings are UL98 certified, ratings 100A, 200A and 400A will by UL 1008 certified from January 2011.
For MTS, from 100A to 400A UL 1008 certified, see our website.
(2) Padlockable in all 3 positions.

Direct handle

Rating (A)	Colour	Handle type	Reference
100 ... 400	Black	1 lever	4199 **4012**
600	Black	2 lever	4199 **7012**
800 ... 1250	Black	2 lever	4199 **7062**

External handle

Use

The handle interlocking function prevents the user from opening the door of the enclosure when the switch is in the "ON" position.
Opening the door when the switch is in the "ON" position is possible by defeating the interlocking function with the use of a tool (authorized persons only).
The interlocking function is restored when the door is re-closed.

From 40 to 160 A

➲ Function

The **ATyS M**, dedicated to applications below 160A, enables the switching On Load of single or three phase sources in remote or automatic mode.
This Transfer Switching Equipment (TSE) is designed to be used in low voltage power systems for Open Transition Transfer applications.
This Transfer Switching Equipment (TSE) is composed of two mechanically and electrically interlocked switches.

- The **ATyS M 3** (RTSE) is driven by volt-free dry contacts allowing switching operation between position I, 0, II, from an external control logic or a PLC (control relay type ATyS C30).
- The **ATyS M 6** (ATSE) is dedicated to break before make automatic transfer applications. The ATyS M 6 integrates control relays, timers and test functions to manage a Normal/Backup switching operation between two networks or between a generator set and a network.

➲ General characteristics

- Isolation with positive break indication.
- On load switching.
- Manual emergency operation.
- 3 stable positions.(I, 0, II).
- Padlocking in 0 or in all three positions (I, 0, II).
- AUTO / MANU selector.
- Command of the device in 0 position thanks to the energy storage device (ATyS M 6e).
- Single phase or three phase control on networks I and II (ATyS M 6s and M 6e).
- Electrical measurements (ATyS M 6e).

➲ Conformity to standards

- IEC 60947-3
- IS 14947-3
- EN 60947-3
- NBN EN 60947-3
- BS EN 60947-3
- GB 14048
- IEC 60947-6-1
- EN 60947-6-1
- NBN EN 60947-6-1
- BS EN 60947-6-1
- VDE 0660-107

Emergency manual operation

AUT/ MAN sealable cover

What you need to know

• On ATyS M 3s model

Power supply

Single-phase interface Three-phase interface

ATyS M 3s is equipped with two independent 230 VAC (176-288 VAC), 50/60 Hz (45/65-65 Hz) power inputs.

These two supplies can be connected individually to switch I and switch II:
- Power supply I must be available to reach position I,
- Power supply II must be available to reach position II.

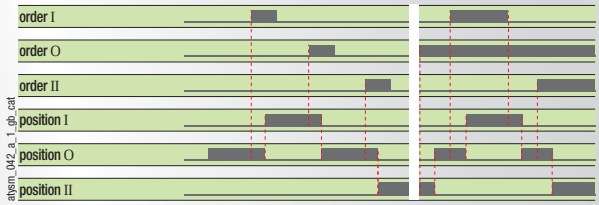
The 0 position is a stable transition position.
The use of a double power supply module (DPS) or an external supply enables the full security of the 3 position commands in all circumstances (from the available source). In this case, both supply inputs of the ATyS M 3s must be connected in parallel in order for them both to be supplied from the output of the DPS.

Electrical control

The switching operation can be driven by an external volt free contact coming from an external control relay (ATyS C30 for example).The positions are stable in case of loss of supply. There are two types of command logic to chose from: impulse or contactor.

• Impulse logic
- A switching command of at least 60 ms is necessary to initiate operation.
- Orders I and II have priority over order 0.
- Order 0 must be maintained (joint connection 317).

• Contactor logic
- If command I or II disappears, the device returns to zero position, if power supply is available.
- The first command (order) received (I or II) has priority as long as it remains present.



• On ATyS M 6s and 6e models

Power supply

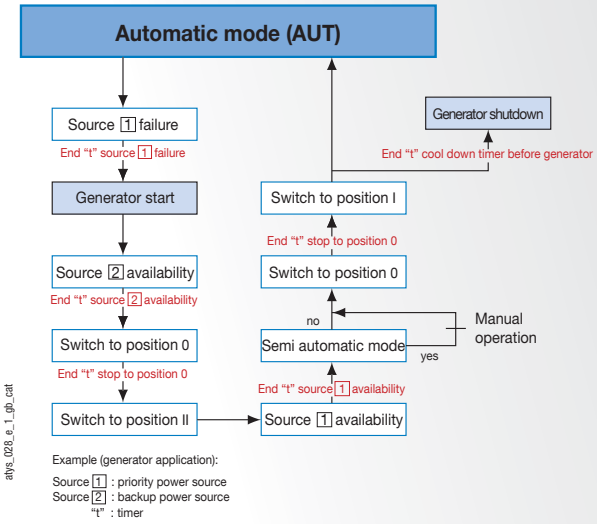
ATyS M 6 products are self power supplied from incoming supplies: 230 VAC (176-288 VAC for the ATyS M 6s and 160-305 VAC for the ATyS M 6e), 50/60 Hz (45-65 Hz).
For three phase products: two different versions are available:
- 230 / 400 VAC with neutral conductor distributed: product is power supplied between phase and neutral,
- 127 / 230 VAC with or without neutral conductor distributed: product is power supplied between 2 phases.

For single phase products: one version is available:
- 230 VAC networks: product is power supplied between phase and neutral,

The neutral conductor can be connected to the left or right side of the switch.

Automatic control

The ATyS M 6e and M 6s are equipped with a sequence logic.



Configuration

ATyS M 6s

Single-phase interface Three phase interface

Common points between the three-phase and single-phase versions:
- 2 potentiometers (Sector loss and return time delays)
- 2 dip-switches (Pause for 2 seconds in position 0 during the transitions I<->II ; Network-Network Application or Network-Genset).
- 4 LED's (Supplies status; Automatic mode; Fault)
- 3 inputs for external control (Inhibition of the automatic mode; Remote Test on load; Manual retransfer from standby supply to normal supply).
- 1 NO bi-stable output relay for generator start /stop command (30 VDC / 2 A).
- 1 NC relay for product availability (250 VAC / 0.5 A).

Three phase ATyS M specificities:
- 2 potentiometers (Nominal voltage; Voltage thresholds)
- 2 dip switches (50 or 60 Hz; Network)

Specificity of the single phase ATyS M:
- PRG button: automatic voltage and nominal frequency programmation.

ATyS M 6e

Three phase interface

- 4 applications: Network/Genset, Network/Network, With or without priority.
- Adjustable thresholds and hysteresis.
- Display + keyboard (Programming of the values; Visualization of the electrical readings; Test and control positions function; Visualization of the availability of supplies).
- LED's (Product Power On; Supplies status; Position of the switch status; Automatic mode TEST/CONTROL Mode; Fault)
- 3 configurable inputs for external control (Automatic mode inhibition; Test on load and off load; Manual retransfer; Electrical control of the switch in positions I, 0 or II; Change of priority network...).
- 3 NO output relays (250 VAC / 3 A) , configurable (Availability of the supplies; Auxiliary position contacts; Load shedding control; Operational product...)
- 1 configurable bi-stable output relay for generator start /stop command (30 VDC / 2 A).
- Connection of a remote interface ATyS D10 or D20.
- A version with RS485 Communication, JBUS/Modbus protocol, is available.

➲ Services & Technical Assistance

Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

From 125 to 3200 A

➲ Function

The **ATyS** dedicated to applications from 125A, enables the switching On Load three phase sources in remote or automatic mode.
This Transfer Switching Equipment (TSE) is designed to be used in low voltage power systems for Open Transition Transfer applications.
This Transfer Switching Equipment (TSE) is composed of two mechanically and electrically interlocked switches.

- The **ATyS 3 (RTSE)** is driven by volt-free dry contacts allowing switching operation between position I, 0, II, from an external control logic or a PLC (control relays type ATyS C30).
- The **ATyS 6 (ATSE)** is dedicated to break before make automatic transfer applications. The ATyS 6 integrates control relays, timers and test functions to manage a Normal/ Backup switching operation between two networks or between a generator set and a network.

➲ General characteristics

- Fully visible breaking.
- On load switching.
- Manual emergency operation.
- 3 stable positions (I, 0, II), overlapping contacts on request (I, I+II, II).
- Padlocking in 0 position (I and II optional).
- AUTO / MANU selector.
- Single phase or three phase control on networks I and II (ATyS 6e and 6m).
- Electrical measurements (ATyS 6e and 6m).
- Measure of I, P, Q, S and PF (ATyS 6m).
- Configurable Control Logic.
- Possibility of inhibition of the electrical control (ATyS 3e).
- Optional communication and inputs/outputs modules (ATyS 3e and ATyS 6).

➲ Conformity to standards

- IEC 60947-3
- IS 14947-3
- EN 60947-3
- NBN EN 60947-3
- BS EN 60947-3

AUT/MAN command

Emergency manual operation

Padlocking facility

What you need to know

• On ATyS 3s and 3e models

Operation

ATyS 3s

ATyS M 3s is equipped with one 230VAC power input (176-288 VAC), 50/60 Hz (45/65 Hz).

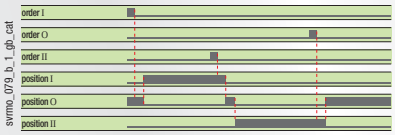
ATyS 3e

ATyS 3e is equipped with 2 power inputs: one for power source 1 & the other one as backup power source 2.
It allows the product to be electrically controlled in the 3 positions with only one of the supplies present.

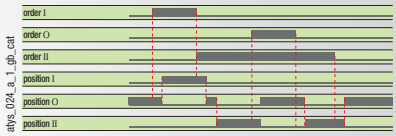
Electrical control

• General
- The switching operation can be driven by an external dry contact.
- On ATyS 3e, it is possible to inhibit the electrical control (dry contact closed between terminal n° 313 and 317).
- The first order received has priority as long as it is present. A zero command has always priority, excepted in case of controls inhibition.

• Pulse logic
- The switching command is a pulsed dry contact (100ms minimum).
- When the order disappears, the product remains in position. The impulse can be of infinite duration without causing any disturbance.



• Contactor logic
- The transfer command is a maintained dry contact.
- If command I or II disappears, the device returns to zero position, if power supply is available.
- A 0 command drives the device into zero position, irrespective of the status of the I and II commands.



• On ATyS 6e and 6m models

Operation

ATyS 6e

ATyS 6m

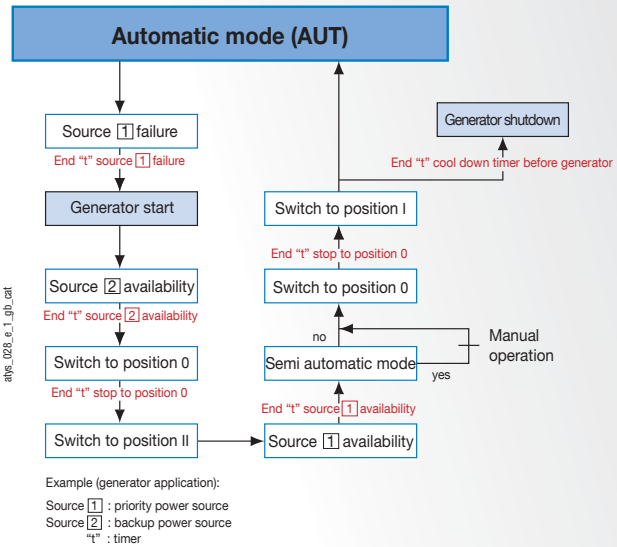
ATyS 6e and 6m are equipped with 2 power inputs (same as ATyS 3e): one for power source 1 & the other one as backup power source 2.
It allows the product to be electrically controlled in the 3 positions with only one of the supplies present.

Characteristics

- Single phase or three phase control on networks I and II.
- Independent adjustable over/undervoltage and over/underfrequency thresholds: +/- 20 % of the nominal value.
- Adjustable hysteresis thresholds linked to the threshold values.
- Control of phase rotation
- Measure (3U and frequency on network 1 and 2 ; ATyS 6e and 6m N/E cycle delay; 3I, In, P, Q, S, PF - 3 phases only on ATyS 6m).
- Display + keyboard (adjustment of all threshold parameters; adjustment of MFT, DTT, OMF, MRT, OMR and CDT Visualization of electrical values; Test functions and position control functions;
- LED's (Product Power On; Status of the electrical sources; Position of the switch status; "/AUT" mode; TEST/CONTROL mode and default.
- 1 configurable bistable output relay for generator start/stop command.(30 VDC, 5 A, AC1).
- 1NO fault relay activated in case of changeover position ordered and not reached (30 VDC, 5 A, AC1).

Automatic Control

The ATyS 6e and 6m are equipped with a sequence logic.



Example (generator application):
Source 1 : priority power source
Source 2 : backup power source
"t" : timer

• Control modes
- Test On Load: This test simulates a loss of priority source. The complete automatic sequence is then followed.
Can be activated from the keypad of the product or remotely from an external dry contact.
- Test Off-Load: This test will start and stop the generator without load transfer. Can be activated from the keypad of the product.
- Control of position I, 0, II: Allows the selection of the position of the product; the Automatic mode is inhibited. Can be activated from the keypad of the product or remotely from a external dry contact.
- Manual retransfer (Semi automatic): When this parameter is programmed, the switching back to the main must be acknowledge on the keypad of the product or through the contact of an optional Input/output module.

Other products

Make before break motorised changeover switch (overlapping contact).

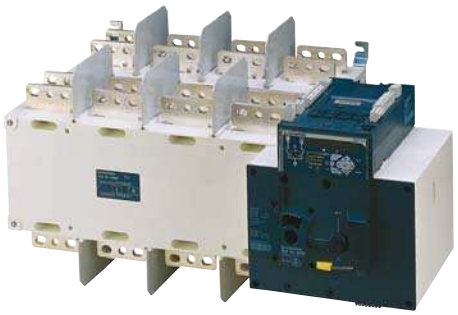
ats_003_a_1_cat

Function
They provide switching, uninterrupted low voltage source inversion and safety isolation. They are intended to be coupled with a UPS (I, I+II, II).

General characteristics
- For ratings from 125 to 1800 A, 3 and 4 pole.
- 3 stable positions (I - I+II - II).
- Automatic on-load switching and source changeover without interruption with a UPS.
- Manual emergency operation.
- Padlocking in 3 positions.

Consult us

Motorised mixed pole changeover switches



ats_725_a_1_cat

Function
They provide switching and source inversion for low voltage sources of different power ratings.

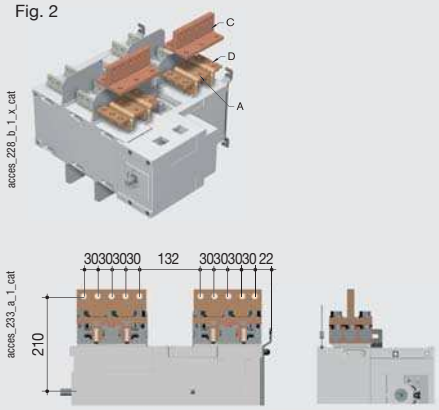

Fig. 3

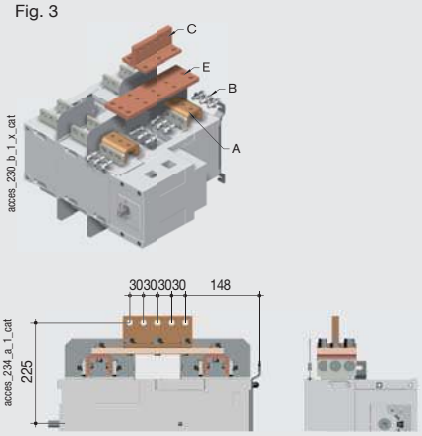

Use

Enables:
- Connection between the two power terminals from the same pole for 2000 to 3200 A ratings (Fig. 1 and Fig 2).
- Top or bottom bridging connection (Fig. 3).

For 3200 A rating, the connection piece (part A) are delivered bridged from factory.
Bolt sets must be ordered separately.
Technical notice for these specific accessories can be download from www.socomec.com

(1) Example for 3 pole device equipped upstream only: order 3 times the indicated quantities.
(2) Bolt set is provided with the accessories.

Control voltage transformer

Use

Enables a 230 VAC device to be supplied with 400 VAC.

Rating (A)	Reference
125 … 630	1599 **4063**
800 … 1800	1599 **4120**
2000 … 3200	1599 **4200**

DC power supply

Use

Allows standard ATyS 3 or ATyS 6 to be DC power supplied.
To be positioned as close as possible to DC power supply source.

Rating (A)	Operating voltage	Reference
125 … 1800	12 VDC / 230 VAC	1599 **5012**
125 … 1800	24 VDC / 230 VAC	1599 **5112**

Mounting spacers

atys_009_a_2_cat

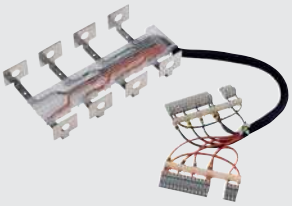
Use
Raises the device's terminals 10mm away from the bottom of the enclosure or frame on which the device is mounted.

This may also be used to replace the original mounting spacers.

Rating (A)	Description of accessories	Reference
125 … 630	1 set of 2 spacers	1509 **0001**

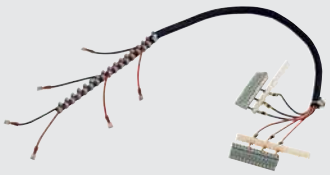
Voltage sensing and power supply kit

From 125 to 630 A.



atys_606_a_1_cat

From 800 to 3200 A.



atys_603_a_2_cat

Use
For ATyS 6 power supply and voltage measurement (4 wires, three phase). Routing of the conductors is controlled, which means that no specific protective device is necessary for these connections.

The kit can be fitted on the top or bottom of the switch.
Note: the 3-pole version does not integrate the power supply.

Plug-in optional modules

atys_016_a_1_cat

Use

N°1 - communication module
Control and state feedback of the changeover switch via a 2 or 3-wire RS485 link with JBUS/MODBUS protocol® and transmission speed up to 38 400 baud.

No. 2 - module with 2 inputs / 2 outputs
- On ATyS 3e
  - 2 inputs: changeover control + backup network availability;
  - 2 outputs:a load shedder relay + fault relay.
- On ATyS 6e and 6m, 2 inputs / 2 programmable outputs.

Description of accessories	Reference
RS485 MODBUS (N°1)	1599 **2000**
2 inputs/2 outputs (N°2)	1599 **2001**

Terminal shrouds

acces_206_a_2_cat

Use
Protection IP2X against direct contact with terminals or connecting parts.

Advantages
Perforations allowing remote thermographic inspection without removal.

Rating (A)	No. of poles	Position	Reference
125 … 160	3 P	top / bottom / front (I) / rear (II)	2694 **3014**(1)(2)
125 … 160	4 P	top / bottom / front (I) / rear (II)	2694 **4014**(1)(2)

250 … 400	4 P	top / bottom / front (I) / rear (II)	2694 **4021**(1)(2)
630	3 P	top / bottom / front (I) / rear (II)	2694 **3051**(1)(2)
630	4 P	top / bottom / front (I) / rear (II)	2694 **4051**(1)(2)

(1) To shroud front switch top and bottom 2 references required.
(2) To fully shroud front, rear, top and bottom 4 references required.

Terminal screens

acces_207_a_2_cat

Use
Top or bottom protection against direct contact with terminals or connection parts.

Rating (A)	No. of poles	Position	Reference

Auxiliary contacts

acces_065_a_1_cat

Use
Pre breaking and signalling of positions I and II: 1 extra NO / NC auxiliary contact in each position (factory fitted).
Low level auxiliary contacts : Consult us.

For ATyS 3s

Rating (A)	Reference
125 … 630	1599 **1002**
800 … 1800	1599 **1032**

For ATyS 3e, 6e and 6m

Rating (A)	Reference

800 … 1600	1599 **0032**
2000 … 3200	included

Padlocking in the 3 positions I-0-II

atys_125_a_1_cat

Use
Allows padlocking of the operation in the 3 positions I, 0 and II (factory fitted).

Rating (A)	Reference
125 … 630	1599 **0003**
800 … 3200	1599 **0004**

Key handle interlocking accessories

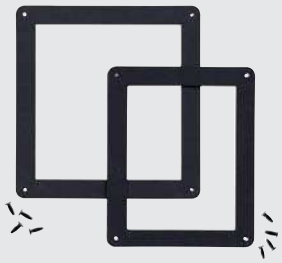
atys_101_a_1_cat

Use
Locking the electrical control and the backup control in position 0 using a RONIS EL11AP lock (factory fitted).

As standard, locking in position 0.
Optional padlocking in 3 positions:
Locking in position I, 0 or II

Rating (A)	Reference
125 … 630	1509 **1006**
800 … 3200	1509 **1004**

Door protective surround



Use
Door finishing surround for protecting ATyS application.

For ATyS 3s

Rating (A)	Reference
125 … 630	1529 **0012**

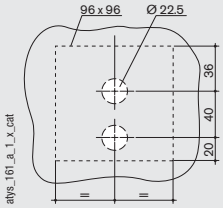
800 … 3200	1539 **0080**

Remote control interfaces for ATyS 6e, 6m and C30

Interfaces are self powered from the ATyS.

Drillings



Use
To display source availability and changeover state on the front of a panel. Interfaces are self powered from the ATyS.
Maximum connection distance: 3 m.

ATyS D10
To display source availability and changeover state on the cabinet front panel.
Protection degree: IP21.

ATyS D20
In addition to the ATyS D10 allows displays, operation and configuration on the cabinet front panel.
Protection degree: IP21.

Door mounting
2 holes Ø 22.5. ATyS connection via RJ45 cable, not isolated.

Cable not provided.

Description of accessories	Reference
ATyS D10	1599 **2010**
ATyS D20	1599 **2020**

Connecting cable for remote interfaces

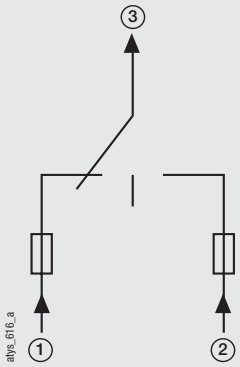
Use
To connect between a remote interface (D10 or D20) and a control product (C30 or ATyS 6e or 6m).

Characteristics
RJ45 8 straight non insulated wires, length 3m.

For ATyS 6e, 6m and C30

Type	Length	Reference
RJ45 cable	3 m	1599 **2009**

Double power supply - DPS



1 and 2. Input
3. Output

Use
Allows an ATyS 3s to be supplied by two 230 VAC 50/60Hz networks.

Input
- The input is considered as “active” from 200 VAC.
- Maximum voltage: 288 VAC.
- Internal protection: fuse protected 3.15 A
- Terminal connections: max. 6 mm².
- Modular device: 4 modules width.

Input 1	Input 2	Output
230 VAC	0 VAC	230 VAC (Input 1)
0 VAC	230 VAC	230 VAC (Input 2)
230 VAC	230 VAC	230 VAC (Input 1)
0 VAC	0 VAC	0 VAC

Description of accessories	Reference

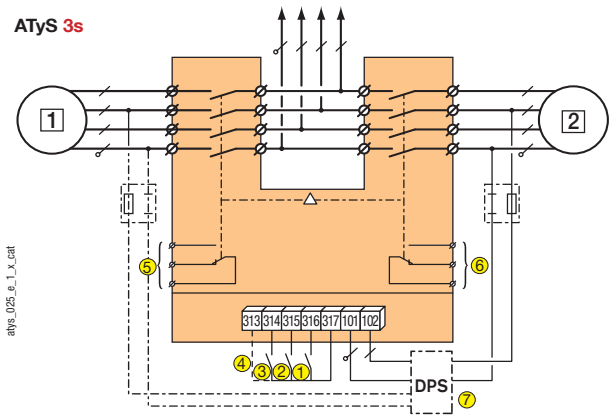
Terminals and connections

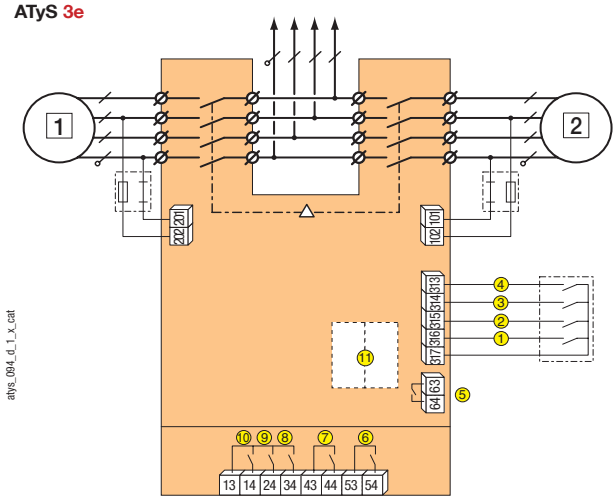
ATyS 3s



1 preferred source
2 alternate source

1: control position 0
2: control position I
3: control position II
4: configuration of the control logic
5: NO/NC position and prebreaking contact for position I
6: NO/NC position and prebreaking contact for position II
7: Double Power Supply (accessory)

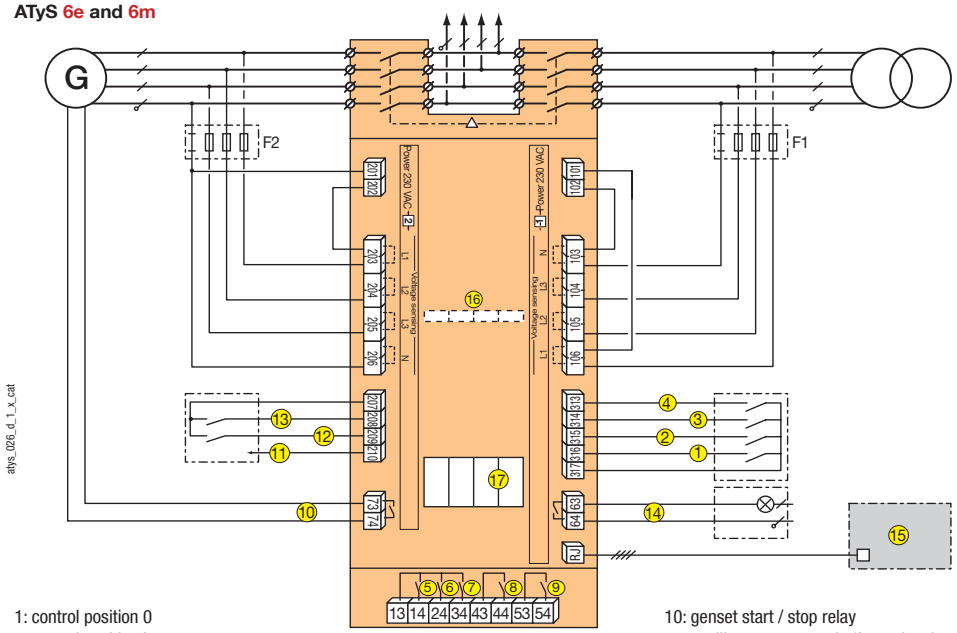
ATyS 3e



1 preferred source
2 alternate source

1: control position 0
2: control position I
3: control position II
4: inhibition of the control position
5: fault relays
6: auxiliary contact, closed when the switch is padlocked
7: auxiliary contact, closed when the switch is in “AUT” mode
8: auxiliary contact, closed when the switch is in position 0
9: auxiliary contact, closed when the switch is in position II
10: auxiliary contact, closed when the switch is in position I
11: slots for optional modules

ATyS 6e and 6m



1: control position 0
2: control position I
3: control position II
4: remote command
5: auxiliary contact, closed when the switch is in position I
6: auxiliary contact, closed when the switch is in position II
7: auxiliary contact, closed when the switch is in position 0
8: auxiliary contact, closed when the switch is in “AUT” mode
9: auxiliary contact, closed when the switch is padlocked
10: genset start / stop relay
11: auxiliary power supply (for optional modules control)
12: remote “test on-load ”input
13: DTT inhibit input. Transfer initiated as soon as the input is closed when DTT = max. value.
14: fault relay
15: remote control interface
16: current transformers (ATyS 6m only
17: slots for optional modules

➲ ATyS - Dimensions

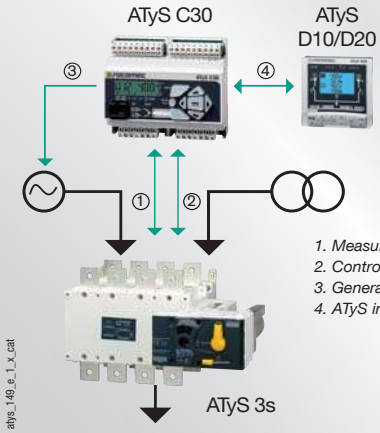
- IEC 61000-4-11
- IEC 60068-2-6
- IEC 60068-2-11
- IEC 60068-2-30

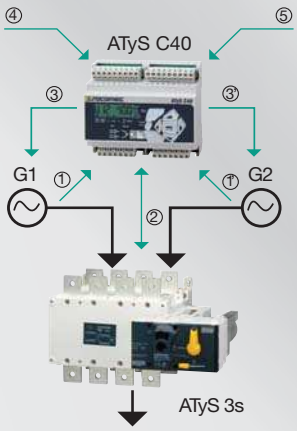
➲ Applications

ATyS C30



1. Measurement and power supply
2. Control and position information feedback
3. Generating set "start/stop"
4. ATyS interface connection

ATyS C40



1 and 1'. U+F metering for each group
2. Control and position information feedback
3 and 3'. Generating set "start/stop" control
4. External "start/stop" command for basic cycle
5. DC power supply

General characteristics

- Modular design (6 modules).
- DIN rail mounting.
- 2 output relays for changeover control.

ATyS C30

- ATyS D10 or D20 connection.
- Inputs for auxiliary position contacts.
- Metering 3U on network 1.
- Metering 1U on network 2.
- 2 programmable inputs for the following functions: test, loss of a network, remote starting/stopping.
- 2 programmable inputs for the following functions: information transfer, circuit breaker control.

ATyS C40

- Dual gensets controller with a redundant genset application cycle (basic cycle).
- Single phase sensing on Gen1 & Gen 2.
- 3 programmable inputs for the following functions: test, loss of a network, remote starting/stopping.
- 1 programmable input for the following functions: information transfer, circuit breaker control.
- 2 start Gen contacts (Gen1 & Gen2).

Energy efficiency

From sensors to supervision: complete solutions for monitoring power distribution

➲ **You want to design and put in place a system for…**

- **monitoring an electrical installation**
  SOCOMEC offers a complete solution from the measuring sensor to the monitoring software. We offer a wide range of digital and analogue indicators (single or multifunction) to meet all your needs.
  See our selection guide p. 330

- **energy management**
  More than 15 years ago, SOCOMEC developed DIRIS, a complete system designed to run high and low voltage electrical networks, whilst ensuring the measurement and monitoring of electrical values, the metering and management of energy (electricity, water, gas, etc.), the remote control and checking of devices and the protection of networks.
  See our selection guide p. 331

- **Power quality management**
  The DIRIS N300 and N600 are 2 high-precision products (class 0.2) which provide quality measurement functions.
  See our selection guide p. 331

➲ **Services & Technical Assistance: second nature!**
When different parts of a supply system interconnect, it brings together technical areas which don't always see things the same. SOCOMEC's multidisciplinary expertise guarantees optimal commissioning and use of the proposed solutions ***(see following pages)***.

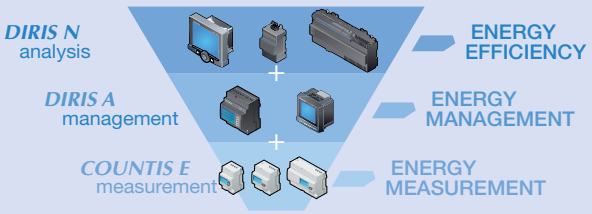
Range overview

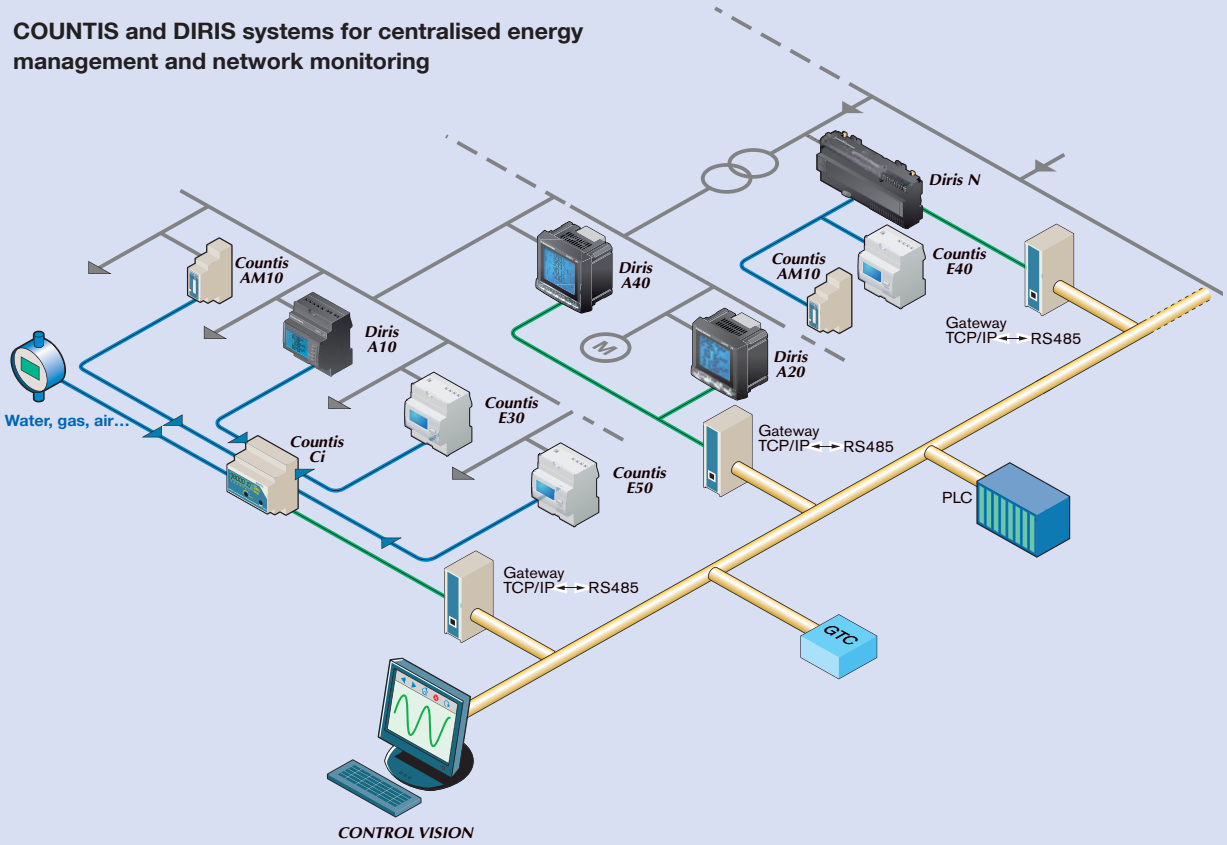
The "Energy measurement & management" section covers the devices and components used to measure energy and display, centralise and process data. A detailed presentation is given below.

Selection guide

Our solutions based on your application:
See the next page.



COUNTIS and DIRIS systems for centralised energy management and network monitoring



The COUNTIS energy metering offer consists of several meters suited to all type of electrical networks. These meters are all equipped with a pulse output allowing data to be exported to a concentrator, RS485 communication facility is also available as an option.

The DIRIS range multifunction meters can be adapted to any electrical network. These devices take measurements and monitor electrical values, meter energy or pulses (water, air, etc.). They also manage energy using average power values for 10 minute periods, and carry out control and command of installations.

The pulse concentrator and measurement units communicate with a PC or PLC via a suitable communications interface.
Monitoring can be performed by:

- a technical building management system (BMS) or a centralised technical management system (CTM)
- SOCOMEC software (CONTROL VISION and BILLING APPLICATION).

Made to measure...

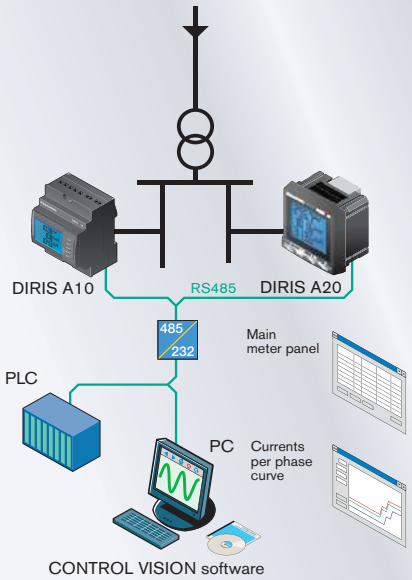
Our adaptation laboratory can develop indicators to your specifications.

Your applications - our solutions

Monitor your electrical installation

By efficiently monitoring your distribution network, you are helping to ensure continuity of service and optimise the operation of your installation. You can quickly identify overloaded equipment and available power reserves. It also helps you better distribute and balance loads.

➲ SOCOMEC solutions



The DIRIS A10 and A20 allow all the parameters of an LV installation to be used. These can be centralised on a PC or PLC. The complete solution offered by SOCOMEC includes:

- sensors installed on the network (measurement shunts and current transformers),
- DIRIS A20 or A10 Multifunction meters,
- communication interfaces,
- and the CONTROL VISION monitoring software.

➲ DIRIS A: compliant with IEC 61557-12

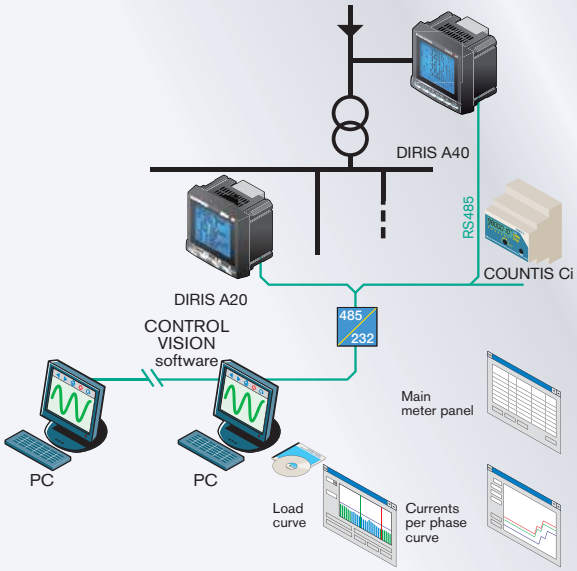
DIRIS A conforms to this new standard, which has been specifically created to govern Performance Measuring and monitoring Devices (PMD). IEC 61557-12 guarantees the user that the product meets all the metrological, mechanical and environmental requirements of an electrical distribution network (EMC, temperature, etc.).

Manage and optimise energy consumption

By measuring the energy consumption of the various sub-assemblies in your building, you can identify the main consumers. By correctly managing the peaks in consumption, you can avoid high costs and even optimise your energy contract. Thanks to submetering, you can also distribute your energy costs between the various users.

In addition to offering savings, energy management enables your company to make better use of energy resources and therefore minimise the impact on the environment.

➲ SOCOMEC solutions



The CONTROL VISION software displays all the electrical values measured and reads the energy consumption of an item of equipment or a production line.
BILLING APPLICATION, is used to charge energy consumption on the price of parts manufactured or even to reinvoice this consumption to those hiring equipment or service users.
The complete solution offered by SOCOMEC includes:

- sensors installed on the network (measurement shunts and current transformers),
- the DIRIS A20, A40, A60 multifunction meters and the COUNTIS Ci concentrator connected to COUNTIS meters,
- communication interfaces,
- and the CONTROL VISION and BILLING APPLICATION monitoring software.

Energy efficiency

➲ Services & Technical Assistance: second nature!

When different parts of a supply system interconnect, it brings together technical areas which don't always see things the same. SOCOMEC's multidisciplinary expertise guarantees optimal commissioning and use of the proposed solutions.

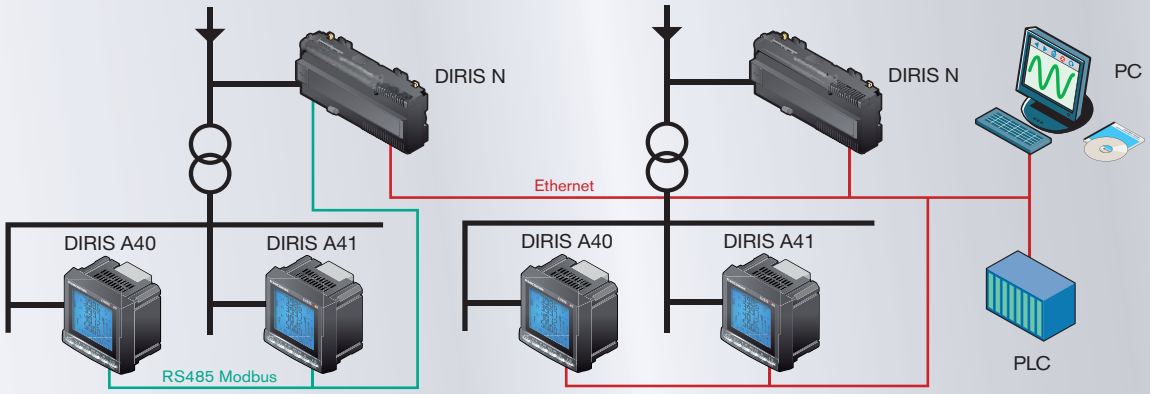
Our **Services & Technical Assistance** department will audit your installation, commission selected equipment and train personnel responsible for its use. This service provision corresponds to level 2 or 3 of the "Service Categories" reference by GIMELEC.
For further information, please contact your SOCOMEC agency.

* *Group of industries supplying electrical equipment, control-command systems and associated services.*

Power quality management

By monitoring energy quality, you can identify any problems in the electrical supply, for example due to the installation of a new element on the network. By preventing equipment malfunctions and premature wear, you can optimise your installation and make long-term savings.

➲ SOCOMEC solutions



DIRIS N records events and their waveforms in case of disturbance or failure. It also provides the user with a complete diagnostic of the electrical supply quality (EN50160 report).
DIRIS N300 and N600 are stand-alone acquisition, processing and memory modules. They are installed at the back of the cabinet on a DIN rail or plate. Both have Ethernet, RS 485 and USB communication ports. They can communicate with each other, with other equipment or with a supervision unit. In particular, they can be interconnected with COUNTIS and DIRIS A, from which they can retrieve and transmit information.

Current transformers

Measurement devices

➲ Function

SOCOMEC **current transformers** deliver to the secondary a standard current proportional to the primary current and adapted to the rating of the associated device. They are equipped as standard with removable terminal covers, double terminals allowing the secondary to be short-circuited without any risk.
They are mounted using two screw-on metal brackets or, in certain cases, by a clip-on DIN rail fastening. The connections are made by screws or by fast-on terminals.

- Accuracy class: 0.5.
- Accuracy class: 1 or 3 for higher required powers.
- Dielectric quality: 3 kV - 50 Hz 1 mn.
- Usage frequency: 50 - 60 Hz.
- Permanent overload 1.2 I_n.

➲ Abbreviated description

- **Primary wound moulded case transformer: TRB xxx** (xxx = CT width)
- **Cable-through transformer: TCA xx** (xx = cable diameter)
- **Bar or cable-through transformer: TCB xx-yy** (xx = cable diameter, yy = bar width)
- **Bar-through transformer: TBA yy** (yy = bar width)
- **Split-core transformer: TO xx-yy** (xx = inside width, yy = inside height).

➲ Conformity to standards

- IEC 185 (IEC 44-1)
- VDE 0414

➲ Other products

- Accuracy class: 0.2 S.
- 1 A secondary.
- Frequency 400 Hz.
- Double or triple primary ratio.
- Summation.
- Voltage transformer.

Transducers to be associated

Transducer to be associated with adapted current transformers:

- input: 1 or 5 A,
- output:
  - 0-20 mA, 0-10 V (model CEA-VA),
  - 4-20 mA, 0-10 V (model CEA-VA4),
- self-supplied or auxiliary power supply 24 VDC or 230 VAC.
- 3 sizes according to the CT: type 1, 2 or 3.

Measurement shunts

➲ Function

SOCOMEC **shunts** provide indirect measurement of direct current by creating a standardised voltage drop.

➲ Composition of the range

- 20 ratings available from 1 to 6000A, in 100 mV.
- 2 models:
  - ECONOMIC, 10 to 600 A,
  - DIN, 1 to 6000 A.

➲ Characteristics

- Voltage drop: 100 mV for nominal rating.
- Accuracy class: 0.5.
- Permanent overload 1.2 In.
- 10 I_n / 5 s rating ≤ 250 A
  5 I_n / 5 s rating 300 to 2000 A
  2 I_n / 5 s rating 300 to 10 kA.

➲ Other products (1)

- 60 or 150 mV voltage drop.

(1) Please consult us.

PTI : CT automatic short-circuit device

pti_005_a_2_cat

Use

This device provides automatic short-circuiting of the CT secondary if the measuring circuit is opened.

Conformity to standards

- Decree n° 88-1056 from 14-11-88: protection of workers.
- NF C 15-100 article 473.1.4-556.3.
- Complies with the Mines and Quarries decree n° 91-986.
- GAM EG 13.C (military standard).

Characteristics

Switch body protection degree	IP55
Terminal protection degree	IP20
Connection wire range	2.5 mm²
Weight	82 g

Bar or cable-through saturation current transformer

trafo_056_a_1_cat

Use

The protection transformers are used for thermal relays. The TCS 30 - 40 are transformers for cables and busbars. They protect the low power terminal relays against from the engine starting intensity.

Avaible in primary wound version for current between 1 to 75 A (1 A secondary, 2 VA, Cl. 1). Please consult us.

Transformer with integrated transducer

trafo_057_a_1_cat

Compact cable-through current transformer with integrated measurement transducer (Ø 27 mm) or bar transformer (40 x 10 mm).

- Input:
  - Direct Connection 0 to 10 A,
  - CT primary of 40 to 800 A (self-supplied)
  - CT primary of 15 to 800 A (auxiliary supply)
- Output:
  - 0-20 mA, 0-10 V (type CTA-VA)
  - 4-20 mA and 0-10 V (type CTA-VA4)
- Self-supplied or auxiliary power supply 24 VDC or 230 VAC.
- Dimension: 135 x 80 x 50 mm.

Voltage transformer BTV 25

trafo_062_a_1_cat

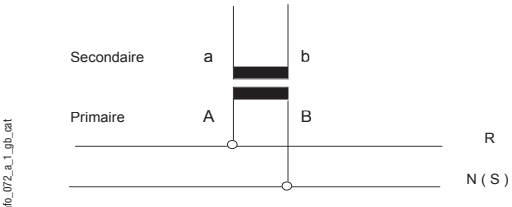
Applications

Measurement and conversion of the input value read at the primary of a transformer in a directly proportional voltage signal.
BTV 25s are voltage transformers.

Recommendation

Voltage transformers are used specifically for supplying measurement equipment, therefore it is not recommended to connect other components which could affect accuracy. This is due to the effect of the dephasing error.
If the consumption is greater than 25 VA, another transformer must be added.

Connection



trafo_072_a_1_gb_cat

Transducers

trans_071_a_2_cat

They provide conversion of an AC electrical quantity (A, V, Hz, Cos phi, W, Var) into a DC signal, with standardized current or voltage. They are available in surface-mounting casings (CS range).
These devices are designed for DIN rail or back plate mounting.
Type CS transducers in surface-mounted casings come in two dimensions:
- 75 mm for current, voltage and frequency converters,
- 150 mm for power or three-phase converters.

Consult us.

Modular transducers

trans_076_a_2_cat

Available in:
- 3-DIN module housings (52.5 mm) for current, voltage and frequency converters,
- 6-DIN module housings (105 mm) for current (output 4-20 mA), voltage (output 4-20 mA) converters,
- 9-DIN module housings (157.5 mm) for power or three-phase converters.

Consult us.

Analogue meters

freq_003_a_1_cat
freq_002_a_1_cat
phase_002_b_1_cat
amper_027_a_1_cat
amper_033_a_2_cat

SOCOMEC ferromagnetic ammeters and voltmeters measure the AC current voltage of any electrical circuit. SOCOMEC vibrating reed or needle type frequency meters have a converter either integrated or in a separate casing and measure the frequency of any electrical circuit. The wattmeters, varmeters and phase-meters consist of an analogue meter and a separate converter. They exist in 3 types of casing: Rotex round barrel model in 72 or 96, in a DIN 48 to 144 body or a modular casing (3 modules). With pointer deflections of 90° and 240°, they can be flush-mounted into cubicles, enclosures or other equipments.
Consult us.

Changeover switches

comut_015_b_2_cat

Voltmeter and ammeter switches allow the phase changeover for a three-phase circuit for voltage and current measurement.
They are available in three different casings:
- for screw mounting,
- with a central Ø 22 mm mounting,
- for DIN rail mounting.

Consult us.

Digital meters

cosph_001_a_2_cat
amper_032_a_2_cat
freq_004_a_2_cat
volm_019_a_2_cat

They measure all types of electrical measurement values (A, V, Hz, Cos phi, P, Q...).
The range:
- 2 different types of casing: rectangular or square:
  - 2 sizes of rectangular casing,
  - 2 sizes of square casing.
- direct measurement indicators or connected to a current or voltage transformer,
- 2000-point (3.5 digits) or 20000-point (4.5 digits) display,
- possibility of having 2 or 3 different types of measurement in the same square casing (AAA-VVV-AVF...),
- multi-indicators version,
- RMS-value.

Consult us.

Hour counters

compt_001_a_2_cat

Often combined with analogue meters in an electrical panel, hour counters count the total operating time of machines or electrical equipment.
Consult us.

COUNTIS AM10

Active energy meter and concentrator

Single phase - Direct 32 A

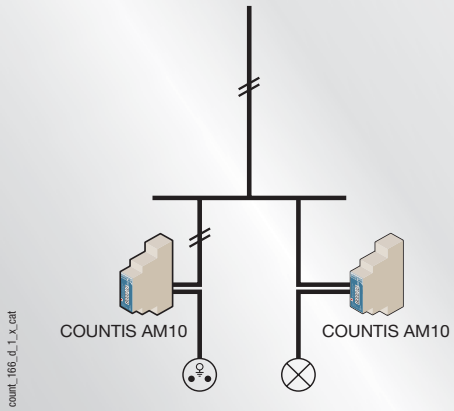
➲ Function

The **COUNTIS AM10** is a modular active energy meter designed for single phase load metering.
This product is used for direct connections up to 32 A.

➲ Conformity to standards

- IEC 62053-21 class 1
- IEC 61010-1
- IEC 61000-4-2
- IEC 61000-4-3
- IEC 61000-4-4
- IEC 61000-4-5
- IEC 61000-4-6
- IEC 61000-4-8
- IEC 61000-4-11
- IEC 60068-2-6
- IEC 60068-2-11
- IEC 60068-2-30

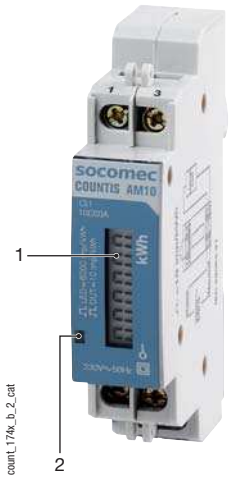
➲ Applications



The **COUNTIS AM10** is a 32 A active energy meter. Its LCD display shows the kWh consumed by, for example, a machine, a motor or a boat in a marina.

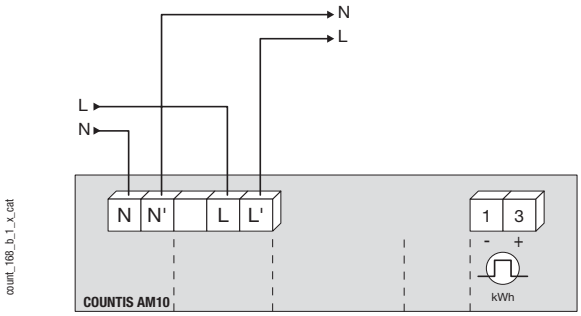
The pulse output enables the kWh consumption to be gathered / uploaded to a PC in order to be analysed for billing, energy saving or energy cost management purposes.

Front panel



1. kWh display.
2. Metrological LED (6000 pulses/kWh)

Terminals and connections



N - L: Network voltage inputs.
N' - L': Network voltage outputs.
1 - 3: Pulse outputs.

Characteristics

Current measurement (TRMS)	
Type	32 A direct input
Input consumption	1 VA
Permanent overload	40 A
Overload	20 I_{max} for 500 ms
Minimum current measured	15 mA

Voltage measurements (TRMS)	
Range of measurement	184 … 276 VAC
Input consumption	≤ 8 VA
Sustained overload	276 VAC

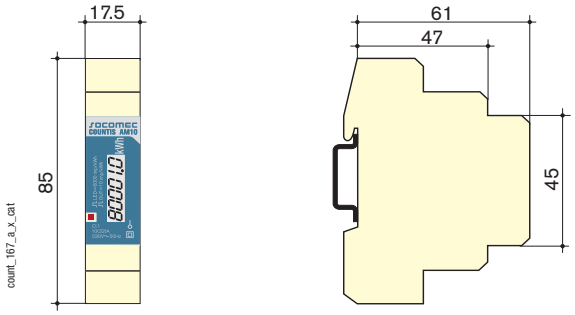
Energy accuracy	
Active (according to IEC 62053-21)	class 1

Power supply	
Self supplied	yes

Output (pulsed)	
Number	1
Type phototransistor	10 ... 35 VDC
Fixed weight of impulses	100 Wh
Impulse duration	100 ms

Operating conditions	
Operating temperature	- 20 … + 45 °C
Storage temperature	- 25 … + 70 °C
Relative humidity	85 %

Case



Type	Modular
Number of optional modules	1
Dimensions W x H x D	17.5 x 85 x 61
Case protection index	IP 20
Front protection rating	IP 50
Display type	LCD 5+1 digits
Rigid cable connection section	10 mm²
Flexible cable connection section	6 mm²
Weight	150 g

Services and Technical assistance

Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

COUNTIS E10 / E11 / E12

Active energy meter and concentrator

Single phase - Direct 63 A

➲ Function

The **COUNTIS E1x** is an active electrical energy meter designed for single phase load metering. It is used for direct connections up to 63 A.

➲ Applications

The **COUNTIS E10** displays the total energy consumed and allows remote access through pulse output.
Metering over specific period can be managed though a partial counter.

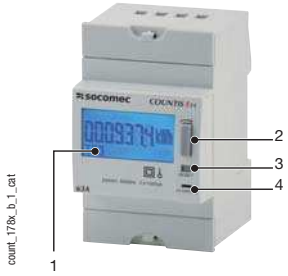
The **COUNTIS E11** is a double tariff meter meant for dual tariff invoicing. For each tariff a partial counter is available.

The **COUNTIS E12** features MID certification.
MID certified meters feature:
- Extra thefts protection : meter can not be reset, sealed casing.
- Extra accuracy : MID specifications on accuracy according to temperature, humidity, and other external factors are extended.

➲ Conformity to standards

- IEC 62053-21 class 1
- IEC 62053-31
- IEC 62053-11
- EN 50470-1
- EN 50470-3

Front panel



1. LCD display.
2. Navigation key.
3. Reset key.
4. Metrological LED.

Electrical characteristics

Current measurement

Type	Single phase - Direct 63 A
Input consumption	0.8 VA max.
Startup current (I_{st})	40 mA
Minimum current (I_{min})	0.5 A(1)
Transition current (I_{tr})	1 A(2)
Reference current (I_{ref})	10 A(3)
Permanent overload (I_{max})	63 A
Short-time over-current	1890 A max for 10 ms

Voltage measurement

Range of measurement	230 ... 400 V +/- 20 %
Consumption (VA)	0.5 VA max.
Sustained overload	280 V phase-neutral

Energy accuracy

Active (according to IEC 62053-21)	Class 1

Power supply

Self supplied	Yes
Frequency	50/60 Hz

Output (pulsed)

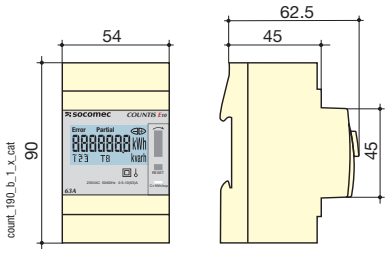
Type of optocoupler	IEC 62053-31 Class A (20 ... 30 VDC)
Number	1
Fixed weight of impulses	100 Wh
Impulse duration	100 ms

Operating conditions

Operating temperature	-10 to 55 °C
Storage temperature	-20 to 70 °C
Relative humidity	85 %

(1) $I_{(min)} \leq 0.5 * I_{tr}$
(2) The accuracy class is guaranteed between I_{tr} et I_{max}.
*(3) $I_{(ref)} = I_{(b)}$ (base current) = 10 * $I_{(tr)}$ for direct connection COUNTIS.*

Case



Type	Modular
Number of optional modules	3
Dimensions W x H x D	54 x 90 x 62.5 mm
Case protection index	IP 20
Front protection rating	IP 51

3-phase - Via CT up to 6000 A

➲ Function

The **COUNTIS E4x** is an active and reactive electrical energy meter designed for three-phase networks. It is used for connection via CT up to 6000 A.

➲ Applications

The **COUNTIS E40** displays the total energy consumed and allows remote access through pulse output.
Metering over specific period can be managed though a partial counter.

The **COUNTIS E41** is a double tariff meter meant for dual tariff invoicing. For each tariff a partial counter is available.

In addition to the COUNTIS E41 functions, the **COUNTIS E42** also offers MID certification.

In addition to the COUNTIS E40 functions, the **COUNTIS E43** also offers JBUS/ MODBUS RTU communication via RS485.

In addition to the COUNTIS E43 functions, the **COUNTIS E44** also offers MID certification.

COUNTIS E42 and **E44** cannot be reset.

The **COUNTIS E43** is bi-directional (import and export).

➲ Conformity to standards

MID certification

The Measuring Instruments Directive (MID) authorises the use of MID Countis in applications for which sub-billing of the electrical energy consumed is necessary (apartments, commercial units, etc.).
It guarantees each user that meters meets a high level of accuracy, quality design and manufacturing through a 3rd party verification.

COUNTIS E50 / E53

Active energy meter and concentrator

Three-phase
Via CT up to 6000 A

➲ Function

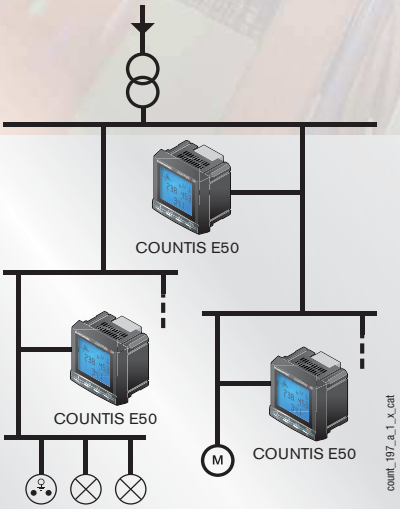
COUNTIS E5x are active and reactive energy meters.
The **COUNTIS E50** is a totalising meter allowing direct reading of the power consumed, using a pulse output.
Two partial meters with reset allow the energy to be metered over a specific period.
The **COUNTIS E53** provides additional JBUS/MODBUS communication via RS485.

➲ Conformity to standards

- IEC 62053-23 class 2
- IEC 62053-21 class 1
- IEC 61557-12

➲ Applications

COUNTIS E50 and **E53** are equipped as per standards with a totalising meter which allows direct reading in kWh and a pulse output.
The CT ratio can be configured by the user via the keypad and the display.
In addition, once they are associated with COUNTiS Ci, it is possible to centralise consumption with an automaton or a PC equipped with CONTROL VISION.



Multi-function meter

- Current
  - instantaneous: I1, I2, I3
- Voltages & frequency
  - instantaneous: U1, U2, U3, U12, U23, U13
- Power
  - instantaneous: 3P, 3Q, 3S
  - mean maximum: 3P
- Power factor
  - instantaneous: 3PF

Metering

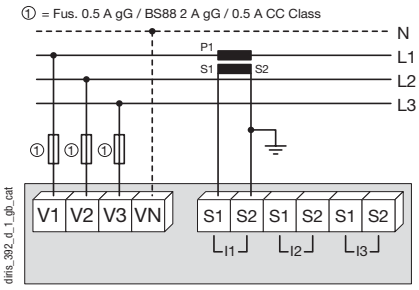
Current connection section	1.5 … 6 mm²
Weight	370 g

Connection

Recommendation:
- For IT earthing systems, it is recommended that the CT secondary is not connected to earth.
- While disconnecting the COUNTIS, the secondaries of each current transformer must be short-circuited. This operation can be carried out automatically via a SOCOMEC product, the PTI, can be found in the SOCOMEC catalogue page 348.

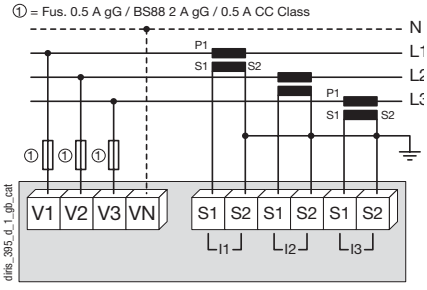
Low voltage balanced network
3/4 wires with 1 CT



diris_392_d_1_gb_cat

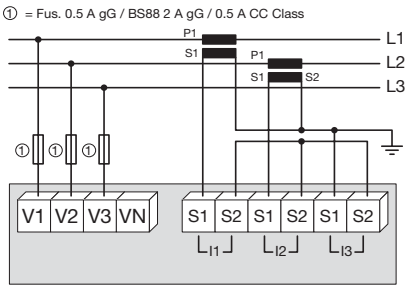
Use of 1 CT reduces by 0.5% the accuracy of the phases, the current of which is worked out by vector calculation.

Low voltage unbalanced network
3/4 wires with 3 CTs



diris_395_d_1_gb_cat

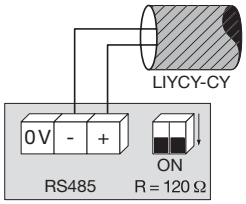
3 wires with 2 CTs



diris_397_d_1_gb_cat

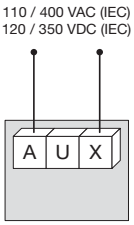
Use of 2 CT reduces by 0.5% the accuracy of the phases, the current of which is worked out by vector calculation.

Additional information
Communication via RS485 link



diris_398_c_1_x_cat

AC & DC auxiliary power supply



diris_501_d_1_gb_cat

It is recommended that the auxiliary power supply be protected by 500mA gG fuses.

Pulse concentrator

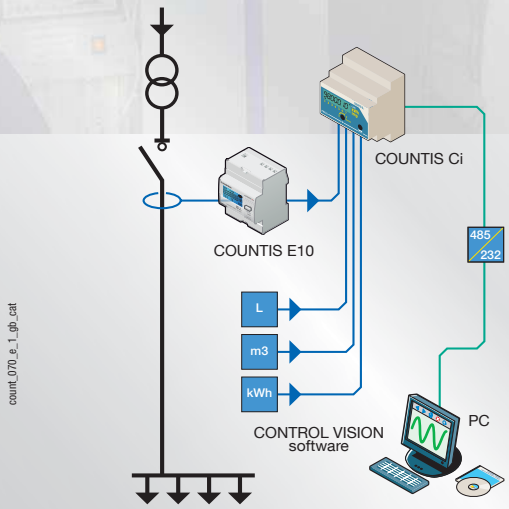
➲ Function

The **COUNTIS Ci** is a pulse concentrator communicating via an RS485 link using JBUS/MODBUS protocol.
Through 7 insulated on/off inputs, it counts the number of pulses from different energy meters (water, air, gas, electricity...) and transmits this information to a PC equipped with CONTROL VISION software or a PLC.

➲ Conformity to standards

- IEC 61010-1
- IEC 61000-4-2
- IEC 61000-4-3
- IEC 61000-4-4
- IEC 61000-4-5
- IEC 61000-4-6
- IEC 61000-4-8
- IEC 61000-4-11
- IEC 60068-2-6
- IEC 60068-2-11
- IEC 60068-2-30

➲ Applications



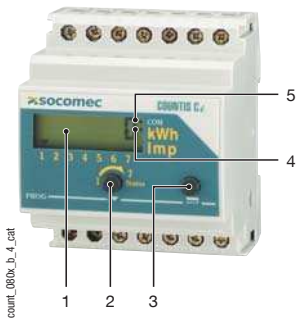
As electricity is not the only energy consumption source, COUNTIS allows collection of other energies such as water, air or gas.

CONTROL VISION software, via the COUNTIS Ci concentrator and its RS485 link JBUS/MODBUS® protocol allows centralization of all consumptions whilst guaranteeing an optimal accuracy and ease of use (Windows™ environment).

The **COUNTIS Ci** provides:

- 7 total counters to count kWh or a number of pulses.
- Time-dated memory for kWh consumed over one month for each input. This record is carried out once a month for 12 successive months. Values are accessible through JBUS/MODBUS communication facility.
- 4 out of 7 inputs can store load curves over a period of 8, 10, 15, 20 or 30 minutes. Example: load curves over 8 days if average power values are stored every 10-minutes.
- Status of the 7 inputs.

Front panel



1. Displays consumption per input (▼).
2. *Pushbutton to display consumption and status per input.*
3. *Validation pushbutton in programming mode.*
4. *Unit indicator (kWh or Imp)*
5. *Communication status indicator (COM).*

DIRIS A10

NEW

diris_791_b_1_cat

Modular multi function meter

➲ Function

The **DIRIS A10** is a multi function meter for measuring electrical values in low voltage networks in modular format. It allows all electrical parameters to be displayed and the measurement, energy metering and communication functions to be used.
In addition, the DIRIS A10 has a function for correcting errors in CT connections. It also allows variations in temperature to be detected thanks to its internal temperature measurement function.

➲ Conformity to standards

- IEC 62053-22 class 0.5S
- IEC 62053-23 class 2
- IEC 61557-12

➲ Applications

Multi-function meter
- Current
  - instantaneous: I1, I2, I3, In
  - maximum average: I1, I2, I3, In
- Voltages & frequency
  - instantaneous: U1, U2, U3, U12, U23, U31, F
- Power
  - instantaneous: 3P, ΣP, 3Q, ΣQ, 3S, ΣS
  - maximum average: ΣP, ΣQ, ΣS
- Power factor
  - instantaneous: 3PF, ΣPF
- Internal temperature

- Hours:

Harmonic analysis
- Harmonic distortion rate
  - Currents: thd I1, thd I2, thd I3, thd In
  - Phase-to-neutral voltage: thd U1, thd U2, thd U3
  - Phase to phase voltage: thd U12, thd U23, thd U31
- Individual up to level 63
  - Currents: HI1, HI2, HI3, HIn
  - Phase-to-neutral voltage: HU1, HU2, HU3,
  - Phase to phase voltage: HU12, HU23, HU31

Load curves(1)
- Active and reactive power: ΣP+/-; ΣQ+/-
- Voltages & frequency: U1, U2, U3, U12, U23, U31, F

Events(1)
- Alarms on all electrical values.

Communications(1)
- Analogues 0/4- 20 mA
- Digital RS485 (Jbus/Modbus & Profibus-DP)
- Ethernet (modbus/TCP or Jbus/Modbus RTU over TCP and Web server)
- Ethernet with RS485 gateway Jbus/Modbus RTU over TCP

Inputs / Outputs(1)
- Pulse metering
- Remote control/command
- Alarm report
- Pulse report

(1) Available as an option (see the following pages).

➲ Front panel

1. Backlit LCD screen.
2. Pushbutton for currents and setup wiring correction
3. Pushbutton for voltages and frequency.
4. Pushbutton for active, reactive, and apparent power and power factor.
5. Pushbutton for maximum and average current and power values.
6. Pushbutton for harmonics values.
7. Pushbutton for pulse, hours and electrical energy meters.

➲ Plug-in modules

DIRIS® A40

DIRIS® A41

Pulse outputs

2 configurable pulse outputs (type, weight and run) on ± kWh, ±kvarh and kVAh

JBUS / MODBUS® communication

RS485 link with JBUS / MODBUS® protocol (speed up to 38400 bauds).

PROFIBUS® DP communication

SUB-D9 link with PROFIBUS® DP protocol (speed up to 12 Mbauds).

Ethernet communication

- Ethernet link with MODBUS/TCP or JBUS/MODBUS RTU over TCP

Ethernet communication with RS485 JBUS/MODBUS gateway

- Ethernet link with MODBUS/TCP or JBUS/MODBUS RTU over TCP
- Connection of 1 to 247 RS485 JBUS/MODBUS slaves

Analogue outputs

A maximum of 2 modules may be connected, that is 4 analogue outputs.
2 outputs assignable to:
3I, In, 3V, 3U, F, ±ΣP, ±ΣQ, ΣS, ΣPFL/C, I sys, Vsys, Usys, Ppred, Q pred, Spred, internal T°C, T°C 1, T°C 2, T°C 3 and to 17 VDC power supply

2 inputs - 2 outputs

A maximum of 3 modules may be connected, giving 6 inputs.
2 outputs assignable to:
- monitoring: 3I, In, 3V, 3U, F, ±ΣP, ±ΣQ, SS, ΣPFL/C, THD 3I, THD In, THD 3V, THD 3U, Ppred, Qpred, Spred, internal T°C, T°C 1, T°C2, T°C3 and hour meter,
- remote control,
- timed remote control.

Memory

- Storing up to a maximum of 62 days of P+, P-, Q+, Q- with an internal or external synchronisation signal of 5, 8, 10, 15, 20, 30 and 60 minutes.
- Storing of 10 hour-dated last alarms.
- Storing of the last minimum and maximum instantaneous values for 3U, 3V, 3I, In, F, ΣP±, ΣQ±, ΣS, THD 3U, THD 3V, THD, 3U, THD, 3V, THD, 3I, THD In.
- Storing of 3U, 3V and F average values based on synchronisation function (maximum 60 days).

Temperature

Temperature indication
- Internal
- External sensor PT 100 (T°C 1)
- External sensor PT 100 (T°C 2)
- External sensor PT 100 (T°C 3)

Electrical characteristics

Current measurement on insulated inputs (TRMS)	
Via CT primary	10 000 A
Via CT secondary	1 or 5 A
Measurement range	0 … 11 kA
Input consumption	≤ 0.1 VA
Measurement updating period	1 s
Accuracy	0.2 %
Sustained overload	6 A
intermittent overload	10 I_n for 1 s

Voltage measurements (TRMS)	
Direct measurement between phases	50 … 700 VAC
Direct measurement between phase and neutral	28 … 404 VAC
VT primary	500 000 VAC
VT secondary	60, 100, 110, 173, 190 VAC
Frequency	50 / 60 Hz
Input consumption	≤ 0.1 VA
Measurement updating period	1 s
Accuracy	0.2 %
Sustained overload	760 VAC

Current-voltage product	
Limitation for 1A CT	10 000 000
Limitation for 5A CT	10 000 000

Power measurement	
Measurement updating period	1 s
Accuracy	0.5 %

Power factor measurement	
Measurement updating period	1 s
Accuracy	0.5 %

Frequency measurement	
Measurement range	45 … 65 Hz
Measurement updating period	1 s
Accuracy	0.1 %

Energy accuracy	
Active (according to IEC 62053-22)	class 0.5 S
Reactive (according to IEC 62053-23)	class 2

Auxiliary power supply	
Alternating voltage	110 … 400 VAC
AC tolerance	± 10 %
Direct voltage	120 … 350 VDC / 12 … 48 VDC
DC tolerance	± 20 % / - 6 … + 20 %
Frequency	50 / 60 Hz
Consumption	≤ 10 VA

2 inputs / 2 outputs module: Outputs (alarms / control)	
Number of relays	2(1)
Type	250 VAC - 5 A - 1150 VA

2 inputs / 2 outputs module: Phototransistor inputs	
Number	2(1)
Power supply	10 … 17 VDC
Minimal signal width	10 ms
Minimum length between 2 impulses	18 ms
Type	phototransistor

Pulse outputs module	
Number of relays	2
Type	100 VDC - 0.5 A - 10 VA
Max. number of operations	≤ 10^8

Analogue output module	
Number of outputs	2(2)
Type	insulated
Scale	0 / 4 … 20 mA
Load resistance	600 Ω
Maximum current	30 mA

JBUS/MODBUS communication module	
Link	RS485
Type	2 … 3 half duplex wires
Protocol	JBUS/MODBUS® in RTU mode
JBUS/MODBUS® speed	1400 … 38400 bauds

PROFIBUS-DP communication module	
Link	SUB-D9
Protocol	PROFIBUS® DP
PROFIBUS® speed	9.8 kbauds … 12 Mbauds

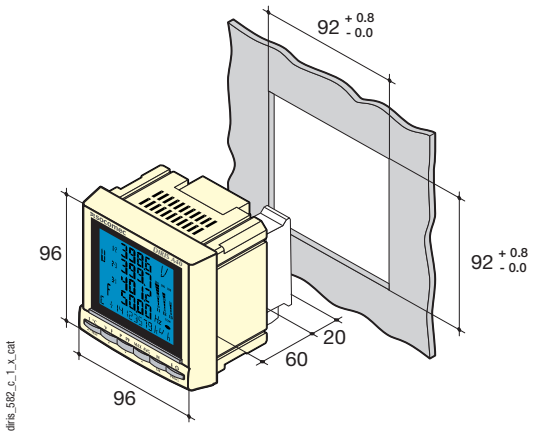
Ethernet Communication Module	
Connectique	RJ45
Speed	10 base T / 100 base T
Protocol	MODBUS TCP or JBUS/MODBUS RTU over TCP

Module temperature (inputs)	
Type	PT100
Connection	2, 3 or 4 wires
Dynamic	- 20°C ... 150°C
Accuracy	+/- 1 digit
Maximum length	300 cm

Operating conditions	
Operating temperature	- 10 … + 55 °C
Storage temperature	- 20 … + 85 °C
Relative humidity	95 %

(1) Max. 3 modules / DIRIS.
(2) Max. 2 modules / DIRIS.

Case



Type	Panel mounting

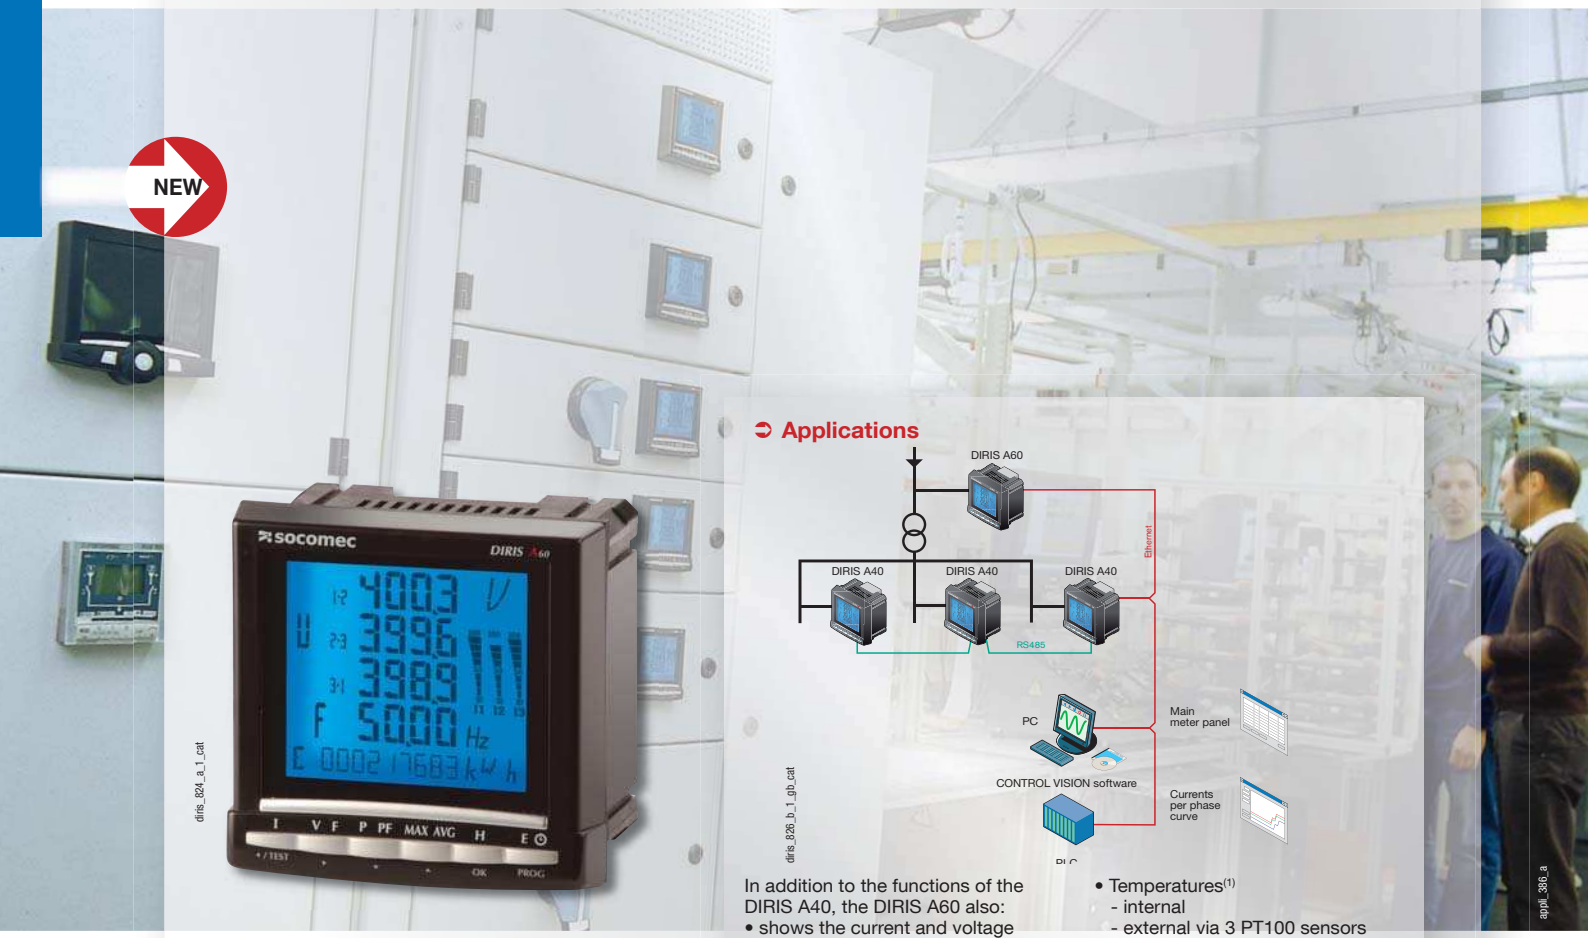
Services and Technical assistance

Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

DIRIS A60

NEW



Applications

Events monitoring and managing energy for high/low voltage electrical installations

Function

DIRIS A60 is a measurement station which takes over all the functions of DIRIS A40 and which is enhanced by a history of harmful events for installation. A graphic representation of these harmful events is associated and provided to the user.
All this information can be used and analysed remotely using free quality measurement software that can be downloaded on the site www.socomec.com.

Conformity to standards

- IEC 61557-12
- IEC 62053-22 class 0.5 S
- IEC 62053-23 class 2

In addition to the functions of the DIRIS A40, the DIRIS A60 also:
- shows the current and voltage unbalance
- shows the tangent phi
- stores the load curves (50 days ith an interval of 10 minutes) for:
  - Active, reactive and apparent power: ΣP+/-; ΣQ+/-, ΣS
- detects and stores the last 40 events concerning:
  - overvoltage
  - voltage dips
  - cut-offs
  - overcurrent

For each stored event, the DIRIS A60 records the relevant RMS 1/2 interval curves for the voltages V1, V2, V3, U12, U23, U31 and the currents I1, I2, I3, In, giving a total of 400 curves.

Other functions:

Multi-function meter
- Current
  - instantaneous: I1, I2, I3, In, Isystem,
  - average/maximum average: I1, I2, I3, In,
  - unbalance: I unb.
- Voltages & frequency
  - instantaneous: U1, U2, U3, U12, U23, U31, F, Vsystem, Usystem
  - average/maximum average: U1, U2, U3, U12, U23, U31, F
  - unbalance: U unb.
- Power
  - instantaneous: 3P, ΣP, 3Q, ΣQ, 3S, ΣS
  - maximum average: ΣP, ΣQ, ΣS
  - predictive: ΣP, ΣQ, ΣS.
- Power factor
  - FP, ΣFP
- Instantaneous total tangent phi
- Instantaneous, averaged, max averaged disbalance
- Temperatures(1)
  - internal
  - external via 3 PT100 sensors

Metering
- Active energy: +/- kWh
- Reactive energy: +/- kvarh
- Apparent energy: kVAh
- Hours:

Harmonic analysis (level 63)
- Harmonic distortion rate
  - Currents: thd I1, thd I2, thd I3, thd In
  - Phase-to-neutral voltage: thd U1, thd U2, thd U3
  - Phase to phase voltage: thd U12, thd U23, thd U31
- Individual
  - Currents: HI1, HI2, HI3, HIn
  - Phase-to-neutral voltage: HU1, HU2, HU3,
  - Phase to phase voltage: HU12, HU23, HU31

Events(1)
- Alarms on all electrical values

Communications(1)
- Analogues 0/4- 20 mA
- Digital RS485 (Jbus/Modbus & Profibus-DP)
- Ethernet (modbus/TCP or Jbus/Modbus RTU over TCP and Web server)
- Ethernet with RS485 gateway Jbus/Modbus RTU over TCP

Inputs / Outputs(1)
- Pulse metering
- Remote control/command
- Alarm report
- Pulse report

(1) Available as an option (see the following pages).

Front panel

diris_824x_a_1_cat

1. Backlit LCD screen.
2. Pushbutton for currents, temperatures and CT setup wiring correction.
3. Pushbutton for voltages and frequency.
4. Pushbutton for active, reactive, and apparent power and power factor.
5. Pushbutton for maximum and average current and power values.
6. Pushbutton for harmonics values.
7. Pushbutton for energies and hour run meter.

Plug-in modules

DIRIS® A60

diris_834_a

diris_445_a_1_cat

Pulse outputs

- 2 configurable pulse outputs (type, weight and run) on ± kWh, ±kvarh and kVAh

diris_447_a_1_cat

JBUS / MODBUS® communication

- RS485 link with JBUS / MODBUS® protocol (speed up to 38400 bauds).

diris_775_a_1_cat

PROFIBUS® DP communication

- RS485 link with PROFIBUS® DP protocol (speed up to 12 Mbauds).

diris_777_a_1_cat

Ethernet communication

- Ethernet link with MODBUS/TCP or JBUS/MODBUS RTU over TCP

diris_776_a_1_cat

Ethernet communication with RS485 JBUS/MODBUS gateway

- Ethernet link with MODBUS/TCP or JBUS/MODBUS RTU over TCP
- Connection of 1 to 247 RS485 JBUS/MODBUS slaves

diris_448_a_1_cat

Analogue outputs

- A maximum of 2 modules may be connected, that is 4 analogue outputs.
  2 outputs assignable to:
  3I, In, 3V, 3U, F, ± ΣP, ± ΣQ, ΣS, ΣPFL/C, I sys, Vsys, Usys, Ppred, Q pred, Spred, T°C internal, T°C 1, T°C 2, T°C3 and to 17 VDC power supply.

diris_449_a_1_cat

2 inputs - 2 outputs

- A maximum of 3 modules may be connected, giving 6 inputs.
  2 outputs assignable to:
  - monitoring: 3I, In, 3V, 3U, F, ± ΣP, ± ΣQ, ΣS, ΣPFL/C, THD 3I, THD In, THD 3V, THD 3U, Ppred, Qpred, Spred, T°C internal, T°C 1, T°C2, T°C3 and hour meter,
  - remote control,
  - timed remote control,
  - 2 inputs for pulses metering.

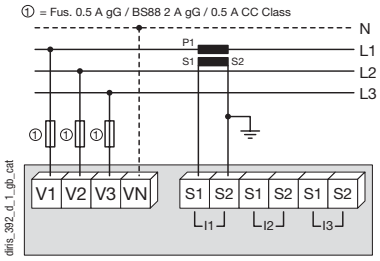
Weight	400 g

➲ DIRIS A60 - Connection

Recommandation: when disconnecting the DIRIS, the secondaries of each current transformer must be short-circuited. This operation can be carried out automatically by a product in the SOCOMEC catalogue, PTI: consult us.

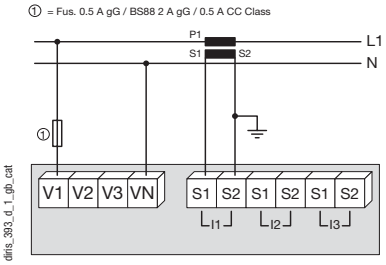
Low voltage balanced network for DIRIS A60

3/4 wires with 1 CT

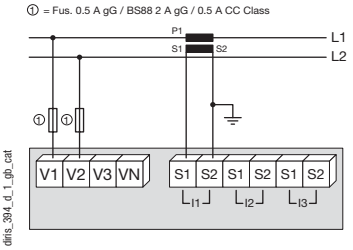


Use of 1 CT reduces by 0.5% the accuracy of the phases, the current of which is worked out by vector calculation.

Single phase

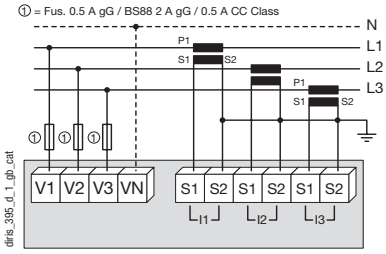


Two phase

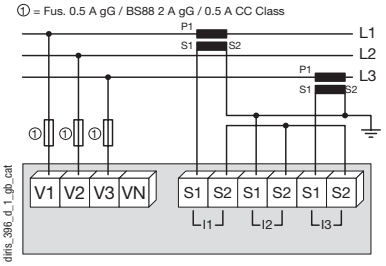


Low voltage unbalanced network for DIRIS A60

3/4 wires with 3 CTs

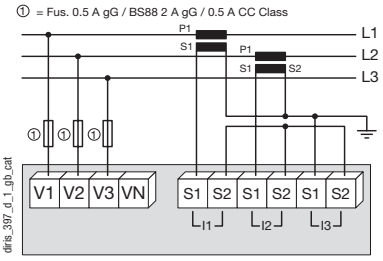


3 wires with 2 CTs



Use of 2 CTs reduces by 0.5% the accuracy of the phase, whose current is worked out by vector calculation.

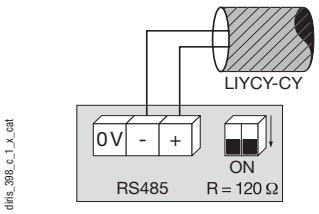
3 wires with 2 CTs



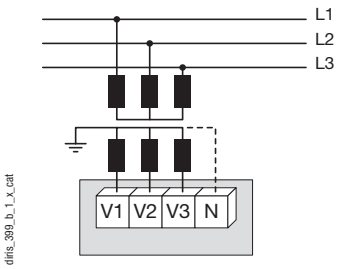
Use of 2 CTs reduces by 0.5% the accuracy of the phase, whose current is worked out by vector calculation.

Additional information

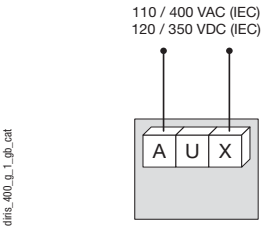
Communication via RS485 link



Connection of voltage transformer for HV networks



AC & DC auxiliary power supply



It is recommended that the auxiliary power supply be protected by the use of 500 mA gG fuses.

Software

Visualize the SAG, SWELL, CUT-OFF and Over current curves

This software allows the DIRIS A60 event monitoring system to help you improve the reliability of your electrical installation,
by detecting and allowing the analysis of the events through graphic display.
It provides the following functions:
- List of voltage dips, cuts, and surges, and over current
- Display of the 10 curves (3V, 3U, 3I, In) related to the event with advanced zoom in functions
- Classification of the events according to EN50160
- Export pictures or XLM files of curves.

Software can be connected to the DIRIS either in Modbus TCP / Modbus RTU over TCP or Modbus RTU over RS485.
Software can be downloaded on the SOCOMEC website : www.socomec.com

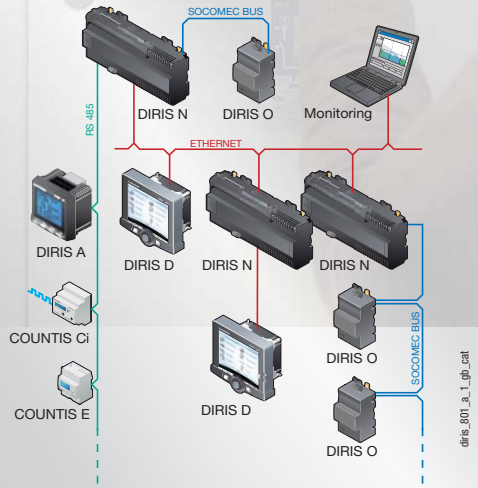
Services and Technical assistance

Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

DIRIS N300 / N600

Application



A modular and open system

The **DIRIS N** is a true system made up of "functional blocks":

- data acquisition and processing: DIRIS N300/N600
- graphic colour display: DIRIS D (option of using a single DIRIS D for several DIRIS N)
- remote input / output modules: DIRIS O.

In addition, the **DIRIS N** can provide an interface between products communicating via Modbus, such as DIRIS A or COUNTIS Ci, for example, using an Ethernet network via an RS485 port to centralise information for monitoring.

Network quality control and analysis system

Function

DIRIS N300 / N600 are multifunction network analysers designed for all energy efficiency projects. They actively contribute to procedures for optimising the operation of your electrical networks and give the user a solution which helps to:

- improve the efficiency of the facility,
- reduce production costs,
- optimise operating costs,
- reduce maintenance costs.

To ensure these aims are achieved, the **DIRIS N** assures the following functions:

- measurement of electrical values and temperatures,
- management of energy and allocation of other fluids (water, gas),
- monitoring of all parameters,
- control/command of apparatus,
- analysis of the network quality (waveform, EN50160 report),
- communication.

Its use is made even easier by the additional functions that it offers, from checking the connection to providing a metrological report, and including USB ports and an SD card reader for loading or downloading information (measurements for example). As an option, **DIRIS O** remote input/output modules allow the control/command function to be moved close to the components concerned. Besides being user friendly, the **DIRIS D600's** colour graphic display, gives the user access to all the parameters.

Conformity to standards

- IEC 61557-12
- EN 50160
- IEC 61000-4-30

General characteristics of the DIRIS N300 and N600

The vast majority of the functions below are available as numbers (instant, average, minimum and maximum values), graphs (wave captures and 1/2 period RMS) and logs.

Measurements:
- Currents, voltages, frequency (instant, average, minimum and maximum)
- Direct, inverse and homopolar voltages
- Voltage unbalance
- Active, reactive, apparent and predictive power
- Power factor
- Fresnel diagram
- Temperatures.

Energy management:
- Active, reactive and apparent energy meters
- Impulse meters (up to 20 meters)
- Timestamped meters (up to 8 meters)
- Load curves.

Monitoring:
- Display of an alarm and status log
- Indication of the parameter concerned, the status at time T, the duration and date/time of the start and end of the event.

Control/Command (only with the DIRIS O):
- Controls and commands the position of the remote devices
- Programmes the logical functions to create automatic processes.

Network and event quality analysis:
- Dips, surges and voltage cut-offs
- Crest factor
- Voltage and current harmonics
- Mains signalling voltages.

Communication:
- RS485 using Modbus
- 10BaseT and 100BaseT Ethernet (Modbus/TCP)
- 2 USB ports (host/device)
- Open CAN (internal bus for DIRIS O modules).

DIRIS N600:
the user also has the following functions:
- Flicker (Pst and Plt)
- EN50160 report
- Voltage transients (sampling 1.33 µs)
- Voltage and current interharmonics.

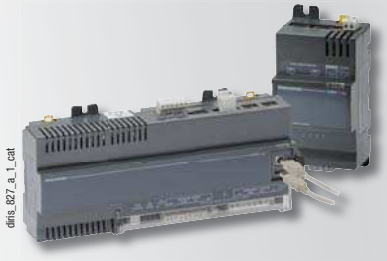
A hub of innovation

The DIRIS N, developed using innovative technology, has enabled some functions to cross a new frontier.

• Measurements
Optimal calculation functions and sampling in the range of 1.33 µs ensuring a very high level of precision when measuring as shown below:
- Voltages and currents in class 0.1
- Active energy in class 0.2 as per IEC 62053-22
- Harmonics in class 1.

• Operating
A DIRIS D colour LCD display module gives the user access to all the installation's parameters with the greatest of ease. They will be able to access both numerical values and graphs.
The DIRIS N offers the option of downloading all the data in its internal memory onto a USB key or SD card.

• Installation
The DIRIS N, D and O have been designed to be located as close as possible to the function and its operation so as to reduce the number of cables needed.
Using a remote display module avoids having lots of cables across the door; only an RJ45 cable is required. In the same way, power is supplied to the additional DIRIS O modules directly via the communication bus, thus avoiding the use of yet more cables.



➲ DIRIS N300 / N600 - Software suite

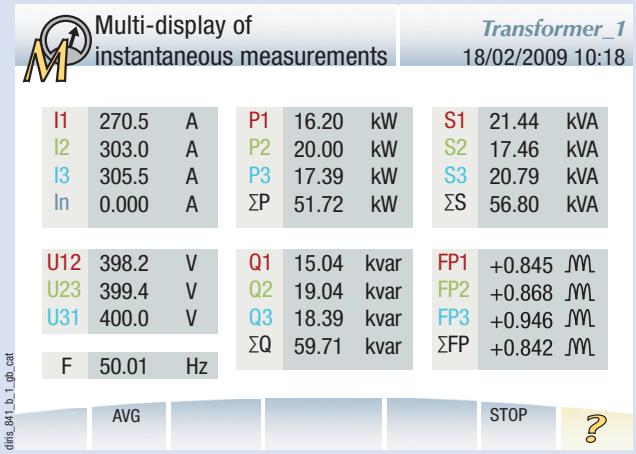
The DIRIS N300/N600 network analyser is delivered with the software package which allows to manage remotely all features. Friendly and intuitive, these software tools insure the functions of:

SOFTWARE 1: Real time remote monitoring installation

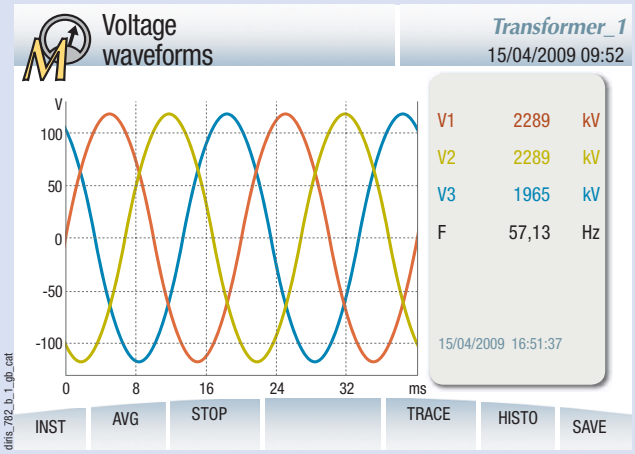
This software reproduces the screens of the DIRIS D600 identically on a PC. Any user can therefore access all the data to save time and increase readability:
- Measurements
- Energies
- Events
- Quality Parameters
- Diagnosis
- Configuration.

Communication between the PC and the DIRIS N units is via Ethernet. A simultaneous display of several DIRIS N is possible.

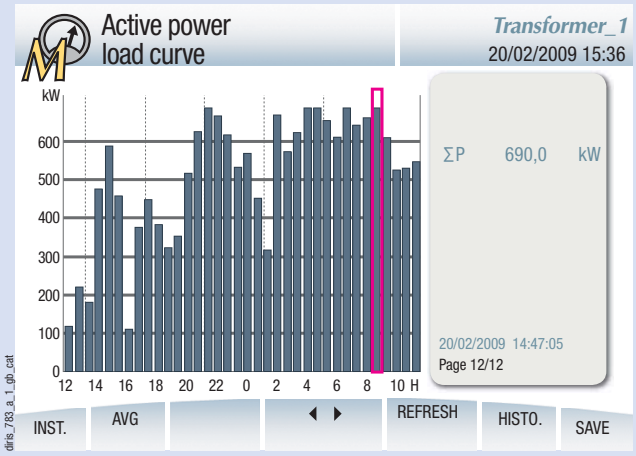
All measurements displayed on a single screen



Voltage waveforms displayed



Load curve displayed



Total and partial consumption displayed per time slot

SOFTWARE 2: Configuration for a simple and fast parameter setting

This configurator allows to modify and to adapt quickly the parameters of regulation of the network analyser. The following parameters are available:
- Networks
- Events
- EN50160 report thresholds
- Tariff meters
- Histories and load curves
- Control/command functions linked to DIRIS O remote modules.

A maintenance function allows the connection and operation of the DIRIS Ns to be checked after they have been configured.

diris_787_b_1_gb_cat

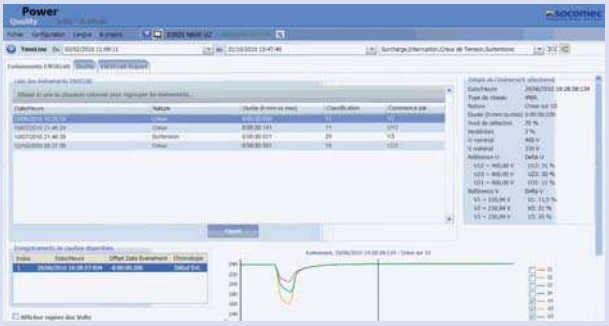
diris_786_b_1_gb_cat

SOFTWARE 3: Operation to analyze the quality parameters

This software allows access to the DIRIS N300/N600 quality parameters so that you may improve the efficiency of your electrical installation.
It provides the following functions:
- Classification of voltage dips, cuts and surges (Disdip table)
- EN50160 automatic reports (voltages, frequencies, harmonics, flickers...)
- Automatic detection of out of limits event
- Timestamp EN50160 events list (surges, dips, cut-offs...)

The application enables reports to be issued for periods which can be customised by the user.
The temporal display screen allows rapid access to information relating to the desired period.

Event log: Display



diris_837_a_1_gb_cat

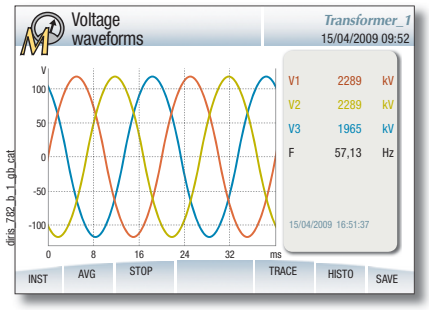
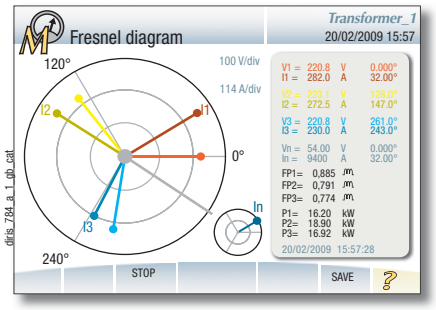
Options

DIRIS D: the ergonomic remote graphic display

1. High-definition colour display.
2. Direct access buttons.
3. Control by rotating wheel.





The **DIRIS D600** is a high-definition colour display which allows adaptable, local or remote viewing of the functions of the DIRIS N300 and N600.

A single DIRIS D600 display can show information coming from several DIRIS N using windows on the screen dedicated to measurement, analysis of consumption and energy quality, along with their associated events and curves.

DIRIS O: for extended control-command functions

DIRIS O are optional analogue and/or digital input/output modules which can extend the system's functions by taking into account all information relevant to facility supervision (fluids, alarms, etc.).
They communicate with the DIRIS N via a SOCOMEC bus.
They enable you to:

- acquire and apply the positions of breaker components, contactors, sensors, etc.
- centralise pulses from water, gas and electricity meters.
- apply information from analogue sensors (temperature, flow, humidity level, pressure, etc.).
- actuate breaker components, perform load shedding actions upon alarms. The inputs/outputs can be activated via logic equations.

Services and Technical assistance

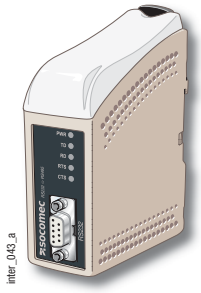
Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

Communication accessories

appli_223_b

Connecting the RS485 link

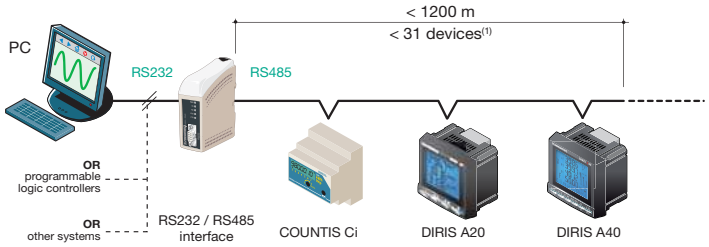
RS232 / RS485 interface



inter_043_a

Function

If the PC is equipped with an RS232 port, the interface will convert RS232 signal into RS485. 31 devices can be connected to the interface over a distance of 1200 m at 9600 bauds.



diris_141_g_1_gb_cat

References

(1) Beyond these characteristics, use an " RS422 / RS485 repeater".

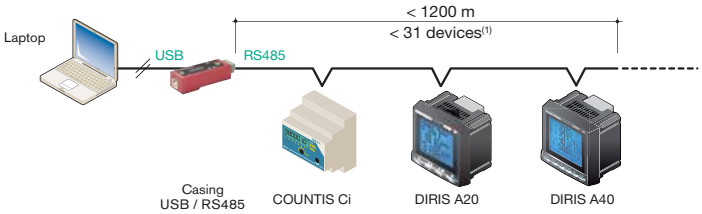
Auxiliary power supply Us	Frequency	Reference
95 … 240 VAC / 110 … 250 VDC	50 Hz	4899 **0100**

USB / RS485 interface

inter_002_a_2_cat

Function

If the PC is not equipped with a serial port, the interface will connect via the USB port to obtain an RS485 communication port.
This product is recommended for local, non-permanent use.



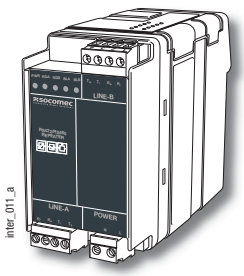
inter_142_f_1_gb_cat

(1) Beyond these characteristics, use an " RS422 / RS485 repeater".

References

Description of accessories	Reference
External USB / RS485 interface unit	4899 **0110**

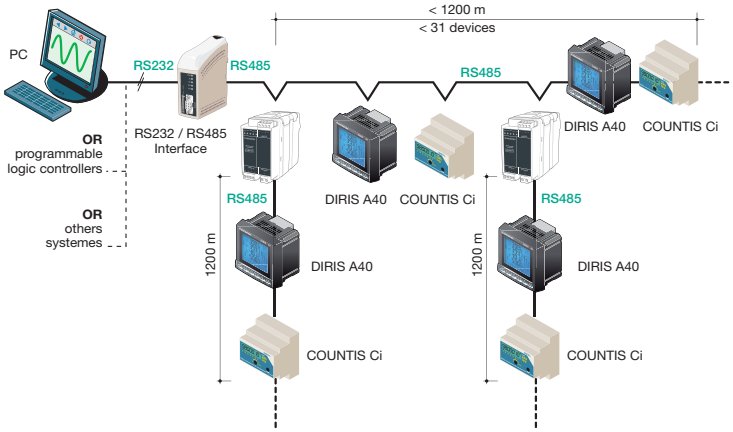
RS422 / RS485 repeater



inter_011_a

Function

In some applications the maximum distance and/or the maximum number of devices can be exceeded. One solution to this technical restriction is to install an interface which amplifies the signal over a further 1200 m (at 9600 bauds) for 31 devices.
In addition, it allows you to create a new branch on the network thereby making it possible to reduce the length of cable required to connect the devices by avoiding back and forth cabling.



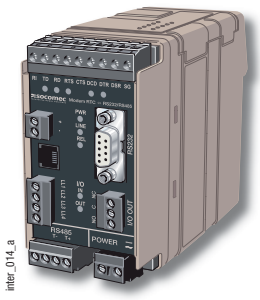
inter_143_g_1_gb_cat

References

Auxiliary power supply Us	Frequency	Reference
95 … 240 VAC / 110 … 250 VDC	50 Hz	4899 **0120**

Using the telephone network

RTC / RS232 - RS485 modem



Function

On some sites, it is impossible to connect all the DIRIS's using a single cable. Indeed, the distances may be such that the investment would be too costly. In this case, a modem may be used.
This modem can be configured as a master (RS232: connected directly to PC) or slave (RS485: connected to slave devices, via network).

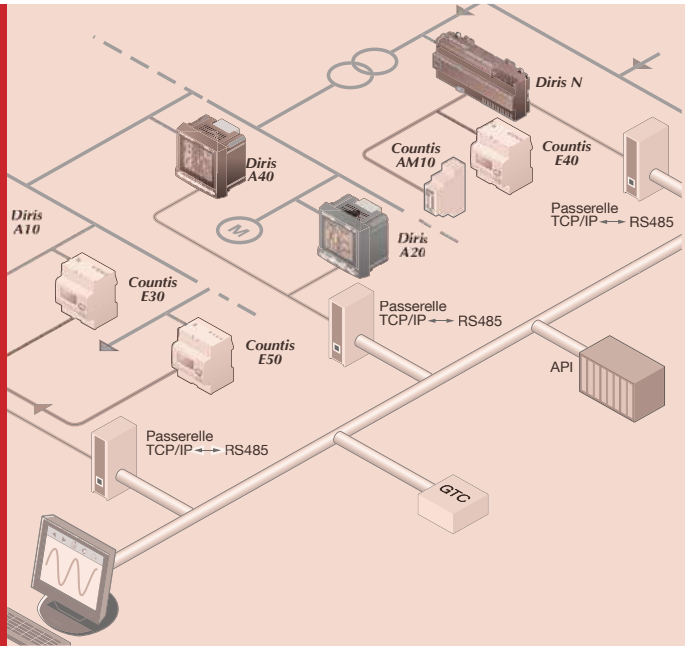
230 VAC / 12 … 48 VDC	50 Hz	4899 **0300**

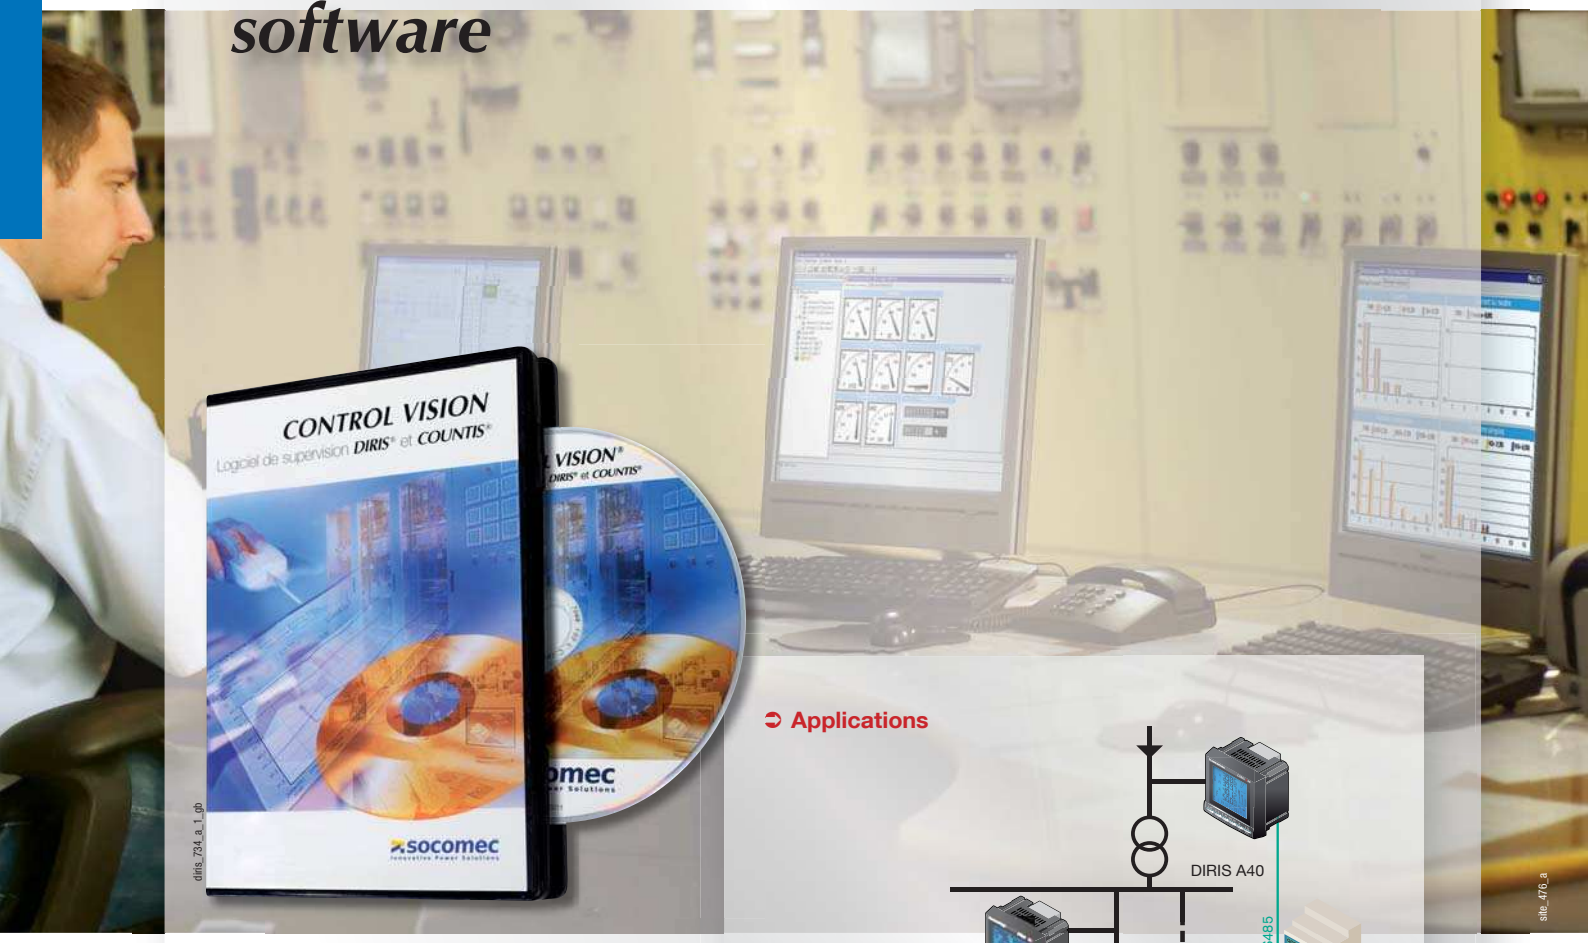


Other solutions and services

The accessories listed in these pages represent a selection from our range.
We can supply many other solutions upon request, such as SHDSL interfaces, fibre optics/RS485, GSM/GPRS and protocol converter interfaces.

Need something integrating into your network?
No problem with **SERVICES & TECHNICAL ASSISTANCE**. This department will fully integrate all your SOCOMEC devices, audit your installation, commission selected equipment and train personnel in charge of their use.
For further information, please contact your SOCOMEC agency.

CONTROL VISION
software

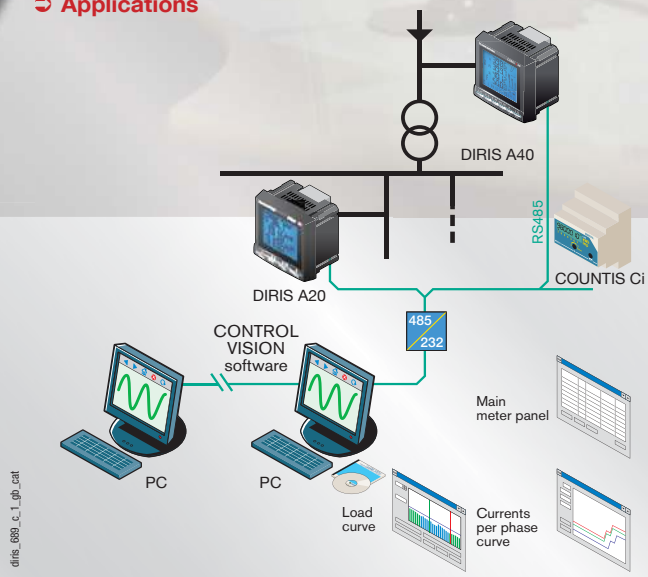


To configure, display and monitor DIRIS / COUNTIS

➲ Function

CONTROL VISION is a metering and monitoring software for DIRIS Am, A10, A20, A40, A41, A60, Ap, M, Mh, C, CC, CM, CMv2, N300/N600 and COUNTIS Ci devices.
It operates in a Windows XP Service Pack 3 or Vista environment.
Minimum PC requirement: 1.0GHz processor with 512MB of RAM, 500MB of available hard drive space and a monitor with a minimum resolution of 1024x768.
Communication with the devices is either directly via the Ethernet network, a serial port or the computer's USB connection.

➲ Applications



The **CONTROL VISION** software is designed to communicate with all devices in the installation and create logs based on manual and automatic scanning.
CONTROL VISION will display all the electrical values measured and read the total energy consumption.
The user can also create logs of several electrical values over a selected time period.
All these functions can be performed in relation to a DIRIS (corresponding to one output) or a predefined group of DIRIS (all outputs relating to a workshop, for example).

The user will also be able to import or export the configuration parameters with EXCEL. The ease of integration and modification of the number of products on this RS485 link makes this a long-lasting solution.

General characteristics

The **CONTROL VISION software** allows:
- remote configuration of DIRIS and COUNTIS Ci devices,
- displaying all electrical parameters measured, energies, indices, alarms, harmonics and the configuration of all the devices,
- creating readings, backups and automatic print-outs,
- displaying, of DIRIS CM/CMv2/A40/A60 and COUNTIS Ci inputs:
  - table of min. 10P, corresponding load curve,
- displaying historical data for each DIRIS in tabular or graphical format:
  - immediate measurements,
  - harmonics values,
  - status changing of inputs / outputs.

The **CONTROL VISION software** is available in a multilingual version comprising the following languages: english, french, german, italian, spanish.

References

Type	CONTROL VISION software Reference

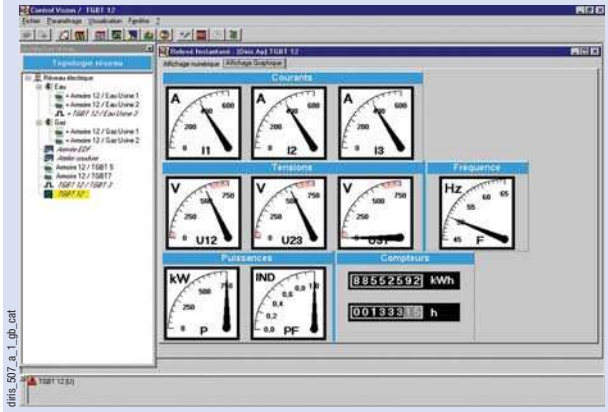
CONTROL VISION software + INTRANET option (multi user)	4805 **0001**

Functions

Instantaneous measurement display

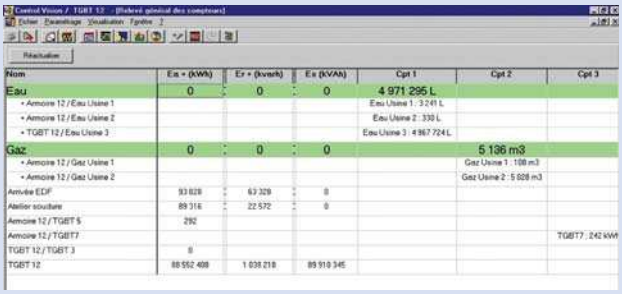


diris_507_a_1_gb_cat

All electrical values displayed either with digital values or analogue indicators, depending on the tab selected:
- currents,
- phase to phase voltage,
- powers,
- frequency,
- active energy and time meter (according to DIRIS) of the selected DIRIS.

Alarm levels (programmed in the device) are indicated in red.
The parameters to be displayed can be customised.
All screens are refreshed automatically.

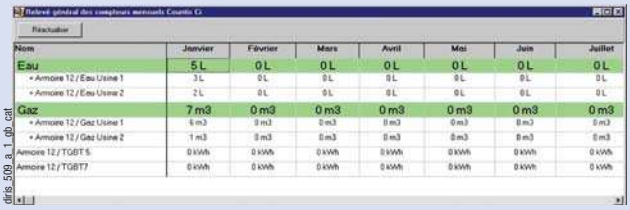
General reading of measurements



diris_508_a_1_gb_cat

Energy consumption table or metered pulses of all the DIRIS / COUNTIS Ci present on the network. This readout comprises (depending on the type of DIRIS) positive and negative active energy (kWh), positive and negative reactive energy (kVArh), apparent power (kVA) and pulses metered by the devices' on/off inputs. These pulses are configurable (name, weight and unit).
These values can be added (or subtracted) in groups, allowing them to be grouped by type (electricity, water, gas, etc.).
They can be printed and saved (Excel file) automatically (one file per day created at a set time, for example).
This screen may be printed and extracted manually by clicking on the respective pushbuttons.

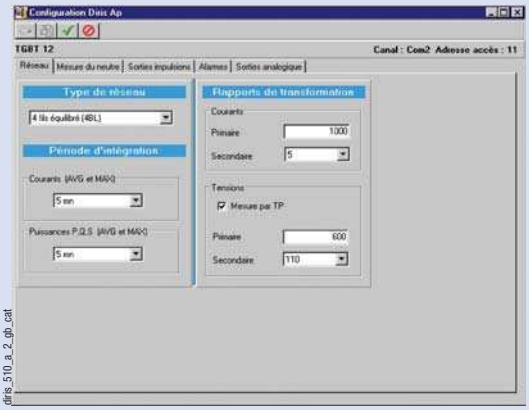
Monthly general reading of COUNTIS Ci



diris_509_a_1_gb_cat

Monthly meter readings of all COUNTIS Ci present on the network.
COUNTIS Ci memorises monthly consumption (energy or pulse), via each of their 7 inputs, the software retrieves the values and allocates them into the allocated “group”.
This screen may be printed and extracted manually by clicking on the respective pushbuttons.

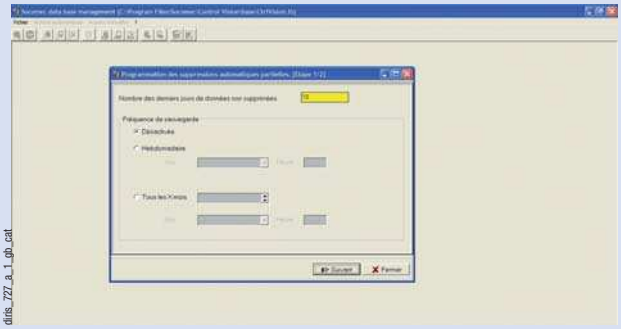
Configuration of the devices



diris_510_a_2_gb_cat

Display window for viewing and configuring the parameters entered in DIRIS/COUNTIS
Each device's settings can be checked in a single window (divided into tabs depending on the options).
Modification of the following parameters are possible from this window using a password (depending on the options):
- type of network,
- CT and VT ratio,
- weight of pulse outputs,
- levels and assignment of the alarms,
- assignment of the 4/20 mA outputs and parameters,
- assignment and weight of the TOR inputs.

Managing the database (DMT)



diris_727_a_1_gb_cat

The DMT software (supplied with CONTROL VISION) is a database management tool.
It helps ensure by automatic or manual action (complete or partial database backup and partial database deletion), thereby providing a database suitable for the efficient operation of CONTROL VISION.

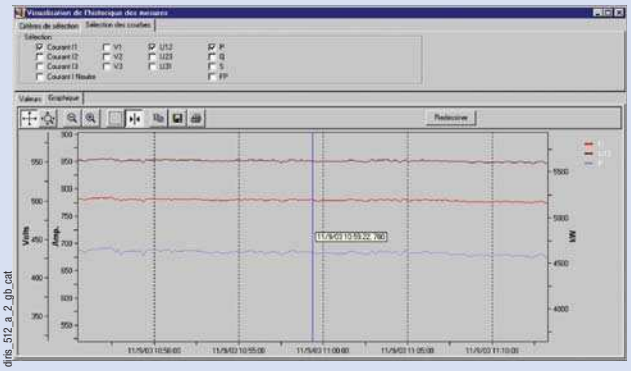
General reading of the instantaneous measurement

diris_511_a_2_gb_cat

Displayed in numerical format:
- currents,
- voltages,
- powers,
- frequency,
- power factor,
- electrical value in the alarm.

This screen may be printed and extracted manually by clicking on the respective pushbuttons.

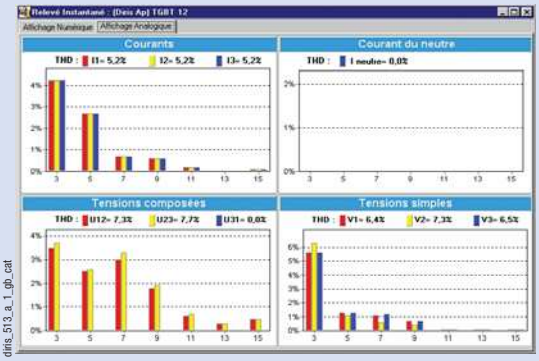
History of device measurements



diris_512_a_2_gb_cat

CONTROL VISION records the electrical parameters of the devices defined under "permanent scanning" into a central database.
The scale of the graphical display can be selected and specific areas enlarged.
The cursor allows obtaining the value / date time of an exact point where it is placed.
All colours may be customized in order to complement the Windows environment.
This screen may be printed and extracted manually by clicking on the respective pushbuttons.

General harmonics readings

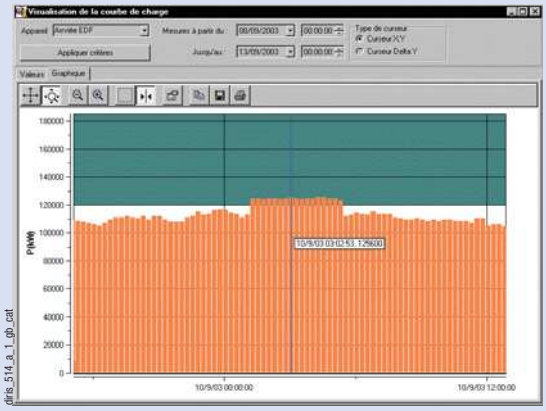


diris_513_a_1_gb_cat

Table or bar graph showing harmonics for the selected device (DIRIS A40/A60) row by row for:
- the 3 currents and neutral (on the basis of the network type)
- the simple and Ph-Ph and Ph-N voltages (on the basis of the network type).

All colours may be customized in order to complement the Windows environment.
All screens are refreshed automatically.

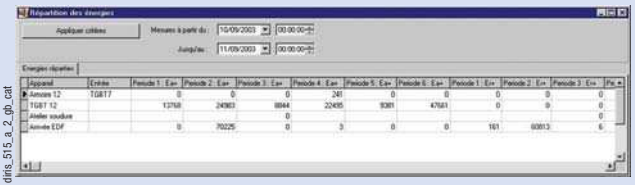
Load curve



diris_514_a_1_gb_cat

The load curve gives a graphic image of the load on the network according to the selected period
DIRIS CM / CMv2 / A60 (A40 fitted with memory module) and COUNTIS Ci (via 4 inputs) records the average values for a period (for example, 10 minutes); CONTROL VISION regularly retrieves and records the results in the database in order to format the load data in a table of all devices within CONTROL VISION.
The concerned devices are those configured in CONTROL VISION.
On the graph, the orange section represents the average value of the power consumed during this period (10 minutes in this case), the green section represents the power zone outside the procured power (which the user has defined per product). This allows the user to quickly see (and zoom in on) the zone where the load has exceeded the value procured from the electricity supplier.
The cursor allows obtaining the value / date time of an exact point where it is placed.
All colours may be customized in order to complement the Windows environment.
This screen may be printed and extracted manually by clicking on the respective pushbuttons.

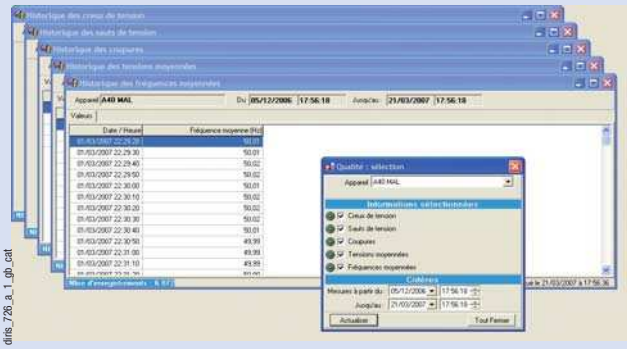
Power distribution



diris_515_a_2_gb_cat

Display of the active and reactive energy consumption by period and by device.
Each period is defined by a name, a time of starting and of ending.
The concerned devices are those configured in CONTROL VISION.
This screen may be printed and extracted manually by clicking on the respective pushbuttons.

Quality



diris_726_a_1_gb_cat

Allows display of events (voltage dips, voltage surges, cut-offs, average voltages, average frequencies) in table form.
It requires a DIRIS A60 or DIRIS A40 with a memory module.

➲ Services and Technical assistance

Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

BILLING APPLICATION
software

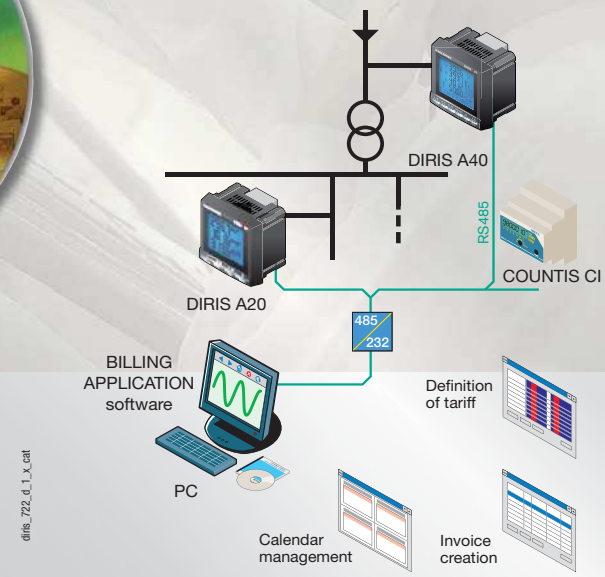
Sub-billing of energy consumption by time slot

➲ Function

BILLING APPLICATION is an energy consumption management software package. Using a defined tariff system, it allows underbilling and simulation of consumption invoices.
CONTROL VISION is required for the software to operate.

The software operates in a Windows XP Service Pack 3 or VISTA environment. Minimum PC requirement: 1.0GHz processor with 512MB of RAM, 500MB of available hard drive space and a monitor with a minimum resolution of 1024x768.

➲ Applications



The **BILLING APPLICATION** software uses information gathered from the COUNTIS Ci, DIRIS CMv2 and DIRIS A40 linked to a memory module, or from a DIRIS A60, to enable internal invoicing or tariff simulation to optimally define the requirements.

BILLING APPLICATION enables the consumption of a production line to be refined in order for the costs to be allocated in relation to the production.
Users can also distribute the energy consumption according to the various departments within a company (e.g. a hospital with a geriatrics department, surgery and restaurant, etc.).

Using load curves, **BILLING APPLICATION** also enables users to define the most appropriate tariff for their application in order to reduce their energy bill.

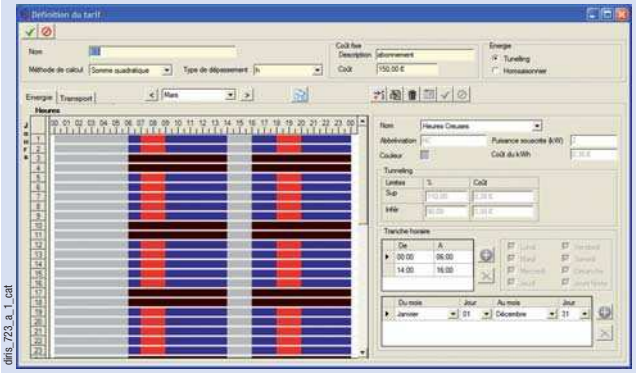
General characteristics

BILLING APPLICATION allows:
- calendar management (bank holidays…),
- price creation (periods, cost, fixed, premium…),
- pricing calculation management,
- device group creation,
- bill edition according to period and consumer,
- load curves visualisation,
- consumption comparison.

The **BILLING APPLICATION software** is available in a multilingual version comprising the following languages:
- french,
- english,
- spanish,
- german,
- italian.

Functions

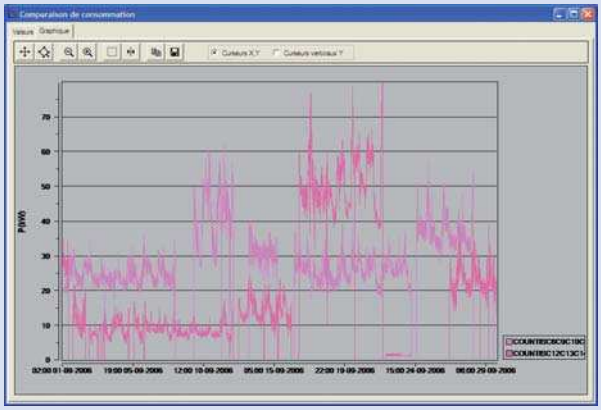
Definition of tariff



diris_723_a_1_cat

Tariff definition window for power consumption and transmission:
- KWh price definition,
- tariff name,
- calculation method,
- type of overrun,
- additional fixed costs (subscription, service…),
- consumption and transmission periods list,
- seasonal or transport use.

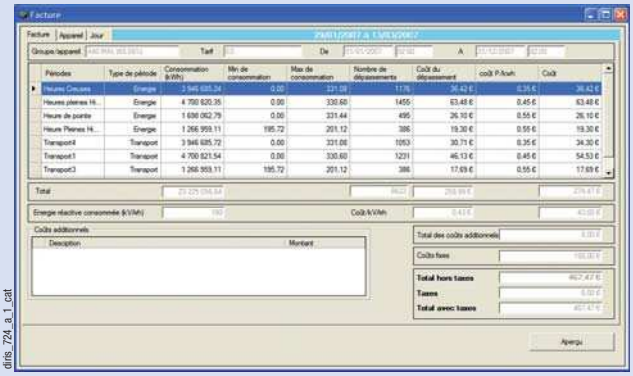
Comparison of 2 load curves



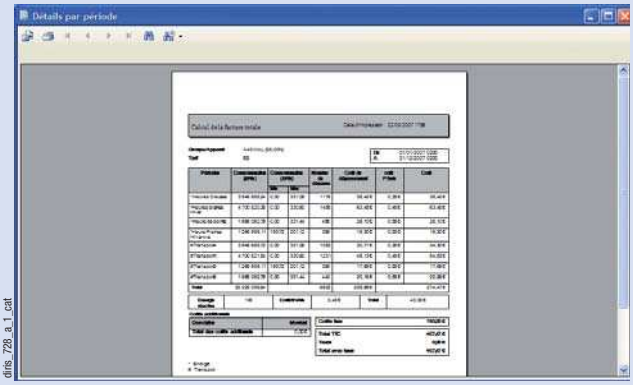
diris_725_a_1_cat

Visualisation of several devices or device groups for defined period.
Table form or curve display.

Invoice creation



diris_724_a_1_cat



diris_728_a_1_cat

Print an invoice or export data into EXCEL for one device or a group of products.
Software enables user to select tariff and billing period.

Electronic protection

Differential protection - voltage surge protection - overcurrent protection

All electrical installations - particularly those which incorporate sensitive receivers must be appropriately protected or monitored against indirect contact, earth leakage currents, short circuits or even temporary voltage surges.

➲ In the section entitled 'Electronic protection', we have grouped together all the devices which protect your installation against these various hazards:

- RESYS differential protection
  See our selection guide "Earth leakage protection" **p. 404**
- SURGYS surge protection devices
  See our selection guide "Protection against voltage surges" **p. 416**

➲ **Warning: sound knowledge of your electrical network is essential to ensure the successful outcome of your protection project.** In fact, the choice of electronic protection products and their place of installation depend on the type of supply source, the length of the conductors and the type and nature of the electrical receivers connected to the network.

With long-term experience in industry and perfect knowledge of installation standards, **SOCOMEC guarantees** much more than the supply of high-performance products. We carry out an audit of your LV installation, define the protection requirements and integrate the products perfectly into your electrical distribution system; we also perform commissioning, offer training in the use of the installation and the standards governing it and provide turnkey supervision solutions. **Contact us now to see how we can help with your project!**

resys_041_a_1_cat

Earth leakage relays type A "protection of people"

➲ Function

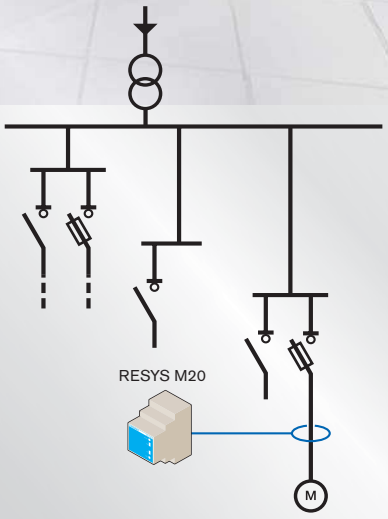
RESYS M20 earth leakage relays are associated with a remote trip breaking device (automatic power breaking), thus providing the following functions:
- protection against indirect contacts,
- limitation of leakage currents.

The relay also monitors electrical installations when used directly as signalling relay.

➲ Conformity to standards

- IEC 60755
- IEC 60947-2
- IEC 62020
- IEC 60364

➲ Applications



resys_052_b_1_x_cat

Rapid recognition of an insulation fault increases the availability of the distribution network by preventing accidental power cuts and the resulting loss of production.

Examples of conventional applications

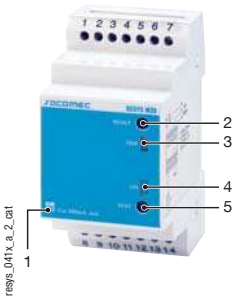
AC LV networks: IT, TT, TNS.

Monitoring pure AC differential currents (type AC) and pulsed (type A) to provide the following functions:
- Protection:
  - against direct contact,
  - against fire risk,
  - earth and protection conductors.
- Preventive signalling.
- Used with SOCOMEC “Core balance transformers” (see page 410).

General characteristics

- M20 with 1 alarm relay.
- Sensitivity: 30 or 300mA depending on the version.
- Time delay: 0 (instantaneous) or 60ms depending on the version.
- Tripping accuracy by TRMS measurement.
- Automatic permanent relay-toroid connection test.

Front panel



1. *Threshold value and time delay indication.*
2. *"RESET" pushbutton*
3. *"TRIP" alarm LED.*
4. *"ON" LED.*
5. *"TEST" pushbutton*

Characteristics

Auxiliary power supply Us	
Frequency	47 … 63 Hz
Operating zone	0,85 … 1,15 U_s
Max. consumption	6 VA

Insulation (according to IEC 60664-1 standard)	
Rated insulation voltage	250 VAC
Rated impulse voltage	2.5 kV (115 VAC) / 4 kV (230 VAC)
Degree of pollution	Class 3

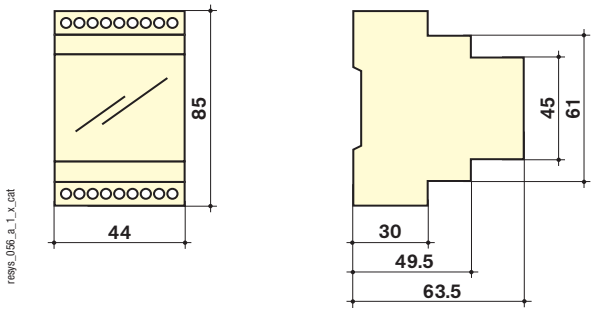
Threshold values	
IΔn setting	30 / 300 mA
Accuracy of tripping	- 20 … - 10 % IΔn
Network frequency range	15 … 400 Hz

Alarm	
Alarm configuration mode	save
Reset	Manual by pushbutton / using terminal

Output contacts	
Number of contacts	1
Type of ALARM contact	250 VAC - 8 A - 2000 VA
ALARM operating mode	negative security

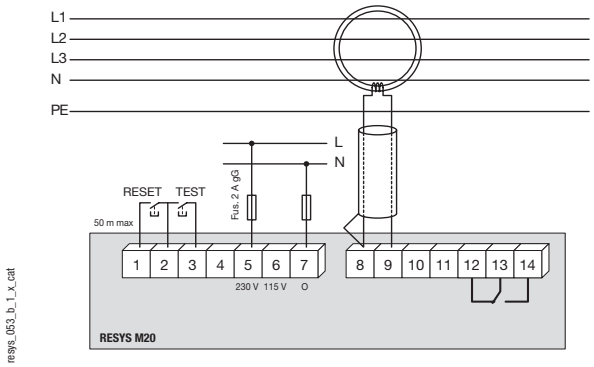
Operating conditions	
Operating temperature	- 20 … + 55 °C
Storage temperature	- 30 … + 70 °C

Case



Type	Modular
Number of modules	2.5
Dimensions W x H x D	44 x 85 x 63.5
Case degree of protection	IP40
Terminal block degree of protection	IP20
Rigid cable connection section	0.2 … 4 mm²
Flexible cable connection section	0.2 … 2.5 mm²
Weight	190 g

Terminals and connections



1 - 2 - 3: external pushbuttons
5 - 6 - 7: auxiliary power supplies U_s
8 - 9: SOCOMEC differential toroid connections
12 - 13 - 14: alarm relay outputs

NOTE The earthing must not pass through the C.T. For single phase applications, only the live and neutral need to be passed through the C.T.
Cabling: for distances > 1 m, use twisted pair cable between the unit and C.T.
Do not connect the shield to earth.

Earth leakage relays type A "Motor feeder"

➲ Function

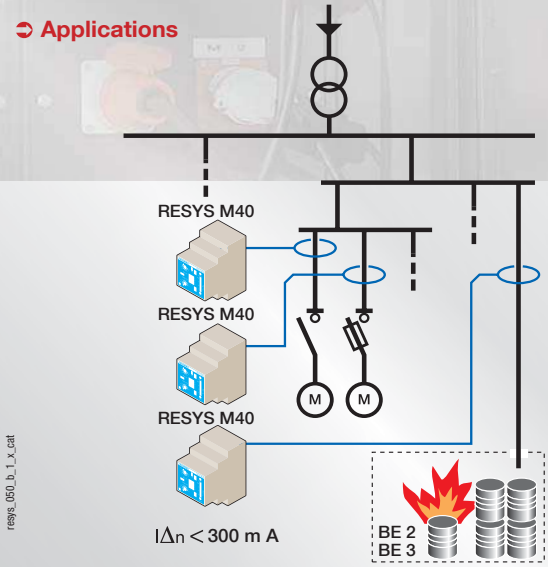
RESYS M40 earth leakage relays are associated with a remote trip breaking device (automatic power breaking), thus providing the following functions:
- protection against indirect contact,
- limitation of leakage currents.

They also preventively monitor electrical installations via their (configurable) pre-alarm function or when used as signalling relays.

➲ Conformity to standards

- IEC 60755
- IEC 60947-2
- IEC 62020
- IEC 60364

➲ Applications



Rapid recognition of an insulation fault increases the availability of the distribution network by preventing accidental power cuts and the resulting loss of production. TRMS measurement avoids repeated random tripping and the bargraph allows the display of permanent leakage current.

Examples of conventional applications

AC LV networks: IT, TT, TNS.

Monitoring pure AC differential currents (type AC) and pulsed (type A) to provide the following functions:
- protection
  - against indirect contact,
  - against fire or explosion risk, (classified sites BE2 and BE3 depending NF C 15-100),
  - of earth and protection conductors.
- preventive signalling,
- monitoring installations where periodic insulation measurement with power off is impossible.

General characteristics

- RESYS M40 with 2 configurable relays:
  - either 2 alarm relays,
  - or 1 alarm relay and 1 pre-alarm relay (50 % IΔn).
- Adjustment sensitivity from 30 mA to 30 A.
- Time delay 0 to 10 s.
- Tripping accuracy by TRMS measurement.
- Automatic instantaneous tripping at 30 mA.
- Positive or negative security configurable by the user.
- Selection of toroid ratio.
- Automatic permanent relay-toroid connection test
- Sealable cover.

Earth leakage relays type A "Motor output"

➲ Function

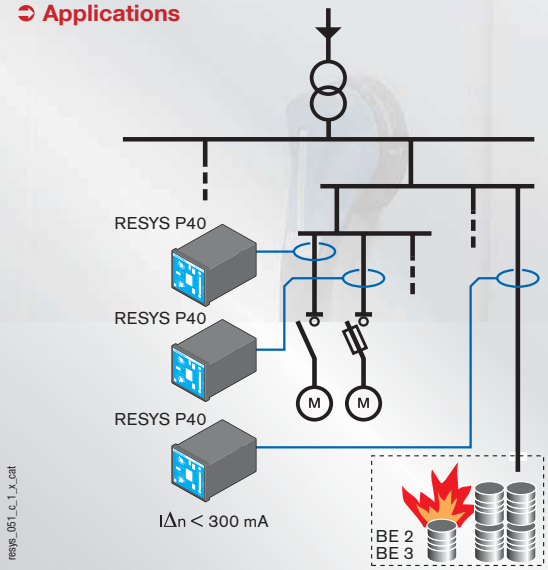
RESYS P40 earth leakage relays are associated with a remote trip breaking device (automatic power breaking), thus providing the following functions:
- protection against indirect contact,
- limitation of leakage currents.

They also preventively monitor electrical installations via their (configurable) pre-alarm function or when used as signalling relays.

➲ Conformity to standards

- IEC 60755
- IEC 60947-2
- IEC 62020
- IEC 60364

➲ Applications



TRMS measurement avoids repeated random tripping and the bargraph allows the display of permanent leakage current.
Rapid recognition of an insulation fault increases the availability of the distribution network by preventing accidental power cuts and the resulting loss of production.
RESYS P40 are particularly suitable for insertion in electricity control panels with withdrawable compartments.

Examples of conventional applications
AC LV networks: IT, TT, TNS.
Monitoring pure AC differential currents (type AC) and pulsed (type A) to provide the following functions:
- protection
  - against indirect contact,
  - against fire or explosion risk, (classified sites BE2 and BE3 depending NF C 15100),
  - of earth and protection conductors,
  - motor, equipment and hardware protection;
- preventive signalling,
- monitoring installations where periodic insulation measurement with power off is impossible.

General characteristics

- Compact.
- RESYS P40 relay with 2 configurable relays:
  - either 2 alarm relays,
  - or 1 alarm relay and 1 pre-alarm relay (50 % IΔn).
- Adjustment sensitivity from 30 mA to 30 A.
- Time delay 0 to 10 s.
- Tripping accuracy by TRMS measurement.
- Automatic instantaneous tripping at 30 mA.
- Positive or negative security configurable by the user.
- Selection of toroid ratio.
- Automatic permanent relay-toroid connection test
- Sealable cover.

type A and B

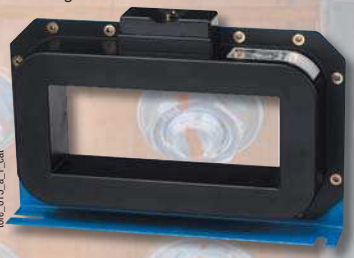
Closed toroids

tore_014_a_1_cat

Split core toroids

tore_016_a_1_cat

Rectangular closed toroids



tore_015_a_1_cat

➲ Function

The installation of protection or signalling resources such as earth leakage protection relays involves the use of core balance transformers.
These enclose active conductors, providing the differential summation of vector currents and revealing leakage current.
The DLD core balance transformers proposed by SOCOMEC meet the requirements for measurement sensitivity and are adapted to the RESYS M20/M40/P40 differential relays.
Closed (series W, WR and TFR) or split core (series WS) types, suit all wiring configurations.
A special range is proposed for RESYS B470/B 471 and B 420 relays.

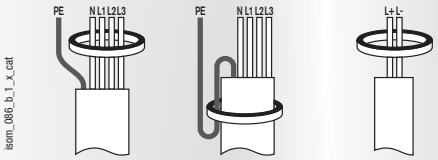
➲ Conformity to standards

- IEC 60044-1

➲ Installation of toroids

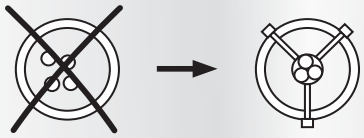
All of the active conductors must be passed through the detection toroid's aperture.
The protective conductor must pass on the outside of the toroid or pass once for each direction.

Installation of the detection toroids



isom_006_b_1_x_cat

Installation limiting distortions during heavy load switching



isom_007_a_1_x_cat

Characteristics

Insulation coordination	according to IEC 664-1
Rated insulation voltage	690 VAC
Dielectric quality	6 kV
Degree of pollution	3
Test voltage according to IEC 255	3 kVAC
Transformation ratio	600 / 1
Resistance of winding	≈ 7 Ω
Rated primary current (W/WR/TFR/WS toroids)	10 A
Rated primary current (Specific toroids for RESYS B470/B471)	3 A
Permanent current withstand	20 A
Associated thermal short-circuit current	14 kA / 1s
Nominal power	50 mVA
Max. accuracy class	5
Operating temperature	-10 … +55°C
Flammability class	UL94V-0

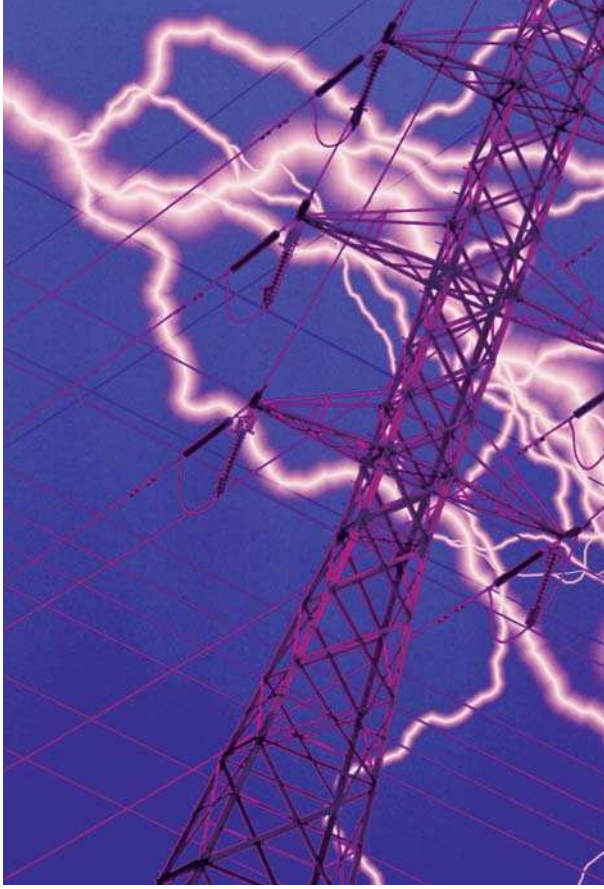
Protection against overvoltages



SOCOMEC's SURGYS surge protection devices ensures the protection of electrical recievers againts transient overvoltages from various sources:

- indirect effects of a lightning strike,
- Switching operations on an industrial network,
- disruptive loads (switched-mode power supplies, inductive loads, etc.).

The SURGYS range covers both strong and weak currents.

SURGYS® G50-PV

NEW

sgys_068_a_1_cat

Surge arrester PV - Type 2 "photovoltaic panels"

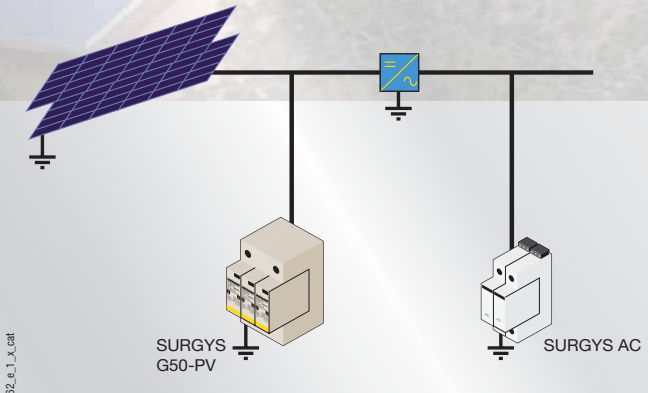
➲ Function

SURGYS® G50-PV Surge Protective Device is designed to ensure protection of photovoltaic supply networks against transient overvoltages.

➲ General characteristics

- Type 2 Surge Protective Device.
- Available with protection from 500 V d.c. to 1000 V d.c.
- Monobloc design.
- Common mode / differential mode protection.
- Remote signalling contact (depending on reference).
- End of service life indicator.
- Plug-in protection module.

➲ Applications



sgys_062_e_1_x_cat

Main incoming protection in a photovoltaic network:
- SURGYS G50-PV is installed in the d.c. side, in the combiner box, close to the solar cell strings, for protecting the downstream d.c. equipment from the effects of lightning…
- SURGYS a.c. is installed in the a.c. side close to the inverter for protecting the downstream a.c. equipment from the effects of lightning.

➲ Conformity to standards

- EN 61643-11 class 2 tests
- IEC 61643-1 class 2
- IEC 60364-7-712

SURGYS® G140-F

Surge arresters - Type 1 "presence of lightning rod and classified installations"

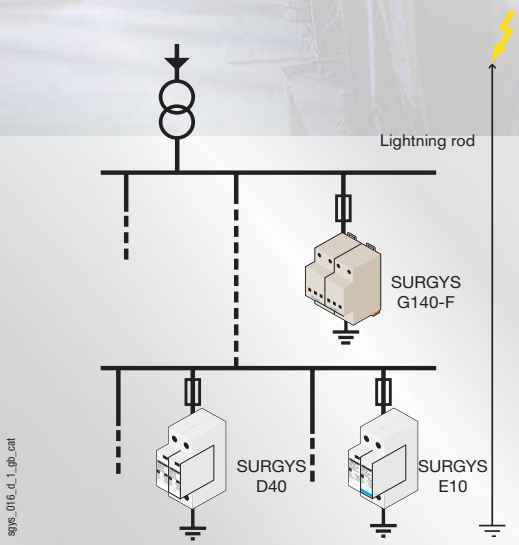
➲ Function

The **SURGYS® G140-F** surge arrester is designed to ensure the protection of your low voltage distribution installations and your electrical equipment. It acts against industrial operation overvoltages and overvoltages owing to lightning.
This type of Surge Protective Device is particularly recommended in case of risk of direct impact of high energy level lightning strikes.
NEW: impulse current (limp) of 25 kA per pole.

➲ Conformity to standards

- EN 61643-11 class 1 tests
- IEC 61643-1 class 1 and 2
- UL1449 ed. 2

➲ Applications



- Upstream location of the distribution surge arresters.
- Main switchboard + building protected against lightning either:
  - through lightning conductors,
  - through mesh cages.
- Main switchboard in buildings subjected to high level risk of lightning strikes such as classified installations, installations located in areas prone to high density of lightning strikes, high-rise buildings, presence of antenna towers, chimneys.
- Sites located at high altitudes.
- Distribution board of a building with presence of Lightning Protection Systems.

General characteristics

- Type 1 surge arrestor.
- Designed to resist discharge linked to direct lightning strike.
- Max. discharge current 140 kA.
- Protection in common mode.
- Thermal disconnection device.
- End of service life indicator.
- Remote signalling contact.
- Absence of follow current.
- Possibility of parallel or series arrangement.
- Fuse combination switch recommended: FUSERBLOC (see page 142).

Front panel

1. End of life indicator.
2. Earthing comb connection.
3. Remote signallling contact.
4. DIN rail mounting.

Characteristics

Network

Network type	230 / 400 VAC
Neutral systems	TT-TN-IT
Nominal voltage U_n	400 VAC
Maximum voltage U_c	400 VAC
Temporary surge in power line frequency U_T	400 VAC

Protection characteristics

Level of protection U_p	2.5 kV
Maximum discharge current (1 shock 8/20 µs) I_{max}	140 kA
Nominal discharge current (15 shocks 8/20 µs) I_n	50 kA
Residual voltage at I_{imp}	1.5 kV
Shock current (1 shock 10/350 µs) I_{imp}	25 kA
Mode of protection	common

Associated characteristics

Residual current I_c	< 2 mA
Response time t_r	< 25 ns
Follow current I_f	None
Rated conditional short-circuit current I_{cc}	25 kA
Recommended disconnectors	125 A fuses gG(1)
Type of disconnection indicator	mechanical
Number of disconnector indicators	3

Remote signalling contact

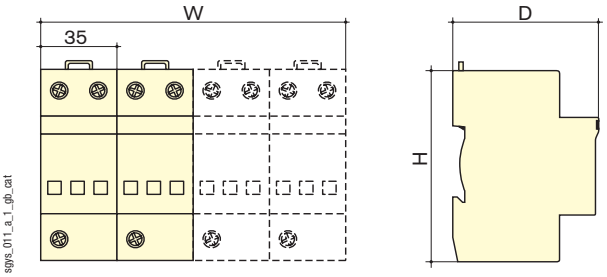
Number of contacts per pole	1
Contact type	terminal connections
a.c. making capacity	3 A
d.c. making capacity	2 A
a.c. nominal voltage	125 VAC
d.c. nominal voltage	30 VDC
Sustained current	2 A
Connection type	screw block
Max. section of terminal connections	1.5 mm²

Operating conditions

Operating temperature	-40 … +85 °C
Storage temperature	-40 … +85 °C

(1) Value in accordance with article 534.1.5.3 of NF C 15100: higher ranges can however be used in case reinforced service continuity of the surge arrestor line is desired.

Case



Type	Modular
Dimensions W x H x D in 2 poles	70 x 90 x 67 mm
Dimensions W x H x D in 3 poles	105 x 90 x 67 mm
Dimensions W x H x D in 4 poles	140 x 90 x 67 mm
Case degree of protection	IP20
Terminal block degree of protection	IP20
Case material	polycarbonate UL94-5VA
Network connection section	10 … 50 mm²
Earth connection section	10 … 50 mm²

appli_288_a

Surge arresters - Type 1 and 2 "presence of lightning conductors and classified installations with sensitive receivers"

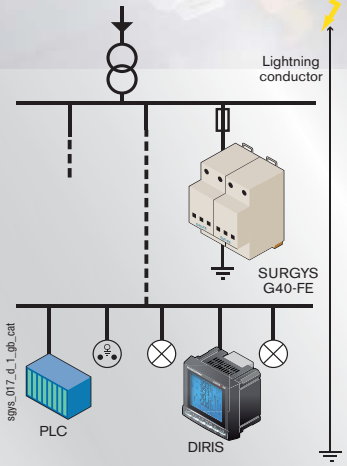
➲ Function

The **SURGYS® G40-FE** surge arrester is designed to ensure the protection of your low voltage distribution installations and your electrical equipment. It acts against industrial operation overvoltages and overvoltages owing to lightning.
This type of Surge Protective Device is particularly recommended in case of risk of direct impact of lightning strikes, at the main switchboard level containing electronic devices sensitive to overvoltages.

➲ Conformity to standards

- EN 61643-11 class 1 and 2 tests
- IEC 61643-1 class 1 and 2
- UL1449 ed. 2

➲ Applications



- Main switchboard or main distribution panel of a building, equipped with electronic devices (multi-function measurement devices, PLC, etc.) with presence of lightning conductors or protection through meshed cages.
- Main switchboard equipped with electronics in buildings subjected to high level risk of lightning strikes such as classified installations, installations located in areas prone to high density of lightning strikes, high-rise buildings.
- Main switchboard equipped with PLC, BMS or CTM, remote monitoring, technical alarms, modems...
- High-rise buildings safety main switchboard.
- Lift machinery unit located in the higher part of the building.
- Safety inverter units.
- Main switchboard of remote sites containing electronics.

➲ General characteristics

- Type 1 and 2 Surge Protective Device.
- Designed to resist discharge linked to direct lightning strike.
- Up protection level optimized at 1.5 kV.
- Protection in common mode.
- End of service life indicator.
- Remote signalling contact.
- Absence of follow current.
- Fuse combination switch recommended: FUSERBLOC (see page 142).

Surge arrester - Type 2 "sites frequently struck by lightning"

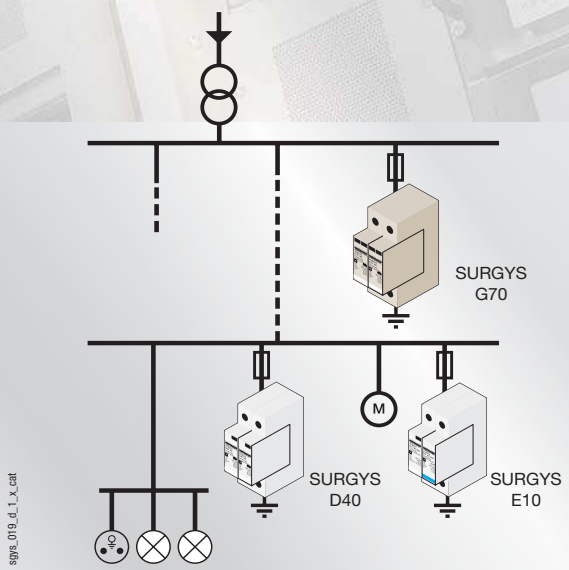
➲ Function

The **SURGYS® G70** surge arrester is designed to ensure reinforced protection of single-phase and three-phase networks. It acts against industrial operation overvoltages and overvoltages owing to lightning.
This type of Surge Protective Device is particularly recommended in case of heightened risk of nearby lightning strikes.

➲ General characteristics

- Type 2 Surge Protective Device.
- Max. discharge current 70 kA.
- Protection in common mode.
- Monobloc body.
- Plug-in modules for each active conductor (PH or N).
- Possibility of live replacement under voltage.
- Redundant functioning of protection.
- Plug-in remote signalling contact.
- End of service life indicator.
- Fuse combination switch recommended: FUSERBLOC (see page 142).

➲ Applications



- Safety main switchboard.
- Main switchboard of high power inverters.
- Distribution boards of remote sites.
- Protection of electrotechnical equipment such as motors, switching devices, control devices…

➲ Conformity to standards

- EN 61643-11 class 2 tests
- IEC 61643-1 class 2

SURGYS® D40

NEW

Surge arrester - Type 2 "distribution boards"

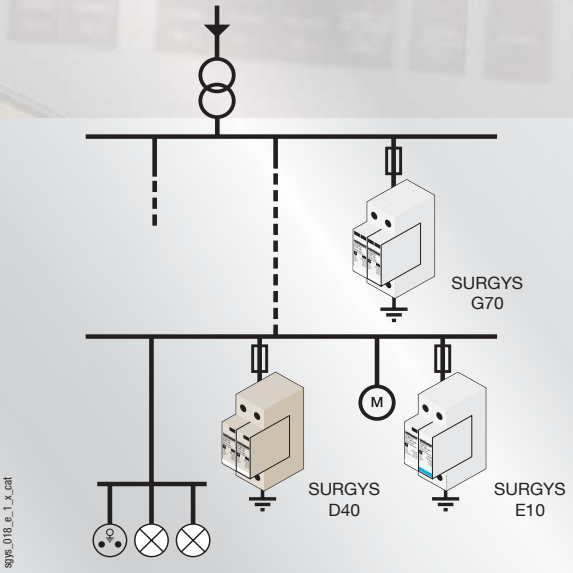
➲ Function

The **SURGYS® D40** surge arrester is designed to ensure protection of LV distribution circuits and equipment against transient overvoltages. It acts against industrial operation overvoltages and overvoltages owing to lightning.

➲ General characteristics

- Type 2 Surge Protective Device.
- Max. discharge current 40 kA.
- Common mode / differential mode protection.
- Monobloc body.
- Plug-in remote signalling contact.
- End of service life indicator.
- Plug-in module.
- Differential mode versions (only TT and TN conditions).
- Fuse holder recommended: RMS (see page 218).

➲ Applications



- Power distribution unit (downstream of a main switchboard).
- Autonomous power supply units such as generator sets, medium power UPS.
- Machine equipment unit.

➲ Conformity to standards

- EN 61643-11 class 2 tests
- IEC 61643-1 class 2

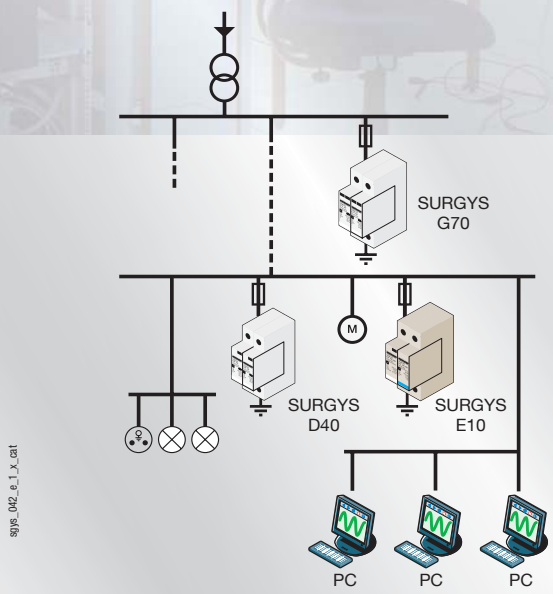
SURGYS® E10

Surge arrester - Type 2 and 3 "terminal receivers and sensitive loads"

➲ Function

The **SURGYS® E10** surge arresters are designed to ensure protection of installations connected to single-phase, three-phase or d.c. networks against industrial operation overvoltages. They act against transient overvoltages owing to lightning.

➲ Applications



- AC or DC power distribution unit (downstream of a main switchboard).
- Protection of electrotechnical equipment such as motors, switching devices, control devices…

➲ Conformity to standards

- EN 61643-11 class 2 and 3 tests
- IEC 61643-1 class 2 and 3

➲ General characteristics

- Type 2 and 3 Surge Protective Device.
- Max. discharge current 10 kA.
- Common mode / differential mode protection.
- Monobloc design.
- Compact DC network version.
- Plug-in remote signalling contact.
- End of service life indicator.
- Plug-in module for each active conductor.
- Possibility of live replacement.
- Fuse holder recommended: RMS (see page 218).

SURGYS® Low current

Surge arrester - Extra low voltage "communication network"

➲ Function

For protection against transient overvoltages of equipment connected to telecommunication and data transmission networks, the **SURGYS®** range includes 4 surge arrester models:

- **SURGYS® RS-2,**
- **SURGYS® mA-2,**
- **SURGYS® TEL-2,**
- **SURGYS® COAX.**

➲ General characteristics

- Max. discharge current 20 kA.
- Common and differential protection mode.
- End-of-life signalling by interruption of transmission.
- Serial connection on the very-low-voltage line.

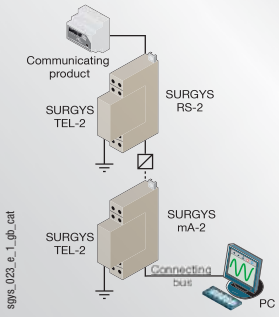
➲ Conformity to standards

- EN 61643-21

➲ Applications

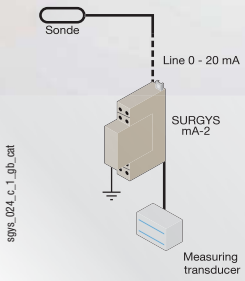
SURGYS® RS-2

- Protection of the RS422/RS485 connections.
- Digital telephone line T2.
- ETHERNET connection (10 baseT).



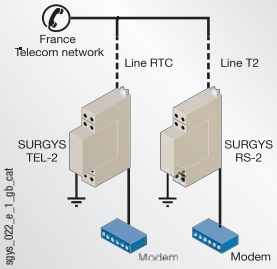
SURGYS® mA-2

- Field bus:
  - Profibus (DP, PA, FMS...),
  - Fieldbus (H1, H2),
  - Wordbus,
  - Fipway,
  - LONworks,
  - Interbus,
  - Batibus,
- Measurement loops, measurement acquisition cards:
  - current loops 0 / 4-20 mA,
  - analog signals 0 to 10 V.
- Regulation, control loops.
- RS232 connections.
- Numeris network (RNIS-T0).
- Specialized telephone connections.



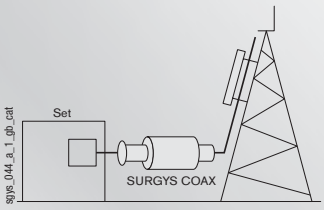
SURGYS® TEL-2

- Analog telephone line:
  - modem,
  - automatic switch,
  - telephone alarm,
  - DSL.



SURGYS® COAX

- Protection of radiocommunication equipment.



Front panel

1. Mounting on DIN rail ensuring earthing.

Characteristics

	SURGYS® RS-2	SURGYS® mA-2	SURGYS® TEL-2	SURGYS® COAX
Use	RS422/RS485/Telecom T2	4-20mA, field bus	via land line	telecommunication network
Maximum voltage U_c	6 V	48 V	170 V	6 V
Maximum usage frequency	20 MHz	20 MHz	2 kHz	70 MHz
Level of protection U_p	25 V	75 V	220 V	25 V
Line impedance	50-150 Ω	50-150 Ω	600 Ω	50-75 Ω

Characteristics	
Protected configuration	2 wires
Maximum line intensity	200 mA(1)
Maximum discharge current (1 shock 8/20 µs) I_{max}	20 kA
Nominal discharge current (20 shocks 8/20 µs) I_n	5 kA
Type of protection	spark-gaps / clamping diode
End of life	Earthing

Operating conditions	
Operating temperature	-40 … +85 °C
Storage temperature	-40 … +85 °C

sgys_055_a_1_cat

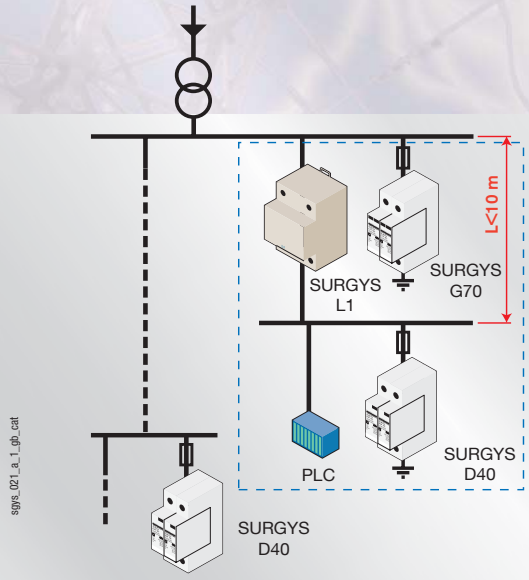
➲ Function

The **SURGYS® L1** inductance coordination unit is designed to ensure the implementation of head and distribution low voltage surge arresters of the SOCOMEC range. This inductance is necessary for carrying out a coordination or "cascading" of surge arresters when the "natural" inductance of the wiring is insufficient (length < 10 m).

➲ General characteristics

- Maximum current of 100 A per conductor.
- Line inductance of 15 µH.

➲ Applications



sgys_021_a_1_gb_cat

Coordination between head surge arresters:
- **SURGYS® G140-F**
- **SURGYS® G40 FE**
- **SURGYS® G70.**

and distribution surge arresters:
- **SURGYS® D40**
- **SURGYS® E10.**

located in immediate proximity.

sfte_221_a

Characteristics

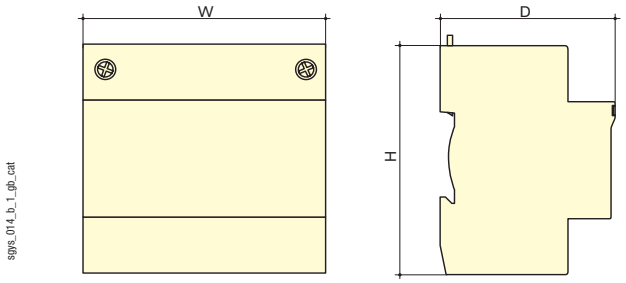
Network

Network type	230/400 VAC
Nominal voltage U_n	400 VAC
Maximum voltage U_c	500 VAC
Maximum line current	100 A
Line inductance L	15 µH

Operating conditions

Operating temperature	-40 … +85 °C
Storage temperature	-40 … +85 °C

Case



Type	Modular
Dimensions W x H x D	106 x 90 x 59 mm
Case degree of protection	IP20
Terminal block degree of protection	IP20
Mounting	35 mm symmetric rail
Case material	polycarbonate UL94- 5VA
Network connection section	4 … 50 mm²

Connection

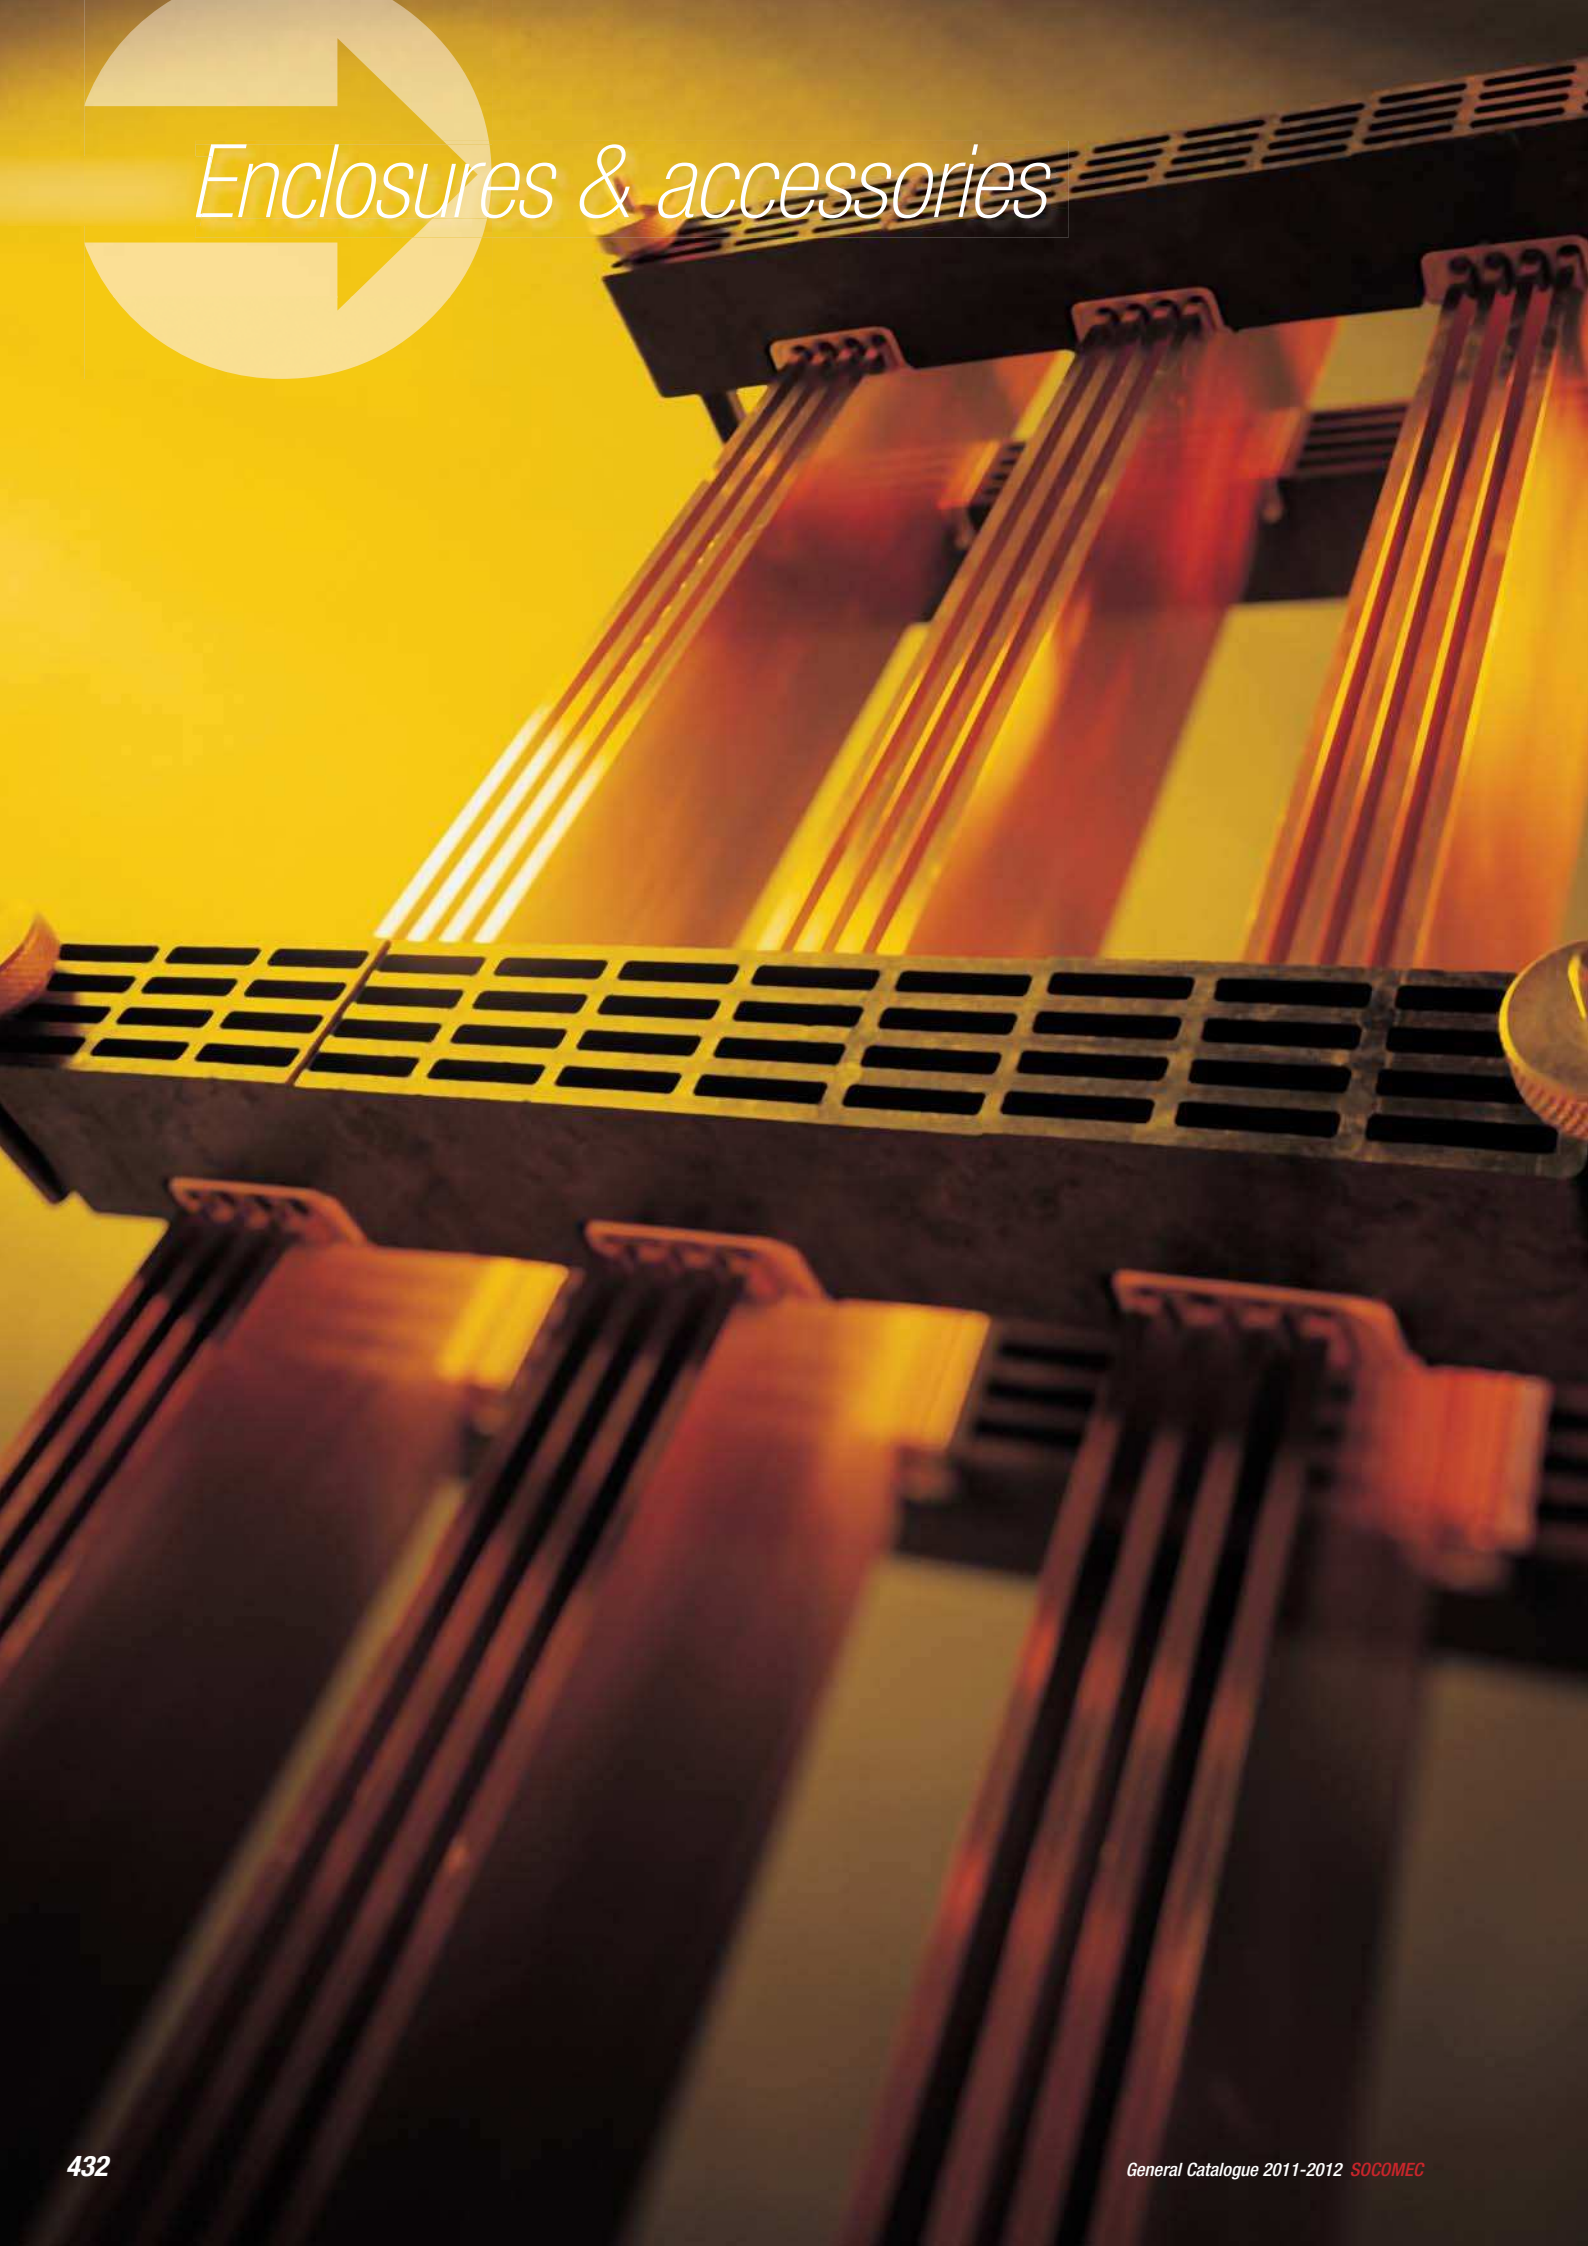
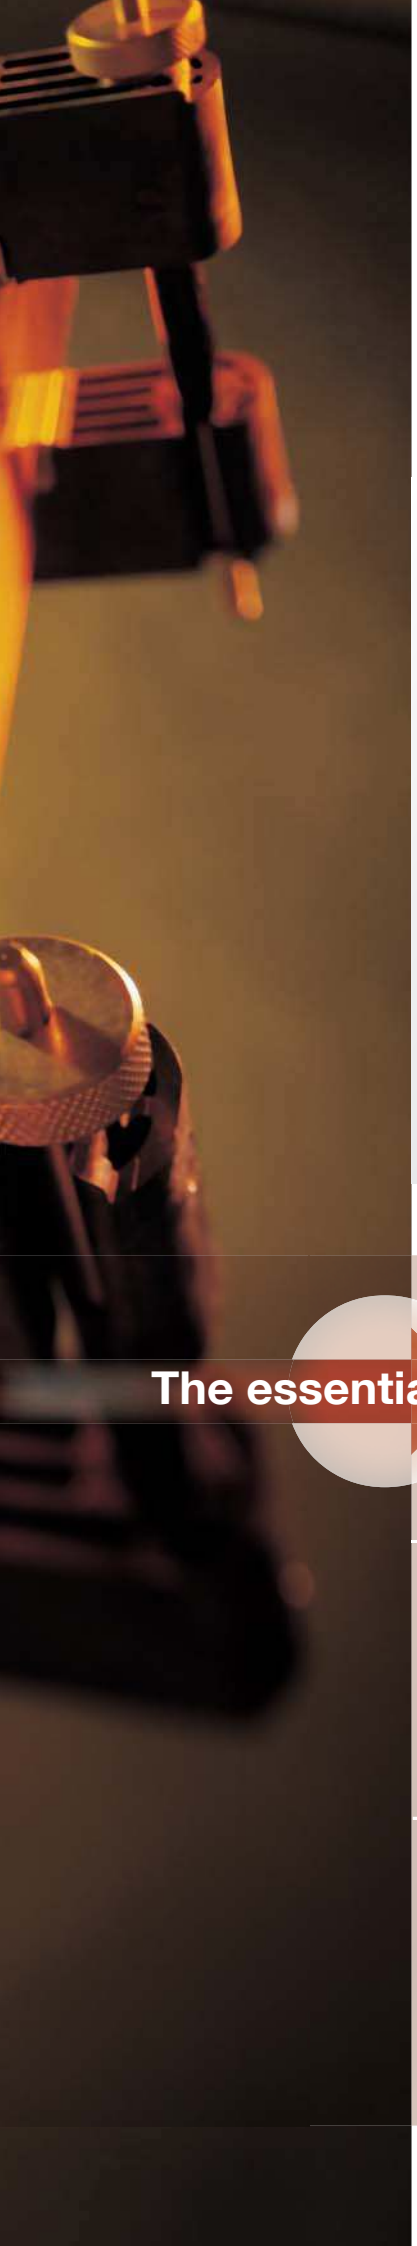
Coordination inductance L1	4988 **9100**

Enclosures & accessories





All the components to facilitate the use of your electrical equipment

This section brings together the complete SOCOMEC range of components for building units and cabinets designed for electrical distribution. Wishing, as always, to facilitate your work, we have set out these pages so as to fit most closely with your process for designing a cabinet *(see below and the next page).*

➲ **SOCOMEC works with your Design Office**

- **Sizing a cabinet**
  Please do not hesitate to contact us if you need help with thermal dimensioning of your enclosure based on your specifications. Contact your SOCOMEC office.

- **Sizing busbar**
  In addition to the practical guide given in the following pages, the Mechanical Systems software allows you to size the busbar for your panel with the greatest of ease: It defines the best bar section and distance between each support for the electrical characteristics of the panel.
  See page 444

- **Assistance with construction**
  You can also entrust us with your projects with particular construction requirements.
  See the section on "Built-in products"

- **Integration of electric functions**
  In this catalogue, you will find solutions for a great number of your requirements in terms of LV distribution.
  Take a look at the overview

The essential

Enclosures

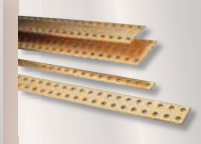
COMBIESTER *p. 434*

CADRYS DELTA *p. 435*

➲ **Think about it...** SOCOMEC offers a wide range of pre-equipped units for breaking, protection and switching; these units perfectly fulfil the requirements in terms of secure usage and installation conditions *(see our section on "Built-in products").*

Busbar

Busbar supports and Insulators *p. 444*



Rigid copper bars *p. 440*

Flexible copper bars *p. 442*

Distribution

Power terminals *p. 464*

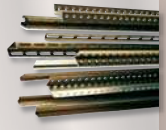
630 A

Cable champs and cage terminals *p. 466*

630 A

Distribution blocks *p. 468*

Mounting accessories



Mounting rails and profiles *p. 474*

COMBIESTER

➲ Function

COMBIESTERs are modular insulated enclosures.
They protect all low voltage electrical equipment against direct contact.

➲ Conformity to standards

- IEC 60439-1
- IEC 60529
- NF C 20010
- NF C 20455
- DIN 40050

➲ General characteristics (1)

These enclosures provide:
- an electrical safety with:
  - double insulation,
  - good resistance to creepage current distance.
- an IP66, IK9 degree of protection,
- an excellent withstanding to climatic conditions,
- a good withstanding to chemical agents,
- a 960°C self-extinguishable ability (polyester glasswool loaded),
- a 850°C self-extinguishable ability (for polycarbonate),
- a 650°C self-extinguishable (for polyamide),
- case and cover with opaque colour RAL 7035.

(1) Please consult us.

Monobloc enclosures
- 4 modules with sizes: 125 x 75 mm to 250 x 175 x mm
- 2 types of covers in polycarbonate:
  - transparent,
  - opaque,
- Solid casing in polycarbonate (with cover on request).

Constructible enclosures
- 17 constructible modules every 90 mm for sizes 180 x 135 mm and 720 x 540 mm
- 2 types of sealable covers:
  - transparent (polycarbonate),
  - opaque (polycarbonate or polyester).
- Solid casing or with openings:
  - in polyamide for sizes 180 x 135 mm and 270 x 135 mm,
  - in polyester for sizes 270 x 180 mm to 720 x 540 mm.

➲ Available on request

- Pre-drilled casing and cover.
- Pres-assembled enclosures.
- Pre-mounted accessories.
- Construction of support frames.

CADRYS enclosures

➲ Function

CADRYS ST, SH, SP and **SI** wall-mounted enclosures are intended to include automatic or control equipment.
They provide:

- Degree of protection IP65 (except double-leaf door enclosure, IP55).
- Perfect sealing:
  - casing edge in channel form,
  - robot positioning polyurethane joint.
- High rigidity provided by a folded and welded casing.
- Good resistance to chemical agents:
  - carbon steel FE 40 + polyester epoxy paint 70 µ,
  - stainless steel 304 L brushed and polished.
- High and low closing plates for ST and SP enclosures.

➲ General characteristics (1)

CADRYS ST enclosures, steel

- 51 models, heights from 300 to 1200 mm, widths from 200 to 1000 mm and depths from 150 to 400 mm.
- 1 or 2 solid doors opening to 120°.

CADRYS SP enclosures, steel

- 17 models, heights from 500 to 1200 mm, widths from 400 to 800 mm and depths from 250 and 400 mm.
- Casing with polyester paint RAL 7035.
- Transparent door with frame with polyester epoxy paint RAL 7035.

The basic CADRYS ST and SP enclosures are equipped with:

- double bar locking,
- bottom closing plate with pressed neoprene seal,
- concealed hinges,
- earthing screw,
- door profiles perforated every 25 mm,
- casing and solid door, steel, polyester epoxy paint RAL 7035,
- reversible doors.

CADRYS SI enclosures, brushed stainless steel

- 9 models, heights from 200 to 1000 mm, widths from 200 to 800 mm and depths from 150 to 300 mm.
- Solid door, double bar locking, concealed hinges, without closing plate.

(1) Please consult us.

➲ Conformity to standards

- IEC 60439-1
- EN 60439-1
- NF C 15-100

➲ Available on request

- Special paint,
- Specific cutouts (enclosures, plates...)
- Specific dimensions.

CADRYS DELTA
modular

➲ Function

CADRYS DELTA enclosures are modular steel enclosures.
They are intended to include automation or electrical equipment.
They can be placed side by side, back to back and side to back.
They can be delivered pre-assembled or, on request, in kit form.

➲ Approvals and certifications

- PSA E03.15.605.G
- RENAULT EB03.15.613

➲ Equipment

- Drilled plate
- Perforated plate
- Mounting frame
- Modular casing

➲ Preassembly

- We can preassemble your cabinet configuration on request.

➲ Composition of the range (1)

- 4 heights 1600, 1800, 2000, 2200 mm.
- 7 widths 300, 400, 600, 800, 1000, 1200 and 1600 mm.
- 4 depths 400, 500, 600 and 800 mm.
- 96 models available in the following standard presentations:
  - enclosure with transparent front door, dismountable rear panel,
  - enclosure with solid front and rear doors.
- In its basic version, the enclosure is equipped with framework, front door, ear panel (or door) and the top panel.
- It is supplied on a handling pallet H 100 mm.

(1) Please consult us.

➲ Conformity to standards

- IEC 60529
- IEC 60439-1
- NF C 15-100
- NF C 20010
- Protection rating IP 55, IK 10

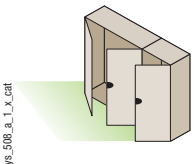
➲ Available on request

- Canopies.
- Drillings.
- Special colours and paints.
- Doors, panels of 2 mm.
- Specific dimensions.
- Adaptations as per drawings.
- Aluminium or painted stainless steel doors and panels.

kdrys_471_b_2_x_cat

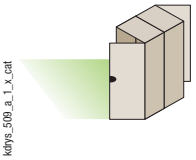
1. *Framework in welded 17.5/10 mm steel with double perforation every 25 mm.*
2. *Casing in folded, welded 12/10 mm steel. Structured finish powders polyester, colours RAL 7035.*
3. *Solid or transparent door in 15/10 mm steel with single or double wings depending on the width of the enclosure. Single-wing enclosures have left/right reversible doors requiring no tools.*
4. *CNOMO (option) automatic locking handle with standard interchangeable double bar key lock.*
5. *Bottom plate of enclosure in 1.5 mm steel with central opening.*
6. *Removable roof made of 12/10 mm steel with possibility of a bus bar set box.*
7. *The frame elements are assembled by screwing onto a tripod.*

kdrys_508_a_1_x_cat



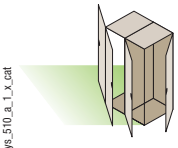
Coupling side by side

kdrys_509_a_1_x_cat



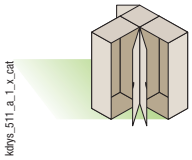
Coupling back to back

kdrys_510_a_1_x_cat



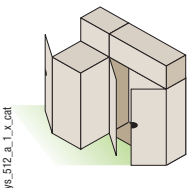
Coupling back to back + side doors

kdrys_511_a_1_x_cat



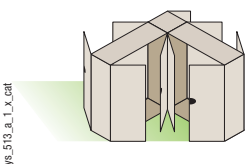
Juxtaposition

kdrys_512_a_1_x_cat



Juxtaposition in an L with busbar housings

kdrys_513_a_1_x_cat



Juxtaposition in an L with front and rear doors

Tripod

The frame elements are assembled by screwing onto a tripod.

Back panel

The back panel can be replaced by a door without the addition or removal of any accessories.

Door

The door can be reversed without removing the handle or hinges in 3 easy steps:

1. Remove the hinge pins.
2. Reversing of the door.
3. Replace the hinge pins.

1 2 3

Bases

- The bases have 4 removable sides made of folded 1.2 mm steel. The angle pieces are 3 mm steel reinforced by welding.
- They are designed to allow several bases to be stacked so as to obtain the height required.

Busbar housing

- Fits in between the top panel and the top of the cubicle.
- Takes bars up to 160 mm high.

Side panels

- Thanks to a special anchoring system, the side and back panels are easily mounted.
- The side panel can be replaced by a door without the addition or removal of any accessories.

Handle

- An ergonomic automatic locking handle that does not require the use of a key.
  This handle cannot be locked with the door open (CNOMO system).
- When the door is reversed, it is not necessary to remove the handle.

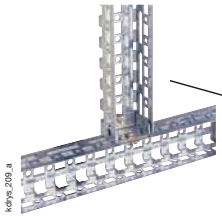
Juxtaposition

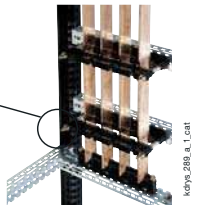
The juxtaposition of cubicles side or back to back is achieved using a kit that guarantees IP55 sealing.

Internal options

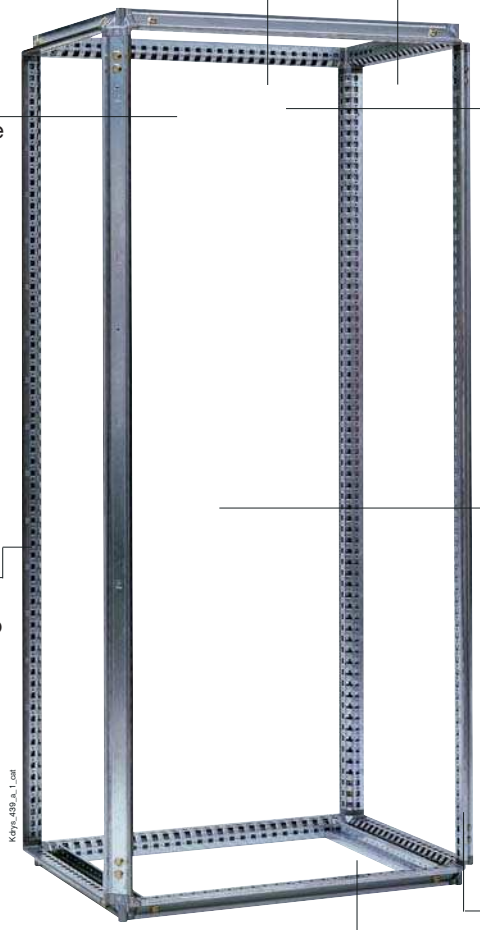
Perforated plate
- The placing of the plates is facilitated by an anchoring system.
- No intermediate pieces are needed to fix them in place.

Mounting profiles
The perforations in these profiles allow the positioning of the nuts every 25 mm or continuously.





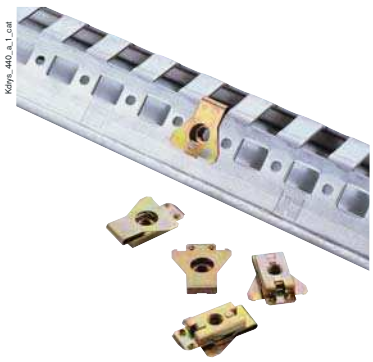
Solid plate
A system of slides and clips facilitate the positioning of the plates and holds them in place during assembly.



Notched mounting profiles
- These facilitate the positioning of the nuts and provide support during assembly.
- These provide good slip resistance, particularly in the event of vibration during transport.

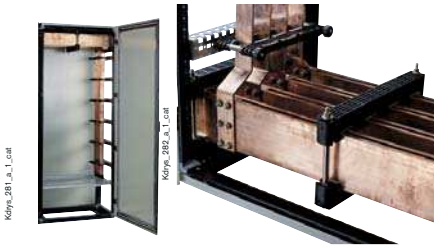
Internal door
- This allows the mounting of control auxiliaries and measuring devices protected by a solid or transparent front door.
- It is fixed onto the frame and can be depth-adjusted at a pitch of 25 mm.

Nuts
The clip-on nuts fit onto the mounting profiles and perforated plates whilst also providing earthing.

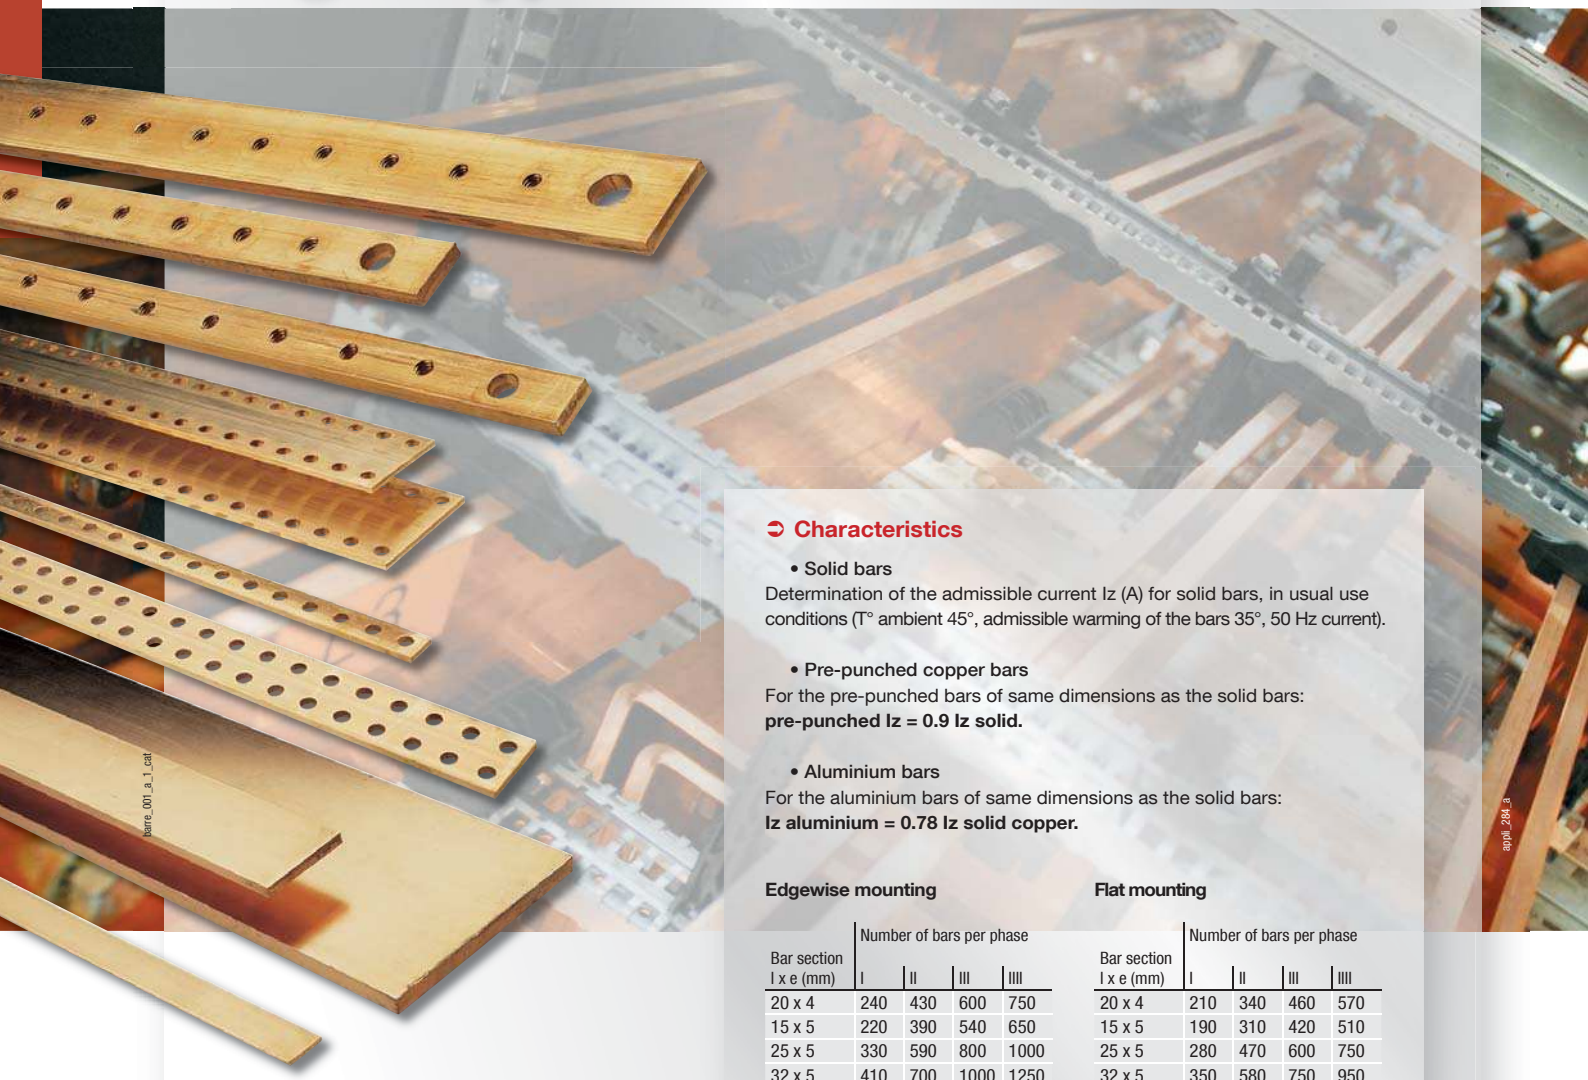


Structural profiles
- In 1.75 mm steel double perforated every 25 mm so as to allow made-to-measure dimensions.
- These profiles allow the direct mounting of SOCOMEC SBC 10 and 20 bar supports.

Gland plate
- The closing plate is fixed in place by a knurled nut.
- It is tightened manually with no tools required.



Rigid copper bars



➲ Characteristics

• Solid bars

Determination of the admissible current Iz (A) for solid bars, in usual use conditions (T° ambient 45°, admissible warming of the bars 35°, 50 Hz current).

• Pre-punched copper bars

For the pre-punched bars of same dimensions as the solid bars:
pre-punched Iz = 0.9 Iz solid.

• Aluminium bars

For the aluminium bars of same dimensions as the solid bars:
Iz aluminium = 0.78 Iz solid copper.

Edgewise mounting

Bar section I x e (mm)	Number of bars per phase			
	I	II	III	IIII
20 x 4	240	430	600	750

160 x 10	2000	3300	4450	5500

➲ Function

The SOCOMEC **rigid copper bars** are suitable for providing main or distribution connections.

➲ General characteristics of copper

- Material: electrolytic copper Cu-ETP (Cu/A1).
- State: hammer-hardened 1/2 hard (H12).
- Maximum resistivity: 0.017241 Ωmm²/m at 20°C.

➲ Composition of the range

Solid bars
- Thickness: 4.5 and 10 mm.
- Width: 20 to 160 mm.
- Length: 1750, 2900, 5800 mm.

Pre-punched bars
- Thickness: 5 and 10 mm.
- Width: 25 to 125 mm.
- Length: 1750 mm.

Pre-punched and threaded bars
- Thickness: 5 mm.
- Width: 15 to 32 mm.
- Length: 990 mm.

Connector for drill-free connection on the busbar
- Cable for 2.5 to 185 mm².
- Bars for thickness 5 or 10 mm.

Connection Earth / Neutral
- Corner piece for Earth / Neutral connection, L = 1750 mm.
- Earth bar, L = 470 mm and L = 120 mm

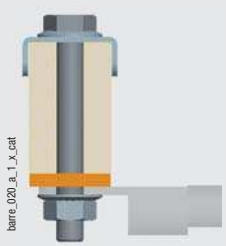
Accessories

Drill-free connection accessories



Use

- Allows the drill-free connection of flexible bars or cables onto a busbar
- Connection across 2 bars, 10 mm thick, placed side by side, 10 mm apart.
- Compatible with busbar supports in the SBC range.
- For terminals or flexible bars with widths greater than 40 mm, use 2 connection accessories.
- Secured with M10 screws, tightening torque 45Nm.
- To make a connection: 1 securing clamp and 1 screw adapted to the height of the bars are required.

Insulated flexible copper bars

➲ Function

SOCOMEC **flexible copper bars** are mainly used to make the links between series of distribution bus bars and the disconnection devices.

➲ General characteristics

- Width of 9 to 100 mm
- Thickness of 0.8 to 1 mm
- Length of 2 m

Ease of positioning

- Compact
- Wide flexibility of the bus bar
- Time saving by the elimination of terminal lugs and their crimping.

Increased safety by the elimination of crimped connections

- Better behaviour in short-circuits.
- Decrease of heating points.
- Better protection of people.

➲ Conformity to standards

- VDE 207 Y16
- BS 6746
- NF A 51-050
- VDE 207 YM4
- DIN 40050

➲ Available on request

- Other lengths: consult us.
- Bars in tin-plated copper or aluminium
- Halogen-free insulation.

➲ Technical characteristics

Conductor
Strips of electrolytic copper Cu/ETP, FINAL ANNEALING state.

Insulated flexible busbar

- Operating temperature: from -40°C to +105°C.
- Maximum operating voltage: 1000 V AC / 1500 V DC.
- Alternative voltage withstand (10-min test):
  - between core and insulation: 16.5 kV,
  - between two insulating elements in contact: 33 kV,
  - Conductivity: 100 IACS,
  - HV < 50,
  - Resistance to traction Rm > 200 N/cm^2
  - Strech following break 35 %
  - Resistivity: 1.724 micro Ω/cm to 20°C.

Insulator
High temperature co-extruded vinyl compound on the copper strips (insulation thickness: 1.5 to 2 mm)

- Self-extinguisher: NFC 32200.
- Continuous temperature withstand: 105°C.
- Shore hardness A: 89 +/- 2.
- Module 100 % elongation: 16 Mpa.
- Resistance to elongation: < 15 % mini.
- Breaking stress: 20 Mpa.
- Transversal volume resistivity: 6.10^{15} Ω.
- Oxygen index: 29.5 %.
- Scratch and tear resistant.

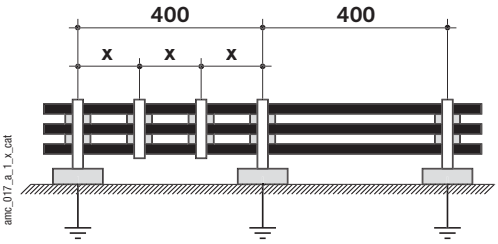
(1) For ambient air temperature of 40°C - Important : max. busbar temperature = 105° C.
L: length of bar in metres.
I: width of bare busbar in mm.
N: number of strips.
e: strip thickness in mm.

Assembly instructions

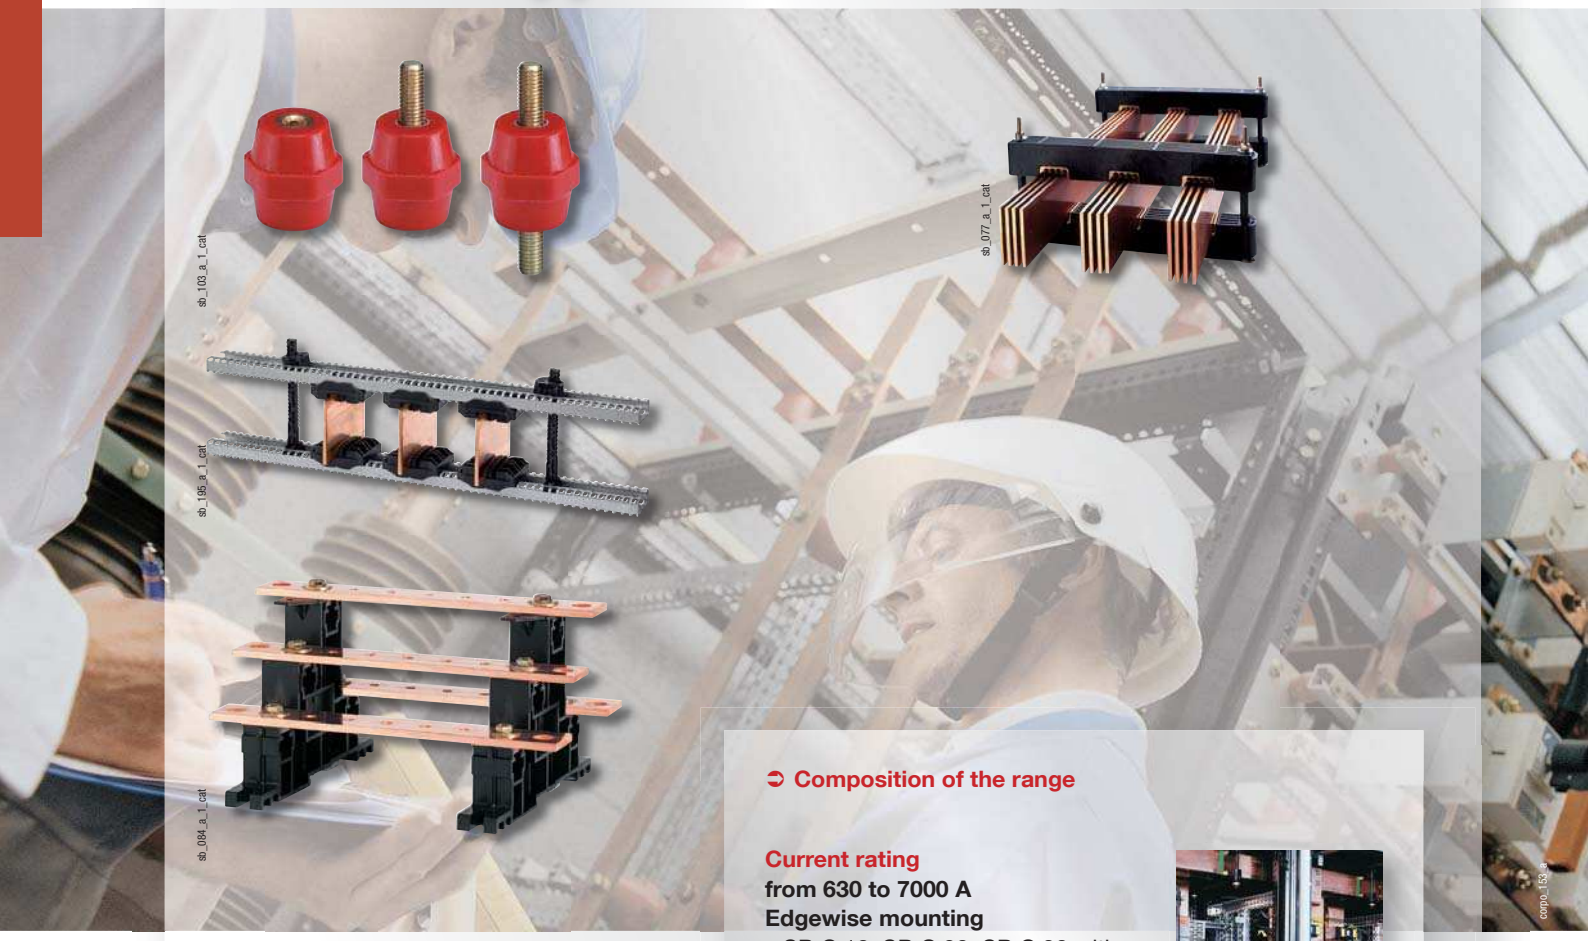


Flexible bars should be mounted on insulated supports with a maximum distance of 400 mm. Bars should also be held together with straps, as shown in the above diagram. The distance between successive straps depends on the electro-dynamic constraints in the event of a short-circuit. The table below gives the recommended distances between straps.

Icc maxi (kA rms)	Distance x between straps (mm)[1]
20	350
25	200
35	100
45	70

(1) 9 mm straps, load 80 kg.

Busbar supports



➲ Function

SOCOMEC insulating **busbar supports** allow the fixation of a copper or aluminium bar or busbar.

➲ General characteristics

Insulators

- Polyester without halogene.
- UL94 VO self extinguishable.
- Colour red RAL 3002.
- Operating temperature from - 40°C to + 130°C.
- Deformation under load temperature (ASTM D643): >200°C.
- Dielectric constant (ASTM D150): 4/5.
- Arc resistance (ASTM D495): > 180 s.
- Water absorption (ASTM D570): 0.3%.

Busbar supports

- High dielectric strength.
- High mechanical strength.
- High resistance to humidity (supplied "tropicalised").

Stair type supports

- Thermoplastic material.
- VO self extinguishable.
- Insulating voltage: 1000 V.

➲ Composition of the range

Current rating
from 630 to 7000 A
Edgewise mounting

- SB C 10, SB C 20, SB C 30 with fixed distance between phases.
- SBC ER, SBC ER Power with adjustable distance between phases.

Current rating
from 630 to 5800 A
Flat mounting

- SB 205 and SB 306 unipolar mounting busbar supports.
- SB 7500 and SB P 30 multipolar mounting busbar supports.

Current rating
up to 630 A

- Hexagonal insulators, SB 1 SB 2 and SB 3 unipolar busbar supports.
- SB E 44, SB P 10 and SB P 44 multipolar busbar supports.

➲ Conformity to standards

- IEC 60439-1
- IEC 60865-1

➲ Approvals and certifications(1)

- KEMA
- Lloyd's Register of Shipping
- ASEFA/LCIE

(1) Product reference on request.

What you need to know

Mechanical systems is a software which is used to size bar sets. It defines the best bar section and distance between each support for the electrical characteristics of the panel compliant with standard IEC 60439-1.
It runs in a Windows® 95, 98, 2000, NT or XP environment.

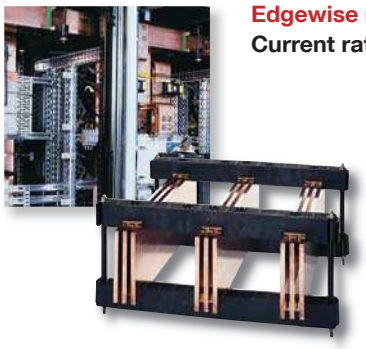
Our advantages

The details which make a difference

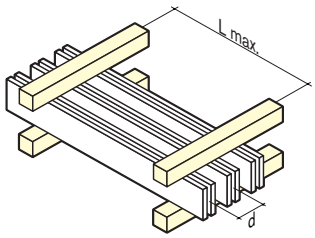
SB C 20 busbar supports have threaded holes which allow a protective screen to be attached.
The supports are put in place using threaded rods and M8 nuts.



Edgewise mounting busbar supports
Current rating from 630 to 7000 A

SB C 30
Multipolar busbar supports with fixed interphase

➲ Characteristics



sb_021_b_1_x_cat

Adhering to the maximum distances between two supports ensures the busbar supports are able to withstand the given short circuit current values. At these values, deformation of the copper bars may occur. These deformations are permitted by standard IEC 60439-1 as long as they adhere to the insulation distances.

(1) Admissible nominal current for a temperature in the enclosure of 45°C and 80°C for the bars.
Other assembly configurations: consult us.

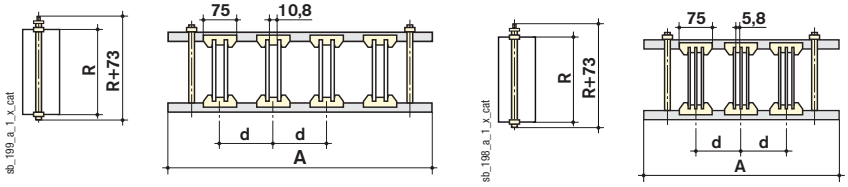
Dimensions

Mounting
- *1 to 3 bars, 5 mm thick, per pole.*
- *1 or 2 bars, 10 mm thick, per pole.*
- *Interphase distance: min 75 mm and max 200 mm.*
- *Use 2 rods positioned symmetrically on the outside of the poles or between the outermost poles.*

A (mm)	Enclosure (mm)
380	400
480	500
580	600
780	800



References

Order guide
- *With three poles, order: 6 x studs, 2 x rods, 2 x profiles.*
- *With four poles, order: 8 x studs, 2 x rods, 2 x profiles.*

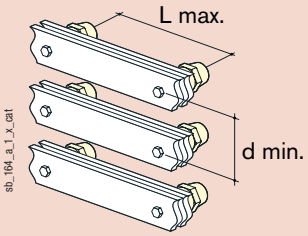
Ensure the busbar is defined



So that your busbar equipped with hexagonal insulators can mechanically withstand the short circuit, it must correspond to the table below.
Values according to IEC 60439-1.

General characteristics

			Max. L (distance between centers of supports in mm) for						
		peak Isc	24 kA	48 kA	63 kA	82 kA	114 kA		
Height		rms Isc	12 kA	23 kA	30 kA	39 kA	52 kA

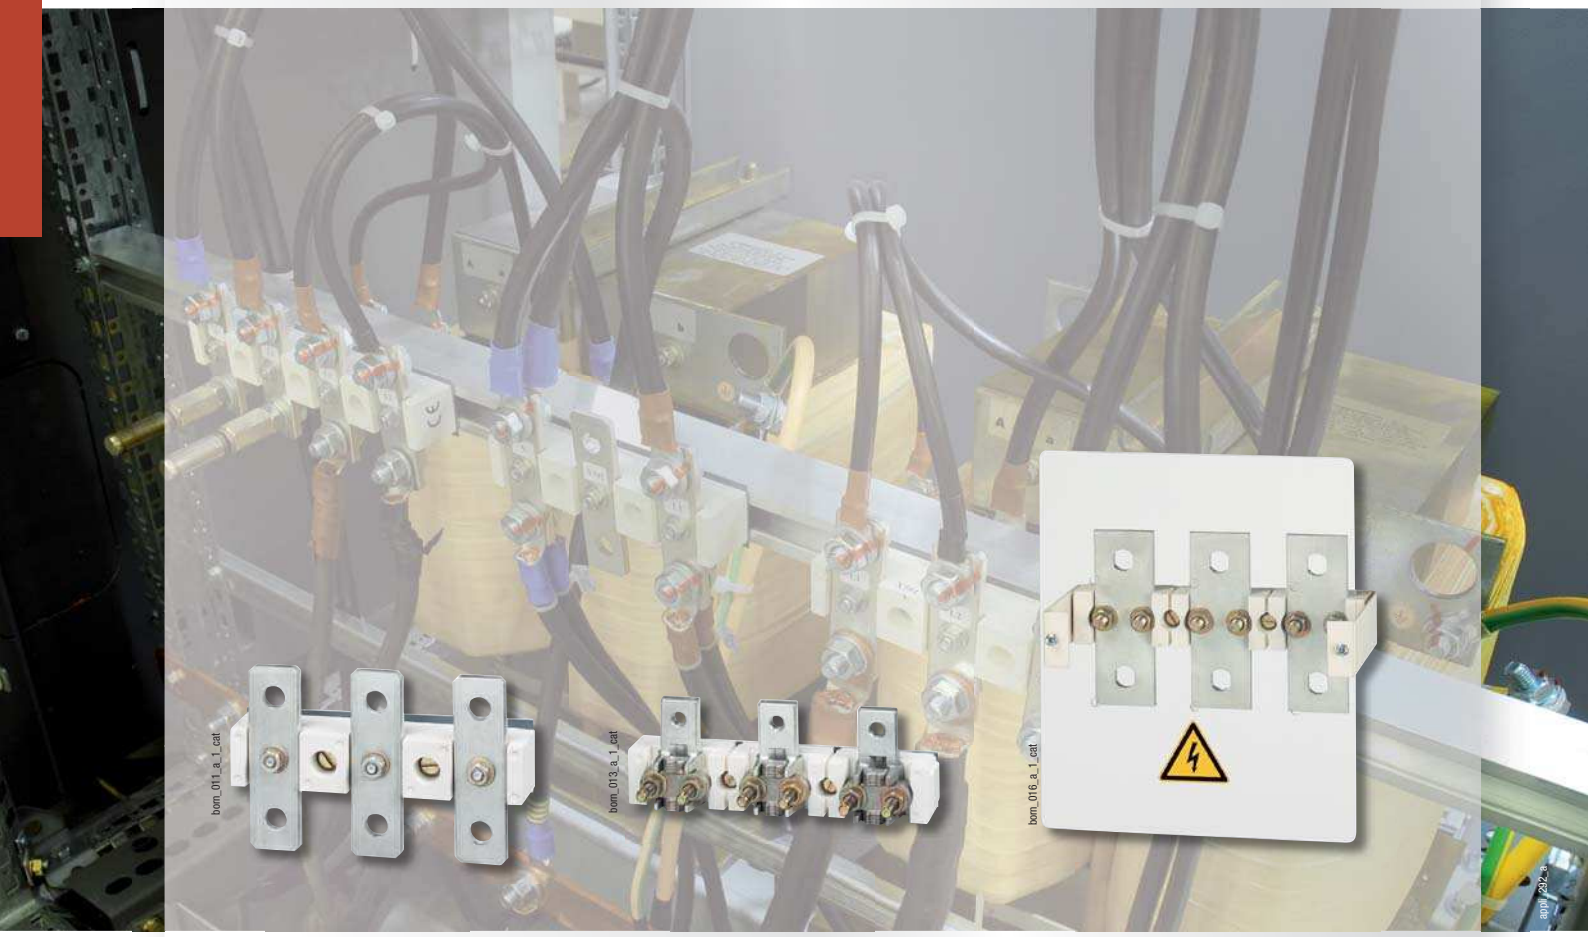
Power terminals



➲ Function

SOCOMEC **power terminals** provide connections for power circuits.They consist of connection plates fixed onto insulating brackets.

➲ General characteristics

- Tin-plated aluminium plates
- High dielectric strength.
- High mechanical resistance
- High resistance to humidity (supplied "tropicalised").

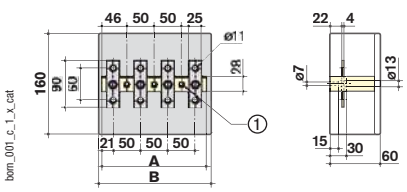
➲ The range

- 5 terminal models from 250 to 630 A, with 3 and 4 poles
- 2 methods of connection:
  - by lugs,
  - by cable clamps.
- Accessories: interphase screen, front cover to protect against unintentional contact.

➲ Conformity to standards

- IEC 60439-1
- DIN 46206

➲ Dimensions



1. M6 screws mounting.

Type 1

Cable clamps and cage terminals

➲ Function

SOCOMEC power **cable clamps** ensure the connection of copper or aluminium cables onto plates or onto bars.
Available in aluminium or tin-plated brass, they provide: increased mechanical resistance and high resistance to humidity (supplied "tropicalised").

SOCOMEC **cage terminals** are connection devices fixed onto the connection plates of SOCOMEC switches, changeover switches and fuse switches. They enable a direct terminal-free connection to the rigid copper and aluminium conductors and integration under the IP2 protective cover.

➲ Composition of the range

Cable clamps

- 3 cross-section ranges from 35 to 300 mm²
- 2 cable clamp models with bracket mounting: single-double.

Cage terminals

- Ratings: From 160 to 630 A.
- Number of poles: 3 and 4.
- Material: tin-plated aluminium.

➲ Conformity to standards

Cable clamps

- IEC 60439-1
- DIN 46206

Cage terminals

- IEC 60947-1 (if mounted to SOCOMEC devices)
- NF C 63-060
- NF C 63-062

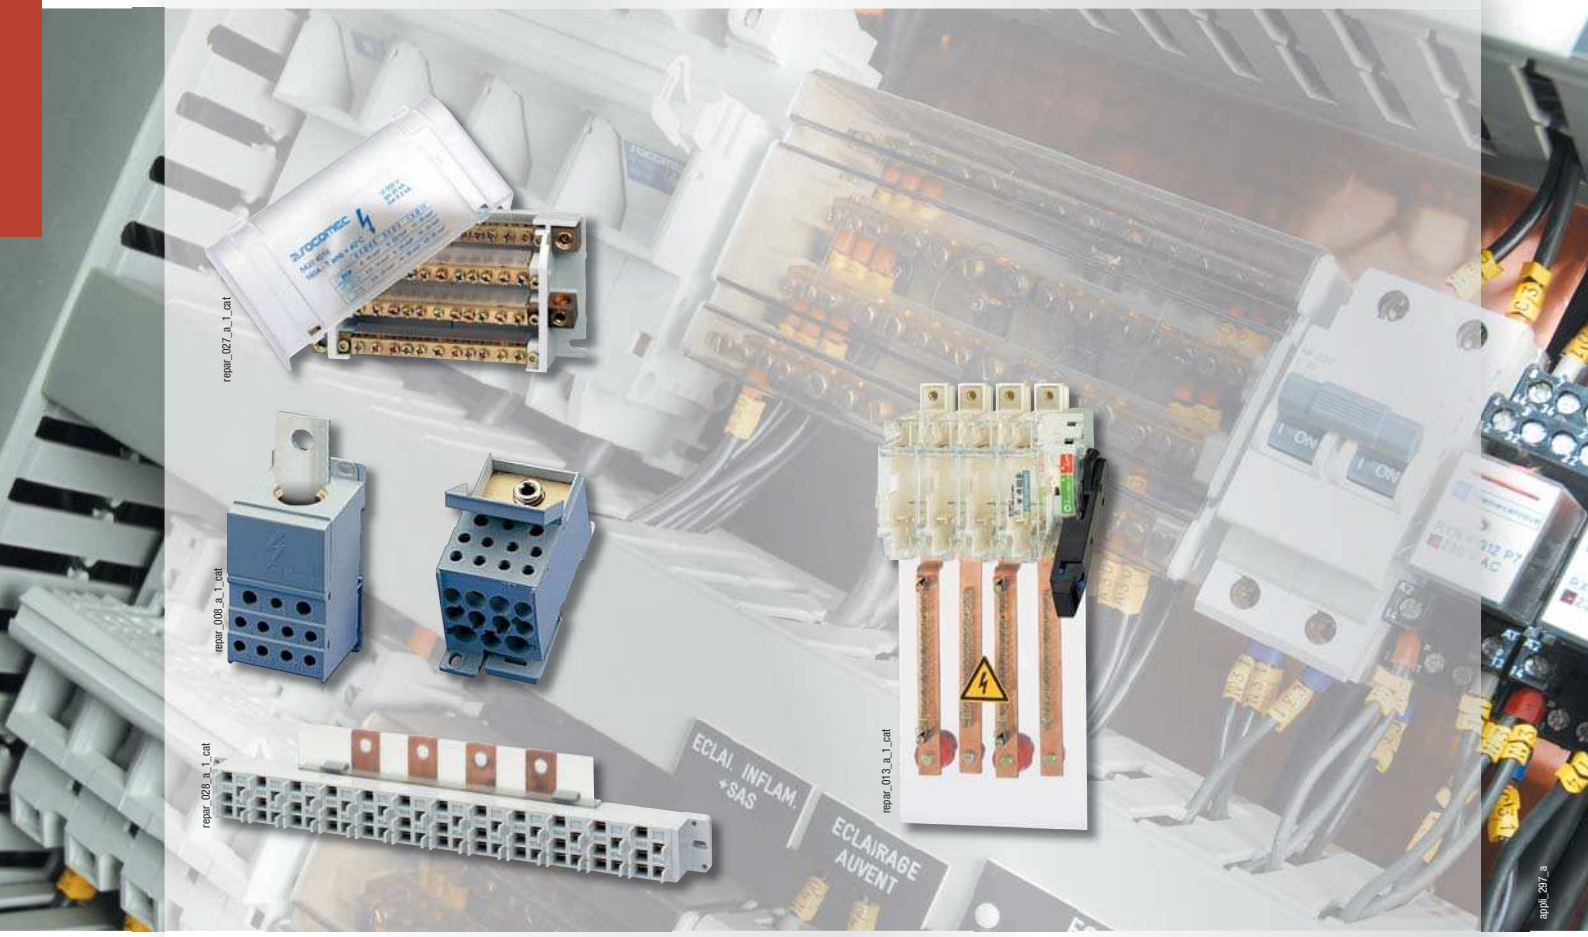
Distribution blocks



➲ Function

SOCOMEC **distribution blocks** allow easy connection of conductors.
They are installed downstream of a load break switch, a changeover switch or a fuse combination switch.

➲ Composition of the range

- 7 ratings from 80 to 360 A in 1, 2, 3 and 4 poles.
- 2 connection modes:
  - direct or ferrules,
  - cable lugs.

➲ General characteristics

- Insulating voltage:
  - ferrules terminal distribution block: 500 V,
  - modular row terminal distribution block: 690 V,
  - wire-terminal distribution block: 1000 V.
- Impulse voltage:
  - ferrules terminal distribution block: 6 kV,
  - modular row terminal distribution block: 6 kV,
  - wire-terminal distribution block: 8 kV.
- Self-extinguishing: 960°C.

➲ Conformity to standards

- IEC 60439-1
- EN 60439-1
- NF C 20455

Direct or cable connection

Bridge multipolar distribution block

repar_027_a_2_cat

repar_009_a_1_gb_cat

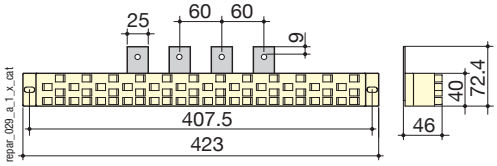
(1) Delivered with 6 mm² connector leads, L = 120 mm, 12 black connectors, 12 blue connectors.
(2) Preferably the terminations will be distributed over the entire number or terminals.

Dimensions



Distribution blocks designed to supply power to a row of modular devices. IP20.

Connection
- *12 three pole/four pole connections*
- *24 single phase connections*
- *Maximum current = 63 A*

Mounting rails and profiles

➲ Function

SOCOMEC frame parts come in steel, 304 L stainless steel or aluminium (profiles and accessories) and allow the fixing of any electrical equipment.

➲ General characteristics

- High dielectric strength.
- Good corrosion resistance (white zinc-coated steel, stainless steel or aluminium).

➲ Conformity to standards

- EN 60715

➲ Composition of the range

1. Profile C 20 x 14 - 30 x 15 - 35 x 35
2. Diamond shaped nut 33 x 11 - 34 x 20
3. Bracket 45 x 60 x 25 2 oblong holes: 35 x 9 ou 25 x 9
4. Rectangular nut 28 x 35
5. Profile C 30 x 15
6. Square nut 25 x 25
7. Bracket 25 x 25 x 19
8. Square nut 15.5 x 15.5
9. Fixomega
10. Bracket 36 x 36 x 23
11. Terminal block support
12. Fixocap
13. Asymmetrical profile
14. Straddle bracket 30 x 15
15. Cable support profile
16. Straddle bracket 20 x 14
17. Straddle bracket 35 x 35

Integrated products

Enclosures and cabinets equipped with breaking or protection functions

When they are not mounted in cabinets, load break switches, changeover switches or fuse combination switches are generally delivered enclosed. Placed as close as possible to the operator, their function is to guarantee his or her safety and to ensure continuity of operation.

For local safety breaking purposes, SOCOMEC - leader in this field - offers the widest range of equipped enclosures on the market. This dual expertise means we can offer you complete systems to meet your specific requirements (normal or explosive atmosphere).

The result of many years building on our experience, our enclosures are quick and easy to fit. These enable personnel who are not electricians to carry out work on the installation without risk of error and in complete safety, whilst adhering to the rules for ensuring safe electrical lockout.

On the next page, you will find our range of safety enclosures and local isolator enclosures.

Our services are regularly sought to create enclosures or boards according to specification. If this is of interest to you, please consult us.

Do not hesitate to make the most of our expertise! To find out more, please contact your SOCOMEC office.

➲ **Discover our complete selection guide** *(see next page)*

➲ **Need a suggestion?** We will help you find the best solution for your application.

➲ **A special requirement?** SOCOMEC makes specific products. Please feel free to consult us.

Our range of products

➲ **Our products meet the specific constraints of each application**

- Mining - Cement works - Steel works - Heavy industry - Wood industry:

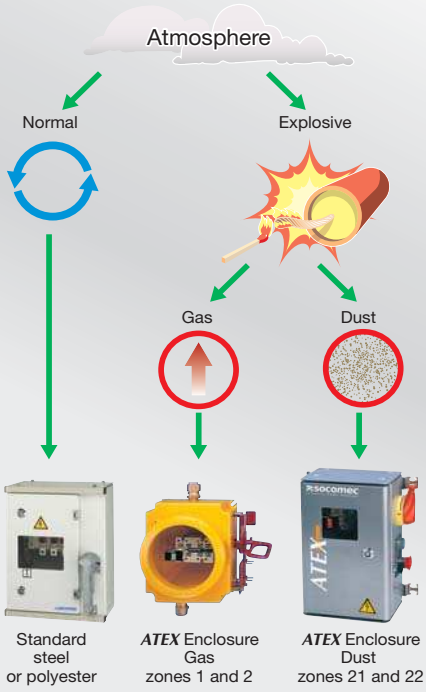
  Robustness - Reliability - Dust-resistance - Corrosion-resistance - Risks of explosion
- food and beverage industry:

  Resistance to humidity, and to dust - Risk of explosion due to dust or gas
- Chemical and petrochemical industries:

  Resistance to humidity and to corrosive atmospheres - Resistance to dust and to gas

➲ **Which ambient atmosphere?**

The environment is an essential parameter when choosing an enclosure. Our range of enclosures offers you solutions for the most varied of atmospheres, including the most severe.



SOCOMEC has the skills and resources to build enclosures and distribution switchboards to specification.
You will find a guide on page 512 for drawing up your request.

Please do not hesitate to contact us for suggestions or any requirements about your project.

Safety enclosures

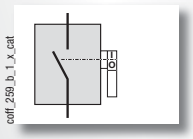
➲ Function

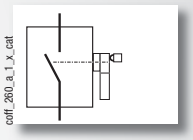
Safety enclosures equipped with SOCOMEC switches provide emergency breaking, breaking for mechanical maintenance and safety isolation in the vicinity of any low voltage final circuit.

➲ Conformity to standards

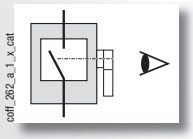
- IEC 60364
- EN 60204-1
- EN 60439
- EN 60695-2-11



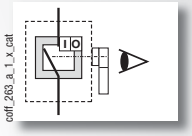
Isolator clearly evident



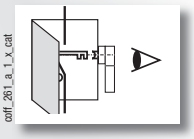
Triple padlocking of the handle



Visible breaking



mechanical flag indicator (Optional)



Double locked door

➲ General characteristics

- **Steel enclosure:**
  - FeP01ZE, electrogalvanized, 2 mm thick,
  - 2 earth connection points,
  - IP55, Ik 10 (without window).
- **Polyester enclosure:**
  - good resistance to creepage current distance,
  - high resistance to chemicals,
  - self-extinguishing at 960°C,
  - 2 earth connection points.

Environment	Steel enclosure	Polyester enclosure

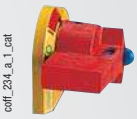
Mechanical risk	•	
Dust risk	•	
Contamination risk		•
Atmospheric corrosion		•

Safety functions

Isolation clearly evident

coff_233_a_1_cat

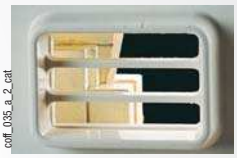


coff_234_a_1_cat

The handle can only indicate the “open” position if the contacts are actually open.
The marking of the label (position 0 or I) and the print stamp marking on the movable bar made in the factory allows fully visible isolation to be achieved.

Visible breaking

In position 1



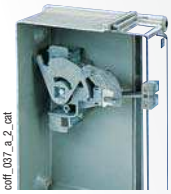
coff_033_a_2_cat

In position 0

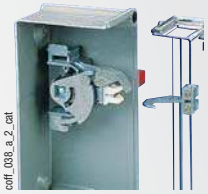
coff_036_a_2_cat

In accordance with NF C 13-100:“an isolating device is considered as having visible breaking if the separation of the contacts is directly visible.”

Double locking

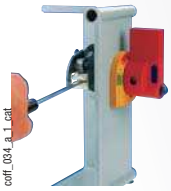


coff_037_a_2_cat



coff_038_a_2_cat

Double locking system of the enclosure prevents the opening of the door when the breaking device is closed and prevents the closure of the breaking device when the door is open (ex: Side operation).



coff_034_a_1_cat

It is possible to close the breaking device when the enclosure door is open by using a tool to inhibit the double lock, thus allowing tests to be carried out by qualified staff.

Padlocking

coff_221_a_2_cat

The ergonomic handle can accommodate up to three locks.

Mechanical flag indicator (Optional)

coff_243_a_1_x_cat

coff_042_a_2_cat

coff_043_a_2_cat

Flush with the viewing glass and integral with the movable bar, it indicates the position of the contacts unambiguously and at a glance.
It provides easier visualisation of the visible breaking.

(1) Or the mechanical indicator option, replace the second digit in the enclosure reference number with the letter V. For example: 3V11 3005.

➲ General characteristics

- Load break switch: SIDER visible breaking.
- Handle: aluminium handle (natural colour)
- Protection degree: IP55.
- Colour: RAL 9001; other, RAL 7032; roof and/or closing plates.
- Cable gland plate(s) top and bottom for TB version and bottom only for BB version.
- Material: galvanised steel, thickness 20 / 10 mm.
- Coating: polyester powder
- Wall mounting: 4 fixing lugs supplied, not mounted
- Locking system: 8 mm male square (key supplied).
- Miscellaneous: Bottom-Bottom configuration, connection through busbar system (range > 80 A).

ATEX enclosures

logo_29_00 logo_115_00

Zone 21 and 22 (dust) as per European Directive ATEX 94/9/CE Category 2

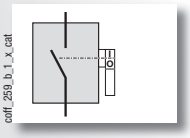
➲ Function

ATEX enclosures equipped with SOCOMEC switches provide emergency breaking, breaking for mechanical maintenance and safety isolation in the vicinity of any low voltage final circuit. Installed in an explosive area.

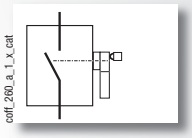
They offer the following features:
- fully visible breaking
- visible breaking
- triple locking of the handle
- double locked door, side operation
- mechanical flag indicator

➲ Conformity to standards

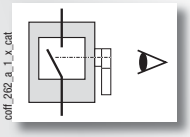
- Directive 94/9/CE
- EN 50 281-1-1
- EN 50 281-1-2
- EN 50014
- EN 60204-1
- EN 60439-1
- EN 60695-2-11
- EN 60947-3
- NF C 15-100
- IEC 60364
- Decree 29.07.92: Machine safety
- Decree n°88-1056 from 14-11-88: protection of workers
- Decree n°96-1010 from 19.11.96
- Decree 11.01.93: particularly for compliance with the machine



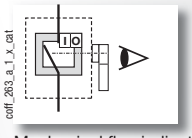
Isolation clearly evident



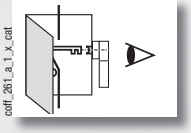
Triple padlocking of the handle



Visible breaking



Mechanical flag indicator (Optional)



Double locked door

SIDER steel enclosure, side operation

General characteristics

- Adapted to mechanical risk and dust hazard.
- Load break switch: SIDER/SIDER ND with visible breaking and mechnical flag indicator.
- Handle: S-type red handle padlockable.
- Protection degree: IP65.
- Colour: metallic grey.
- Cable gland plate: bottom.
- Material: steel, thickness 2 mm.
- Coating: epoxy polyester powder.
- Wall mounting: 4 fixing lugs supplied loose.
- Locking system: 8 mm male square (key supplied). For lock, please consult us.
- Miscellaneous: earthing bolts, 2 internal connection points, top configuration, connection through busbar system (range > 80 A).
- Installation of push-buttons and signaling lights on the right side of the enclosure: consult us.
- Installation of push-buttons and signaling lights on the front door of the enclosure: consult us.
- Polyamide or brass cable glands fitted: consult us.
- Auxilary contact and push-button wired on terminal: consult us.

Polycarbonate enclosure SIRCO M with front operation

➲ General characteristics

- Equipped with a 3 pole SIRCO M.
- 1 removable neutral terminal and 1 removable earth terminal.
- Possibility of adding 1 additional pole.
- Possibility of adding 1 M type auxiliary contact module.
- Protection IP65.

For enclosure 162 x 99 mm
- 4 pre-drill holes M16 (on the side).
- 4 pre-drill holes M20 / M25 (top and bottom).
- 4 pre-drill holes M20 (rear).

For enclosure 210 x 125.5 mm
- 4 pre-drill holes M16 (on the side).
- 4 pre-drill holes M25 / M32 (top and bottom).
- 2 pre-drill holes M25 / M32 (rear).

➲ Conformity to standards

- IEC 60947-3
- EN 60947-3
- UL 508 - see page 100.

Enclosed changeover switches

Other switch enclosure

COMO C polyester enclosure with front operation

➲ Function

- Emergency breaking.
- Switching and source inversion.
- Switching on load.
- Breaking for mechanical maintenance.
- Safety isolation in the vicinity of any low voltage final circuit.

➲ Conformity to standards

- IEC 60364
- EN 60204-1
- EN 60439
- EN 60695-2-11

➲ General characteristics

- Adapted to chemical attack, dust hazard, contamination hazard and atmospheric corrosion.
- Handle: Red/yellow handle
- Protection degree: IP65.
- Colour: RAL 7030.
- Material: glass fibre reinforced polyester
- Product supplied as a kit, to be self-fitted.
- Locking system: Screw.
- Miscellaneous: the enclosed COMO C 80 A is derated to 70 A in the 4-pole version.

Single phase ATyS M in polycarbonate enclosure

Function

- Remote control changeover switch, single phase ATyS M 3s version.
- Automatic Transfer changeover Switches (ATS), single phase ATyS M 6s version.
- Modular design.
- No additional wiring is required for the ATyS M 6s version.
- Connection accessories integrated.
- Steel operation handle.
- Optional accessories available.

Conformity to standards

- IEC 60947-6-1
- NF EN 60947-6-1
- NBN EN 60947-6-1
- BS EN 60947-6-1
- IEC 60947-3
- IEC 60439-2

General characteristics

- From 40 to 160 A.
- 230 VAC network
- Protection degree: IP 55, IK08.
- Colour: RAL 7035
- Material: transparent cover, polycarbonate casing.
- Wall mounting: 4 holes on the rear of the enclosure.
- Flame resistant to 650°C.
- Weight: 5.5 kg.
- Connection: recommended cable size (Cu): 25 to 70 mm².

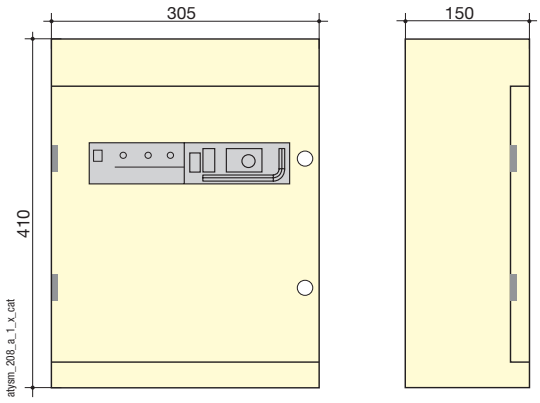
Dimensions



ATyS M steel enclosure

coff_366_a_1_cat

Function

- Remote control changeover switch, ATyS M 3s version.
- Automatic Transfer Changeover Switches, versions ATyS M 6s and ATyS M 6e.
- Modular design.
- Optional accessories available.

Conformity to standards

- IEC 60947-6-1
- NF EN 60947-6-1
- NBN EN 60947-6-1
- BS EN 60947-6-1
- IEC 60947-3
- IEC 60439-2

General characteristics

- From 40 to 160 A.
- Network 230/400 VAC +/-20 % in standard
- Network 127/230 VAC on request for ATyS M 6s and ATyS M 6e.
- For 3/4 pole.
- Bridging bar.
- Protection degree: IP3X (standard), IP54 (optional). For a higher degree of protection please consult us.
- Colour RAL 7035.
- Cable gland plate: Top and bottom.
- Materials: steel, thickness 1.2 mm.
- Coating: epoxy polyester powder.
- Wall mounting: 4 wall mounting brackets supplied - not mounted
- Door: with hinges, cut out 327.4 x 47.6 mm.
- Locking system: 3 mm double-bar key (key supplied).
- Weight (without accessories): 15 kg.
- Connection (without power connection terminals): min. Cu 6 mm², max. 70 mm².

Accessories

- 1 NO/NC added auxiliary contact per position (I, 0, II), max. 1 set per enclosure.
- Voltage sensing and power supply connecting points: allows connections of 2 cables of 1.5 mm² to be connected.
- Power connection terminals with maximum connection cross section of 2 x 70 mm².
- Sealable cover.

ATyS 3s steel enclosure

cotf_305_a_1_cat

Function

- Non-Automatic Motorized Transfer Switch
- Compact Design
- Mechanically interlocked switching
- Connection blocks supplied for external logic control

Conformity to standards

- IEC 60439-1
- IEC 60947-3
- IEC 60947-6-1

General characteristics

- ATyS 3s up to 1600 A.
- ATyS 3e for rating 2000, 2500 and 3200 A.
- Adapted to mechanical risk and dust hazard.
- Protection degree: IP54 (standard device)
- Colour: RAL 7035
- Cable gland plate: top and bottom
- Connection of cables: Top or bottom from 125 to 250 A, top from 400 to 1600 A.
- The auxiliary contacts are wired to a terminal block.
- Material: steel thickness 2 mm
- Coating: epoxy polyester powder
- Wall mounting: 4 wall mounting brackets supplied - not mounted (ratings ≤ 400 A), floor standing feet (ratings > 630 A).
- Door: solid with hinges
- Locking system: 3 mm double bar key (key supplied)
- Miscellaneous: 2 bolted earth connection points, dual power supply, 2nd auxiliary contact, solid neutral to the right, 400/230 VAC transformers (one on each input), padlocking in 3 positions.

Available on request

- Enclosures for specific connections:

ATyS 6e* steel enclosure

coff_306_a_1_cat

➲ Function

- Automatic Transfer Switch - ATS.
- Compact Design.
- Mechanically interlocked switching.
- Connection blocks supplied for external logic control.

➲ Conformity to standards

- IEC 60439-1

➲ General characteristics

- Adapted to mechanical risk and dust hazard.
- Protection degree: IP54
- Colour: RAL 7035.
- Connection of cables:Top or bottom flat connection from 125 to 250 A, top from 400 to 1600 A.
- The auxiliary contacts are wired to a terminal block.
- Material: steel thickness 2 mm.
- Coating: epoxy polyester powder.
- Wall mounting: 4 wall mounting brackets supplied - not mounted (range ≤ 400 A), floor standing feet (range > 630 A).
- Door: solid with hinges.
- Locking system: 3 mm double-bar key (key supplied).
- Miscellaneous: 2 bolted earth connection points, 2nd auxiliary contact, solid neutral, 400/230 VAC transformers (one on each input), padlocking in 3 positions.

➲ Available on request

- Enclosures with specific connections: neutral on the left.

Services and Technical assistance

Our expertise extends to a complete offer of services like commissioning installation audit, training, maintenance and project engineering.

ATS* By-Pass solution

Enclosed ATS By-Pass from 40 to 3200 A

➲ Function

- Automatic Transfer Switching between 2 sources for reliability of the power supply.
- By-Pass Single Line & Double Line of the Automatic Transfer Switch in order to insure continuity of the supplies during inspection, test and maintenance.
- Complete isolation of the Automatic Transfer Switch for safe exploitation.
- The association of an ATYS 6 along with a remote interface ATyS D20, will enable an easy configuration, exploitation and visualization of the data shown on the front of the equipment (timers settings, hysterisis, start/stop of the genset…).
- Different optional accessories are available.

➲ General characteristics

- From 40 to 3200A, 4 poles (fully rated).
- 230/400 VAC +/- 20%, 50/60 Hz, self supplied from incoming sources.
- Normal/Emergency logic control sequence.
- Three phase voltage and frequency control on source I and II.
- Control of phase rotation.
- 1 configurable contact output relay for generator start/stop command.
- Position I,0,II control by external dry contact.
- Manual emergency operation.
- Auxiliary contacts.
- JBus/Modbus Communication (as standard).
- AUTO / MANU selector.
- Protection degree: IP41 (except with ATyS D20: IP21)
- Hinged door, double bar locking system.
- Wall mounting brackets delivered up to 125 A.
- Floor standing feet from 250 to 3200 A.
- Withdrawable ATS from 250 to 3200 A.
- Phase identification.
- Functional/mimic diagram (indicating LED as an option).
- Complete protection against direct contact on each functional unit.
- Steel enclosure
- Colour: Grey Toyo.

➲ Conformity to standards for equipment

- IEC 60439-1
- IEC 60529

➲ Conformity to standards for integrated products

- IEC 60947-6-1
- GB 14048-11
- IEC 60947-3

** ATS : Automatic Transfer Switch*

Changeover equipment presentation

For economic and safety reasons, the Transfer Switches Equipment (TSE) are used in all types of applications where changeover between 2 sources will secure the continuity & the reliability of the supply.

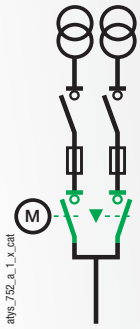
The SOCOMEC ATS range have been designed, developed and approved as per the IEC standards. Our range is fully compliant with the IEC 60947-6-1 and IEC 60947-3.

ATS By-Pass equipment presentation

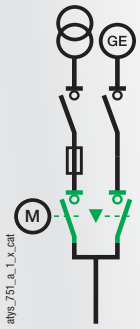
The enclosed ATS By-Pass solution, developed by SOCOMEC enables on a Normal/Emergency installation, to fully isolate the Automatic Transfer Switch during inspection, test and maintenance periods, hence to always secure the continuity and reliability of the installation's power supply.

ATS By-Pass equipment application

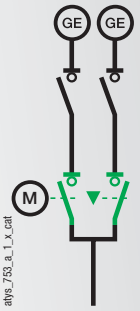
- **Main/Main (standard)**



- **Main/Genset (standard)**



- **Genset/Genset (on request)**



Applications

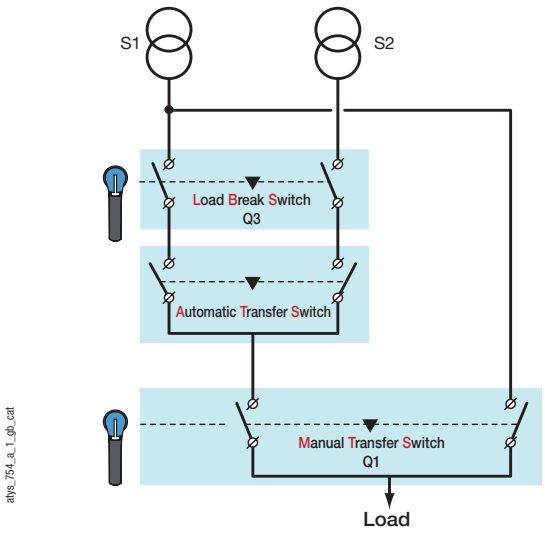
Ranges:

To propose a solution close to customers requests, Socomec have designed 2 versions of enclosed ATS By-Pass solution.

- **ATS By-Pass Single Line**

It consists of 2 functions, an Automatic Transfer Switch and a One-Way By-Pass Isolation Switch connected to the main supply.

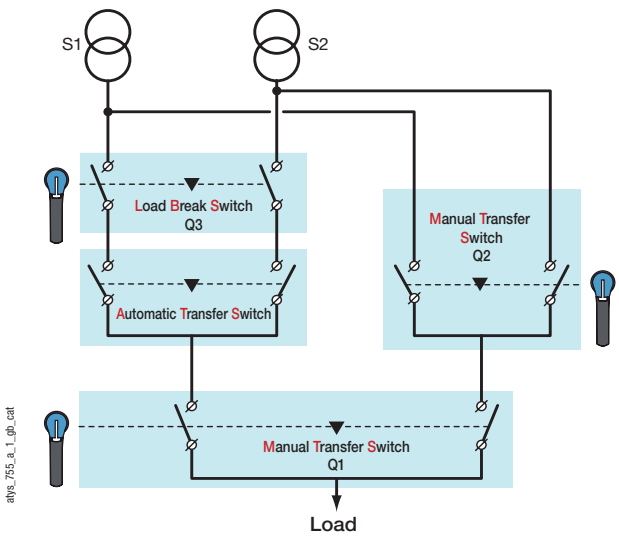
ATS from 40 to 3200 A - SINGLE LINE



- **ATS By-Pass Double Line**

It consists of 2 functions, an Automatic Transfer Switch & a Two-Way By-Pass Isolation Switch which enables the selection of the available source.

ATS from 40 to 3200 A - DOUBLE LINE

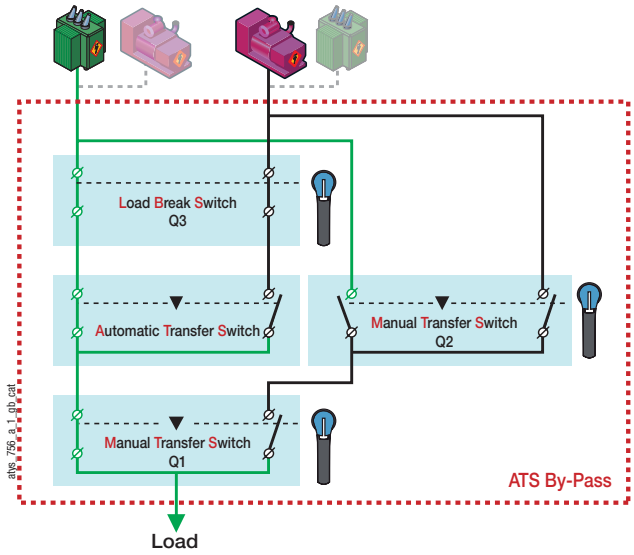


The Markets:

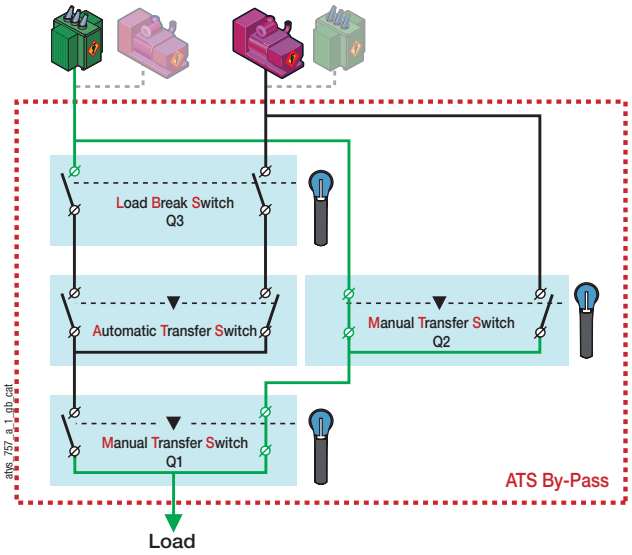
- Data centers
- Hospitals
- High Rise Buildings
- Transportation
-...

➲ Utilisation

Normal Position:
The load is supplied by Source 1 or Source 2 through the ATS; the LBS (Q3) is closed and the MTS (Q1) is on Normal position.



By-Pass Position:
The ATS is By-passed and fully isolated, the load is supplied by source 1 or Source 2 but through the MTS (Q2); (Q3) and (Q1) isolate the ATS.



Test Position:
The load is not supplied by the ATS but through the MTS (Q2) by closing (Q3). The ATS can be tested without interference to the load side.

Accessories (factory fitted)

Extension cabinet

kdrys_504_a_2_cat

Use
From 1250A to 3200A, the standard enclosed ATS By-Pass is supplied with connections to allow for Bottom/Bottom or Bottom/Top cable entry.

In order to facilitate the wiring, we propose the use of an extension cabinet, which can be mounted to the side of the standard ATS By-Pass enclosure, when utilising all other types of connections (TT/TB/BT). The extension cabinet also enables any necessary future adaptation.

Remote ATS By-Pass management

Use

As standard an RS485 JBUS/MODBUS serial communication module is provided.
ATyS Vision Monitoring Software is available for download on the User's Area of our website; www.socomec.com

In order to extend communication facilities, an optional module can be integrated in the enclosed ATS By-Pass to allow communication through Ethernet for the following functions :
· Alarm management (SNMP protocol)
· Data logging.
· Remote control.
· …

Description	Reference

(1) Add 100 mm for feet.
(2) Add 60 mm for lifting system of the equipment.

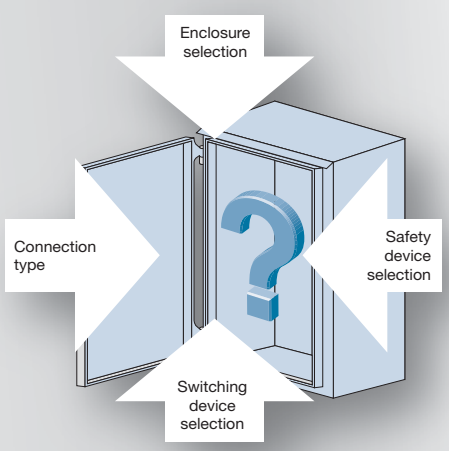
Environment

The complete equipment complies to the following requirements:
- Operating temperature: from -20 to +40°C without de-rating,
- Operating temperature: from +40 to +70°C with de-rating,
- 80% humidity non condensing at +55°C,
- 95% humidity non condensing at +40°C,
- Maximum operating altitude: 2000 meters above sea level.

Thanks to the enclosed ATS By-Pass solution, Socomec guarantees you:

- **a reliable solution**
  - Complete ATS redundancy.
  - Optimized MTTR (Mean Time To Repair).
  - Easy Inspections, Test and Maintenance.
- **a safe solution**
  - Intuitive and secured operation.
  - High electrical performance.
  - A French Builder warranty and certification (Made in France).
- **a compact solution**
  - Complete solution according to the standards.
  - New and Retrofit installation.
  - Remote control capabilities.

Customised solutions



Our services are regularly sought to create enclosures or distribution boards to specification.
You will find below a simplified description of the projects we are currently carrying out to meet the specifications of our customers.

For any request of customised products, please contact your SOCOMEC agency.

➲ Safety enclosures

Typical applications:
Enclosed load break switch for the following sites:
- Cement works
- Paper mill
- Aluminium manufacturing
- Chemical industry
- Automotive

Available on request:
- Sheet steel, insulating material, painted (coastal location) or brushed stainless steel version (food processing industry).
- Specific colours (enclosure, handle).
- Specific dimensions (to measure).
- Sloping roof and window protective cover.
- Control auxiliaries (push button, AC, etc.) wired onto the terminal.
- Locking using a specific lock (type EL11AP, etc.).
- Specific marking.
- Specific connection (BB, earthing enclosure, extended copper busbar).
- Multipolar 6-pole or 9 pole load break, side or front operation.
- Interlocking between two switches (horizontally or vertically).

➲ Presenting examples

Of the safety enclosure side operation with, Lock and double interlocking device.

Enclosure with 6-pole switch, special closure, air vent and cable gland

➲ Enclosed load break switches

Typical application:
- Motor cut-off

Available on request:
- Specific devices with or without trip breaking.
- Specific connections (BB, extended ranges, etc.).
- Special colours.
- Control auxiliaries (push button, AC, etc.) wired onto the terminal.
- Specific characteristics (DC, 690 VAC, etc.).

➲ Examples

coff_341_a_1_cat

NATO green enclosure

➲ Enclosed fuse combination switches

Typical applications:
- Battery protection
- Protection transformer
- Application HVAC

Available on request:
- Specific devices with or without trip breaking (FUSERBLOC, SIDERMAT combination unit, FUSOMAT, etc.)
- Specific characteristics DC
- Specific connecting
- Special colours
- SIRCO distributor + fuse bases for protecting the compressors on an air conditioning unit.
- Protection transformer

➲ Examples

coff_045_a_1_cat

Steel enclosure with visible breaking fuse switch and double locking

➲ Enclosed changeover switches

Typical applications:
- Generators sets
- High-rise buildings

Available on request:
- Manual changeover or motorised
- Option of integrating the customer's control units
- Specific connections
- Enclosure with changeover switch BY-PASS system

➲ Examples

atys_712_a_1_cat

Steel enclosure with changeover switches

➲ Complete integrated equipment.

Typical applications:
- Main distribution boards
- Hospitals
- Public lighting
- Dock cabinet (naval)
- Tramway enclosure (earthing)

Available on request:
The complete solution to your needs: distribution switchboards etc.

➲ Examples

appli_296_a_1_cat

Pre-cabled distribution board

UPS Division

The availability of high quality energy

Equipment and services for your high quality power supply

Teams of specialised designers, highly integrated production and a dedicated commercial network have all helped SOCOMEC to forge the most complete ranges of high quality power supplies, industrial switching and protection components, on the market.
Marketed under the SOCOMEC UPS brand, our range of products and services fulfils all your needs for a quality, continuous electrical power supply. UPS, secure power supplies, static transfer systems, harmonic equalisers, rectifiers, DC/AC converters, covering a very wide range of applications for every sector of the market.
They have gained approval from the most demanding of users: telecoms operators, the nuclear industry, naval industry.

SOCOMEC UPS: the availability of high quality energy

➲ Why an uninterruptible power system?

The distribution of electrical energy is often subject to interference, this can be short lived or for extended periods, caused by both external and internal factors. Atmospheric phenomena or phenomena determined by human action cause incalculable harm every day in terms of the alteration or complete destruction of data-bases and damage to sensitive electronic equipment.

➲ The various levels of protection

	High protection	Total protection	Excellent protection
Black-out			
Current and voltage peaks			
Interference			
Voltage variations			
Microinterruptions			
Frequency variations			
Current harmonics			
Voltage distorsion			

➲ The main phenomena and their causes

Blackout

- **Causes**
  - Storms
  - Accidental causes
  - Short circuit
  - Industrial loads
  - Overload
- **Irregular phenomenon**
  - Loss of data
  - Disk crash
  - Hardware damage
  - Interruption of operations

Electrical impurities

- **Causes**
  - Current and voltage peaks
  - Interference
  - Voltage variations
  - Microinterruptions
  - Frequency variations
  - Current harmonics
  - Voltage distortion
- **Irregular phenomenon**
  - Alteration of data
  - Operating faults
  - Premature wear of electronic parts
  - Irreparable damage to electronic components
  - Excessive current consumption.

➲ What you need to know about uninterruptible power systems

The various types of uninterruptible power systems can be divided into three distinct categories, according to their technology, the degree of protection offered and power rating.

	Offline	Line interactive with AVR	Online dual conversion
Standard IEC62040-3	VFD-SY-311	VI-SS-311	VFI-SS-111
Level of protection	High	Total	Excellent
Normal supply	From mains power	From mains power	From UPS
Emergency supply	With switching < 10 ms	With switching	Without switching
Voltage regulation	No	Yes	Yes
Frequency regulation	No	No	Yes
Power ratings used	Low power	Recommended up to 3 kVA	Medium and high power
Advantages	Low cost	Voltage stabilisation	High protection
	Reduced maintenance	Better use of the batteries	Many options available
	Suitable for small power ratings	Sinusoidal output*	Extended back-up time

** certain models.*

SOCOMEC UPS: for a high quality power supply

Innovative power solutions

Marketed under the SOCOMEC UPS trademark, our range of products and services fulfils all needs for a high quality, continuous electrical power supply. Our UPS, as well as our secure power supplies, static transfer systems, harmonic equalizers, rectifiers and DC/AC and AC/DC converters, comprise the most complete ranges in the world and cover a very wide range of applications for every sector of the market.

➲ A key requirement

High quality energy supply at any moment is vital in many fields such as telecommunications, data processing or certain industrial processes. It is even mission-critical for many medical applications. In all these sectors SOCOMEC UPS has over 40 years of experience at your disposal.

➲ Product solutions that meet requirements

Underpinned by significant R&D resources, our product offer continually evolves as a consequence of our contact with customers. Our products have the approval of some of the most stringently demanding users: Telecom companies worldwide, Ministries of Defence, nuclear industry operators… To ensure the highest availability, we provide the latest UPS technology combined either with traditional batteries or with other innovating energy storage system.

➲ Recognised expertise

Having already received the 2004 Award for Customer Service Excellence and the 2006 Award for Product Innovation from Frost & Sullivan, SOCOMEC UPS recently has once again excelled by winning the 2009 Best Practice Award for "European Energy & Power Systems Product Line Strategy". This prestigious accolade was presented in recognition of the company's ability to propose an extensive product range demonstrating the most insight into the needs and product demands of its customers.

➲ Continuing innovation

"The facts speak for themselves: first French manufacturer to offer static power supplies (1968), designer of the first UPS with PWM technology (1980), first to integrate IGBT technology into major power sources (1996), designer of the first UPS in a modular rack system (2000), first to integrate hybrid components (2001), first 200 kVA UPS with IGBT rectifier (2003), new battery charging design (2004), dynamic energy storage system (flywheel) replacing the more traditional battery-based solution (2006), first UPS true online double conversion 120-200 kVA with 96 % efficiency certified (2007), most compact STS 19" rack hot-swapable (2009), most compact UPS true online double conversion 900 kVA (2010).

➲ Always focused on customer needs

Our sales and after-sales network means we are always there for you. Our partner-customers recognise the quality of our products, our availability, our flexibility in meeting requirements and commitment.

➲ An organisation "hard-wired" for customer satisfaction

Design and production in each UPS factory is certified to ISO 9001. Together with quality service and maintenance, the UPS are your guarantee of a fail-safe electrical power supply.

➲ A controlled environmental management

With its ISO 14001 certification, SOCOMEC UPS is committed to continuous improvement of its environmental management system.

40 YEARS OF UPS SUCCESS

Our commitment to Absolute Green

For maximum availability and true cost savings

ABSOLUTE GREEN
AVAILABILITY & SAVING

➲ Availability

- The system is supplied with top-quality electrical power, minimising the risk of downtime.
- Protection is ensured by the use of on-line double conversion UPS, the most reliable technology on the market.
- The system is fully safeguarded against blackouts and any disturbance caused by the mains power supply and by distorting loads.

➲ Saving

- UPS energy costs cut by up to 40 %.
- The saving is guaranteed by the highest available efficiency performance for online double conversion UPS on the market, certified up to 96 %.
- Optimising the power supply to the system makes it possible to reduce the use of nonrecyclable materials and cut CO_2 emissions.

SOCOMEC UPS can also provide

Commissioning, Inspection & Maintenance

➲ Start-up

With the start-up of your equipment, CIM guarantees the compatibility of the UPS with your environment and checks it is compliant with the various installation standards.

➲ Performance

Recovery from alarm state, replacement of faulty parts, mechanical and electrical checks, suggestions and advice on better use of the equipment.

➲ Training

For the training of users on their UPS systems, SOCOMEC UPS organises courses held at its training centre or at the user's premises, with practical sessions involving "hands-on" use of machines.

➲ Maintenance contracts

We tailor our services around your operating constraints. This means that for each of your contracts, we provide you with adapted solutions to match your expectations.
Our Silver, Gold and Platinum solutions meet your needs by protecting and securing the electrical supply to your sensitive applications (office, automation, servers, data-processing centres, NICT, security…).

➲ Remote surveillance

Thanks to the ***T.Service*** remote monitoring service, our team of technical specialists remains continuously connected to the UPS via the telephone network or the internet.
T.Service:

- checking the parameters required to enable your equipment to function properly,
- identifying potential problems in order to establish a reliable and comprehensive diagnostic function which can provide you with a quick and effective solution,
- supplies regular reports on the status of the UPS

➲ Preventive and predictive maintenance

The ***CIM thermo*** service involves checking the components of your electrical installation using special equipment (thermal imaging cameras). In this way it is possible to perform a preventive diagnosis of breakdown risks by analysing the temperature (thermographic control) of each component.

➲ *CIM rent*

When you require high-quality uninterrupted electrical energy over a limited period (weeks or months), leasing is the most economical answer for your short-term needs. Leasing enables you to draw on the global expertise of SOCOMEC, which not only assures the availability of the UPS system, but also provides an all-in-one service to guarantee you a clean and uninterrupted energy supply.
